**SUBMITTAL TO THE BOARD OF SUPERVISORS, COUNTY OF RIVERSIDE, STATE OF CALIFORNIA**

**FORM 11: Professional Service Agreements for Laboratory Testing Services**

**DATE:** January 27, 2014

**PAGE:** Page 2 of 2

**BACKGROUND:**

**Summary**

In order to comply with State and Federal landfill regulations, the Riverside County Waste Management Department (Department) is required to perform groundwater, stormwater, leachate, gas condensate, and soil analytical testing at 21 landfills, utilizing a state-certified laboratory.

**Impact on Citizens and Businesses**

None.

**SUPPLEMENTAL:**

**Additional Fiscal Information**

The contracts are based on unit pricing for various sampling analyses. When the primary vendor is unavailable to meet scheduling requirements or service quality, testing services will be awarded to secondary vendors based on lowest cost pricing. The maximum annual award to each secondary vendor will be limited to \$25,000.

Due to the varied nature of sampling requirements, the total expenditures vary year to year but shall not exceed \$190,000. Annually required testing is anticipated to total \$130,000, however to ensure adequate allowances for new regulatory requirements that are expected to pass legislation in the near future, and to include an allowance for additional sampling/testing that is required due to known year to year regulatory variances and for unforeseen circumstances, the annual expenditure amount has been budgeted at \$190,000.

Under the contract renewal option, the total potential award is \$950,000.

**Contract History and Price Reasonableness**

In October 2013, County Purchasing on behalf of the Waste Management Department released a Request for Proposal (RFP) WMARC-227 that was e-mailed to nine vendors and advertised on the Purchasing website. Four vendors submitted proposals in response to the RFP. One vendor's proposal was deemed nonresponsive.

The Department proposes to award contracts to the three responsive vendors that submitted a proposal. This will allow the Department the flexibility to obtain laboratory testing services from three different vendors. This flexibility is crucial given strict scheduling requirements often imposed on the Department by regulatory agencies and changes in laboratory testing service quality.

The most responsive/responsible bidder is BC Laboratories, Inc. (Primary Vendor). The second and third most responsive/responsible bidders are TestAmerica Laboratories, Inc. and E.S. Babcock & Sons, Inc., respectively (Secondary Vendors). Each laboratory has performed environmental laboratory testing for a number of years and for a variety of clients, including landfills.

Each proposer was evaluated based on criteria set forth in the RFP. Each proposer's cost for services were applied to an average yearly estimated quantity of analyses to determine the best pricing, the results of which are summarized below:

<b>BC Labs</b>	<b>TestAmerica</b>	<b>Babcock</b>
\$ 129,381.00	\$ 154,915.00	\$168,524.00

Based on the analysis of the proposals submitted, it is the desire of the Department to select the lowest responsive/responsible vendor as primary: BC Laboratories, Inc.; with the remaining responsive/responsible vendors as secondary awards.

### **3. Performance Specifications**

#### **3.1.1 Time of Performance**

The CONTRACTOR shall be able to respond to COUNTY requests for sample container and sample pickups/drop offs in a timely manner. The CONTRACTOR shall transport/ship sample containers to COUNTY’s facilities within 36-hour notice. The CONTRACTOR shall transport/ship samples for CONTRACTOR analysis, within the analytical test method hold times, upon 24-hour notice of sample collection.

Analytical results shall be submitted in a timely manner and consist of all analytical results being reported to the COUNTY per each Chain of Custody event (i.e. all requested analysis on a single Chain of Custody must be sent to the COUNTY at one time under the same cover letter).

#### **3.1.2 Destroyed and/or Lost Samples**

The CONTRACTOR shall provide for monetary refunds for the cost of analysis, if procedures are performed in direct violation of instructions by COUNTY, if the CONTRACTOR destroys or loses samples, if the CONTRACTOR does not analyze the samples in a timely manner, meeting the test method holding times, or if quality control testing indicates that there is a problem with the CONTRACTOR’s test methods. Compensation for labor costs associated with the COUNTY’s re-sampling efforts (if required) shall be the responsibility of the CONTRACTOR.

#### **3.1.3 Delayed Reporting of Results**

If the analyses are not prepared within the specified timeframe, the CONTRACTOR shall provide the COUNTY with a written explanation as to the circumstances surrounding such delay and/or destruction of samples. This explanation shall be sufficient to provide COUNTY with satisfactory information for inclusion into reports prepared by COUNTY to regulatory agencies.

Failure to submit analytical results in accordance with the time schedule may result in loss of future work. Consistent delays in transmitting analytical results may cause cancellation of purchase order/agreement in accordance with Section 8 (Inspection of Service; Quality Control/Assurance) of the General Conditions in Personal/Professional Services Agreement (PSA), which precedes Appendix A.

### **4. Billing Requirements**

All invoices/billing requests shall be submitted at the end of each month for the preceding month's analytical results. An invoice shall be prepared for each sampling event/Chain of Custody. The invoice/bill request shall include the Site name, sample identification, sample date, number of analyses, unit prices and costs, and CONTRACTOR tracking number. Failure to submit invoices in the format specified may delay payment by the COUNTY.

### **5. Quality Assurance / Quality Control**

Current expectations by the COUNTY include:

- a) All testing procedures shall be completed in accordance with the most recent version listed in the U.S. EPA’s

Test Methods for Evaluating Solid Waste, Physical/Chemical Methods (SW-846) and/or Standard Methods for the Examination of Water and Wastewater (American Public Health Association, American Water Works Association, and Water Environment Federation).

- b) The CONTRACTOR logbook is to be accessible to the COUNTY during the course of the project.
- c) The analysis of a Matrix Spike/Matrix Spike Duplicate at a frequency of 1 per 20 samples of similar matrix.
- d) The analysis of a CONTRACTOR Control Sample with each extraction batch or 1 per 20 samples.
- e) The analysis of a Method Blank with each extraction batch or 1 per 20 samples.
- f) The analysis of a single control sample (for organics) per batch.
- g) Reporting Limits (RLs) and Method Detection Limits (MDLs) shall be derived and performed by the CONTRACTOR for each analyte, according to the requirements of the test method or the California Department of Public Health, Environmental Laboratory Accreditation Program (ELAP), whichever is more stringent. The CONTRACTOR shall adhere to the RLs and MDLs specified in the CONTRACTOR's proposal, specifically Tables H through L. Samples results less than the RL but greater than the MDL shall be "J" flagged and so noted in the CONTRACTOR report.

All work papers prepared in connection with the contractual services will remain the property of the successful bidder, however all reports rendered to the COUNTY are the exclusive property of the COUNTY and subject to its use and control.

The CONTRACTOR shall submit analytical results to the COUNTY in the formats specified below.

## **6. Reporting Requirements/Format of Data**

### **6.1.1 Hard Copies**

Analytical results shall be certified (a cover letter signed by the CONTRACTOR director stating that the data meets state certification standards). The cover letter should also state what date the digital data was sent via electronic mail.

All data deliverables, with the exception of the raw data requirement, are required to comply with EPA Region IX deliverables, which is equivalent to Exhibit C, Data Deliverables Summary Table. All analytical reports shall be submitted electronically as PDF report, which is formatted easily to read and includes, at a minimum, the following:

#### **6.1.1.1 Case Narrative**

Sample Description Summary  
Summary of Anomalies or Nonconformance

#### **6.1.1.2 Data Summary**

Method Detection Limit

RLs and MDLs shall be specified along with the results of the sample analysis.

**6.1.1.3 Quality Assurance Summary**

- Matrix Spike/Matrix Spike Duplicate Summary

All QA/QC data shall be reported, along with the sample results to which it applies, including the method, equipment, and analytical detection limits, the recovery rates, an explanation for any recovery rate that is less than 80 percent (a requirement of the California Regional Water Quality Control Board - Colorado River Region), the results of equipment and method blanks, the results of spiked and surrogate samples, the frequency of quality control analysis, and the name of the person(s) performing the analyses. Sample results shall be reported unadjusted for blank results or spike recovery. The CONTRACTOR shall notify the COUNTY immediately, via telephone, if the sample analysis fails the requisite QA/QC criteria. In cases where contaminants are detected in QA/QC samples (i.e. field, trip, or method blanks), the accompanying sample results shall be appropriately flagged.

**6.1.1.4 Chain of Custody Documentation**

The report shall include all necessary chain of custody documentation.

**6.1.1.5 Additional Parameters**

When additional monitoring parameters are reported (either through more advanced analysis techniques or improved equipment) for a monitoring event, the selected CONTRACTOR shall advise the COUNTY in writing as to the revised methodology, the additional parameter, the corresponding CAS number and any other applicable changes.

**6.1.1.6 "Unknown Peak" reporting**

Quantitation shall be an estimation of the concentration using the nearest internal standard as per EPA protocol and assuming a response factor (RF) for TIC of "1". The report shall indicate that the value is an estimate and identify which internal standard was used for the estimation. All costs of identifying or tentatively identifying and quantifying any unknown analytes shall be born by the CONTRACTOR and shall be included in the unit rates proposed by the CONTRACTOR.

**6.1.2 Digital (PC Compatible) Copies**

In addition to the PDF copies listed above, all data must be submitted in an ASCII Tab Delimited format in the categories/fields and order as shown in Exhibit D. Also, since all of the COUNTY's data will be linked by "CAS numbers," it is imperative that the CONTRACTOR lists ALL parameters with the correct CAS number, as shown on Exhibit B. TICs must have a "Y" in the last column and must have a CAS number listed in the third column, as shown on Exhibit D.

Digital data shall be submitted to the COUNTY, via electronic mail, within the amount of time specified in the CONTRACTOR's proposal after receipt of samples. If the data is not received by the COUNTY within the specified timeframe, provisions for compensation to the COUNTY will be provided for (see section of the Performance Specifications). All digitally transmitted data shall contain the selected CONTRACTOR's State Certification Number and Lab Number in the digital file.

**6.1.3 GeoTracker Electronic Deliverable Format (EDF)**

The laboratory shall be solely responsible for uploading all requisite laboratory information to the GeoTracker website, in the format and manner specified by the State Water Sources Control Board and/or local Regional Water Quality Control Board. The bidders shall anticipate that all groundwater, leachate, gas condensate and soil samples analyzed will require an EDF upload to GeoTracker. The COUNTY will specify on the chain of custody whether an EDF submittal is required. Stormwater sample reports will not require an EDF submittal. The laboratory shall notify the COUNTY upon successful upload of EDF submittals. Please refer to the State Water Resources Control Board website if additional information is needed regarding EDF submittals:

A list of monitoring parameters the COUNTY is required to analyze for Groundwater Detection Monitoring Santa Ana, San Diego, and Colorado Regional Water Quality Control Boards.” In addition, for each groundwater sample set, the COUNTY analyzes each travel blank, at a minimum, for EPA 8260B constituents. Provisions for quarterly and semi-annual analytical services are therefore required.

##### 2.1.1.1 Constituents of Concern (COC) Monitoring

In addition to the previously mentioned quarterly and semi-annual analyses, the COUNTY is required to perform a laboratory analysis for Constituents of Concern (COCs) once every five years, when entering an Evaluation Monitoring Plan (EMP), for newly installed wells, or as required by the RWQCBs. ### **3. Performance Specifications**

#### **3.1.1 Time of Performance**

The CONTRACTOR shall be able to respond to COUNTY requests for sample container and sample pickups/drop offs in a timely manner. The CONTRACTOR shall transport/ship sample containers to COUNTY’s facilities within 36-hour notice. The CONTRACTOR shall transport/ship samples for CONTRACTOR analysis, within the analytical test method hold times, upon 24-hour notice of sample collection.

Analytical results shall be submitted in a timely manner and consist of all analytical results being reported to the COUNTY per each Chain of Custody event (i.e. all requested analysis on a single Chain of Custody must be sent to the COUNTY at one time under the same cover letter).

#### **3.1.2 Destroyed and/or Lost Samples**

The CONTRACTOR shall provide for monetary refunds for the cost of analysis, if procedures are performed in direct violation of instructions by COUNTY, if the CONTRACTOR destroys or loses samples, if the CONTRACTOR does not analyze the samples in a timely manner, meeting the test method holding times, or if quality control testing indicates that there is a problem with the CONTRACTOR’s test methods. Compensation for labor costs associated with the COUNTY’s re-sampling efforts (if required) shall be the responsibility of the CONTRACTOR.

#### **3.1.3 Delayed Reporting of Results**

If the analyses are not prepared within the specified timeframe, the CONTRACTOR shall provide the COUNTY with a written explanation as to the circumstances surrounding such delay and/or destruction of samples. This explanation shall be sufficient to provide COUNTY with satisfactory information for inclusion into reports prepared by COUNTY to regulatory agencies.

Failure to submit analytical results in accordance with the time schedule may result in loss of future work. Consistent delays in transmitting analytical results may cause cancellation of purchase order/agreement in accordance with Section 8 (Inspection of Service; Quality Control/Assurance) of the General Conditions in Personal/Professional Services Agreement (PSA), which precedes Appendix A.

### **4. Billing Requirements**

All invoices/billing requests shall be submitted at the end of each month for the preceding month's analytical results. An invoice shall be prepared for each sampling event/Chain of Custody. The invoice/bill request shall include the Site name, sample identification, sample date, number of analyses, unit prices and costs, and CONTRACTOR tracking number. Failure to submit invoices in the format specified may delay payment by the COUNTY.

### **5. Quality Assurance / Quality Control**

Current expectations by the COUNTY include:

- a) All testing procedures shall be completed in accordance with the most recent version listed in the U.S. EPA’s

Test Methods for Evaluating Solid Waste, Physical/Chemical Methods (SW-846) and/or Standard Methods for the Examination of Water and Wastewater (American Public Health Association, American Water Works Association, and Water Environment Federation).

- b) The CONTRACTOR logbook is to be accessible to the COUNTY during the course of the project.
- c) The analysis of a Matrix Spike/Matrix Spike Duplicate at a frequency of 1 per 20 samples of similar matrix.
- d) The analysis of a CONTRACTOR Control Sample with each extraction batch or 1 per 20 samples.
- e) The analysis of a Method Blank with each extraction batch or 1 per 20 samples.
- f) The analysis of a single control sample (for organics) per batch.
- g) Reporting Limits (RLs) and Method Detection Limits (MDLs) shall be derived and performed by the CONTRACTOR for each analyte, according to the requirements of the test method or the California Department of Public Health, Environmental Laboratory Accreditation Program (ELAP), whichever is more stringent. The CONTRACTOR shall adhere to the RLs and MDLs specified in the CONTRACTOR's proposal, specifically Tables H through L. Samples results less than the RL but greater than the MDL shall be "J" flagged and so noted in the CONTRACTOR report.

All work papers prepared in connection with the contractual services will remain the property of the successful bidder, however all reports rendered to the COUNTY are the exclusive property of the COUNTY and subject to its use and control.

The CONTRACTOR shall submit analytical results to the COUNTY in the formats specified below.

## **6. Reporting Requirements/Format of Data**

### **6.1.1 Hard Copies**

Analytical results shall be certified (a cover letter signed by the CONTRACTOR director stating that the data meets state certification standards). The cover letter should also state what date the digital data was sent via electronic mail.

All data deliverables, with the exception of the raw data requirement, are required to comply with EPA Region IX deliverables, which is equivalent to Exhibit C, Data Deliverables Summary Table. All analytical reports shall be submitted electronically as PDF report, which is formatted easily to read and includes, at a minimum, the following:

#### **6.1.1.1 Case Narrative**

All QA/QC data shall be reported, along with the sample results to which it applies, including the method, equipment, and analytical detection limits, the recovery rates, an explanation for any recovery rate that is less than 80 percent (a requirement of the California Regional Water Quality Control Board - Colorado River Region), the results of equipment and method blanks, the results of spiked and surrogate samples, the frequency of quality control analysis, and the name of the person(s) performing the analyses. Sample results shall be reported unadjusted for blank results or spike recovery. The CONTRACTOR shall notify the COUNTY immediately, via telephone, if the sample analysis fails the requisite QA/QC criteria. In cases where contaminants are detected in QA/QC samples (i.e. field, trip, or method blanks), the accompanying sample results shall be appropriately flagged.

#### 6.1.1.4 Chain of Custody Documentation

The report shall include all necessary chain of custody documentation.

#### 6.1.1.5 Additional Parameters

When additional monitoring parameters are reported (either through more advanced analysis techniques or improved equipment) for a monitoring event, the selected CONTRACTOR shall advise the COUNTY in writing as to the revised methodology, the additional parameter, the corresponding CAS number and any other applicable changes.

#### 6.1.1.6 "Unknown Peak" reporting

For the volatile and semi-volatile GC/MS methods, the ten and twenty, respectively, largest non-target analyte peaks whose area count exceeds 10 percent of the nearest internal standard will be termed "Tentatively Identified Compounds" (TICs). The identification of TICs shall be made per SW-846 guidelines. Quantitation shall be an estimation of the concentration using the nearest internal standard as per EPA protocol and assuming a response factor (RF) for TIC of "1". The report shall indicate that the value is an estimate and identify which internal standard was used for the estimation. All costs of identifying or tentatively identifying and quantifying any unknown analytes shall be born by the CONTRACTOR and shall be included in the unit rates proposed by the CONTRACTOR.

#### 6.1.2 Digital (PC Compatible) Copies

In addition to the PDF copies listed above, all data must be submitted in an ASCII Tab Delimited format in the categories/fields and order as shown in Exhibit D. Also, since all of the COUNTY's data will be linked by "CAS numbers," it is imperative that the CONTRACTOR lists ALL parameters with the correct CAS number, as shown on Exhibit B. TICs must have a "Y" in the last column and must have a CAS number listed in the third column, as shown on Exhibit D.

Digital data shall be submitted to the COUNTY, via electronic mail, within the amount of time specified in the CONTRACTOR's proposal after receipt of samples. If the data is not received by the COUNTY within the specified timeframe, provisions for compensation to the COUNTY will be provided for (see section of the Performance Specifications). All digitally transmitted data shall contain the selected CONTRACTOR's State Certification Number and Lab Number in the digital file.

**6.1.3 GeoTracker Electronic Deliverable Format (EDF)**

In addition to the PDF copies and digital format specified above, all applicable data must be submitted in State Water Resources Control Board GeoTracker Electronic Deliverable Format (EDF). The laboratory shall be solely responsible for uploading all requisite laboratory information to the GeoTracker website, in the format and manner specified by the State Water Sources Control Board and/or local Regional Water Quality Control Board. The bidders shall anticipate that all groundwater, leachate, gas condensate and soil samples analyzed will require an EDF upload to GeoTracker. The COUNTY will specify on the chain of custody whether an EDF submittal is required. Stormwater sample reports will not require an EDF submittal. The laboratory shall notify the COUNTY upon successful upload of EDF submittals. Please refer to the State Water Resources Control Board website if additional information is needed regarding EDF submittals:
