extent feasible. If project timing requires that vegetation clearing activities occur during the nesting season for birds (February 1 to August 31), a pre-construction survey for nesting birds should be conducted within three days prior to commencement of construction by a qualified Biologist. If nests are found, a protective buffer will be established around each active nest. The buffer size will be determined by a qualified Biologist based on the location of the nest and sensitivity of species to disturbance.

60.EPD. 2 - RAPTOR NESTING SURVEY

RECOMMND

If construction commences during the nesting raptor season (February 1 to June 30), a pre-construction survey for active raptor nests will be conducted within three days prior to commencement of construction to ensure that no raptors are nesting on the project site. If any nests are observed, a protective buffer will be established around each active nest. The buffer size will be determined by a qualified Biologist based on the location of the nest and the sensitivity of the species to disturbance.

60.EPD. 3 - BADGER AND KIT FOX DENS

RECOMMND

A qualified Biologist shall perform pre-construction surveys for badger and kit fox dens on the project site, including areas within 100 feet of all project facilities, utility corridors, and access roads. Surveys may be concurrent with burrowing owl surveys. If dens are detected, each den will be classified as inactive, potentially active, or definitely active. Inactive kit fox and badger dens and burrows that would be directly impacted by construction activities shall be excavated by hand and backfilled to prevent reuse by badgers or kit foxes. Potentially and definitely active dens that would be directly impacted by construction activities will be monitored by a qualified Biologist for three consecutive nights using a tracking medium (such as diatomaceous earth or fire clay) and/or game/infrared camera stations at the entrance. If no tracks are observed in the tracking medium or no photos of the target species are captured after three nights, the den will be excavated and backfilled by hand. If tracks are observed, and especially if high or low ambient temperatures could potentially result in harm to kit fox or badger from burrow exclusion, various passive

After verification that the den is unoccupied, it will then be excavated and backfilled by hand to ensure that no badgers or kit foxes are trapped in the den. In the event that passive relocation techniques fail for badgers or kit foxes, the Biologist will contact CDFW to explore other relocation options, which may include trapping.

USE - CNST RSTRTN PLN SOLAR(1)

RECOMMND

Prior to Building permit issuance, a Construction Restoration Plan must be prepared by the applicant and approved by the Planning Department. The plan shall include a monitoring and compliance plan that establishes the monitoring requirements and thresholds for acceptable performance. The plan shall include at minimum, the following elements:

1.The Applicant shall reduce visual impacts during construction by clearly delineating construction boundaries and minimizing areas of surface disturbance; preserving existing, native vegetation to the extent feasible; utilizing undulating surface-disturbance edges; stripping, salvaging, and replacing topsoil; using contoured grading; controlling erosion; using dust suppression techniques; and restoring exposed soils to their original contour and vegetation.

2.Visual impact mitigation objectives and activities shall be discussed with equipment operators before construction activities begin.

3.Existing rocks, vegetation, and drainage patterns shall be preserved to the extent feasible.

4.Brush-beating or mowing or using protective surface matting rather than removing vegetation shall be employed where feasible.

5.Slash from vegetation removal shall be mulched and spread to cover fresh soil disturbances as part of the re-vegetation plan. Slash piles shall not be left in sensitive viewing areas.

6.The visual color contrast of graveled surfaces shall be reduced with approved color treatment practices.

7. No paint or permanent discoloring agents shall be applied to rocks or vegetation to indicate surveyor construction activity limits.

8.All stakes and flagging shall be removed from the construction area and disposed of in an approved facility.

9.Visual design elements to be integrated into construction plans, details, shop drawings and specifications must at a

a.Vegetation and ground disturbance associated with access road construction, gen-tie and distribution line installations, and the perimeter access road shall be minimized and take advantage of existing clearings wherever feasible.

b.Along all off-site access roads, all off-site gen-tie and distribution line corridors, and all internal access roads 16 feet or wider, graveled surfaces, areas to be permanently cleared of vegetation, and (if applicable) cut slopes shall be treated with rock stains or other color treatment appropriate with the surrounding landscape.

c.Openings in vegetation for facilities, structures, roads, and gen-tie line monopoles (and/or H-frames), shall be feathered and shaped to repeat the size, shape, and characteristics of naturally occurring openings.

d.A form of color treatment shall be used to reduce visual contrast between the backs or non-energy gathering side of the solar panels and the landscape setting. Since not all of the panels are visible outside the project footprint, the exact location or color treatment method that will be required shall be determined prior to installation.

e.Security fencing shall be coated with black poly-vinyl or other visual contrast reducing color.

f.Materials, coatings, or paints having little or no reflectivity shall be used whenever possible.

g.Grouped structures, including the water tanks and prefabricated buildings, shall be painted the same color to reduce visual complexity and color contrast.

h.The gen-tie line and the distribution line shall utilize non-specular conductors and non-reflective coatings on insulators.

i.The choice of color treatments shall be based on the appearance at typical viewing distances and consider the entire landscape around the proposed development as it would be viewed from publically accessible locations. Appropriate colors for smooth surfaces often need to be two

80.PLANNING. 31 USE- DECOM RECLMTN PLAN SOLAR RECOMMND

Prior to the issuance of a building permit, a Decommissioning and Site Reclamation Plan shall be developed by the applicant and approved by the Planning Department. The plan shall require that all aboveground and near-ground structures be removed. Some structures shall be removed only to a level below the ground surface that will allow reclamation/restoration. Topsoil from all decommissioning activities shall be salvaged and reapplied during final reclamation. The plan shall include provisions for monitoring and determining compliance with the plan. The Plan shall include the following elements:

1.A preconstruction survey of existing conditions to establish the baseline that will be restored to.

2.A maintenance plan for the life of the project.

3.Soil borrow areas, cut-and-fill slopes, berms, water bars, and other disturbed areas shall be contoured to approximate naturally occurring slopes, thereby avoiding form and line contrasts with the existing landscapes. The Applicant shall contour to a rough texture (i.e., use large rocks/boulders, grade uneven surfaces, and/or vegetation mulches/debris) in order to trap seed and to discourage off-road travel, thereby reducing associated visual impacts.

4.A combination of seeding, planting of nursery stock, transplanting of local vegetation within the proposed disturbance areas, and staging of decommissioning activities enabling direct transplanting shall be considered. Where feasible, native vegetation shall be used for re-vegetating to establish a composition consistent with the form, line, color, and texture of the surrounding

5. Stockpiled topsoil shall be reapplied to disturbed areas, and the areas shall be re-vegetated by using a mix of native species selected for visual compatibility with existing vegetation, where applicable, or by using a mix of native and non-native species if necessary to ensure successful re-vegetation. Gravel and other surface treatments shall be removed or buried.

6. Rocks, brush, and vegetal debris shall be restored whenever possible to approximate pre-existing visual conditions.

80.PLANNING. 32 USE- LIGHTING PLANS SOLAR (1)

RECOMMND

Prior to the issuance of a building permit, a solar power plant lighting plan shall be prepared by the applicant, and approved by the Planning Department, that documents how lighting will be designed and installed to minimize night-sky impacts during facility construction and operations. Lighting for facilities should not exceed the minimum number of lights and brightness required for safety and security, and should not cause excessive reflected glare. Low-pressure sodium light sources should be used to reduce light pollution. Full cut-off luminaires should be used to minimize up lighting. Lights should be directed downward or toward the area to be illuminated. Light fixtures should not spill light beyond the project boundary. Lights in highly illuminated areas that are not occupied on a continuous basis should have switches, timer switches, or motion detectors so that the lights operate only when the area is occupied.

Where feasible, vehicle mounted lights should be used for night maintenance activities. Wherever feasible, consistent with safety and security, lighting should be kept off when not in use. The lighting plan should include a process for promptly addressing and mitigating complaints about potential lighting impacts.

RE: Conditional Use Plan (CUP) No. [REDACTED]
Proposal: Development of a 4.5 MW solar power plant 40 acres
APNs: 808-240-007;-010

Dear Mr. Rush:

The Riverside County Waste Management Department (RCWMD) has reviewed the proposed project located north of Belsby Avenue, south of Investor Avenue, west of Plantation Street, and east of Melon Street, in the Desert Center Area Plan. In order to mitigate the project's potential solid waste impacts and help the County comply with AB 939 (Integrated Waste Management Act) and the California Green Building Standards through diverting solid waste from landfill disposal, the RCWMD recommends that the following conditions be made a part of any Conditions of Approval for the project:

- 1. Prior to issuance of a grading and/or building permit:** A Waste Recycling Plan (WRP) shall be submitted to the Riverside County Waste Management Department for approval. At a minimum, the WRP must identify the materials (i.e., cardboard, concrete, asphalt, wood, etc.) that will be generated by construction and development, the projected amounts, the measures/methods that will be taken to recycle, reuse, and/or reduce the amount of materials, the facilities and/or haulers that will be utilized, and the targeted recycling or reduction rate. During project construction, the project site shall have, at a minimum, two (2) bins: one for waste disposal and the other for the recycling of Construction and Demolition (C&D) materials. Additional bins are encouraged to be used for further source separation of C&D recyclable materials. Accurate record keeping (receipts) for recycling of C&D recyclable materials and solid waste disposal must be kept. Arrangements can be made through the franchise hauler.
- 2. Prior to final building inspection:** Evidence (i.e., receipts or other type of verification) to demonstrate project compliance with the approved WRP shall be presented by the project proponent to the Planning Division of the Riverside County Waste Management Department. Receipts must clearly identify the amount of waste disposed and Construction and Demolition (C&D) materials recycled.
- 3. Prior to Approval of the Decommissioning and Closure Plan:** A Waste Recycling Plan (WRP) shall be submitted to the Riverside County Waste Management Department for approval. At a minimum, the WRP must identify the materials (i.e., solar panels/mirrors, cardboard, concrete, asphalt, wood, etc.) that will be generated by the decommissioning and closure of the facility, the projected amounts, the measures/methods that will be taken to recycle, reuse, and/or reduce the amount of materials, the facilities and/or haulers that will be utilized, and the

targeted recycling or reduction rate. During the decommissioning and closure, the project site shall have, at a minimum, two (2) bins: one for waste disposal and the other for the recycling of Construction and Demolition (C&D) materials. Additional bins are encouraged to be used for further source separation of C&D recyclable materials. Accurate record keeping (receipts) for recycling of C&D recyclable materials and solid waste disposal must be kept. Arrangements can be made through the franchise hauler.

Thank you for the opportunity to review this Project. Please continue to include the RCWMD in future transmittals. Please call me at (951) 486-3280 if you have any questions regarding the above comments.

Dear Ms. Harrison:

CUP 3693, Assessor Parcel Number: 808-240-007, 808-240-010, – Indigo Ranch Solar Project
08-RIV 177, PM 4.57

The California Department of Transportation reviewed the Initial Transmittal for the Indigo Ranch Project. The project proposes a 4.5 Mega Watt photovoltaic solar power plant on 40 acres. The project will be located three miles north of Interstate 10 and less than a mile northwest of State Route 177 (SR-177). The solar facility will connect to Southern California Edison's Desert Center line that traverses the site. Construction of the site will be 3 to 4 months with approximately 40 workers. There will be no full time on-site personnel after construction.

There is no mention of where access to the site will be taken. It is assumed access will be off of SR-177 and what seems to be Belsby Avenue. Our concerns with regard to State highway impacts to SR-177 primarily involve site access and possible roadway modifications. Unfortunately, the information included with this submittal is not sufficient to fully identify potential highway impacts and effective mitigation strategies. The following comments are therefore preliminary, and are offered for your consideration to address our concerns for highway impact mitigation:

Traffic:

- If access is to be off of SR-177, design and construction plans to connect an access road to SR-177 shall meet California Highway Design Manual Sections 205.4 and 405.7.
- Trips generated by the project during construction appear to be less than significant. However, there must be minimal interruption to traffic on SR-177 therefore; we recommend that signage and flaggers be utilized to minimize delays on SR-177 during construction.

Dust Control:

- Mitigation measures should be addressed for minimizing fugitive dust emissions created by construction activities and preventing all fugitive dust plumes from leaving the project site.
- Stabilize access route(s) to the project site.

Ms. Tamara Harrison
May 10, 2013
Page 2

- Water trucks or sprinkler systems should be used during clearing, grading, earth moving, and excavation, to prevent dust from leaving the site. At a minimum this would include wetting down such areas in the later morning and after work is completed for the day and whenever wind exceeds 15 mph.
- Cover loaded haul vehicles while operating on publicly maintained paved surfaces.
- Reduce non-essential earth-moving activity under high wind conditions.
- Take actions sufficient to prevent project-related trackout onto paved surfaces.

Permits:

Caltrans has the discretionary authority to issue special permits for the movement of vehicles/loads exceeding statutory limitations on the size, weight, and loading of vehicles contained in Division 15 of the California Vehicle Code. Requests for such special permits require the completion of an application for a Transportation Permit. LAND USE and PERMIT APPLICATION PROCESSING AGREEMENT
Agreement for Payment of Costs of Application Processing

TO BE COMPLETED BY APPLICANT:

This agreement is by and between the County of Riverside, hereafter "County of Riverside",
and Indigo Ranch Project, LLC hereafter "Applicant" and South Tamarisk Solar, LLC "Property Owner".

Description of application/permit use:

Indigo Ranch - a 4.5 MW solar PV generating facility

If your application is subject to Deposit-based Fee, the following applies

Section 1. Deposit-based Fees

Purpose: The Riverside County Board of Supervisors has adopted ordinances to collect "Deposit-based Fees" for the costs of reviewing certain applications for land use review and permits. The Applicant is required to deposit funds to initiate staff review of an application. The initial deposit may be supplemented by additional fees, based upon actual and projected labor costs for the permit. County departments draw against these deposited funds at the staff hourly rates adopted by the Board of Supervisors. The Applicant and Property Owner are responsible for any supplemental fees necessary to cover any costs which were not covered by the initial deposit.

Section 2. Applicant and Property Owner Responsibilities for Deposit-based Fee Applications

- A. Applicant agrees to make an initial deposit in the amount as indicated by County ordinance, at the time this Agreement is signed and submitted with a complete application to the County of Riverside. Applicant acknowledges that this is an initial deposit and additional funds may be needed to complete their case. The County of Riverside will not pay interest on deposits. Applicant understands that any delays in making a subsequent deposit from the date of written notice requesting such additional deposit by County of Riverside, may result in the stoppage of work.
- B. Within 15 days of the service by mail of the County of Riverside's written notice that the application permit deposit has been reduced to a balance of less than 20% of the initial deposit or that the deposit is otherwise insufficient to cover the expected costs to completion, the Applicant agrees to make an additional payment of an amount as determined by the County of Riverside to replenish the deposit. Please note that the processing of the application or permit may stop if the amount on deposit has been expended. The Applicant agrees to continue making such payments until the County of Riverside is reimbursed for all costs related to this application or permit. The County of Riverside is entitled to recover its costs, including attorney's fees, in collecting unpaid accounts that would have been drawn on the deposit were it not depleted.
- C. The Property Owner acknowledges that the Applicant is authorized to submit this agreement and related application(s) for land use review or permit on this property. The Property Owner also acknowledges that should the Applicant not reimburse the County of Riverside for all costs related to this application or permit, the Property Owner shall become immediately liable for these costs which shall be paid within 15 days of the service by mail of notice to said property Owner by the County.
- D. This Agreement shall only be executed by an authorized representative of the Applicant and the Property Owner. The person(s) executing this Agreement represents that he/she has the express authority to enter into this agreement on behalf of the Applicant and/or Property Owner.

- E. This Agreement is not assignable without written consent by the County of Riverside. The County of Riverside will not consent to assignment of this Agreement until all outstanding costs have been paid by Applicant.
- F. Deposit statements, requests for deposits or refunds shall be directed to Applicant at the address identified in Section 4.

Section 3. To ensure quality service, Applicant is responsible to provide one-week written notice to the County of Riverside Transportation and Land Management Agency (TLMA) Permit Assistance Centers if any of the information below changes.
