

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Source: Department of Environmental Health Review

Findings of Fact:

a-b) The project is not proposing any construction at this time. However, the proposed project will change the General Plan designation for the site, which could eventually lead to a higher level of development on the property. The homes in project site are currently using septic systems. Specific permitting is required prior to the use of any septic system. The proposed increase in density would permit lot sizes that have traditionally been accepted by the County and the Regional Water Quality Control Board to permit septic systems. However, the RWQCB has recently been re-evaluating the minimum lot size that would permit septic. The proposed project might be required to connect to and construct a sewer system which could result in potential impacts. At this stage, the specific size and need of sewer infrastructure to the area would be too speculative to analyze. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

47. Solid Waste

a) Is the project served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?

b) Does the project comply with federal, state, and local statutes and regulations related to solid wastes including the CIWMP (County Integrated Waste Management Plan)?

Source: Riverside County General Plan, Riverside County Waste Management District correspondence

Findings of Fact:

a-b) The project is not proposing any construction at this time. However, the proposed project will change the General Plan designation for the site, which could eventually lead to a higher level of development on the property. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory?

Source: Staff review, Project Application Materials

Findings of Fact: Implementation of the proposed project would not substantially degrade the quality of the environment, substantially reduce the habitat of fish or wildlife species, cause a fish or wildlife populations to drop below self-sustaining levels, threaten to eliminate a plant or animal community, or reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory.

51. Does the project have impacts which are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, other current projects and probable future projects)?

Source: Staff review, Project Application Materials

Findings of Fact: The project does not have impacts which are individually limited, but cumulatively considerable. The proposal will increase the density of the area, which could potentially impact CEQA study areas cumulatively. At this stage, the specific level of changes is not known, as there is no construction proposed with this project. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts.

52. Does the project have environmental effects that will cause substantial adverse effects on human beings, either directly or indirectly?

Source: Staff review, project application

Findings of Fact: The proposed project would not result in environmental effects which would cause substantial adverse effects on human beings, either directly or indirectly.

VI. EARLIER ANALYSES

Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration as per California Code of Regulations, Section 15063 (c) (3) (D).

Location Where Earlier Analyses, if used, are available for review:

RIVERSIDE COUNTY
PLANNING DEPARTMENT

**PLANNING COMMISSION
MINUTE ORDER
AUGUST 20, 2014**

I. AGENDA ITEM 2.1

GENERAL PLAN AMENDMENT NO. 925 – Adopt a Mitigated Negative Declaration - Applicant: Lubec Properties, LLC - Third/Third Supervisorial District - Location: Northerly of Pat Road, southerly of Scott Road, easterly of Leon Road and westerly of Pourroy. (Legislative)

II. PROJECT DESCRIPTION:

The General Plan Amendment proposes to amend the General Plan Foundation Component of the subject site from Rural to Community Development and the General Plan Land Use designation Rural Residential (RUR:RR) (5 Acre Minimum Lot Size) to Low Density Residential (CD:LDR) (1/2 Acre Minimum Lot Size). Continued from June 18, 2014.

III. MEETING SUMMARY:

The following staff presented the subject proposal:

Project Planner: Matt Straite at (951) 955-8631 or email mstraite@rctlma.org.

Spoke in favor of the proposed project:

- Dave Jeffers, Representative
- Andy Domenigoni, Neighbor

Spoke in opposition of the proposed project:

- Dennis Tuffin, Neighbor, 34155 Winchester Rd., Winchester 92596 (951) 897-5713
- Grant Becklund, Neighbor, 30911 Garbani Rd., Winchester 92596 (951) 288-0601

IV. CONTROVERSIAL ISSUES:

None

V. PLANNING COMMISSION ACTION:

PUBLIC HEARING IS **CLOSED**

Motion by Commissioner Petty, 2nd by Commissioner Sloman

A vote of 5-0

APPROVED PLANNING COMMISSION RESOLUTION NO. 2014-03; and,

RECOMMENDS TO THE BOARD OF SUPERVISORS TAKE THE FOLLOWING ACTIONS:

- **ADOPTION OF A MITIGATED NEGATIVE DECLARATION; and,**
- **APPROVAL OF GENERAL PLAN AMENDMENT NO. 925** as modified at hearing and subject to the adoption of the resolution.

CD The entire discussion of this agenda item can be found on CD. For a copy of the CD, please contact Mary Stark, TLMA Commission Secretary, at (951) 955-7436 or email at mcstark@rctlma.org.

RIVERSIDE COUNTY PLANNING DEPARTMENT

Memorandum

To: Planning Commission

From: Matt Straite, project planner

RE: Additional Information for Agenda Item No. 2.1- GPA925

Additional Information

The following additional letters (attached) were received since the staff report was published-

In opposition

- The Endangered Habitats League has requested that their July 10, 2014 letter be resubmitted to the Commission for consideration.
 - Planning responses were previously included in the July 16th Memo to the Planning Commission.
- City of Menifee 7-16-14
 - The letter indicates that the property near the site in the City of Menifee are designated for 2 ½ acre lots and that the community in this area has consistently voiced their opposition to change. However, if the community is defined as the area bound by Highway 79, the hills to the north and south, and the City limits, then most of the community is a party to the application, and thus desiring the change. The letter also argues that the general Plan encourages protection of rural communities, which is true. However, this community has voiced a desire for change, and the General Plan allows for change.
 - The City letter also explains that the topography is not suited in some areas to ½ acre lots. The lot design of future subdivisions could take topography into account and create ½ acre lots in these areas even with the current topography.
 - The City letter explains that the MSHCVP speaks to the conservation of rural areas. The project went through the HANS process and was determined to be consistent with the MSHCP by the Environmental Programs Division of Planning.
 - The City letter inquired about the projects consistency with General Plan Policy SWAP 23.5, requiring conservation of certain species. Implementation of this policy will be administered at the project level, with an implementing use or subdivision case when details such as areas of disturbance are more clear. At this stage it is too speculative to determine specific locations that should or should not be a specific Land Use. Conservation can be achieved in any land use designation.
- Mr. Victor Cantu email dated 7-27-14
 - Mr Cantu is the owner of 472-090-008 or 31650 Scenic Hill Drive. His email indicates that he no longer wishes to be a party to the application.

RE: Item 3.1, GPA 903; Item 3.4, GPA 945D; Item 3.5, GPA 925 (July 16, 2014)

Dear Chair and Commission Members:

The Endangered Habitats League (EHL) appreciates the opportunity to submit written testimony.

Item 3.1, GPA 903

With the furnishing of information on MSHCP consistency, EHL now has no position on this proposal for commercial development but notes that development within municipal spheres of influence should generally be deferred to an orderly annexation process.

Item 3.4, GPA 945D

With the modification of this proposal and the apparent addressing of staff's initial concerns, EHL now has no position.

Item 3.5 GPA 925 - *OPPOSITION*

This 203-acre proposal is part of a complex of parcels that now form a Rural Separator. Urban conversion is being recommended despite the absence of an absorption study showing that any additional urban land is actually needed. At its heart, this proposal is piecemeal parcel-by-parcel sprawl, without even the veneer of a community-focused specific plan. It is wholly automobile dependent and bereft of merit from a "smart growth" perspective. Because the property is within the sphere of influence of the City of Murrieta, any urbanization should occur via orderly annexation.

The proposed General Plan findings for the project are either bogus or simply disheartening. Regarding consistency with the Riverside County Vision, the staff report states, "The General Plan envisioned the area as rural." By definition then, conversion

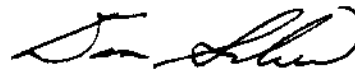

from the Rural Foundation to the Community Foundation is inconsistent with the rural vision. One half-acre lots constitute *suburban* development.

The second finding regards new circumstances. How the preservation of nearby open space justifies the creation of development is unclear. And the approval of another piecemeal development project nearby (SP 380) might just as well justify the creation of a strong boundary for the remaining rural separator via denial this request. If the justification for new development is simply "sprawl begets sprawl" then Riverside County has not improved its planning at all over the past decades.

EHL appreciates the inclusion in the hearing packet of the MSHCP HANS documentation as well as the setting aside of land during project design for Criteria Cell compliance. We understand that site-specific surveys will be undertaken at later stages of project review, as allowed by County Resolution 2013-111. The applicant and any future owners or developers should understand that changes in project design may be necessary upon completion of these various surveys in order to comply with the MSHCP.

Thank you for your consideration.

Yours truly,

RE: General Plan Amendment No. 925

Dear Mr. Straite,

The Community Development Department has become aware of General Plan Amendment No. 925 through Planning Commission Agenda postings. The Community Development Department is concerned with the general plan amendment request due to incompatibility with existing rural residential uses located to the west of the project site in the City of Menifee. The general plan amendment would allow for the development of half-acre lots. The existing rural residential lots to the west of the project site within the City of Menifee are designated for two acre minimum lot sizes and properties surrounding the site within the County of Riverside are predominately designated for five acre minimum lot sizes. These residential uses comprise a well established rural area of our community which has consistently voiced the desire to remain rural and maintain large lot sizes. The existing land use designation of the project site, Rural: Rural Residential – 5 acre minimum is compatible and consistent with the existing properties surrounding the site and within our City. The Riverside County General Plan encourages protection of existing rural communities, such as the area encompassing the project site.

In addition, the existing general plan land use of Rural Residential seems appropriate due to the site's topography. There is steep terrain on several of the parcels included in the amendment. The Rural Residential land use designation helps to minimize development of those hillsides because only one home is allowed for every five (5) acres. The Low Density Residential land use designation would allow one dwelling unit for every ½ acre. In addition, the County does not have an ordinance for Hillside Development Standards, so the larger lot sizes required under the current land use designation helps to reduce impacts to scenic vistas and hillsides.

The majority of the properties included in the General Plan Amendment proposal are within Multi-Species Habitat Conservation Plan (MSHCP) Criteria Cells and there are MSHCP conserved properties adjacent to the site. The Riverside County's General Plan states that the Rural areas are valuable in providing important wildlife habitat and habitat linkages. The general plan amendment to allow more density in this area could negatively affect the implementation of the MSHCP.

The project site is located within the Southwest Area Plan. The Southwest Area Plan, contains policy SWAP 23.5, requiring conservation of a large block of habitat containing clay soils east of Interstate 215 and south of Scott Road for the Quino checkerspot butterfly and other narrow endemic species such as Munz's onion, California Orcutt grass and spreading navarretia. How will the proposed amendment be consistent with this policy?

The City of Menifee's Community Development Department is opposed to any project that would result in the development of an incompatible land use adjacent to the existing rural residential properties. In our opinion, the approval of the proposed amendment would not be consistent with the Riverside County General Plan or the Multi-Species Habitat Conservation Plan.

Thank you again for the opportunity to provide comments. We formally request to receive any hearing notice regarding this project. Notices can be sent to my attention at 29714 Haun Road, Menifee, CA 92586.

Sincerely,

Charles LaClaire
Interim Community Development Director

RIVERSIDE COUNTY **PLANNING DEPARTMENT**

MEMO

To: Planning Commission

From: Matt Straite, project planner

RE: ADDITIONAL INFORMATION FOR AGENDA ITEM 3.3- GPA925

Additional Information

The following additional letters have been received since the staff report was published-

In support

- Attyah 5/20/14 (applicant)
- Cavananugh 5/24/14 (applicant)
- Belcuore 6/2/14 (applicant)
- Ladd 6/4/14- owns 40 acres near the project site
- Poliquin 6/6/14 (applicant)
- Lee 6/9/14 (applicant)
- Davis 6/10/14 (applicant)
- Le 6/14/14 (applicant)

In opposition

- Stevens, Sorum, and Romberger 6-13-14
 - The letter does not contain any project specific questions, it is more concerned with the political representation of the people in the county process. The letter suggests that the General Plan Land Use designations should not change. This requires no response from Planning.
- Endangered Habitats League 6-18-14
 - This letter suggests that an absorption study be done. The letter also suggests that the project is automobile dependent and not smart growth. The letter continues by suggesting that sprawl development is justification for more sprawl development. The project was bordered on the south by higher density development. To the north, the site is bound by topography and conservation cells that acts as a natural barrier. Previously Highway 79 acted as a barrier between rural property on the west and urban development on the east. Once urban development was approved on the west side of Highway 79 (SP380) the previous natural borders that regulated development have changed. A 'spot' change to a higher density Land Use designation would not have made sense in this rural area; however, with the nature of development changing (approval of SP380) and with bulk of property

Riverside Office · 4080 Lemon Street, 12th Floor
P.O. Box 1409, Riverside, California 92502-1409
(951) 955-3200 · Fax (951) 955-1811

(760) 863-8277 · Fax (760) 863-7555

owners in the rural area requesting a large scale change at the same time (over 200 acres), a slight increase in density, that maintains the rural character, can be supported in the opinion of staff. Staff did not consider half acre development sprawl development. The ½ acre lots will maintain character and help transmission the area from the urban uses surrounding the site to the south and east to the open spaces to the west.

Additional Findings and Analysis

Because the proposed project is changing from one foundation to another, certain findings are required. The foundation findings are included in the staff report. However, because the Land Use designation itself is also changing (from Rural Residential to Low Density Residential) findings are required for that change as well. The five required findings for the Land Use change are:

- a. The proposed change does not involve a change in or conflict with:
 - (1) The Riverside County Vision.
 - (2) Any General Plan Principal.
- b. The proposed change does not involve a change in or conflict with any Foundation Component Designation in the General Plan.
- c. The proposed amendment would either contribute to the achievement of the purposes of the General Plan or, at a minimum would not be detrimental to them.
- d. The change would not create an internal inconsistency among the elements of the General Plan.
- e. That there are new conditions or special circumstances that were disclosed during the review process that were unanticipated in preparing the General Plan and subsequently justify modifying the General Plan.

Two of these were addressed in the staff report: a(1) and e. The three additional required for the designation change are analyzed here:

A(2): The General Plan allows for changes to the Land Use Designations. The proposed change is consistent with the principals of the General Plan contained in Appendix B of the General Plan. There are 15 planning principals in the Appendix, the project is consistent with all principals that can be addressed by a General Plan change (some are County wide, others are project specific). Specifically, Principal 1,C discusses the different maturity rates of different communities. This community, in the opinion of staff, is ready for this increase in density for the many reasons outlined in this memo and in the staff report, partly demonstrated by the number of applicants/ community members. Principal 1,G discusses the efficient use of the land, and explains that higher density should be appropriate for the area. For the reasons outlined in this memo and the staff report, the density proposed by this development is appropriate at this time. Principal 2,A, discussing environmental protection, and B, discussing habitat preservation and the need for MSHCP consistency, are addressed in the MSHCP review of the project and through the CEQA document. Principal 4,A,1 discusses the need for a variety of housing options and densities, this change will promote a greater diversity on lot sizes in this area. Principal 4,A,3 and 4 discusses the need to distribute density in a rational way. This community, in the opinion of staff, is ready for this increase in density for the many reasons outlined in this memo and in the staff report. These principals explain that density should transmission between communities. This

proposed change will foster a transition. Principal 6,3 explains that in areas where rural character is clearly established, its nature is such that intensification is impractical, and its current residents/property owners strongly prefer a continued rural lifestyle, should be retained as rural in the General Plan. First, the half acre lots proposed are rural, so the character of the rural area will be retained. Second, the change proposed is for over 200 acres, and comprised of several property owners indicating their desire for the change, and thus consistency with this Principal. Principals in 8 pertain to the certainty system. Because this application was submitted in the permitted 5 year window, the project is consistent with this Principal.

B: Upon approval, the foundation will be consistent. Because this application was submitted in the permitted 5 year window, the project is consistent with the certainty principal.

C: As outlined in the consistency with the principals above, the project is consistent with the purposes of the General Plan.

D: The project would not create an internal inconsistency within the general Plan. The project was reviewed against the policies of the General Plan, and found to be consistent with them.

As such, the following findings are hereby included with the findings contained in the staff report for the project:

19. The project is consistent with the vision and principals of the General Plan.
20. The project will increase housing and density options in this area of the County.
21. The project will aid in transition between urban development and large lots to the north.
22. The MSHCP and the hills to the north of the site act as natural barriers to the area.
23. The proposed project will contribute to the achievement of the purposes of the General Plan and not create any inconsistencies.
24. Over 200 acres and all of the property owners within those 200 acres, representing a significant number of community members, desire the change proposed.

Re: GPA 925 (Planning Commission meeting date: 6/18/14)

Dear Mr. Straite:

I am a landowner/ applicant in GPA 925, scheduled for a hearing on June 18, 2014. I am writing to express my strong support for this General Plan Amendment application. The APN number of my property is 480-030-014.

I am a resident of Cape Town, South Africa. Unfortunately, I am unable to make the trip to the United States to attend the June 18th meeting. Please accept this letter as an expression of my strong support of the GPA. In addition, I have asked my brother, Paul Attyah, to represent me at the hearing if there are any questions.

My family has owned our property in Winchester for approximately 30 years. My late parents purchased it from the Pourroy/ Hansen families when my siblings and I were young children. I wanted to let the Commission know that two generations of my family have been involved in the Winchester area for a long time, and we are strongly in favor of the GPA.

Thank you for your consideration.

Sincerely,

Karen Attyah

Re: GPA 925 (Planning Commission meeting date: 6/18/14; item 3.3)

Dear Mr. Straite:

I am a landowner in GPA 925, scheduled for a hearing on June 18, 2014. I am writing to express my support of the General Plan Amendment. My APN number is 472-090-007.

For reasons of health, I am unable to drive to Riverside to attend the meeting. As such, I wanted to write to you and let you know that I am strongly in favor of the GPA.

Thank you for your consideration.

Sincerely,

Valoy Cavanarugh

RE: GPA 925

Dear Mr. Straite,

I am the owner of APNS: 480-030-003 and 480-030-004 in Winchester, CA. I am an applicant in the GPA 925. I want the Planning Commission to know in the upcoming meeting, June 18, 2014 that I support the GPA.

I am sorry but I cannot attend the meeting in person.

Sincerely,

Grace Belcuore

Re: GPA 925 - Planning Commission meeting date: 6/18/14; item 3.3

Dear Mr. Straite:

I am a landowner in Winchester with properties in the immediate vicinity of General Plan Amendment 925. As you know, a hearing is set on June 18th for this GPA application. My APN numbers are: 480030028-7, 480030022-1, 480030027-6 and 472090027-3, totaling just over 40 acres.

I am writing to express my support for GPA 925, as well as for continued development in the area.

Sincerely,

Ladd Penfold

Subject: Letter in Opposition to GPA 925 June 18, 2014 Meeting - Letter of Record

Categories: Blue Category

6-13-2014

Dear Planning Commissioners:

As Rural Residents within this area, we find it very disturbing that the Planning Commission would allow GPA 925 to go forward, as you did with GPA 1129 on April 29, 2014.

Neither GPA makes any since in this area.

All of the properties between Leon Road, Scott Road to the north, Keller Rd to the south and Briggs to the west are zoned either RR2 or RR5. As are the properties in

GPA 1129 north of Scott Road, east of Briggs and west of Leon Road zoned RR2 or larger.

We the property owners are very concerned on who is getting away with making these changes and selling us Rural Residents out. We are all very aware of the comments in the news and on you-tube on what is taking place with Developer's and many of the high power people working with them.

People were voted in because they promised to work to with the property owners. They stated they would work for the people! Where does the Planning Commission see these elected people working for the people?

Why are you allowing the higher ups overrule your Great Recommendations? This is not right! We have to ask are your jobs being threatened by these people too? That's what is being seen and talked about in the public's eyes.

Developer's don't live in the areas they are about to destroy, once they are done they leave and won't give a damn about any problems they have left behind.

We will be the ones holding the bag for any problems and costs. You know this as well as we do.

There were reasons for a General Plan. People spent hours preparing and meeting until we were "Blue in the Face" to what we wanted our area to be "Designed to conserve the Rural Nature" as there is not much of it left. This area deserves to have the same consideration that Temecula and Murrieta or any other places that have their Rural Nature that was conserved for them. Did they save their area because they became a City and the people were able to control what took place, and not the politics driving these changes?

To go from 5 acre Rural lots which the General Plan recognizes as "encouraging intensive animal keeping uses" to 1/2 acre lots which "discourages intensive animal keeping uses" is hardly compatible in this whole 3 to 5 mile area of GPA 925 being heard on June 18, 2014 and GPA 1129 that moved forward on April 29, 2014.

Even the Winchester Municipal Advisory Council Land Use Plan which was approved changed with-out the knowledge of the property owners. How do you all get away with these changes and not have any Public Hearings to advise the property owners how your taking our rights away?

We would hope the Planning Commission would have the applicant work with residents in this area and stick to the General Plan or come up with a more compatible plan that still encourages animal keeping uses that have been there for over 25 years.

Respectfully,
Rural Residents

Scot and Lora Stevens Glen & Pat Sorum Frank, Janet & Vicki Romberger

**RE: Item 3.3 (June 18, 2014): General Plan Amendment 925 –
OPPOSITION**

Dear Chair and Commission Members:

The Endangered Habitats League (EHL) opposes this project on planning grounds and urged the denial of the GPA.

This 203-acre proposal is part of a complex of parcels that now form a Rural Separator. Urban conversion is being recommended despite the absence of an absorption study showing that any additional urban land is actually needed. At its heart, this proposal is piecemeal parcel-by-parcel sprawl, without even the veneer of a community-focused specific plan. It is wholly automobile dependent and bereft of merit from a “smart growth” perspective. Because the property is within the sphere of influence of the City of Murrieta, any urbanization should occur via orderly annexation.

The proposed General Plan findings for the project are either bogus or simply disheartening. Regarding consistency with the Riverside County Vision, the staff report states, “The General Plan envisioned the area as rural.” By definition then, conversion from the Rural Foundation to the Community Foundation is inconsistent with the rural vision. One half-acre lots constitute *suburban* development.

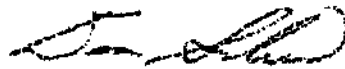

The second finding regards new circumstances. How the preservation of nearby open space justifies the creation of development is unclear. And the approval of another piecemeal development project nearby (SP 380) might just as well justify the creation of a strong boundary for the remaining rural separator via denial this request. If the justification for new development is simply “sprawl begets sprawl” then Riverside County has not improved its planning at all over the past decades.

EHL appreciates the inclusion in the hearing packet of the MSHCP HANS documentation as well as the setting aside of land during project design for Criteria Cell compliance. We understand that site-specific surveys will be undertaken at later stages of project review, as allowed by County Resolution 2013-111. The applicant and any future

owners or developers should understand that changes in project design may be necessary upon completion of these various surveys in order to comply with the MSHCP.

Thank you for your consideration.

Yours truly,

RIVERSIDE COUNTY **PLANNING DEPARTMENT**

Memorandum

To: Planning Commission

From: Matt Straite, project planner

RE: **Additional Information for Agenda Item No. 3.5- GPA925**

Additional Information

The following additional letter was received since the staff report was published-

In opposition

- Endangered Habitats League 7-10-14 (second letter submitted)
 - This letter suggests that the findings in the staff report are not accurate. The letter contends that the staff report is basing its support on the fact that the proposed ½ acre lots are still rural. EHL argues that is not that case and supports their contention by citing the change in the foundation from Rural to Community Development. The foundation is indeed changing, but the ½ lot size is still considered rural, as evidenced by the fact that the Rural Community Foundation of the General Plan features a Low Density Residential designation with a ½ acre minimum lot size.

The letter continues by contending that the second required finding is not clear. To clarify the finding, the area requesting to be converted contains natural boundaries that are explained in the finding. To the north, the site is largely bound by a hill, now preserved by the MSHCP. To the south, the site is generally bound by Medium Density Residential Specific Plans currently being built out. To the west is an open space preserve that also will not have any development potential in the future. To the east is the now approved Keller Crossing Specific Plan and other commercial developments along the newly expanded Highway 79 corridor. These natural boundaries form a community unto itself, surrounded by these natural barriers. The EHL letter argues that finding is only saying sprawl begets sprawl. The finding was attempting to point out that the approval of SP380 to the east was simply another indication of growth trends in the area; the finding was attempting to explain the pattern of development. The development to the south, and now the development to the east, in conjunction with the natural barriers to the west and north indicates that the community in question may not be best suited by 5 acre lots. In addition, the bulk of the landowners within *this* community (the area bound by the barriers outlined above) are applicants, therefore, the bulk of this community is supporting change.

RE: Item 3.1, GPA 903; Item 3.4, GPA 945D; Item 3.5, GPA 925 (July 16, 2014)

Dear Chair and Commission Members:

The Endangered Habitats League (EHL) appreciates the opportunity to submit written testimony.

Item 3.1, GPA 903

With the furnishing of information on MSHCP consistency, EHL now has no position on this proposal for commercial development but notes that development within municipal spheres of influence should generally be deferred to an orderly annexation process.

Item 3.4, GPA 945D

With the modification of this proposal and the apparent addressing of staff's initial concerns, EHL now has no position.

Item 3.5 GPA 925 - *OPPOSITION*

This 203-acre proposal is part of a complex of parcels that now form a Rural Separator. Urban conversion is being recommended despite the absence of an absorption study showing that any additional urban land is actually needed. At its heart, this proposal is piecemeal parcel-by-parcel sprawl, without even the veneer of a community-focused specific plan. It is wholly automobile dependent and bereft of merit from a "smart growth" perspective. Because the property is within the sphere of influence of the City of Murrieta, any urbanization should occur via orderly annexation.

The proposed General Plan findings for the project are either bogus or simply disheartening. Regarding consistency with the Riverside County Vision, the staff report states, "The General Plan envisioned the area as rural." By definition then, conversion

from the Rural Foundation to the Community Foundation is inconsistent with the rural vision. One half-acre lots constitute *suburban* development.

The second finding regards new circumstances. How the preservation of nearby open space justifies the creation of development is unclear. And the approval of another piecemeal development project nearby (SP 380) might just as well justify the creation of a strong boundary for the remaining rural separator via denial this request. If the justification for new development is simply "sprawl begets sprawl" then Riverside County has not improved its planning at all over the past decades.

EHL appreciates the inclusion in the hearing packet of the MSHCP HANS documentation as well as the setting aside of land during project design for Criteria Cell compliance. We understand that site-specific surveys will be undertaken at later stages of project review, as allowed by County Resolution 2013-111. The applicant and any future owners or developers should understand that changes in project design may be necessary upon completion of these various surveys in order to comply with the MSHCP.

Thank you for your consideration.

Agenda Item No.: 3.3
Area Plan: Southwest
Zoning Area: French Valley
Supervisory District: Third/Third
Project Planner: Matt Straite
Planning Commission: June 18, 2014

GENERAL PLAN AMENDMENT NO. 925
ENVIRONMENTAL ASSESSMENT NO. 41748
Applicant: Lubec Properties, LLC
Engineer/Representative: David Jeffers

COUNTY OF RIVERSIDE PLANNING DEPARTMENT STAFF REPORT

PROJECT DESCRIPTION AND LOCATION:

The applicant proposes to amend the General Plan Foundation Component and Land Use designations of the subject site from "Rural: Rural Residential" (RUR:RR) (5 acre minimum lot size) to "Community Development: Low Density Residential" (CD:LDR) (1/2 acre minimum lot size) on approximately 230.72 acres as originally applied and 202.87 as now proposed. The application was submitted during the permitted time period to request foundation changes in 2008.

The project is located northerly of Pat Road, southerly of Scott Road, easterly of Leon Road and westerly of Pourroy Road.

BACKGROUND:

The proposed General Plan Amendment was before the Planning Commission on February 3, 2010 and before the Board of Supervisors on May 18, 2011 as part of the General Plan Initiation Process (GPIP). The project was initiated by the Board. Staff supported the initiation throughout the process.

The subject site is located in the "French Valley" community within the Southwest Area Plan and is also located within the City of Murrieta's Sphere of Influence. The original application proposal included 28 parcels totaling approximately 230.72 acres. Through the processing of the application some of the property owners that were party to the application have elected to be removed from the application and are no longer proposed as part of the project. These include:

- 472-09-005 (former owner Mr. Kiziar), The new owner is not interested in the GPA.
- 472-090-022 (owner McClausland). They decided to no longer persue the change.
- 472-090-023 (former owner Reyes). The new owner is not interested in the GPA.
- 480-030-008 (former owner Davis). The new owner is not interested in the GPA.

The project now consists of 202.87 acres. Many of the parcels are adjacent to each other; however, some parcels amidst the proposal have not been included. Rural Residential can be found to the north and the east of the site and Community Development Foundation designations can be found to the south and the west of the subject site.

POTENTIAL ISSUES OF CONCERN:

Multi Species Habitat Conservation Plan Consistency.

The Project is located within Cells 5174 and 5175 under the County's Multiple Species Habitat Conservation Plan. The project has completed a Habitat Acquisition and Negotiation Strategy Review (HANS No. 2147, see attached). A total of 13.1 acres was identified for conservation focused on the northern portion of cell 5175 which represents the northern most portion of the proposed General Plan

D.M.

Amendment change. This proposed change consists of several owners. The 13.1 acres to be conserved represents part of one owner's property only.

SB-18 Tribal Consultation

The Pechanga Tribe, through State required SB-18 consultation, has requested that any implementing project within the project area contact the Pechanga Tribe while processing any required entitlements. They additionally request to participate in all future CEQA analysis.

Highway 79 Policy Area Consistency

The General Plan's Highway 79 Policy Area requires that residential development be proposed at 9% below the mid-point of the existing Land Use designation due to transportation infrastructure and capacity deficiencies. Mitigation was added to the project's CEQA document that makes the project consistent with the goals of the policy.

Additional Parcels

Staff is recommending that additional parcels be added to the project in order to promote better Land Use consistency. All of the suggested additions have been noticed of the hearing. The CEQA analysis for the project was done on a programmatic level, so the addition of three individual parcels will be consistent with the analysis in the Environmental Assessment and the conclusions of the Mitigated Negative declaration. More specifically, Staff is recommending that the following parcels also have their Land Use designation changed to Community Development: Low Density Residential (CD:LDR):

- 480-030-008- 31080 Flossie Way.
 - This site features a single family residence. This site was previously part of the application but a new owner indicated they did not wish to participate in the application any longer. Including this parcel will create a consistent designation on the east side of Leon Road.
- 480-030-020- 34130 Elliott Road.
 - This site features a single family residence. Addition of this parcel would create a consistent designation on the east side of Elliott Road.
- 472-090-009- 31400 Scenic Hills Drive.
 - This site features a single family residence. Addition of this parcel would create a consistent designation on the north side of Scenic Hills Drive.

General Plan Findings

In order to support the initiation of a proposed General Plan Amendment it must be established that the proposal satisfies certain required findings. The Administration Element of the General Plan explains that there are four categories of amendments, Technical, Entitlement/Policy, Foundation, and Agriculture. Each category has distinct required findings that must be made by the Board of Supervisors at a noticed public hearing.

General Plan Amendment No. 925 falls into the Foundation Component- Regular category, because the request to change foundations was made during the permitted 5 year (now 7 year) General Plan Review Cycle as outlined the General Plan.

The Administration Element of the General Plan explains that two findings must be made to justify an Foundation Component- Regular amendment. The two findings are:

- a. The proposed change does not involve a change in or conflict with:
 - (1) The Riverside County Vision;

(2) And that the change would not create an internal inconsistency among the elements of the General Plan.

b. New conditions or circumstances disclosed during the review process justify modifying the General Plan.

Consideration Analysis:

The first finding per the General Plan Administrative element explains that the proposed Amendment must not involve a change would not create an internal inconsistency among the elements of the General Plan.

A. The proposed change does not conflict with the Riverside County Vision, or create an inconsistency.

The General Plan envisioned the area as rural. The proposed change would allow an increase in density, but the designation proposed is still ½ acre lots which maintains the rural atmosphere. Additionally, many of the parcels that are included in the proposal and many that surround the proposed site remain vacant at this time although urbanization trends seem to be moving toward the area of the subject site. Much of the urbanization in the area is found to the south and east of the subject site, where multiple tracts and Specific Plans have been approved since 2003 which increased density. The incorporation of the City of Menifee which lies to the west of the site across Leon Road also serves as a sign of urbanization and change for the area. Keller Road divides the site into a northern and southern section. The Circulation Element of the General Plan identifies Keller Road as a Secondary Roadway, ultimately having a 100' right-of-way and improving circulation within the area. The proposed project is consistent with the vision of the General Plan for the area and the proposed change would not create an internal inconsistency among the elements of the General Plan. Staff reviewed the proposed change against all policies of the General Plan.

B. New conditions or circumstances disclosed during the review process justify modifying the General Plan.

Specific Plan 380, the Keller Crossing Specific Plan has been approved since 2003, adding 38 acres of commercial retail, 23.8 acres of commercial office, 42.4 acres of mixed use, and 15.6 acres of low density residential development adjacent to the property on the north east portion of the development. SP 380 has also changed the alignment of Keller Road and established a roadway section with four (4) travel lanes within a 100-foot right of way.

Additionally, since 2003 a significant lawsuit has been settled regarding nearby APN's 384-270-001, 392-340-028, 392-350-021 and 392-350-022 that will place over 300 acres of previously developable property into permanent conservation, over a period of time.

With the conservation of these areas identified above, and the change in land uses near the site, such as SP380, these changes justify the proposed amendment. Many other Specific Plans near the site, even with the recession, have continued to build out. While it is important to maintain a mixture of lot sizes in the area, the change from 5 acre lots to ½ acre lots would still provide a range of housing options in the area, transitioning from the higher level of density to the south, and the lower level to the north of the project site.

SUMMARY OF FINDINGS:

1. Proposed General Plan Land Use (Ex. #6): Community Development: Low Density Residential (CD:LDR)
2. Surrounding General Plan Land Use (Ex. #5): Rural: Rural Residential (RUR:RR) (5 acre minimum lot size) on the north and east, Rural: Rural Residential (RUR:RR) (5 acre minimum lot size) and Community Development: Medium Density Residential (CD:MDR) to the west, Rural: Rural Residential (RUR:RR) (5 acre minimum lot size) and Community Development: Low Density Residential (CD:LDR) to the south.
3. Existing Zoning (Ex. #2): Rural Residential (R-R)
4. Surrounding Zoning (Ex. #2): Rural Residential (R-R) and Residential Agricultural- 1 ½ Acre Minimum (R-A-1 ½) to the north, Rural Residential (R-R) and Specific Plan (SP) to the east, Rural Residential (R-R), Residential Agricultural- 5 Acre Minimum (R-A-5) and Specific Plan (SP) to the west, and Rural Residential (R-R), and One Family Dwelling (R-1) to the south.
5. Existing Land Use (Ex. #1): Vacant and single family dwellings.
6. Surrounding Land Use (Ex. #1): Vacant, single family dwellings and urban development.
7. Project Data: Total Acreage: 230.72 as applied, 202.87 as revised
8. Environmental Concerns: See attached environmental assessment

RECOMMENDATION:

APPROVAL of the **PLANNING COMMISSION RESOLUTION NO. 2014-03** recommending adoption of General Plan Amendment No. 925 to the Riverside County Board of Supervisors with the addition of the three parcels identified in the staff report;

THE PLANING DEPARTMENT RECOMMENDS THAT THE PLANNING COMMISSION RECOMMEND TO THE BOARD OF SUPERVISORS:

ADOPTION of a **MITIGATED NEGATIVE DECLARATION** for **ENVIRONMENTAL ASSESSMENT NO. 41748**, based on the findings incorporated in the initial study, and the conclusion that the project will not have a significant effect on the environment;

APPROVAL of **GENERAL PLAN AMENDMENT NO. 925**, amending the Land Use Designation for the subject property from Rural: Rural Residential (RUR:RR) (5 acre minimum lot size) to Community Development: Low Density Residential (CD:LDR) (1/2 acre minimum lot size) in accordance with the General Plan Land Use Exhibit; based on the findings and conclusions incorporated in the staff report; and, pending final adoption of the General Plan Amendment

Resolution by the Board of Supervisors, and with the addition of the three parcels identified in the staff report.

FINDINGS: The following findings are in addition to those incorporated in the summary of findings and in the attached environmental assessment, which is incorporated herein by reference.

1. The project site is designated Rural: Rural Residential (RUR:RR) (5 acre minimum lot size) on the Southwest Area Plan, the proposed designation is Community Development: Low Density Residential (CD:LDR) (1/2 acre minimum lot size).
2. The application was submitted during the permitted time period to request foundation changes in 2008.
3. Residential uses are permitted in the Community Development: Low Density Residential (CD:LDR).
4. The General Plan envisioned the area as rural. The proposed designation proposed requires a ½ acre minimum lot size which maintains the rural atmosphere of the area.
5. Many of the parcels that are included in the proposal and many that surround the proposed site remain vacant at this time although urbanization trends seem to be moving toward the area of the subject site. Much of the urbanization in the area is found to the south and east of the subject site, where multiple tracts and Specific Plans have been approved since 2003 which increased density.
6. The incorporation of the City of Menifee which lies to the west of the site across Leon Road also serves as a sign of urbanization and change for the area.
7. Keller Road divides the site into a northern and southern section. The Circulation Element of the General Plan identifies Keller Road as a Secondary Roadway, ultimately having a 100' right-of-way and improving circulation within the area.
8. Staff reviewed the proposed change against all policies of the General Plan and determined that the project is not inconsistent with the policies.
9. Specific Plan 380, the Keller Crossing Specific Plan was approved after 2003, adding 38 acres of commercial retail, 23.8 acres of commercial office, 42.4 acres of mixed use, and 15.6 acres of low density residential development adjacent to the property on the north east portion of the development. SP 380 has also changed the alignment of Keller Road and established a roadway section with four (4) travel lanes within a 100-foot right of way.
10. Since 2003, a significant lawsuit has been settled regarding nearby APN's 384-270-002, 384-270-003, 392-340-036, 392-340-037, 392-340-038, 392-350-023, 392-350-024, 392-350-025, and 392-350-026 that will place over 300 acres of previously developable property into permanent conservation, over a period of time.
11. The project site is surrounded by properties which are designated Rural: Rural Residential (RUR:RR) (5 acre minimum lot size) on the north and east, Rural: Rural Residential (RUR:RR) (5 acre minimum lot size) and Community Development: Medium Density Residential (CD:MDR) to

the west, Rural: Rural Residential (RUR:RR) (5 acre minimum lot size) and Community Development: Low Density Residential (CD:LDR) to the south.

12. The zoning for the subject site is Rural Residential (R-R).
13. The project has mitigation that requires a Change of Zone to be filled with any implementing project.
14. The project site is surrounded by properties which are zoned Rural Residential (R-R) and Residential Agricultural- 1½ Acre Minimum (R-A-1½) to the north, Rural Residential (R-R) and Specific Plan (SP) to the east, Rural Residential (R-R), Residential Agricultural- 5 Acre Minimum (R-A-5) and Specific Plan (SP) to the west, and Rural Residential (R-R), and One Family Dwelling (R-1) to the south.
15. Similar residential uses have been constructed and are operating in the project vicinity.
16. This project is [located within Criteria Area Cells 5174 and 5175 of the Western Riverside County Multiple Species Habitat Conservation Plan. A total of 13.1 acres was identified for conservation focused on the northern portion of the cell. This project fulfills those requirements. The project has completed a Habitat Acquisition and Negotiation Strategy Review (HANS No. 2147, see attached).
17. This project is within the City Sphere of Influence of the City of Murrieta.
18. Environmental Assessment No. 41748 identified the following potentially significant impacts:
 - a. Land Use
 - b. Traffic

These listed impacts will be fully mitigated by the measures indicated in the environmental assessment, conditions of approval, and attached letters. No other significant impacts were identified.

CONCLUSIONS:

1. The proposed project is in conformance with the Community Development: Low Density Residential (CD:LDR) Land Use Designation, and with all other elements of the Riverside County General Plan.
2. With mitigation, the proposed project is consistent with the zoning classification of Ordinance No. 348, and with all other applicable provisions of Ordinance No. 348.
3. The proposed project is consistent with the provisions of the Administration Element of the 2003 General Plan.
4. The proposed project is consistent with the provisions of Ordinance No 348 Section 2.1 and 2.5 relating to Foundation Component Amendments- Regular.
5. The proposed project is consistent with the vision of the General Plan for the area and the proposed change would not create an internal inconsistency among the elements of the General Plan.

6. With MSHCP conservation of nearby properties, and with the changes in land uses near the site, the changes since 2003 justify the proposed amendment.
7. The SB-18 Tribal Consultation request for consultation was completed.
8. The public's health, safety, and general welfare are protected through project design.
9. With mitigation, the proposed project is compatible with the present and future logical development of the area.
10. The proposed project will not have a significant effect on the environment.
11. The proposed project will not preclude reserve design for the Western Riverside County Multiple Species Habitat Conservation Plan (WRCMSHCP).

INFORMATIONAL ITEMS:

1. As of this writing, no letters, in support or opposition have been received.
2. The project site is not located within:
 - a. A High Fire Area;
 - b. A 100-year flood plain, an area drainage plan; or;
 - c. Stephens Kangaroo Rat Core Reserve Area.
3. The project site is located within:
 - a. The Stephens Kangaroo Rat Fee Area
 - b. The limits of a dam inundation area;
 - c. The boundaries of the Valley Wide Parks and recreation District;
 - d. The City of Murrieta sphere of influence; and,
 - e. An area of moderate liquefaction.
4. The project site is currently designated as Assessor's Parcel Numbers: (as modified): 472-090-007, 472-090-008, 472-090-010, 472-090-017, 472-090-018, 472-090-019, 472-090-020, 472-090-021, 472-090-024, 480-030-001, 480-030-002, 480-030-003, 480-030-004, 480-030-005, 480-030-006, 480-030-007, 480-030-009, 480-030-010, 480-030-011, 480-030-012, 480-030-014, 480-030-015, 480-030-019 and 480-030-021.

3 **RESOLUTION**
4 **RECOMMENDING ADOPTION OF**
5 **GENERAL PLAN AMENDMENT NO. 2014-003**
6

7 **WHEREAS**, pursuant to the provisions of Government Code Section(s) 65350/65450 et. seq.,
8 public hearings were held before the Riverside County Planning Commission in Riverside, California on
9 June 18, 2014, to consider the above-referenced matter; and,

10 **WHEREAS**, all the provisions of the California Environmental Quality Act (CEQA) and
11 Riverside County CEQA implementing procedures have been met and the environmental document
12 prepared or relied on is sufficiently detailed so that all the potentially significant effects of the project on
13 the environment and measures necessary to avoid or substantially lessen such effects have been evaluated
14 in accordance with the above-referenced Act and Procedures; and,

15 **WHEREAS**, the matter was discussed fully with testimony and documentation presented by the
16 public and affected government agencies; now, therefore,

17 **BE IT RESOLVED, FOUND, DETERMINED, AND ORDERED** by the Planning
18 Commission of the County of Riverside, in regular session assembled on June 18, 2014, that it has
19 reviewed and considered the environmental document prepared or relied on and recommends the
20 following based on the staff report and the findings and conclusions stated therein:
21

22 **ADOPTION** of the Mitigated Negative Declaration environmental document, Environmental
23 Assessment No. 41748; and
24

25 **ADOPTION** of General Plan Amendment No. 925

**COUNTY OF RIVERSIDE
ENVIRONMENTAL ASSESSMENT FORM: INITIAL STUDY**

Environmental Assessment (E.A.) Number: 41748
Project Case Type (s) and Number(s): General Plan Amendment No. 925
Lead Agency Name: County of Riverside Planning Department
Address: P.O. Box 1409, Riverside, CA 92502-1409
Contact Person: Matt Straite
Telephone Number: 951-955-8631
Applicant's/ Eng Name: Lubec Properties, LLC
Applicant's/ Eng Address: PO BOX 492403

I. PROJECT INFORMATION

A. Project Description: The General Plan Amendment proposes to amend the General Plan Foundation Component of the subject site from Rural to Community Development and to amend the land use designation of the subject site from Rural Residential (R-RR) (5 Acre Minimum Lot Size) within the Highway 79 Policy Area to Low Density Residential (CD-LDR) (1/2 Acre Minimum Lot Size). NOTE: GPA00925 was initiated by the BOS on May 4, 2010.

B. Type of Project: Site Specific ; Countywide ; Community ; Policy .

C. Total Project Area: 230.72 Acres for the original application

Residential Acres: 230.72 **Lots:** N/A **Units:** N/A **Projected No. of Residents:** N/A
Other:

D. Assessor's Parcel No(s): 472-090-005, 472-090-007, 472-090-008, 472-090-010, 472-090-017, 472-090-018, 472-090-019, 472-090-020, 472-090-021, 472-090-022, 472-090-023, 472-090-024, 480-030-001, 480-030-002, 480-030-003, 480-030-004, 480-030-005, 480-030-006, 480-030-007, 480-030-008, 480-030-009, 480-030-010, 480-030-011, 480-030-012, 480-030-014, 480-030-015, 480-030-019 and 480-030-021 were submitted with the original application. The applicants subsequently revised the application to eliminate some of the parcels; however, the analysis that follows studied the entirety of the original application.

E. Street References: The project is located northerly of Pat Road, southerly of Scott Road, easterly of Leon Road and westerly of Pourroy Road.

F. Section, Township & Range Description or reference/attach a Legal Description: Section 20 South West, Township 6 South, Range 2 West, Section 29 North West Township 6 South Range 2 West, Section 29 North East Township 6 South Range 2 West, and Section 20 South East Township 6 South Range 2 West.

G. Brief description of the existing environmental setting of the project site and its surroundings: Vacant dry farmland, single family dwellings.

II. APPLICABLE GENERAL PLAN REGULATIONS

A. General Plan Elements/Policies:

1. Land Use: The project is consistent with the provisions of the Land Use Element.

2. **Circulation:** The project is consistent with the Highway 79 policy area provisions (through mitigation), and all other policies of the Circulation Element.
 3. **Multipurpose Open Space:** The project is consistent with the policies of the Open Space Element.
 4. **Safety:** The project is consistent with the policies of the Safety Element.
 5. **Noise:** The project is consistent with the policies of the Noise Element.
 6. **Housing:** The project is consistent with the policies of the Housing Element.
 7. **Air Quality:** The project is consistent with the policies of the Air Quality Element.
- B. General Plan Area Plan(s):** Southwest
- C. Foundation Component(s):** Rural:
- D. Land Use Designation(s):** Rural: Rural Residential (R:RR)
- E. Overlay(s), if any:** N/A
- F. Policy Area(s), if any:** Highway 79 Policy Area
- G. Adjacent and Surrounding:**
1. **Area Plan(s):** Southwest to the north, south, east and west
 2. **Foundation Component(s):** Rural and Rural Community to the north, Rural and Community Development to the east, Community Development to the south, Community Development and Rural Community to the west.
 3. **Land Use Designation(s):** Rural and Low Density Residential to the north, Specific Plan and Rural to the east, Low Density Residential and Rural to the south, and Medium Density Residential, Low Density Residential to the west.
 4. **Overlay(s), if any:** None
 5. **Policy Area(s), if any:** Highway 79 Policy Area to the north, south, east, and west. Leon/Keller policy, and Keller Road South Side Policy area to the west
- H. Adopted Specific Plan Information**
1. **Name and Number of Specific Plan, if any:** N/A
 2. **Specific Plan Planning Area, and Policies, if any:** N/A
- I. Existing Zoning:** Rural Residential (R-R)
- J. Proposed Zoning, if any:** No zone change is proposed.

K. **Adjacent and Surrounding Zoning:** Specific Plan (SP) and Rural Residential (R-R) to the west, Rural Residential (RR) to the east, and Residential Agricultural- 1 ½ Acre Minimum (R-A-1 ½), Residential Agricultural- 5 Acre Minimum (R-A-5), Specific Plan (SP), and Rural Residential (R-R) to the west, Rural Residential (R-R) and One Family Dwelling (R-1) to the south.

III. ENVIRONMENTAL FACTORS POTENTIALLY AFFECTED

The environmental factors checked below (x) would be potentially affected by this project, involving at least one impact that is a "Potentially Significant Impact" or "Less than Significant with Mitigation Incorporated" as indicated by the checklist on the following pages.

- | | | |
|---|---|--|
| <input type="checkbox"/> Aesthetics | <input type="checkbox"/> Hazards & Hazardous Materials | <input type="checkbox"/> Recreation |
| <input type="checkbox"/> Agriculture & Forest Resources | <input type="checkbox"/> Hydrology / Water Quality | <input checked="" type="checkbox"/> Transportation / Traffic |
| <input type="checkbox"/> Air Quality | <input checked="" type="checkbox"/> Land Use / Planning | <input type="checkbox"/> Utilities / Service Systems |
| <input type="checkbox"/> Biological Resources | <input type="checkbox"/> Mineral Resources | <input type="checkbox"/> Other: |
| <input type="checkbox"/> Cultural Resources | <input type="checkbox"/> Noise | <input type="checkbox"/> Other: |
| <input type="checkbox"/> Geology / Soils | <input type="checkbox"/> Population / Housing | <input type="checkbox"/> Mandatory Findings of Significance |
| <input type="checkbox"/> Greenhouse Gas Emissions | <input type="checkbox"/> Public Services | |

IV. DETERMINATION

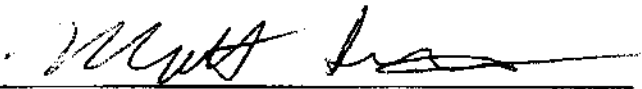

On the basis of this initial evaluation:

A PREVIOUS ENVIRONMENTAL IMPACT REPORT/NEGATIVE DECLARATION WAS NOT PREPARED
<input type="checkbox"/> I find that the proposed project COULD NOT have a significant effect on the environment, and a NEGATIVE DECLARATION will be prepared.
<input checked="" type="checkbox"/> I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because revisions in the project, described in this document, have been made or agreed to by the project proponent. A MITIGATED NEGATIVE DECLARATION will be prepared.
<input type="checkbox"/> I find that the proposed project MAY have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT is required.

A PREVIOUS ENVIRONMENTAL IMPACT REPORT/NEGATIVE DECLARATION WAS PREPARED
<input type="checkbox"/> I find that although the proposed project could have a significant effect on the environment, NO NEW ENVIRONMENTAL DOCUMENTATION IS REQUIRED because (a) all potentially significant effects of the proposed project have been adequately analyzed in an earlier EIR or Negative Declaration pursuant to applicable legal standards, (b) all potentially significant effects of the proposed project have been avoided or mitigated pursuant to that earlier EIR or Negative Declaration, (c) the proposed project will not result in any new significant environmental effects not identified in the earlier EIR or Negative Declaration, (d) the proposed project will not substantially increase the severity of the environmental effects identified in the earlier EIR or Negative Declaration, (e) no considerably different mitigation measures have been identified and (f) no mitigation measures found infeasible have become feasible.
<input type="checkbox"/> I find that although all potentially significant effects have been adequately analyzed in an earlier EIR or Negative Declaration pursuant to applicable legal standards, some changes or additions are necessary but none of the conditions described in California Code of Regulations, Section 15162 exist. An ADDENDUM to a previously-certified EIR or Negative Declaration has been prepared and will be considered by the approving body or bodies.

I find that at least one of the conditions described in California Code of Regulations, Section 15162 exist, but I further find that only minor additions or changes are necessary to make the previous EIR adequately apply to the project in the changed situation; therefore a **SUPPLEMENT TO THE ENVIRONMENTAL IMPACT REPORT** is required that need only contain the information necessary to make the previous EIR adequate for the project as revised.

I find that at least one of the following conditions described in California Code of Regulations, Section 15162, exist and a **SUBSEQUENT ENVIRONMENTAL IMPACT REPORT** is required: (1) Substantial changes are proposed in the project which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; (2) Substantial changes have occurred with respect to the circumstances under which the project is undertaken which will require major revisions of the previous EIR or negative declaration due to the involvement of new significant environmental effects or a substantial increase in the severity of previously identified significant effects; or (3) New information of substantial importance, which was not known and could not have been known with the exercise of reasonable diligence at the time the previous EIR was certified as complete or the negative declaration was adopted, shows any the following: (A) The project will have one or more significant effects not discussed in the previous EIR or negative declaration; (B) Significant effects previously examined will be substantially more severe than shown in the previous EIR or negative declaration; (C) Mitigation measures or alternatives previously found not to be feasible would in fact be feasible, and would substantially reduce one or more significant effects of the project, but the project proponents decline to adopt the mitigation measures or alternatives; or, (D) Mitigation measures or alternatives which are considerably different from those analyzed in the previous EIR or negative declaration would substantially reduce one or more significant effects of the project on the environment, but the project proponents decline to adopt the mitigation measures or alternatives.

V. ENVIRONMENTAL ISSUES ASSESSMENT

In accordance with the California Environmental Quality Act (CEQA) (Public Resources Code Section 21000-21178.1), this Initial Study has been prepared to analyze the proposed project to determine any potential significant impacts upon the environment that would result from construction and implementation of the project. In accordance with California Code of Regulations, Section 15063, this Initial Study is a preliminary analysis prepared by the Lead Agency, the County of Riverside, in consultation with other jurisdictional agencies, to determine whether a Negative Declaration, Mitigated Negative Declaration, or an Environmental Impact Report is required for the proposed project. The purpose of this Initial Study is to inform the decision-makers, affected agencies, and the public of potential environmental impacts associated with the implementation of the proposed project.

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
AESTHETICS Would the project				
1. Scenic Resources				
a) Have a substantial effect upon a scenic highway corridor within which it is located?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Substantially damage scenic resources, including, but not limited to, trees, rock outcroppings and unique or landmark features; obstruct any prominent scenic vista or view open to the public; or result in the creation of an aesthetically offensive site open to public view?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan Figure 9 in the Southwest Area Plan- "Scenic Highways"

Findings of Fact:

a-b) The proposed project is not located along any scenic highway corridors in the Southwest Area plan. The closest Scenic Highway Corridor is the 215. This project will not impact any scenic highway corridors.

The proposed project does not provide the opportunity for physical disturbance of the property; therefore, there is no potential for any impacts to scenic resources. The proposed project will change the General Plan designation for the site, which could eventually lead to a higher level of development on the property. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

2. Mt. Palomar Observatory				
a) Interfere with the nighttime use of the Mt. Palomar Observatory, as protected through Riverside County Ordinance No. 655?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source: GIS database, Ord. No. 655 (Regulating Light Pollution), Southwest Area Plan Figure 6

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Findings of Fact:

a) The proposed project is located within Zone b of the Palomar Nighttime Lighting Policy Area according to figure 6 in the Southwest Area Plan section of the General Plan. However, the project does not provide the opportunity for physical disturbance of the property; therefore, there is no potential for any impacts. The proposed project will change the General Plan designation for the site, which could eventually lead to a higher level of development on the property. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

3. Other Lighting Issues

a) Create a new source of substantial light or glare which would adversely affect day or nighttime views in the area?

b) Expose residential property to unacceptable light levels?

Source: On-site Inspection, Project Application Description

Findings of Fact:

a-b) The proposed project does not provide the opportunity for physical disturbance of the property; therefore, there is no potential for any impacts. The proposed project will change the General Plan designation for the site, which could eventually lead to a higher level of development on the property. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

AGRICULTURE & FOREST RESOURCES Would the project

4. Agriculture

a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland) as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?

b) Conflict with existing agricultural zoning, agricultural use or with land subject to a Williamson Act contract or land

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
within a Riverside County Agricultural Preserve?				
c) Cause development of non-agricultural uses within 300 feet of agriculturally zoned property (Ordinance No. 625 "Right-to-Farm")?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source: Riverside County General Plan Figure OS-2 "Agricultural Resources," GIS database, and Project Application Materials.

Findings of Fact:

a) The proposed project is located within an area of designated "local importance" and "other lands" in the General Plan. Farmland of Local Importance is either currently producing, or has the capability of production, but does not meet the criteria of Prime Farmland, Farmland of Statewide Importance, or Unique Farmland. The California State Department of Conservation makes these designations based on soil types and land use designations. However, the current Land Use designations for the property do not permit commercial agricultural use. Therefore, there is no impact.

b) There are no Williamson Act contracts on the site, and while the zoning on the property is Agricultural, the General Plan is not. As a result, the zoning was not inconsistent with the General Plan and the proposed change is not inconsistent with the County's vision for the area. There are no impacts.

c-d) The property surrounding the site is not agriculturally zoned. There are no impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

5. Forest	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
a) Conflict with existing zoning for, or cause rezoning of, forest land (as defined in Public Resources Code section 12220(g)), timberland (as defined by Public Resources Code section 4526), or timberland zoned Timberland Production (as defined by Govt. Code section 51104(g))?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Result in the loss of forest land or conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of forest land to non-forest use?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan Figure OS-3 "Parks, Forests and Recreation Areas," and Project Application Materials.

Findings of Fact:

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

a-c) The County has no forest land zoning, nor is the property forested. There will be no impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

AIR QUALITY Would the project

6. Air Quality Impacts

a) Conflict with or obstruct implementation of the applicable air quality plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Violate any air quality standard or contribute substantially to an existing or projected air quality violation?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions which exceed quantitative thresholds for ozone precursors)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Expose sensitive receptors which are located within 1 mile of the project site to project substantial point source emissions?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e) Involve the construction of a sensitive receptor located within one mile of an existing substantial point source emitter?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
f) Create objectionable odors affecting a substantial number of people?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: SCAQMD CEQA Air Quality Handbook

Findings of Fact:

a-f) The proposed land use change would result in a net increase in population at build out based on the proposed change. However, the amount of the increase is too speculative to provide a detailed analysis at this stage. This is a programmatic level CEQA analysis. The General Plan includes assumptions that could be used to estimate density, but the new water quality requirements for the State's mandated Low Impact Development (LID) standards will result in a lower density yield on development of all designations. At this stage the increase proposed is minimal on a regional scale and will not substantially alter the population projections for the area, thus not impacting the local Air Quality Management Plans. There are no point source emitters within 1 mile of the proposed site. The proposed project does not provide the opportunity for physical disturbance of the property; therefore, there is no potential for any impacts. The proposed project will change the General Plan designation for the site, which could eventually lead to a higher level of development on the property. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts to air quality. At this stage, the impacts are considered less than significant.

Mitigation: No mitigation is required

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Monitoring: No monitoring is required

BIOLOGICAL RESOURCES Would the project

7. Wildlife & Vegetation

a) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Conservation Community Plan, or other approved local, regional, or state conservation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Have a substantial adverse effect, either directly or through habitat modifications, on any endangered, or threatened species, as listed in Title 14 of the California Code of Regulations (Sections 670.2 or 670.5) or in Title 50, Code of Federal Regulations (Sections 17.11 or 17.12)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or special status species in local or regional plans, policies, or regulations, or by the California Department of Fish and Game or U. S. Wildlife Service?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Have a substantial adverse effect on any riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations or by the California Department of Fish and Game or U. S. Fish and Wildlife Service?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act (including, but not limited to, marsh, vernal pool, coastal, etc.) through direct removal, filling, hydrological interruption, or other means?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
g) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: GIS database, WRCMSHCP and/or CVMSHCP, On-site Inspection

Findings of Fact:

a-g) County mapping has identified a number of the parcels included within the proposal as being located within Cells 5174 and 5175 under the County's Multiple Species Habitat Conservation Plan. Conservation within Cell 5174 will range from 35%-45% of the Cell and will focus on the northern portion of the cell according to the plan. Those proposed parcels that fall within Cell 5174 are located in the southern and northeastern portions of the Cell. Conservation within Cell 5175 will range from 35%-45% of the Cell and will also be focused in the northern portion of the cell. Those proposed parcels that fall within Cell 5175 are located in the southeastern and northeastern portions of the Cell. Cells 5174 and 5175 will contribute to Proposed Constrained Linkage 17 (Paloma Valley), which

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

according to the plan, will provide Habitat for species and will also provide for the movement of species. The plan recognizes that this linkage is currently constrained by existing urban development and agricultural uses; however, many of the land uses surrounding the Constrained Linkage are currently rural.

The proposed project has been submitted to the Environmental Programs Department to process a Habitat Acquisitions and Negotiations Strategy (HANS) application. The process has been completed and Conservation requirements have been identified. Any specific actions regarding the conservation will be required at the project implementation stage. The project is therefore consistent with the requirements of the MSHCP at this stage. Additional ground studies will be required at a future stage to further determine consistency with the MSHCP at the construction stage. Further, this project does not provide the opportunity for physical disturbance of the property, therefore, there is no potential for take of sensitive species or conflict with adopted conservation plans, including but not limited to the MSHCP. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts to Biological Resources as well as any further potential conflicts with adopted conversation plans, including but not limited to the MSHCP. It should be noted that even if the proposed General Plan Land Use is approved by the Board of Supervisors, there is no guarantee that development could occur on all of the property included in the project site. Further study at the implementation stage may reveal biological constraints that would limit development. The applicants are aware of such risk associated with the processing of General Plan Amendments without an associated project.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

CULTURAL RESOURCES Would the project

8. Historic Resources

a) Alter or destroy an historic site?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Cause a substantial adverse change in the significance of a historical resource as defined in California Code of Regulations, Section 15064.5?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source: On-site Inspection, Project Application Materials

Findings of Fact:

a-b) Based on a site visit of the subject property, there are no historic sites on the property. The proposed project does not provide the opportunity for physical disturbance of the property; therefore, there is no potential for any impacts. The proposed project will change the General Plan designation for the site, which could eventually lead to a higher level of development on the property. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential ground disturbing cultural impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
9. Archaeological Resources				
a) Alter or destroy an archaeological site.	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to California Code of Regulations, Section 15064.5?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Disturb any human remains, including those interred outside of formal cemeteries?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Restrict existing religious or sacred uses within the potential impact area?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source: On-site Inspection, Project Application Materials

Findings of Fact:

a-d) The proposed project does not provide the opportunity for physical disturbance of the property; therefore, there is no potential for any impacts. As a result, no site specific archeological studies were requested. The proposed project will change the General Plan designation for the site, which could eventually lead to a higher level of development on the property. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts.

Additionally, the Pechanga Tribe, through State required SB-18 consultation, has requested that any implementing project within the project area contact the Pechanga Tribe while processing any required entitlements. They additionally request to participate in all future CEQA analysis.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

10. Paleontological Resources				
a) Directly or indirectly destroy a unique paleontological resource, or site, or unique geologic feature?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source: Riverside County General Plan Figure OS-8 "Paleontological Sensitivity"

Findings of Fact:

a) According to the General Plan the project is in an area of low and undetermined paleontological sensitivity to the north east and for the remainder of the site (about 80% of the site) respectively. The proposed project does not provide the opportunity for physical disturbance of the property; therefore, there is no potential for any impacts at this stage. The proposed project will change the General Plan designation for the site, which could eventually lead to a higher level of development on the property. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Mitigation: No mitigation is required

Monitoring: No monitoring is required

GEOLOGY AND SOILS Would the project

11. Alquist-Priolo Earthquake Fault Zone or County Fault Hazard Zones	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
a) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death?				
b) Be subject to rupture of a known earthquake fault, as delineated on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan Figure S-2 "Earthquake Fault Study Zones," GIS database, Geologist Comments

Findings of Fact:

a-b) According to the General Plan, there are no map fault zones within or near the project site. There are no impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

12. Liquefaction Potential Zone	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
a) Be subject to seismic-related ground failure, including liquefaction?				

Source: Riverside County General Plan Figure S-3 "Generalized Liquefaction"

Findings of Fact:

a) According to the General Plan, there are portions to the south of the project site that are mapped as areas of low liquefaction potential. The rest of the site shows no mapped liquefaction zones. The proposed project does not provide the opportunity for physical disturbance of the property; therefore, there is no potential for any impacts at this stage. The proposed project will change the General Plan designation for the site, which could eventually lead to a higher level of development on the property. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--	--------------------------------	--	------------------------------	-----------

13. Ground-shaking Zone

a) Be subject to strong seismic ground shaking?

Source: Riverside County General Plan Figure S-4 "Earthquake-Induced Slope Instability Map," and Figures S-13 through S-21 (showing General Ground Shaking Risk)

Findings of Fact:

a) Every project in California has some degree of potential exposure to significant ground shaking. The proposed project does not provide the opportunity for physical disturbance of the property; therefore, there is no potential for any impacts. The proposed project will change the General Plan designation for the site, which could eventually lead to a higher level of development on the property. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts. This will include adherence to the California Building code, Title 24, which will mitigate to some degree, the potential for ground shaking impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

14. Landslide Risk

a) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, collapse, or rockfall hazards?

Source: On-site Inspection, Riverside County General Plan Figure S-5 "Regions Underlain by Steep Slope"

Findings of Fact:

a) The project site is generally flat and based on exhibit S-5 from the General Plan, there are no steep slopes that could potentially result in landslides. There will be no impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

15. Ground Subsidence

a) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in ground subsidence?

Source: Riverside County General Plan Figure S-7 "Documented Subsidence Areas Map"

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Findings of Fact:

a) According to the General Plan, Figure S-7, the lower half of the site is in an area potentially susceptible to subsidence. For the purposes of a stand-alone General Plan Amendment, the indicated level of subsidence does not preclude the potential development of the property at any level. Therefore, there are no impacts based on the proposed project.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

16. Other Geologic Hazards

a) Be subject to geologic hazards, such as seiche, mudflow, or volcanic hazard?

Source: On-site Inspection, Project Application Materials, Geologist Review

Findings of Fact:

a) Based on the review of the proposed project by the County Geologist, the project does not present any other geological hazards or risks. Lake Skinner is located about 16,000 feet (3 miles) to the east of the project site. Portions of the project site are located within a Dam Inundation zone for Lake Skinner. This also indicates a high likeliness for seiche resulting from strong seismic activity near the Lake Skinner Dam, which would impact the property. Regarding the potential mitigation of seiche, the General Plan includes many policies intended to address the concerns presented by Dam Inundation but most are specific to construction level requirements. Such mitigation will be implemented at the construction phase of development, and are not appropriate at the General Plan Amendment levels.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

17. Slopes

a) Change topography or ground surface relief features?

b) Create cut or fill slopes greater than 2:1 or higher than 10 feet?

c) Result in grading that affects or negates subsurface sewage disposal systems?

Source: Riverside County General Plan Figure S-5 "Regions Underlain by Steep Slope", Project Application Materials

Findings of Fact:

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

a-c) The project proposes no grading or construction of any kind, therefore there are no potential impacts to or from slopes. As was previously explained, the site is general flat. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

18. Soils

a) Result in substantial soil erosion or the loss of topsoil?

b) Be located on expansive soil, as defined in Section 1802.3.2 of the California Building Code (2007), creating substantial risks to life or property?

c) Have soils incapable of adequately supporting use of septic tanks or alternative waste water disposal systems where sewers are not available for the disposal of waste water?

Source: Project Application Materials, On-site Inspection

Findings of Fact:

a-c) The project proposes no grading or construction of any kind, therefore there are no potential impacts to soils or septic tanks. There are several single family structures on the site, all of which are on septic currently. The project proposes to increase the density of the property from 5 acre minimum lot size to 1/2 acre minimum lots. One acre lots are consistent with the current regulations regarding minimum lot size for septic systems. All septic systems require separate permitting from the County Environmental Health Department, with full percolation testing. Such testing will be performed at the implementation stage. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

19. Erosion

a) Change deposition, siltation, or erosion that may modify the channel of a river or stream or the bed of a lake?

b) Result in any increase in water erosion either on or off site?

Source: Project Application Materials, On-site Inspection

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Findings of Fact:

a-b) The project proposes no grading or construction of any kind; therefore there are no potential impacts to or from erosion. However, the proposed project will change the General Plan designation for the site, which could eventually lead to a higher level of development on the property. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

20. Wind Erosion and Blowsand from project either on or off site.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
a) Be impacted by or result in an increase in wind erosion and blowsand, either on or off site?				

Source: Riverside County General Plan Figure S-8 "Wind Erosion Susceptibility Map," Ord. No. 460, Article XV & Ord. No. 484

Findings of Fact:

a) According to General Plan figure S-8 the project is not located in an area of high wind erosion. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

GREENHOUSE GAS EMISSIONS Would the project

21. Greenhouse Gas Emissions	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
a) Generate greenhouse gas emissions, either directly or indirectly, that may have a significant impact on the environment?				
b) Conflict with an applicable plan, policy or regulation adopted for the purpose of reducing the emissions of greenhouse gases?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source:

Findings of Fact: The proposed project is a General Plan Amendment only, there is no ground disturbance proposed. The proposed amendment will increase the potential density of the site, which would have an increase in potential impacts because there could be more homes in the area. However, this CEQA analysis is intended to be a programmatic CEQA level review. Any future

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

implementing project on this site will be required to comply with California's AB-32 greenhouse gas reduction requirement. At this stage, it is too speculative to review the specific potential impacts as the number of residential units are not known. Additionally, many of the identified potential mitigation for GHG impacts are implemented at the construction level of development. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

HAZARDS AND HAZARDOUS MATERIALS Would the project

22. Hazards and Hazardous Materials

a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Impair implementation of or physically interfere with an adopted emergency response plan or an emergency evacuation plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Project Application Materials

Findings of Fact:

a-b, d-e) The project proposes no grading or construction of any kind; therefore there are no potential impacts that could result from the transportation of hazardous materials; nor will the proposed change in land use density result in an increased potential for generating anything hazardous. The site is not listed as a hazardous materials site. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts.

c) The project will result in higher development intensity of the site than was proposed in the General Plan in 2003. The increase in density may result in an overburden of streets previously identified as evacuation routes for other projects. However, the Transportation Department will require any future

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

development proposals on the site to add mitigation to those projects to assure the streets will accommodate adequate emergency provisions.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

23. Airports

a) Result in an inconsistency with an Airport Master Plan?

b) Require review by the Airport Land Use Commission?

c) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?

d) For a project within the vicinity of a private airstrip, or heliport, would the project result in a safety hazard for people residing or working in the project area?

Source: Riverside County General Plan Figure S-19 "Airport Locations," GIS database

Findings of Fact:

a-d) Based on the General Plan, figure S-19, the project is not located within an Airport Influence area or compatibility zone and will not require review by ALUC or impact any airport operations in any way.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

24. Hazardous Fire Area

a) Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?

Source: Riverside County General Plan Figure S-11 "Wildfire Susceptibility," GIS database

Findings of Fact:

a) According to General Plan Figure S-11 the project is not located within a Wildfire Susceptibility Area. There will be no impacts.

Mitigation: No mitigation is required

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Monitoring: No monitoring is required

HYDROLOGY AND WATER QUALITY Would the project

25. Water Quality Impacts

a) Substantially alter the existing drainage pattern of the site or area, including the alteration of the course of a stream or river, in a manner that would result in substantial erosion or siltation on- or off-site?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Violate any water quality standards or waste discharge requirements?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Create or contribute runoff water that would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Place housing within a 100-year flood hazard area, as mapped on a federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
f) Place within a 100-year flood hazard area structures which would impede or redirect flood flows?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
g) Otherwise substantially degrade water quality?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
h) Include new or retrofitted stormwater Treatment Control Best Management Practices (BMPs) (e.g. water quality treatment basins, constructed treatment wetlands), the operation of which could result in significant environmental effects (e.g. increased vectors or odors)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County Flood Control District Review.

Findings of Fact:

a-h) The project is not located within a flood zone. The project proposes no grading or construction of any kind; therefore there are no potential impacts to or from flood hazards with the exception of dam inundation (see topic in geology regarding seiche). There is no land alteration proposed at this time that would alter any flows, violate any standards, impact ground water resources, create any runoff, or require any BMP's. No additional study of the current conditions was performed at this time because the proposed General Plan Amendment is not proposing any ground alteration at this time. However, the proposed project will change the General Plan designation for the site, which could eventually lead to a higher level of development on the property. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts which will include a hydrology analysis.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Mitigation: No mitigation is required

Monitoring: No monitoring is required

26. Floodplains

Degree of Suitability in 100-Year Floodplains. As indicated below, the appropriate Degree of Suitability has been checked.

NA - Not Applicable U - Generally Unsuitable R - Restricted

a) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner that would result in flooding on- or off-site?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Changes in absorption rates or the rate and amount of surface runoff?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Expose people or structures to a significant risk of loss, injury or death involving flooding, including flooding as a result of the failure of a levee or dam (Dam Inundation Area)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Changes in the amount of surface water in any water body?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan Figure S-9 "100- and 500-Year Flood Hazard Zones," Figure S-10 "Dam Failure Inundation Zone," Riverside County Flood Control District Flood Hazard Report/Condition, GIS database

Findings of Fact:

a-d) The project is not located within a flood zone. The project proposes no grading or construction of any kind; therefore there are no potential impacts to or from flood hazards with the exception of dam inundation (see topic in geology regarding seiche). There is no land alteration proposed at this time that would alter any flows, violate any standards, impact ground water resources, create any runoff, or require any BMP's. However, the proposed project will change the General Plan designation for the site, which could eventually lead to a higher level of development on the property. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

LAND USE/PLANNING Would the project

27. Land Use	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
a) Result in a substantial alteration of the present or planned land use of an area?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
b) Affect land use within a city sphere of influence and/or within adjacent city or county boundaries?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan, GIS database, Project Application Materials

Findings of Fact:

a-b) The project will result in changes to the Land Use patterns in the area. The area is currently designated for lower density uses, 5 acre minimum lot sizes. However, property near the site, specifically to the south, north and east have experienced some increases in density over what was adopted with the 2003 General Plan. The proposed change will not alter the rural character of the area, because 1/2 acre lots generally permit animal keeping. As previously stated, the potential impacts in this EA are being evaluated for the Land Use change only. For these reasons, the Land Use and zoning impacts are considered less than significant.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

28. Planning				
a) Be consistent with the site's existing or proposed zoning?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b) Be compatible with existing surrounding zoning?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Be compatible with existing and planned surrounding land uses?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
d) Be consistent with the land use designations and policies of the General Plan (including those of any applicable Specific Plan)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
e) Disrupt or divide the physical arrangement of an established community (including a low-income or minority community)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan Land Use Element, Staff review, GIS database

Findings of Fact:

a-e) The project will eventually result in changes to the zoning in the area. The area is currently zoned Rural Residential (R-R), which is generally inconsistent with the proposed General Plan Land Use Designation. Any implementing project within the area of the proposed change will be required to process a zone change with the proposed implementing project to assure the General Plan and zoning consistency for the implementing project. Many projects around and near the project site have changed their General Plan and zoning designations since the 2003 General Plan, most recently a Specific Plan was approved adjacent to the project site on the east, the Keller Crossing Specific Plan, SP380. The proposed Land Use change is consistent with all policies of the General Plan, particularly because the proposed change generally retains the rural character of the area, and will not be dividing the physical arrangement of any communities. As previously stated, the potential impacts in this EA are being evaluated for the Land Use only. Once a development proposal or land use application to

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts. For these reasons, the Land Use and zoning impacts are considered less than significant.

Mitigation: GPA925 MM1: Any implementing project within the limits of General Plan Amendment No. 925 will be required to process a zone change application to assure consistency with the General Plan.

Monitoring: Monitoring will be achieved through the Project review of implementing projects within the General Plan Amendment area.

MINERAL RESOURCES Would the project

29. Mineral Resources

a) Result in the loss of availability of a known mineral resource that would be of value to the region or the residents of the State?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Result in the loss of availability of a locally-important mineral resource recovery site delineated on a local general plan, specific plan or other land use plan?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Be an incompatible land use located adjacent to a State classified or designated area or existing surface mine?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Expose people or property to hazards from proposed, existing or abandoned quarries or mines?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Riverside County General Plan Figure OS-5 "Mineral Resources Area"

Findings of Fact:

a-d) According to the General Plan figure OS-5 the project is not located in an area known to have mineral resources that would preclude the development of the ultimate density requested in the project. Further, the project proposes no grading or construction of any kind; therefore there are no potential impacts to or from mineral resources. There are no known mines on or near the site. However, the proposed project will change the General Plan designation for the site, which could eventually lead to a higher level of development on the property. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

NOISE Would the project result in

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Definitions for Noise Acceptability Ratings

Where indicated below, the appropriate Noise Acceptability Rating(s) has been checked.
 NA - Not Applicable A - Generally Acceptable B - Conditionally Acceptable
 C - Generally Unacceptable D - Land Use Discouraged

30. Airport Noise

a) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport would the project expose people residing or working in the project area to excessive noise levels?

NA A B C D

b) For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?

NA A B C D

Source: Riverside County General Plan Figure S-19 "Airport Locations," County of Riverside Airport Facilities Map

Findings of Fact:

a-b) According to the General Plan, Figure S-19, the project is not located within an airport influence area. Therefore, there will be no significant impacts from airport noise.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

31. Railroad Noise

NA A B C D

Source: Riverside County General Plan Figure C-1 "Circulation Plan", GIS database, On-site Inspection

Findings of Fact:

The project is not located near any railroads, therefore, there will be no significant impacts from railroad noise.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

32. Highway Noise

NA A B C D

Source: On-site Inspection, Project Application Materials

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Findings of Fact:

The project is not located near any highways. The closest Highway is Highway 79 about one half mile to the east of the northern portion of the project area. Noise from this distance will be negligible. Therefore, there will be no significant impacts from highway noise.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

33. Other Noise

NA A B C D

Source: Project Application Materials, GIS database

Findings of Fact:

The project is not located near any other source of potential noise, therefore, there will be no significant impacts from other noise.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

34. Noise Effects on or by the Project

a) A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?

b) A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?

c) Exposure of persons to or generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

d) Exposure of persons to or generation of excessive ground-borne vibration or ground-borne noise levels?

Source: Riverside County General Plan, Table N-1 ("Land Use Compatibility for Community Noise Exposure"); Project Application Materials

Findings of Fact:

a-d) The project proposes no grading or construction of any kind. With no structures proposed on the site, and no expressed use permitted, no additional CEQA analysis is required at this time. The proposed project will change the General Plan designation for the site, which could eventually lead to

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

a higher level of development on the property. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

POPULATION AND HOUSING Would the project

35. Housing

a) Displace substantial numbers of existing housing, necessitating the construction of replacement housing elsewhere?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
b) Create a demand for additional housing, particularly housing affordable to households earning 80% or less of the County's median income?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
c) Displace substantial numbers of people, necessitating the construction of replacement housing elsewhere?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Affect a County Redevelopment Project Area?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Cumulatively exceed official regional or local population projections?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
f) Induce substantial population growth in an area, either directly (for example, by proposing new homes and businesses) or indirectly (for example, through extension of roads or other infrastructure)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: Project Application Materials, GIS database, Riverside County General Plan Housing Element

Findings of Fact:

a-f) Appendix E of the 2003 General Plan outlines the assumptions used for build out density in the Plan. The existing designation of Rural: Rural Residential (R:RR) assumes a midpoint density of 0.15 dwelling units to the acre. The proposed designation of Community Development: Low Density Residential assumes a midpoint of 1.2 dwelling units to the acre, for a difference of 1.05 dwelling units to the acre, or a total unit increase of 242 units over 230 acres (.15x230 – 1.2x230). The increase in units will result a potential midpoint population increase of 626 people (102 people in RR subtracted from 728 people in VLDR- based on the General Plan assumption of 3.01 residents per unit). The project proposes no grading or construction of any kind. There are several homes on the site. None are proposed to be eliminated as part of this proposed Land Use change. It will not displace any existing housing or effect a redevelopment area. The project would increase the population density of the area by 626. This change is negligible to the population projections for Riverside County. Additionally, the project site is large and disperses the population increase over the entire project site (showing a median dwelling unit increase of 1.05 units per acre). Any impacts of the population increase are less than significant. The limitation of sewer availability in the area will act as a further limitation to additional increases in density. The impacts are less than significant.

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

However, as previously explained, the proposed project will change the General Plan designation for the site, which could eventually lead to a higher level of development on the property. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

PUBLIC SERVICES Would the project result in substantial adverse physical impacts associated with the provision of new or physically altered government facilities or the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:

36. Fire Services

Source: Riverside County General Plan Safety Element

Findings of Fact:

The project would result in an increased need for all public services, including fire. However, the costs associated with the increased need are addressed through the County's Development Impact Fees which would be required of all development on the subject site. As such, the impacts would be less than significant.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

37. Sheriff Services

Source: Riverside County General Plan

Findings of Fact:

The project would result in an increased need for all public services, including the Sheriff. However, the costs associated with the increased need are addressed through the County's Development Impact Fees which would be required of all development on the subject site. As such, the impacts would be less than significant.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

38. Schools

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Source: GIS database

Findings of Fact:

The project would result in an increased need for all public services, including schools. However, the costs associated with the increased need are addressed through the County's Development Impact Fees and other State requirements which would be required of all development on the subject site. As such, the impacts would be less than significant.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

39. Libraries

Source: Riverside County General Plan

Findings of Fact:

The project would result in an increased need for all public services, including books and materials for libraries. However, the costs associated with the increased need are addressed through the County's Development Impact Fees which would be required of all development on the subject site. As such, the impacts would be less than significant.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

40. Health Services

Source: Riverside County General Plan

Findings of Fact:

The project would result in an increased need for all public services, including the Health services. However, health care is generally driven by market forces and any increase in population is generally addressed through market demand forces. As such, the impacts would be less than significant.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

RECREATION

41. Parks and Recreation

a) Would the project include recreational facilities or require the construction or expansion of recreational facilities which might have an adverse physical effect on the environment?

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
b) Would the project include the use of existing neighborhood or regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
c) Is the project located within a Community Service Area (CSA) or recreation and park district with a Community Parks and Recreation Plan (Quimby fees)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Source: GIS database, Ord. No. 460, Section 10.35 (Regulating the Division of Land – Park and Recreation Fees and Dedications), Ord. No. 659 (Establishing Development Impact Fees), Parks & Open Space Department Review

Findings of Fact:

a-c) The project would increase the opportunity for density within a designation that would permit residential uses. Those residential uses would ultimately need recreation space, and would potentially impact existing recreational spaces. However, the project is not proposing any actual structures. At such time that a project is proposed, those impacts will be addressed in a separate CEQA document. There is no CSA for this area and there will be no impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

42. Recreational Trails	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
--------------------------------	--------------------------	--------------------------	--------------------------	-------------------------------------

Source: Open Space and Conservation Map for Western County trail alignments

Findings of Fact:

See 41.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

TRANSPORTATION/TRAFFIC Would the project

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
43. Circulation	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
a) Conflict with an applicable plan, ordinance or policy establishing a measure of effectiveness for the performance of the circulation system, taking into account all modes of transportation, including mass transit and non-motorized travel and relevant components of the circulation system, including but not limited to intersections, streets, highways and freeways, pedestrian and bicycle paths, and mass transit?	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
b) Conflict with an applicable congestion management program, including, but not limited to level of service	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

	Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
standards and travel demand measures, or other standards established by the county congestion management agency for designated roads or highways?				
c) Result in a change in air traffic patterns, including either an increase in traffic levels or a change in location that results in substantial safety risks?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
d) Alter waterborne, rail or air traffic?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
e) Substantially increase hazards due to a design feature (e.g., sharp curves or dangerous intersections) or incompatible uses (e.g. farm equipment)?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
f) Cause an effect upon, or a need for new or altered maintenance of roads?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
g) Cause an effect upon circulation during the project's construction?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
h) Result in inadequate emergency access or access to nearby uses?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>
i) Conflict with adopted policies, plans or programs regarding public transit, bikeways or pedestrian facilities, or otherwise substantially decrease the performance or safety of such facilities?	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>	<input type="checkbox"/>

Source: Riverside County General Plan, Highway 79 Policy

Findings of Fact:

a) The project is located within the Highway 79 Policy Area of the General Plan. The project is proposing to increase the density of the area, see discussion in the planning section on the EA. The applicant shall demonstrate compliance with Highway 79 Policy Area to "ensure that overall within the Highway 79 Policy Area development projects produce traffic generation at a level that is 9% less than the trips projected from the General Plan traffic model residential land use designations." Because the Policy intends to limit the existing build out of the Land Use Designation, and increase in the density proposes potential conflicts with the Policy. Mitigation is proposed below to address the General Plan Policy. This mitigation will assure that the goals of the Policy are met at the implementation stage of development. The project would be consistent with all other plans. With the proposed mitigation, the impacts are less than significant.

b) With the required mitigation outlined above, the proposed project will be able to address any congestion management program through the standard fees and mitigation required at the time development is proposed. As previously explained, the proposed project will change the General Plan designation for the site, which could eventually lead to a higher level of development on the property. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts.

c-d) No air traffic or water traffic will be altered due to the proposed project. There will be no impact.

e-i) The project is not proposing any development at the time, therefore there are no design changes to the streets or roads that may increase hazard due to road design. The increase in density will

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

create a need to evaluate the impacts to the existing street design; however, the potential impacts would be too speculative at this stage, because the actual level of impact from the implementing development is not known at this time. The proposed change does not conflict with any adopted policies regarding public transit, bikeways or pedestrian access because the site is rural today, and the proposed change will maintain the rural nature of the area. The efficiency of transit will not change, and therefore not impact any policies regarding transit or other alternative means of travel. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts.

Mitigation: GPA925 MM2: The project has been determined to be consistent with the Highway 79 Policy Area pursuant to the following (applied to the subsequent implementing project) or as approved by the TLMA Director:

- Prior to building permit issuance of any implementing project, the applicant shall participate in any adopted fee program established by the County intended to address the Highway 79 Policy Area. In the event an adopted fee program is not established, the implementing project shall satisfy one the conditions below or the applicant may voluntarily participate in providing a fee, as approved by the TLMA Director, that the County can use to build additional transportation infrastructure or acquire open space to offset the project's incremental impacts on the Highway 79 Policy Area. If the Highway 79 policies are amended, the applicant shall be entitled to, at the applicant's request, the benefit of having this mitigation amended in a corresponding fashion with the requirement of possible further CEQA action/review. If the Highway 79 policies are repealed, this mitigation shall automatically terminate.
- Prior to approval of the implementing project(s), for existing residential Land Use Designations the applicant shall demonstrate to the satisfaction of the Director of Transportation consistency with the Highway 79 Policy Area by demonstrating that the allowable number of units have been determined utilizing the most recent edition of the ITE (Institute of Transportation Engineers) Trip Generation in consideration of (a) transportation demand management (TDM) measures; (b) product types; (c) transportation improvements; or (d) a combination of (a), (b) and (c), such that the project is generating equal to or less than the average daily vehicle trips that would have been generated if the project were constructed at a density of 9% below the midpoint of the density dictated by the existing General Plan Land Use designation at the time of the proposed project change which was Rural: Rural Residential (R:RR). This mitigation does not apply to implementing projects which propose a non-residential land use development. If the Highway 79 policies are amended, the applicant shall be entitled to, at the applicant's request, the benefit of having this mitigation amended in a corresponding fashion with the requirement of possible further CEQA action/review. If the Highway 79 policies are repealed, this mitigation shall automatically terminate.

Monitoring: Monitoring will be achieved through the Project review of implementing projects within the General Plan Amendment area.

44. Bike Trails

Source: Riverside County General Plan

--------------------------------	--	------------------------------	-----------

Findings of Fact:

See 41.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

UTILITY AND SERVICE SYSTEMS Would the project

45. Water

a) Require or result in the construction of new water treatment facilities or expansion of existing facilities, the construction of which would cause significant environmental effects?

b) Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?

Source: Department of Environmental Health Review

Findings of Fact:

a-b) The project is not proposing any construction at this time. However, the proposed project will change the General Plan designation for the site, which could eventually lead to a higher level of development on the property. An assessment of the availability of water to service the area will be required prior to the approval of an implementing project. This will include a commitment from the water purveyor in that area to provide water to the site (beyond that which already exists). Many of the homes in the area currently use well water. The increase in density will likely require connection to a public water system, the construction of which will have potential impacts. However, at this stage, the specific size and need of water infrastructure to the area would be too speculative to analyze. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

46. Sewer

a) Require or result in the construction of new wastewater treatment facilities, including septic systems, or expansion of existing facilities, the construction of which would cause significant environmental effects?

b) Result in a determination by the wastewater treatment provider that serves or may service the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

Source: Department of Environmental Health Review

Findings of Fact:

a-b) The project is not proposing any construction at this time. However, the proposed project will change the General Plan designation for the site, which could eventually lead to a higher level of development on the property. The homes in project site are currently using septic systems. Specific permitting is required prior to the use of any septic system. The proposed increase in density would permit lot sizes that have traditionally been accepted by the County and the Regional Water Quality Control Board to permit septic systems. However, the RWQCB has recently been re-evaluating the minimum lot size that would permit septic. The proposed project might be required to connect to and construct a sewer system which could result in potential impacts. At this stage, the specific size and need of sewer infrastructure to the area would be too speculative to analyze. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

47. Solid Waste

a) Is the project served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
--	--------------------------	--------------------------	--------------------------	-------------------------------------

b) Does the project comply with federal, state, and local statutes and regulations related to solid wastes including the CIWMP (County Integrated Waste Management Plan)?	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Findings of Fact:

a) The County has no specific energy conservation plans that would conflict with the project.

Mitigation: No mitigation is required

Monitoring: No monitoring is required

MANDATORY FINDINGS OF SIGNIFICANCE

50. Does the project have the potential to substantially degrade the quality of the environment, substantially reduce the habitat of a fish or wildlife species, cause a fish or wildlife population to drop below self-	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input checked="" type="checkbox"/>
--	--------------------------	--------------------------	--------------------------	-------------------------------------

Potentially Significant Impact	Less than Significant with Mitigation Incorporated	Less Than Significant Impact	No Impact
--------------------------------	--	------------------------------	-----------

sustaining levels, threaten to eliminate a plant or animal community, reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory?

Source: Staff review, Project Application Materials

Findings of Fact: Implementation of the proposed project would not substantially degrade the quality of the environment, substantially reduce the habitat of fish or wildlife species, cause a fish or wildlife populations to drop below self-sustaining levels, threaten to eliminate a plant or animal community, or reduce the number or restrict the range of a rare or endangered plant or animal, or eliminate important examples of the major periods of California history or prehistory.

51. Does the project have impacts which are individually limited, but cumulatively considerable? ("Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects, other current projects and probable future projects)?

Source: Staff review, Project Application Materials

Findings of Fact: The project does not have impacts which are individually limited, but cumulatively considerable. The proposal will increase the density of the area, which could potentially impact CEQA study areas cumulatively. At this stage, the specific level of changes is not known, as there is no construction proposed with this project. Once a development proposal or land use application to subsequently subdivide, grade, or build on the property associated with General Plan Amendment No. 925 is submitted, a subsequent review and EA shall be prepared assessing potential impacts.

52. Does the project have environmental effects that will cause substantial adverse effects on human beings, either directly or indirectly?

Source: Staff review, project application

Findings of Fact: The proposed project would not result in environmental effects which would cause substantial adverse effects on human beings, either directly or indirectly.

VI. EARLIER ANALYSES

Earlier analyses may be used where, pursuant to the tiering, program EIR, or other CEQA process, an effect has been adequately analyzed in an earlier EIR or negative declaration as per California Code of Regulations, Section 15063 (c) (3) (D).

Location Where Earlier Analyses, if used, are available for review:

Criteria and Project Information

Criteria Comments:

- a. As stated in Section 3.2.3 of the MSHCP, “Proposed Constrained Linkage 17 (Paloma Valley) is located in the south-central region of the Plan Area. Proposed Extension of Existing Core 7 (Lake Skinner/Diamond Valley Lake Extension) is located to the east of Proposed Constrained Linkage 17. Proposed Constrained Linkage 17 provides Habitat for species and also provides for movement of species. Although Proposed Constrained Linkage 17 is constrained by existing urban Development and agricultural use along much of its length, planned land uses surrounding the Constrained Linkage are nearly entirely rural. In addition, Proposed Constrained Linkage 17 has a comparatively low P/A ratio. Thus, Edge Effects on Proposed Constrained Linkage 17 may be substantially lower than for other Constrained Linkages. Nonetheless, treatment and management of edge conditions along Proposed

RCA Joint Project Review (JPR)

JPR #: 14-04-10-01

Date: 5/9/14

Constrained Linkage 17 will be necessary to ensure that it provides Habitat and movement functions for species using the Linkage, since several major Covered Activities are proposed for extension or widening within or adjacent to the Linkage. An adequate wildlife underpass or overpass may need to be implemented to insure movement of species in this area and to reduce the chance of mortality from vehicle collision.”

- b. The project site is located within Cell 5174. As stated in Section 3.3.15 of the MSHCP, “Conservation within Cell 5174 will contribute to assembly of Proposed Constrained Linkage 17. Conservation within Cell 5174 will focus on chaparral habitat and agricultural land. Areas conserved within Cell 5174 will be connected to chaparral and grassland habitat proposed for conservation in Cell Group U to the north, to chaparral habitat proposed for conservation in Cell 5175 to the east and to grassland and adjacent habitat proposed for conservation in Cell Group B in the Sun City/Menifee Area Plan to the west. Conservation within Cell 5174 will range from 35% to 45% of the Cell focusing in the northern portion of the Cell.”
- c. The project site is also located within Cell 5175. As stated in Section 3.3.15 of the MSHCP, “Conservation within Cell 5175 will contribute to assembly of Proposed Constrained Linkage 17. Conservation within Cell 5175 will focus on grassland and chaparral habitat. Areas conserved within Cell 5175 will be connected to chaparral habitat proposed for conservation in Cell 5174 to the west, to chaparral, coastal sage scrub and grassland habitat proposed for conservation in Cell Group U to the north, and to agricultural land proposed for conservation in Cell 5173 to the east. Conservation within Cell 5175 will range from 35% to 45% of the Cell focusing in the northern portion of the Cell.”
- d. Rough Step: The proposed project is within Rough Step Unit 6. Rough Step Unit 6 encompasses 101,542 acres within the south-central region of western Riverside County and includes Antelope Valley, Warm Springs Creek, Paloma Creek, Lake Skinner, Johnson Ranch, and Diamond Valley Lake. Rough Step Unit 6 is bounded by Interstate 15 to the northwest, Bundy Canyon Road and Olive Avenue to the north, and Palm Avenue to the west. Within Rough Step Unit 6, 24,836 acres are located within the Criteria Area. Key vegetation communities within Rough Step Unit 6 include coastal sage scrub, grasslands, developed/disturbed lands, and agricultural lands. Based on the 2012 MSHCP Annual Report, all vegetation categories are “in” rough step. Vegetation on the proposed project site contains coastal sage scrub, grassland, developed/disturbed, and agricultural lands. Therefore, development on the project site will not conflict with or interfere with the Rough Step Status of Unit 6.
- e. Per County of Riverside Resolution No. 2013-111, General Plan Amendments on their own (i.e. without any other entitlement applications), the County will conduct a determination if any portion of the property is needed to meet the requirements of the conservation Criteria of the MSHCP, but survey reports for Sections 6.1.2, 6.1.3 and 6.3.2 will not be conducted until a specific development/entitlement application is submitted to the County. The County has deemed projects with General Plan Amendments only as “Habitat Acquisition and Negotiation Strategy (HANS) LITE” cases.
- f. Project information was provided by the Permittee in the JPR application, including a MSHCP Compliance Review Worksheet prepared by Riverside County Environmental Programs Department

RCA Joint Project Review (JPR)

JPR #: 14-04-10-01

Date: 5/9/14

(EPD) dated April 2, 2014, Application for MSHCP HANS LITE prepared by EPD dated March 3, 2014, a Revised Map – Partial Conservation letter by EPD dated April 23, 2014, and a letter by Louise C. McCausland and Stephen A. McCausland regarding APN 472-090-022 received by EPD on March 31, 2014. The project site is generally located east of Viculin Lane, north and south of Keller Road, and west of Pourroy Road in Winchester, California. The project site currently includes several single family residences with associated structures and vacant lands. There is a very small portion of the project south of Keller Road which is not located in Criteria Cells; therefore, they are not a part of this HANS LITE and JPR process. EPD will ensure that the properties south of Keller Road not in Criteria Cells are in compliance with the other survey requirements of the MSHCP specifically Sections 6.1.2, 6.1.3, 6.1.4 and 6.3.2 prior to project approval. The project being evaluated at this time with the County of Riverside includes a General Plan Amendment (GPA), which identifies 13.1 acres needed for Conservation. No specific development is proposed as part of the General Plan Amendment application. The General Plan Amendment will not alter the General Plan designation on the 13.1-acre portion of the site described for Conservation. The proposed Conservation should be conveyed to the RCA after future entitlements are approved and prior to any site disturbance on any portion of the site depicted on the Regional Map.

- g. Reserve Assembly: As discussed above, the project site is located in Cells 5174 and 5175, which will contribute to Proposed Constrained Linkage 17. The project site is located in the southeastern portion of Cell 5174, not the northern portion of the Cell which is the area described for Conservation. The project site is also located in the southern and north-central portion of Cell 5175. Approximately 13.1 acres of the project site located in the northern portion of Cell 5175 is proposed for Conservation which will contribute to areas described for Conservation. The proposed Conservation would contribute to Proposed Constrained Linkage 17 which traverses the northern portion of Cell 5175 and would connect to areas already conserved northwest of Cell 5175.

Of the 160 acres in Cell 5174, approximately 12% is currently developed with rural residential development, mostly in the south-central portion of Cell 5174. The remaining land within Cell 5174 consists of vacant lands in the northeastern and western portions of the Cell. Since there has been minimal development in the northern portion of Cell 5174, and to date, there has been approximately 32 acres in the northwestern portion of Cell 5174 proposed for Conservation, there is sufficient undeveloped land in the remaining northern portions of Cell 5174 to meet the goals described in Section b. above. Of the 160 acres in Cell 5175, approximately 11% is currently developed with rural residential development, scattered in the eastern and southern portions of Cell 5175. There are 40-acres of Conserved land in the northwest quadrant of Cell 5175 which the proposed 13.1 acres of Conservation in the northern portion of Cell 5175 will adjoin. The proposed 13.1 acres of Conservation will contribute towards the assembly of Constrained Linkage 17; therefore, the project would meet the goals described in Section c. above. Criteria Cells in this area, generally between Briggs Road on the west and Washington Street on the east, are described for assembly of Constrained Linkage 17, a connection between the Southwestern Riverside County Multi-Species Reserve (MSR) and Proposed Core 2 in French Valley. Conservation areas contributing towards the linkage have been identified through several

RCA Joint Project Review (JPR)

JPR #: 14-04-10-01

Date: 5/9/14

large development project JPRs (04-11-16-01, 09-12-14-01) to the east extending to the boundary of MSR. Conservation land has been secured in the western and central portions of the linkage. The gaps that remain are largely undeveloped and conservation can be secured in the future. There is existing fragmentation to the west between Leon Road and Abby Place, homes on 2.5 to 5 acre lots that existed prior to MSHCP approval. The large lot nature of the home doesn't preclude wildlife movement. Future proposed development of the project site in the southern portion of Cells 5174 and 5175 will not preclude the ability of MSHCP Conservation goals to be reached in this area. The project does not affect the Reserve Assembly goals of the MSHCP.

Other Plan Requirements

Per County of Riverside Resolution No. 2013-111, and as stated above, HANS LITE applications are not subject to other Plan requirements. Any future entitlement applications involving the subject parcels, that do not qualify for HANS LITE, will be subject to a full HANS process including analysis of other Plan requirements.

Data:

Section 6.1.2 – Was Riparian/Riverine/Vernal Pool Mapping or Information Provided?

Undetermined. No biological surveys have been completed to date. Upon submittal of any future development/entitlement submitted for this project, biological surveys and evaluations of Section 6.1.2 resources shall be submitted to the RCA for concurrence. If any impacts to Section 6.1.2 resources will occur as a result of development, a Determination of Biologically Equivalent or Superior Preservation (DBESP) shall be required and submitted to the RCA and Wildlife Agencies pursuant to Section 6.1.2 of the MSHCP.

Section 6.1.3 – Was Narrow Endemic Plant Species Survey Information Provided?

Undetermined. The project site is located within a Narrow Endemic Plant Species Survey Area (NEPSSA) for Munz's onion, San Diego ambrosia, many-stemmed dudleya, spreading navarretia, California Orcutt grass, and Wright's trichocoronis. No biological surveys have been conducted to date. Upon submittal of any future development/entitlement submitted for this project, biological surveys and evaluations of Section 6.1.3 resources shall be submitted to the RCA for concurrence. If any impacts to Section 6.1.3 resources will occur as a result of development, a DBESP shall be required and submitted to the RCA and Wildlife Agencies pursuant to Section 6.1.3 of the MSHCP.

Section 6.3.2 – Was Additional Survey Information Provided?

Undetermined. The project site is located within a Criteria Area Species Survey Area (CASSA) for Davidson's saltscale, Parish's brittle-scale, thread-leaved brodiaea, smooth tarplant, round-leaved filaree,

RCA Joint Project Review (JPR)

JPR #: 14-04-10-01

Date: 5/9/14

Coulter's Goldfields, and little mouse-tail. The project site is also located within an Additional Survey Needs and Procedures Area for burrowing owl. No biological surveys have been conducted to date. Upon submittal of any future development/entitlement submitted for this project, biological surveys and evaluations of Section 6.3.2 resources shall be submitted to the RCA for concurrence. If any impacts to Section 6.3.2 resources will occur as a result of development, a DBESP shall be required and submitted to the RCA and Wildlife Agencies pursuant to Section 6.3.2 of the MSHCP.

Section 6.1.4 – Was Information Pertaining to Urban/Wildland Interface Guidelines Provided?

Yes. The property is located near future and existing Conservation Areas.

Other Plan Requirement Comments:

- a. Section 6.1.2: The project consists of a General Plan Amendment with no development proposed at this time. Per Riverside County Resolution No. 2013-111, MSHCP required habitat assessments and surveys shall not be required until land use application is submitted to the County. When a specific development is proposed, a habitat assessment shall be conducted by a qualified biologist to determine presence or absence of riparian and riverine resources, riparian birds, vernal pools, and fairy shrimp, and avoidance of these habitats, where possible. If the future proposed project cannot avoid riparian/riverine resources, a DBESP including appropriate mitigation (i.e., on-site or off-site enhancement, restoration, establishment (creation), preservation, payment into habitat mitigation banks or in lieu fee programs, or a combination of one of these options) to offset the loss of functions and values as they pertain to the MSHCP covered species, is required. The project will demonstrate compliance with Section 6.1.2 of the MSHCP when any future land use application requiring discretionary approval is submitted.
- b. Section 6.1.3: The project site is located within a Narrow Endemic Plant Species Survey Area (NEPSSA) for Munz's onion, San Diego ambrosia, many-stemmed dudleya, spreading navarretia, California Orcutt grass, and Wright's trichocoronis. As previously mentioned, the project consists of a General Plan Amendment with no development proposed at this time. Per Riverside County Resolution No. 2013-111, MSHCP required habitat assessments and surveys shall not be required until a land use application is submitted to the County. When a specific development is proposed, a habitat assessment shall be conducted by a qualified biologist to determine whether suitable habitat for the above mentioned NEPSSA species are present, and if so, focused surveys during the appropriate blooming period would be warranted. Should avoidance of 90% of the long-term conservation value areas cannot be accomplished for any of the above mentioned NEPSSA species, then a DBESP shall be prepared and submitted along with the JPR, to the Permittee, RCA, and Wildlife Agencies for review and approval. The project will demonstrate compliance with Section 6.1.3 of the MSHCP when any future land use application requiring discretionary approval is submitted.

RCA Joint Project Review (JPR)

JPR #: 14-04-10-01

Date: 5/9/14

- c. Section 6.3.2: The project site is located within a Criteria Area Species Survey Area (CASSA) for Davidson's saltscale, Parish's brittlescale, thread-leaved brodiaea, smooth tarplant, round-leaved filaree, Coulter's Goldfields, and little mousetail. As previously mentioned, the project consists of a General Plan Amendment with no development proposed at this time. Per Riverside County Resolution No. 2013-111, MSHCP required habitat assessments and surveys shall not be required until a land use application is submitted to the County. When a specific development is proposed, a habitat assessment shall be conducted by a qualified biologist to determine whether suitable habitat for the above mentioned CASSA species are present, and if so, focused surveys during the appropriate blooming period would be warranted. Should avoidance of 90% of the long-term conservation value areas cannot be accomplished for any of the above mentioned CASSA species, then a DBESP shall be prepared and submitted along with the JPR, to the Permittee, RCA, and Wildlife Agencies for review and approval. The project site is also located within an Additional Survey Needs and Procedures Area for burrowing owl. When a specific development is proposed, a habitat assessment shall be conducted by a qualified biologist to determine whether suitable habitat for burrowing owl are present/absent on site, and if so, focused surveys during the appropriate nesting season is required. If burrowing owls are detected, areas with long term conservation value (generally a minimum of 3 pairs of owls and 35 acres of habitat) are subject to avoidance of 90% of portions of the property that provide for long-term conservation value. If 90% avoidance of areas with long-term conservation value for burrowing owl cannot be met, a DBESP shall be prepared and submitted along with the JPR, to the Permittee, RCA, and Wildlife Agencies for review and approval. If there is no long-term conservation value, the burrowing owls may be relocated. The project will demonstrate compliance with Section 6.3.2 of the MSHCP when any future land use application requiring discretionary approval is submitted.
- d. Section 6.1.4: Future and existing Conservation Areas are located adjacent to the project site. To preserve the integrity of areas dedicated as MSHCP Conservation Areas, the guidelines contained in Section 6.1.4 related to controlling adverse effects for development adjacent to the MSHCP Conservation Area shall be implemented by the Permittee in their actions relative to the project. Specifically, the Permittee should include as project conditions of approval, once a development/entitlement proposal is processed, including the following measures:
- i. Incorporate measures to control the quantity and quality of runoff from the site entering the MSHCP Conservation Area. In particular, measures shall be put in place to avoid discharge of untreated surface runoff from developed and paved areas into MSHCP Conservation Areas.
 - ii. Land uses proposed in proximity to the MSHCP Conservation Area that use chemicals or generate bioproducts, such as manure, that are potentially toxic or may adversely affect wildlife species, Habitat, or water quality shall incorporate measures to ensure that application of such chemicals does not result in discharge to the MSHCP Conservation Area. The greatest risk is from landscaping fertilization overspray and runoff.

RCA Joint Project Review (JPR)

JPR #: 14-04-10-01

Date: 5/9/14

- iii. Night lighting shall be directed away from the MSHCP Conservation Area to protect species within the MSHCP Conservation Area from direct night lighting. Shielding shall be incorporated in project designs to ensure ambient lighting in the MSHCP Conservation Area is not increased.
- iv. Proposed noise-generating land uses affecting the MSHCP Conservation Area shall incorporate setbacks, berms, or walls to minimize the effects of noise on MSHCP Conservation Area resources pursuant to applicable rules, regulations, and guidelines related to land use noise standards.
- v. Consider the invasive, non-native plant species listed in Table 6-2 of the MSHCP in approving landscape plans to avoid the use of invasive species for the portions of the project that are adjacent to the MSHCP Conservation Area. Considerations in reviewing the applicability of this list shall include proximity of planting areas to the MSHCP Conservation Areas, species considered in the planting plans, resources being protected within the MSHCP Conservation Area and their relative sensitivity to invasion, and barriers to plant and seed dispersal, such as walls, topography, and other features.
- vi. Proposed land uses adjacent to the MSHCP Conservation Area shall incorporate barriers, where appropriate, in individual project designs to minimize unauthorized public access, domestic animal predation, illegal trespass, or dumping into the MSHCP Conservation Areas. Such barriers may include native landscaping, rocks/boulders, fencing, walls, signage, and/or other appropriate mechanisms.
- vii. Manufactured slopes associated with the proposed site development shall not extend into the MSHCP Conservation Area.

PROPERTY OWNERS CERTIFICATION FORM

I, VINNIE NGUYEN, certify that on 9/23/2014The attached property owners list was prepared by Riverside County GIS,APN (s) or case numbers GPA00925 ForCompany or Individual's Name Planning Department,Distance buffered 600'

Pursuant to application requirements furnished by the Riverside County Planning Department, Said list is a complete and true compilation of the owners of the subject property and all other property owners within 600 feet of the property involved, or if that area yields less than 25 different owners, all property owners within a notification area expanded to yield a minimum of 25 different owners, to a maximum notification area of 2,400 feet from the project boundaries, based upon the latest equalized assessment rolls. If the project is a subdivision with identified off-site access/improvements, said list includes a complete and true compilation of the names and mailing addresses of the owners of all property that is adjacent to the proposed off-site improvement/alignment.

I further certify that the information filed is true and correct to the best of my knowledge. I understand that incorrect or incomplete information may be grounds for rejection or denial of the application.

PROPERTY OWNERS CERTIFICATION FORM

I, Matt Fraite, certify that on May 8, 2014

The attached property owners list was prepared by Riverside County

APN (s) or case numbers 6-PA-00975 For

Company or Individual's Name Planning Department

Distance buffered 600'

Pursuant to application requirements furnished by the Riverside County Planning Department, Said list is a complete and true compilation of the owners of the subject property and all other property owners within 600 feet of the property involved, or if that area yields less than 25 different owners, all property owners within a notification area expanded to yield a minimum of 25 different owners, to a maximum notification area of 2,400 feet from the project boundaries, based upon the latest equalized assessment rolls. If the project is a subdivision with identified off-site access/improvements, said list includes a complete and true compilation of the names and mailing addresses of the owners of all property that is adjacent to the proposed off-site improvement/alignment.

I further certify that the information filed is true and correct to the best of my knowledge. I understand that incorrect or incomplete information may be grounds for rejection or denial of the application.

NAME: Matt Fraite

TITLE Manager

ADDRESS: 4080 Lemon Street 2nd Floor

Riverside, Ca. 92502
