provided in writing to the Environmental Programs Department. If it is determined that the project site is occupied by the Burrowing Owl, take of "active" nests shall be avoided pursuant to the MSHCP and the Migratory Bird Treaty Act. However, when the Burrowing Owl is present, relocation outside of the nesting season (March 1 through August 31) by a qualified biologist shall be required. Occupation of this species on the project site may result in the need to revise grading plans so that take of "active" nests is avoided or alternatively, a grading permit may be issued once the species has been actively relocated.

If the grading permit is not obtained within 30 days of the survey a new survey shall be required.

EPD- PHASE DEDICATION

RECOMMND

Prior to the issuance of a grading permit, the applicant shall provide an overlay of the Impact and Conservation Phasing Plan (See Figure 14, of the Multiple Species Habitat Conservation Plan Consistency Report, dated June 13, 2014) on the proposed grading plan. No grading shall be proposed beyond the limits of Phase 1, prior to meeting the conservation requirements of the subsequent phases. The conservation and financial requirements for Phase 1 as described below must be met prior to the issuance of a grading permit.

The Toscana MOU requires dedication of 510 acres (53.1 percent) of the 960 acres for the project as open space. Phase 1 community development will impact 260.7 acres or 57.9 percent of the total development anticipated by the MOU (See Figure 14, of the Multiple Species Habitat Conservation Plan Consistency Report, dated June 13, 2014).

In order to remain consistent with required open space dedication, 57.9 percent of the 510 acres, or 295.3 acres, will need to be dedicated as part of Phase 1 community development. A total of 193.9 acres will be dedicated to the RCA prior to the issuance of a grading permit for Phase 1 community development, resulting in the need for 101.4 acres of additional conservation to bring Phase 1 of the project into rough step. These acres will be provided as part of Phase 2 dedications. In order to ensure that the 101.4 acres are conserved in the event that Phase 2

community development never moves forward, a monetary deposit in an amount to be determined by the RCA shall be placed in escrow by Forestar Toscana, LLC, for the benefit of the RCA until the dedication of property for open space conservation is brought into acreage dedication consistency with community development acreage. Upon dedication of at least 101.4 acres prior to Phase 2 community development, these funds will be released to Forestar Toscana, LLC. If the 101.4 acre dedication has not occurred within 5 years of the issuance of the Phase 2 grading permit, these funds shall be released to RCA for use in acquiring open space lands.

This condition shall not be cleared until the RCA has accepted the lands and the monetary deposit has been placed in escrow. The RCA shall have final discretion as to whether they will accept lands encumbered by the easements listed below.

Phase 1 Dedication

Dedication of 193.9 acres of land in Phase 1 will include PAs 26B, 26C, 26F and 26G, in addition to the 70.5 acres of land already dedicated in PA 26A. The 101.4 acres required to bring the project back into rough step will be met through dedication of 261.6 acres subsequent to the initial dedications noted above. Certain easements will be included in the dedicated parcels, including:

- oAn existing 60-foot access easement over the existing dirt road known as El Hermano Road in PA 26B;
- oA proposed 20-foot easement for the use and maintenance of the Regional Trail in PA 26A, 26B and 26C;
- oAn existing 40-foot access easement across PA 26C for access to APNs 290-070-018 and -019;
- oProposed slope maintenance easements for grading of Temescal Canyon Road in PA 26B in favor of County Department of Transportation; and
- oProposed maintenance easements in favor County Department of Transportation for drainage outfall structures in PA 26B and 26F.

There will be approximately 9.7 acres of temporary impacts for construction of the channel, grade control structures, slopes along Temescal Canyon Road, and grading as part of the overall habitat restoration effort.

Phase 2 Dedication

Dedication of 261.6 acres of open space land with Phase 2 community development will include PAs 26E and 26H and a

portion of 26D.

Phase 3 Dedication

Dedication of 88.7 acres of open space land with Phase 3 community development will include the remaining portion PA 26D. Certain easements will be included in the dedicated parcels (Figure 14c), including:

oA proposed 30-foot easement over the existing dirt road known as Spanish Hills Drive for purposes of emergency access for the community of Spanish Hills. Maintenance of the road as a dirt emergency access road shall be the responsibility of the Toscana HOA;

oA proposed 30-foot easement over the existing dirt road known as Diamondback Road for purposes of access to existing residences in the northeast quadrant of the Spanish Hills neighborhood immediately west of the Phase 3 open space dedication. This road shall be maintained as a dirt access road by owners of the benefitted APNs.

60.EPD. 4 EPD-GENERAL LANDSCAPING RECOMMND

Prior to the issuance of a grading permit, the landscape plan shall be submitted to the Riverside County Environmental Programs Division for review and approval. In accordance with the EIR, no species on List 6.2 of the MSHCP shall be utilized on the site, within 500 feet of conservation openspace (including any hydroseed mix used for interim erosion control) for consistency with Section 6.1.4 of the MSHCP. Mitigation measure BIOL-8 states that landscaping adjacent to natural open space shall include native trees that will provide canopy for birds and wildlife use as habitat and as a movement corridor.

60.EPD. 6 EPD-NESTING BIRDS RECOMMND

The clearing of upland habitat shall occur outside of the bird breeding season (February 1 to August 31), unless a qualified biologist demonstrates to the satisfaction of the County that all nesting is complete through completion of a Nesting Bird Clearance Survey. A Nesting Bird Clearance Survey report shall be submitted to the Riverside County Environmental Programs Division for review and approval prior to initiating clearing and grubbing during the breeding season. Clearing of upland vegetation outside of the bird breeding season will not require a nesting bird clearance survey.

EPD-CONSTRUCTION MONITORING

RECOMMND

Mitigation measure BIOL-10 requires a qualified biological monitor to conduct a training session for project personnel prior to grading. Training shall include a description of species of concern, habitats, general provisions of the ESA and the MSHCP, and penalties associated with violating the ESA. The training shall also include a discussion of the general measures being implemented to conserve the species of concern.

Prior to grading permit issuance a qualified biological monitor shall be contracted to provide biological monitoring of the grading and construction activities. A work plan shall be submitted to the EPD to review and approve, from the qualified biological monitor that may include but not be limited to Best Management Practices (BMPs), fencing of Open Space/Conserved Areas, and monitoring reports. The applicant must provide evidence that the qualified biologist has reviewed all construction plans and proposed activities to minimize impacts to any sensitive species and habitats. The biological monitor must maintain a copy of the grading plans and the grading permit at all times while on the project site. The EPD may require additional documentation in the form of biological reports and/or site visit(s) to confirm completion. Please contact EPD for further information. The monitor shall ensure the limits of disturbance are clearly marked, specifically with the upstream and downstream limits, plus lateral limits of disturbance adjacent to streams.

The monitor shall oversee construction activities for the duration of the project to ensure that practicable measures are being employed to avoid incidental impacts to habitat and species of concern outside of the project footprint.

EPD-RIP/RIV PLAN

RECOMMND

Prior to the issuance of a grading permit, a biologist who holds an MOU with the County of Riverside shall submit an updated version of the document titled, Toscana Specific Plan Amendment No. 1 Mitigation Plan (HELIX 2014) incorporating wildlife agency requirement. The document shall be submitted to the Riverside County Environmental Programs Division for final review and approval. The plan shall include financial assurances. The following language was taken directly from the General Biological Report. Mitigation for impacts to Riparian (vegetated) resources, with the exception of tamarisk scrub, will be at a 3:1

ratio for both temporary and permanent impacts. The Riverine resources (unvegetated streambed), disturbed wetland, and tamarisk scrub will be mitigated at a 1:1 ratio (Table 14). Approximately 17.2 acres of mitigation will occur on site per the Toscana Specific Plan Amendment No. 1 Mitigation Plan (HELIX 2014), with the remainder occurring through purchase of credits from an in-lieu fee program or mitigation bank, or other mitigation method as approved by the County and other resource agencies. Mitigation for unavoidable impacts to Riparian/Riverine areas will be biologically equivalent to resources being impacted by the proposed project. Mitigation measures to minimize impacts to waters include:

- oUse of standard BMPs to minimize the impacts during construction (see also Section 5.6.1 above).
- oConstruction-related equipment will be stored in upland areas, outside of drainages except as required by project design (restoration, trash removal, etc.).
- oSource control and treatment control BMPs will be implemented to minimize the potential contaminants that are generated during and after construction. Source control BMPs include landscape planning, roof runoff controls, trash storage areas, use of alternative building materials, and education of future tenants and residents. Treatment control BMPs include detention basins, vegetated swales (bio-swales), drain inlets, and vegetated buffers. Water quality BMPs will be implemented throughout the project to capture and treat contaminants (see also Section 5.6.1 above).
- oTo avoid attracting predators during construction, the project shall be kept clean of debris to the extent possible. All food-related trash items shall be enclosed in sealed containers and regularly removed from site.
- oEmployees shall strictly limit their activities, vehicles, equipment and construction material to the proposed project footprint, staging areas, and designated routes of travel.
- oConstruction limits shall be fenced with orange snow screen and exclusion fencing should be maintained until the completion of construction activities.

Specific Plan #327 Amendment #1, Tentative Tract Map #36593, 36643, Change of Zone #7807
(Riv 15 PM 30.94)

Mr. Straite,

We have completed our review for the above mentioned proposal a Schedule A subdivision of 206,60 acres into six hundred and one (601) residential lots. SPA propose to maintain the maximum unit count of 1,443 as previous approved for the SP, but reduces the residential acreage from 353.3 acres to 300.7 acres. Project is located northerly of Temescal Canyon Road and Interstate-15, southerly of Skyline Road.

As the owner and operator of the State Highway System (SHS), it is our responsibility to coordinate and consult with local jurisdictions when proposed development may impact our facilities. As the responsible agency under the California Environmental Quality Act (CEQA), it is also our responsibility to make recommendations to offset associated impacts with the proposed project. Although the project is under the jurisdiction of the County of Riverside due to the Project's potential impact to State facilities it is also subject to the policies and regulations that govern the SHS.

We recommend the following to be provided:

Traffic Study

- A Traffic Impact Study (TIS) is necessary to determine this proposed project's near-term and long-term impacts to the State facilities and to propose appropriate mitigation measures. The study should be based on Caltrans' *Guide for the Preparation of Traffic Impact Studies (TIS)* which is located at the following website:

http://www.dot.ca.gov/hq/tpp/offices/ocp/igr_ceqa_files/tisguide.pdf

Minimum contents of the traffic impact study are listed in Appendix "A" of the TIS guide.

"Caltrans improves mobility across California"

- The data used in the TIS should not be more than 2 years old.
- The geographic area examined in the traffic study should include as a minimum all regionally significant arterial system segments and intersections, including State highway facilities where the project will add over 100 peak hour trips. State highway facilities that are experiencing noticeable delays should be analyzed in the scope of the traffic study for projects that add 50 to 100 peak hour trips.
- Traffic Analysis Scenarios should clearly be exhibited as exiting, existing + project, existing + project + cumulative, and existing + project + cumulative + ambient growth.
- Caltrans endeavors that any direct and cumulative impacts to the State highway system be eliminated or reduced to a level of insignificance pursuant to the California Environmental Quality Act (CEQA) and National Environmental Policy Act (NEPA) standards.
- The LOS for operating State highway facilities is based upon Measures of Effectiveness (MOE) identified in the Highway Capacity Manual (HCM). Caltrans endeavors to maintain a target LOS at the transition between LOS "C" and LOS "D" on State highway facilities; however, Caltrans acknowledges that this may not always be feasible and recommends that the lead agency consult with Caltrans to determine the appropriate target LOS. If an existing State highway facility is operating at less than this target LOS, the existing MOE should be maintained. In general, the region-wide goal for an acceptable LOS on all freeways, roadway segments, and intersections is "D". For undeveloped or not densely developed locations, the goal may be to achieve LOS "C".
- Clearly indicate LOS with and without improvements.
- It is recommended that the Synchro Analysis includes all intersections from the Project site to the proposed study areas. A PHF of 0.92 in urban areas is recommended to be used in the Synchro Analysis.
- All freeway entrance and exit ramps where a proposed project will add a significant number of peak-hour trips that may cause any traffic queues to exceed storage capacities should be analyzed. If ramp metering is to occur, a ramp queue analysis for all nearby Caltrans metered on-ramps is required to identify the delay to motorists using the on-ramps and the storage necessary to accommodate the queuing. The effects of ramp metering should be analyzed in the traffic study. For metered freeway ramps, LOS does not apply. However, ramp meter delays above 15 minutes are considered excessive.
- Proposed improvements should be exhibited in preliminary drawings that indicate the LOS with improvements.

- **Submit a hard copy of all Traffic Impact Analysis documents and an electronic Synchro Analysis file.**

Encroachment Permit Requirements

Issuance of a Caltrans Encroachment Permit will be required prior to any construction within State R/W. In addition, all work undertaken within SR 18 R/W shall be in compliance to all current design standards, applicable policies, and construction practices. BOARD RULES

Requests to Address Board on "Agenda" Items:

You may request to be heard on a published agenda item. Requests to be heard must be submitted to the Clerk of the Board before the scheduled meeting time.

Requests to Address Board on items that are "NOT" on the Agenda:

Notwithstanding any other provisions of these rules, member of the public shall have the right to address the Board during the mid-morning "Oral Communications" segment of the published agenda. Said purpose for address must pertain to issues which are under the direct jurisdiction of the Board of Supervisors. YOUR TIME WILL BE LIMITED TO THREE (3) MINUTES.

Power Point Presentations/Printed Material:

Speakers who intend to conduct a formalized Power Point presentation or provide printed material must notify the Clerk of the Board's Office by 12 noon on the Monday preceding the Tuesday Board meeting, insuring that the Clerk's Office has sufficient copies of all printed materials and at least one (1) copy of the Power Point CD. Copies of printed material given to the Clerk (by Monday noon deadline) will be provided to each Supervisor. If you have the need to use the overhead "Elmo" projector at the Board meeting, please insure your material is clear and with proper contrast, notifying the Clerk well ahead of the meeting, of your intent to use the Elmo.

Individual Speaker Limits:

Individual speakers are limited to a maximum of three (3) minutes. Please step up to the podium when the Chairman calls your name and begin speaking immediately. Pull the microphone to your mouth so that the Board, audience, and audio recording system hear you clearly. Once you start speaking, the "green" podium light will light. The "yellow" light will come on when you have one (1) minute remaining. When you have 30 seconds remaining, the "yellow" light will begin flash, indicating you must quickly wrap up your comments. Your time is up when the "red" light flashes. The Chairman adheres to a strict three (3) minutes per speaker. **Note: If you intend to give your time to a "Group/Organized Presentation", please state so clearly at the very bottom of the reverse side of this form.**

Group/Organized Presentations:

Group/organized presentations with more than one (1) speaker will be limited to nine (9) minutes at the Chairman's discretion. The organizer of the presentation will automatically receive the first three (3) minutes, with the remaining six (6) minutes relinquished by other speakers, as requested by them on a completed "Request to Speak" form, and clearly indicated at the front bottom of the form.

Addressing the Board & Acknowledgement by Chairman:

The Chairman will determine what order the speakers will address the Board, and will call on all speakers in pairs. The first speaker should immediately step to the podium and begin addressing the Board. The second speaker should take up a position in one of the chamber aisles in order to quickly step up to the podium after the preceding speaker. This is to afford an efficient and timely Board meeting, giving all attendees the opportunity to make their case. Speakers are prohibited from making personal attacks, and/or using coarse, crude, profane or vulgar language while speaking to the Board members, staff, the general public and/or meeting participants. Such behavior, at the discretion of the Board Chairman may result in removal from the Board Chambers by Sheriff Deputies.
