MAP- PROJECT DESCRIPTION

RECOMMND

The land division hereby permitted is for a Schedule "A" subdivision of 168.33 acres into 171 residential lots on 79.83 acres, two (2) water quality/detention basins on 5.26 acres, four (4) park sites on 3.78 acres, and twenty one (21) open space lots encompassing 50.15 acres. In addition, 29.31 acres will be dedicated for on-site infrastructure development (Streets "A" through "R"). Lot sizes for the proposed residential units will range from 14,010 square feet to 116,073 square feet with a minimum lot size of 12,101 square feet.

The first water quality/detention basin will be located within the central north section of the project area on 2.96 acres (Lot 172). The second basin will be located within the northwestern section of the project area on 2.33 acres (Lot 173).

The designated park areas, which encompass a total of 3.78 acres, will be located evenly throughout the project area. Within the northern portion of the project site, a 0.97 acre park will be located on Lot 174, a 3.78 acre park on lot 175 located within the eastern area of the site, a 0.68 acre park on lot 177 within the southeast, and a 0.89 park on Lot 176 which will be located within the southern section of the project site. The twenty-two (22) designated open space lots will be dedicated for community entries, common landscaped areas, and manufactured slopes.

MAP - OBEY ALL GDG REGS

RECOMMND

All grading shall conform to the California Building Code, Ordinance 457, and all other relevant laws, rules, and regulations governing grading in Riverside County and prior to commencing any grading which includes 50 or more cubic yards, the applicant shall obtain a grading permit from the Building and Safety Department.

10.BS GRADE. 4

MAP - DISTURBS NEED G/PMT

RECOMMND

Ordinance 457 requires a grading permit prior to clearing, grubbing, or any top soil disturbances related to construction grading.

RECOMMND

10.BS GRADE. 6 MAP - NPDES INSPECTIONS

Construction activities including clearing, stockpiling, grading or excavation of land which disturbs less than 1 acre and requires a grading permit or construction Building permit shall provide for effective control of erosion, sediment and all other pollutants year-round. The permit holder shall be responsible for the installation and monitoring of effective erosion and sediment controls. Such controls will be evaluated by the Department of Building and Safety periodically and prior to permit Final to verify compliance with industry recognized erosion control measures.

Construction activities including but not limited to clearing, stockpiling, grading or excavation of land, which disturbs 1 acre or more or on-sites which are part of a larger common plan of development which disturbs less than 1 acre are required to obtain coverage under the construction general permit with the State Water Resources Control Board. You are required to provide proof of WDID# and keep a current copy of the storm water pollution prevention plan (SWPPP) on the construction site and shall be made available to the Department of Building and Safety

Year-round, Best Management Practices (BMP's) shall be maintained and be in place for all areas that have been graded or disturbed and for all material, equipment and/or operations that need protection. Stabilized Construction Entrances and project perimeter linear barriers are required year round. Removal BMP's (those BMP's which must be temporarily removed during construction activities) shall be in place at the end of each working day.

Monitoring for erosion and sediment control is required and shall be performed by the QSD or QSP as required by the Construction General Permit. Stormwater samples are required for all discharge locations and projects may not exceed limits set forth by the Construction General Permit Numeric Action Levels and/or Numeric Effluent Levels. A Rain Event Action Plan is required when there is a 50% or greater forecast of rain within the 48 hours, by the National Weather Service or whenever rain is imminent. The QSD or QSP must print and save records of the precipitation forecast for the project location area from (http://www.srh.noaa.gov/forecast) and must accompany monitoring reports and sampling test data. A Rain gauge is required on site. The Department of Building and Safety will conduct periodic NPDES inspections of the site throughout the recognized storm season to verify compliance with the Construction General Permit and Stormwater ordinances and regulations.

FLOOD RI DEPARTMENT

10.FLOOD RI. 1

MAP FLOOD HAZARD REPORT

RECOMMND

Tract 36475 is a proposal to subdivide an approximately 168-acre site for single family residential lots, park sites, 2 water quality basins and several open space lots. The site is located in the Lake Mathews area, north of Lake Mathews, east of McCallister Street, north of EL Sobrante Road and southwesterly of Van Buren Boulevard. The northerly boundary of the site is adjacent to a portion of the southerly boundary of the Citrus Heights Specific Plan (SP 325A1) and Tract 36390. The primary access to this development is dependent on the street improvements of the Citrus Heights Specific Plan. Tract 36390 is currently (December 2014) in plan check review. Change of Zone 7816 is being processed concurrently with this proposal.

The topography of the area consists of ridges and valleys with natural watercourses that traverse the site. A well-defined watercourse conveys tributary offsite through the southerly-central portion of the site and then flows northwesterly along the westerly boundary of the site. Except for a couple of road crossings, the proposed development appears to avoid any encroachment into this watercourse. Another watershed of approximately 21-acres is tributary to the southeasterly portion of the site. Offsite runoff typically passes around or through the site and does not combined with any untreated onsite runoff.

The development has been designed so onsite drainage is divided into 2 major watersheds. Onsite runoff is collected in catch basins and conveyed in storm drains. During lower intensity storm events, minor flows are intercepted and discharged into a water quality basin. As flow rates increase, larger flows bypass the water quality basin interceptor and are conveyed downstream in underground storm drains.

There are two water quality basins proposed with this development. The water quality basin in the north central portion of the site is designed to treat approximately 49-acres of the development. Flows discharged from this basin return to an underground storm drain which eventually connects to a storm drain facility proposed/constructed by Tract 36390. This facility is Line F of Tract 36390 which will be a District maintained facility. The water quality basin located in the northwesterly portion of the site is

Parcel: 270-090-002

GENERAL CONDITIONS

10.FLOOD RI. 1 MAP FLOOD HAZARD REPORT (cont.)

RECOMMND

designed to treat approximately 71-acres of the development. The flows from this basin are discharged into a natural watercourse located along the westerly boundary of the site. Both basins must be sized appropriately if any offsite flows are comingled with untreated onsite runoff.

No additional mitigation for increased runoff due to this development is required because all onsite and tributary flows will pass through Tract 36390 which flows into the District's Harrison Dam (Project No. 1-0-0040). However, if the drainage facilities of Tract 36390 have not been designed to account for the development of Tract 36475, additional mitigation to reduce the flow rates so the designed flow rates for the downstream facilities are not be exceeded.

The Transportation Department is reviewing the preliminary Water Quality Management Plan (WQMP). Since one of the basin discharges into a future District maintained facility, the District will review the final WQMP for this development.

The project site is located in the Southwest Riverside Area Drainage Plan (ADP) where fees have been adopted by the Board of Supervisors.

10.FLOOD RI. 2

MAP SUBMIT FINAL WOMP

RECOMMND

A copy of the final project specific Water Quality Management Plan (WQMP) shall be submitted to the District for review and approval. A copy of the preliminary project specific WQMP approved by the Transportation Department, including any supporting hydrological and hydraulic calculations, shall be included with the first review of the final WOMP.

MAP 10 YR CURB - 100 YR ROW

RECOMMND

The 10 year storm flow shall be contained within the curb and the 100 year storm flow shall be contained within the street right of way. When either of these criteria is exceeded, additional drainage facilities shall be installed. The property shall be graded to drain to the adjacent street or an adequate outlet.

MAP PERP DRAINAGE PATTERNS

RECOMMND

The property's street and lot grading shall be designed in a manner that perpetuates the existing natural drainage patterns with respect to tributary drainage areas, outlet points and outlet conditions. Otherwise, a drainage easement shall be obtained from the affected property owners for the release of concentrated or diverted storm flows. A copy of the recorded drainage easement shall be submitted to the District for review.

10.FLOOD RI. 8

MAP COORDINATE DRAINAGE DESIGN

RECOMMND

Development of this property shall be coordinated with the development of adjacent properties to ensure that watercourses remain unobstructed and stormwaters are not diverted from one watershed to another. This may require the construction of temporary drainage facilities or offsite construction and grading. A drainage easement shall be obtained from the affected property owners for the release of concentrated or diverted storm flows. A copy of the recorded drainage easement shall be submitted to the District for review.

The subdivider shall record sufficient documentation to advise purchasers of any lot within the subdivision that the owners of individual lots are responsible for the maintenance of the drainage facility within the drainage easements shown on the final map.

10.FLOOD RI. 11

MAP MAJOR FACILITIES

RECOMMND

Major flood control facilities are being proposed. These shall be designed and constructed to District standards including those related to alignment and access to both inlets and outlets. The applicant shall consult the District early in the design process regarding materials, hydraulic design, and transfer of rights of way.

10.FLOOD RI. 16 MAP WATERS OF THE US (NO FEMA)

RECOMMND

A portion of the proposed project may affect "waters of the United States", "wetlands" or "jurisdictional streambeds". Therefore, a copy of appropriate correspondence and necessary permits, or correspondence showing the project to be exempt, from those government agencies from which approval is required by Federal or State law (such as Corps of Engineers 404 permit or Department of Fish and Game 1603 agreement) shall be provided to the District prior to the recordation of the final map.

All Regulatory Permits (and any attachments thereto such as Habitat Mitigation and Monitoring Plans, Conservation Plans/Easements) to be secured by the Developer shall be submitted to the District for review. The terms of the Regulatory Permits shall be approved by the District prior to improvement plan approval, map recordation or finalization of the Regulatory Permits. There shall be no unreasonable constraint upon the District's ability to operate and maintain the flood control facility to protect public health and safety.

10.FLOOD RI. 18 MAP WQMP ESTABL MAINT ENTITY

RECOMMND

This project proposes BMP facilities that will require maintenance by a public agency or homeowner's association. To ensure that the public is not unduly burdened with future costs, prior to final approval or recordation of this case, the District will require an acceptable financial mechanism be implemented to provide for maintenance of treatment control BMPs in perpetuity. This may consist of a mechanism to assess individual benefiting property owners, or other means approved by the District. The site's treatment control BMPs must be shown on the project's improvement plans - either the street plans, grading plans, or landscaping plans. The type of improvement plans that will show the BMPs will depend on the selected maintenance entity.

10.FLOOD RI. 21 MAP BMP MAINTENANCE & INSPECT

RECOMMND

The CC&R's for the development's Home/Property Owners Association (HOA/POA) shall contain provisions for all privately owned structural best management practices (BMPs) to be inspected, and if required, cleaned no later than October 15 each year. The CC&R's shall identify the entity that will inspect and maintain all structural BMPs

MAP - GEO02350

RECOMMND

County Geologic Report (GEO) No. 2350, submitted for this project (TR36475) was prepared by Alta California Geotechnical Inc. and is entitled: "Preliminary Geotechnical Investigation, Citrus Heights II Project, County of Riverside, California", dated June 28, 2013.

GEO02350 concluded:

- 1. Active faults are not known to exist within the project.
- 2. The potential for fault surface rupture on the subject site is unlikely.
- 3. The subject site has a very low potential of liquefaction upon completion of grading.
- 4. Upon completion of Alta's recommended remedial grading, the potential for dry sand settlement to occur onsite will be considered very low.
- 5. There is a potential for hydroconsolidation in the alluvium, colluvium, and older alluvium onsite.

10. GENERAL CONDITIONS

10.PLANNING. 1

MAP - GEO02350 (cont.)

RECOMMND

- 6. Seismically induced landsliding is not anticipated to pose a danger to the site.
- 7. The potential for rockfall will be very unlikely upon the completion of grading.
- 8. Any debris flows are expected to be very minor and to be limited.
- 9.Cut slopes within bedrock are anticipated to be stable as designed.
- 10. Seiche should not affect the proposed development.
- 11. The potential for tsunami to affect the site is nil.

GEO02350 recommended:

- 1.Complete removals of any artificial fill, topsoil, alluvium, colluviums, older alluvium or very highly weathered bedrock should be conducted to exposed competent bedrock.
- 2.Brow ditches at the top of cut slopes to control potential debris flows.

GEO No. 2350 satisfies the requirement for a fault study for Planning/CEQA purposes. GEO No. 2350 is hereby accepted for Planning purposes. Engineering and other Uniform Building Code parameters were not included as a part of this review or approval. This approval is not intended and should not be misconstrued as approval for grading permit. Engineering and other building code parameters should be reviewed and additional comments and/or conditions may be imposed by the City upon application for grading and/or building permits.

10.PLANNING. 2

MAP - LOW PALEO

RECOMMND

According to the County's General Plan, this site has been mapped as having a "Low Potential" for paleontological resources. This category encompasses lands for which previous field surveys and documentation demonstrates a low potential for containing significant paleontological resources subject to adverse impacts. As such, this project is not anticipated to require any direct mitigation

for paleontological resources. However, should fossil remains be encountered during site development:

- 1.All site earthmoving shall be ceased in the area of where the fossil remains are encountered. Earthmoving activities may be diverted to other areas of the site.
- 2. The owner of the property shall be immediately notified of the fossil discovery who will in turn immediately notify the County Geologist of the discovery.
- 3. The applicant shall retain a qualified paleontologist approved by the County of Riverside.
- 4. The paleontologist shall determine the significance of the encountered fossil remains.
- 5.Paleontological monitoring of earthmoving activities will continue thereafter on an as-needed basis by the paleontologist during all earthmoving activities that may expose sensitive strata. Earthmoving activities in areas of the project area where previously undisturbed strata will be buried but not otherwise disturbed will not be monitored. The supervising paleontologist will have the authority to reduce monitoring once he/she determines the probability of encountering any additional fossils has dropped below an acceptable level.
- 6. If fossil remains are encountered by earthmoving activities when the paleontologist is not onsite, these activities will be diverted around the fossil site and the paleontologist called to the site immediately to recover the remains.
- 7. Any recovered fossil remains will be prepared to the point of identification and identified to the lowest taxonomic level possible by knowledgeable paleontologists. The remains then will be curated (assigned and labeled with museum repository fossil specimen numbers and corresponding fossil site numbers, as appropriate; places in specimen trays and, if necessary, vials with completed specimen data cards) and catalogued, an associated specimen data and corresponding geologic and geographic site data will be archived (specimen and site numbers and corresponding data entered into appropriate museum repository catalogs and computerized data bases) at the museum repository by a

MAP - PDA04833

RECOMMND

County Archaeological Report (PDA) No. 4833 submitted for this project (TR36475) was prepared by Brian F. Smith and Associates and is entitled: "A Phase 1 and Phase II Cultural Resource Assessment for the Citrus Heights II Project", dated August 26, 2013. This report was not accepted by the County Archaeologist and report comments (request for revisions) were requested and sent to the consultant January 15, 2014.

Revised County Archaeological Report (PDA) No. 4833R1 submitted for this same project, prepared by the same aforementioned company and individual and bearing the same title, is dated March 13, 2014. This report was received on March 20, 2014 and accepted by the County Archaeologist on the same day.

PDA04833R1 documented six prehistoric sites, one prehistoric isolate and one historic site. Phase II significance testing was conducted at each site with the conclusion that none of these resources represent significant cultural resources per CEQA.

PDA04833R1 recommends a cultural resource Mitigation Monitoring and Reporting Program (MMRP) be included as a condition of approval for this project.

RECOMMND

The developer/permit holder or any successor in interest shall comply with the following for the life of this project:

Human remains require special handling, and must be treated with appropriate dignity. Pursuant to State Health and Safety Code Section 7050.5, if human remains are encountered, no further disturbance shall occur until the County Coroner has made the necessary findings as to origin. Specific actions must take place pursuant to CEQA Guidelines °15064.5e, State Health and Safety Code Section 7050.5 and Public Resource Code (PRC) °5097.98. In the event of the accidental discovery or recognition of any human remains in any location other than a dedicated cemetery, the following procedures shall be followed: a) There shall be no further excavation or disturbance of the site or any nearby area reasonably suspected to overlie adjacent human remains until:

- i) A County Official is contacted.
- ii) The County Coroner is contacted to determine that no investigation of the cause of death is required, and If the Coroner determines the remains are Native American:
- iii) The Coroner shall contact the Native American Heritage Commission within 24 hours.
- b) The Commission shall identify the person or persons it believes to be the most likely descended from the deceased Native American.
- c) The Most Likely Descendent (MLD) may make recommendations to the landowner or the person responsible for the excavation work, for the treatment of human remains and any associated grave goods as provided in PRC °5097.98.
- d) Under the following conditions, the landowner or his authorized representative shall rebury the Native American human remains and associated grave goods on the property in a location not subject to further disturbance:
- i) The Commission is unable to identify a MLD or the MLD failed to make a recommendation within 24 hours after being notified by the commission.

RECOMMND

The developer/permit holder or any successor in interest shall comply with the following for the life of this project:

- 1) If during ground disturbance activities, cultural resources are discovered that were not assessed by the archaeological reports and/or environmental assessment conducted prior to project approval, the following procedures shall be followed. A cultural resources site is defined, for this condition, as being three or more artifacts in close association with each other, but may include fewer artifacts if the area of the find is determined to be of significance due to it sacred or cultural importance.
- a).All ground disturbance activities within 100 feet of the discovered cultural resource shall be halted until a meeting is convened between the developer, the project archaeologist, the Native American tribal representative (or other appropriate ethic/cultural group representative), and the Planning Director to discuss the significance of the find.
- b) At the meeting, the significance of the discoveries shall be discussed and after consultation with the Native American tribal (or other appropriate ethnic/cultural group representative) and the archaeologist, a decision is made, with the concurrence of the Planning Director, as to the appropriate mitigation (documentation, recovery, avoidance, etc) for the cultural resource.
- c) Further ground disturbance shall not resume within the area of the discovery until an agreement has been reached by all parties as to the appropriate preservation or mitigation measures.

MAP - STD INTRO 3 (ORD 460/461)

RECOMMND

With respect to the conditions of approval for the referenced tentative exhibit, the land divider shall provide all street improvements, street improvement plans and/or road dedications set forth herein in accordance with Ordinance 460 and Riverside County Road Improvement Standards (Ordinance 461). It is understood that the tentative map correctly shows acceptable centerline elevations, all existing easements, traveled ways, and drainage courses with appropriate Q's, and that their omission or unacceptablility may require the map to be resubmitted for further consideration. These Ordinances and all conditions of approval are essential parts and a requirement occurring in ONE is as binding as though occurring in all. All questions regarding the true meaning of the conditions shall be referred to the Transportation Department.

RECOMMND

The land divider shall accept and properly dispose of all off-site drainage flowing onto or through the site. In the event the Transportation Department permits the use of streets for drainage purposes, the provisions of Article XI of Ordinance No. 460 will apply. Should the quantities exceed the street capacity or the use of streets be prohibited for drainage purposes, the subdivider shall provide adequate drainage facilities and/or appropriate easements as approved by the Transportation Department.

10.TRANS. 5

MAP - TS/CONDITIONS

RECOMMND

The Transportation Department has reviewed the traffic study submitted for the referenced project. The study has been prepared in accordance with County-approved guidelines. We generally concur with the findings relative to traffic impacts.

The General Plan circulation policies require a minimum of Level of Service 'C', except that Level of Service 'D' may be allowed in community development areas at intersections of any combination of secondary highways, major highways, arterials, urban arterials, expressways or state highways and ramp intersections.

The study indicates that it is possible to achieve adequate levels of service for the following intersections based on the traffic study assumptions.

The declaration of covenants, conditions and restrictions submitted for review shall a) provide for a minimum term of 60 years, b) provide for the establishment of a property owner's association comprised of the owners of each individual lot or unit as tenants in common, c) provide for the ownership of the common area by either the home owner's association (HOA) or the owners of each individual lot or unit as tenants in common, and d) contain the following provisions verbatim:

"Notwithstanding any provision in this Declaration to the contrary, the following provisions shall apply:

The home owners' association (HOA) established herein shall manage and continuously maintain the 'common area', more particularly described on Exhibit 'A', attached hereto, and shall not sell or transfer the 'common area' or any part thereof, absent the prior written consent of the Planning Department of the County of Riverside or the County's successor-in-interest.

The home owners'association (HOA) shall have the right to assess the owners of each individual lot or unit for the reasonable cost of maintaining such 'common area', and shall have the right to lien the property of any such owner who defaults in the payment of a maintenance assessment. An assessment lien, once created, shall be prior to all other liens recorded subsequent to the notice of assessment or other document creating the assessment lien.

This Declaration shall not be terminated, 'substantially' amended, or property deannexed therefrom absent the prior written consent of the Planning Director of the County of Riverside or the County's successor-in-interest. A proposed amendment shall be considered 'substantial' if it affects the extent, usage, or maintenance of the 'common area' established pursuant to the Declaration.

EPD - 30 DAY BURROWING OWL SUR

RECOMMND

Pursuant to Objective 6 and Objective 7 of the Species Account for the Burrowing Owl included in the Western Riverside County Multiple Species Habitat Conservation Plan, within 30 days prior to the issuance of a grading permit, a pre-construction presence/absence survey for the burrowing owl shall be conducted by a qualified biologist and the results of this presence/absence survey shall be provided in writing to the Environmental Programs Department. If it is determined that the project site is occupied by the Burrowing Owl, take of "active" nests shall be avoided pursuant to the MSHCP and the Migratory Bird Treaty Act. However, when the Burrowing Owl is present, relocation outside of the nesting season (March 1 through August 31) by a qualified biologist shall be required. The County Biologist shall be consulted to determine appropriate type of relocation (active or passive) and translocation sites. Occupation of this species on the project site may result in the need to revise grading plans so that take of "active" nests is avoided or alternatively, a grading permit may be issued once the species has been actively relocated.

If the grading permit is not obtained within 30 days of the survey a new survey shall be required.

Treaty Act (MBTA) and California Department of Fish and Wildlife (CDFW) Codes. Since the project supports suitable nesting bird habitat, removal of vegetation or any other potential nesting bird habitat disturbances shall be conducted outside of the avian nesting season (February 1st through August 31st). If habitat must be cleared during the nesting season, a preconstruction nesting bird survey shall be conducted. The preconstruction nesting bird survey must be conducted by a biologist who holds a current MOU with the County of Riverside. The biologist shall prepare and submit a report, documenting the results of the survey, to the Riverside County Planning Department, Environmental Programs Division (EPD) for review and approval. If nesting activity is observed, appropriate avoidance measures shall be adopted to avoid any potential impacts to nesting birds. The nesting bird survey must be completed no more than 30 days prior to any ground disturbance. If ground disturbance does not begin within 30 days of the report date, a second survey must be conducted.

EPD BIO MONITORING

RECOMMND

Biological Monitoring Work Plan Prior to grading permit issuance a qualified biological monitor shall be contracted to provide biological monitoring of the grading and construction activities. A work plan shall be submitted from the biological monitor to the EPD to review and approve, that should include but not be limited to Best Management Practices (BMP), fencing of sensitive areas, and monitoring reports. The applicant must provide evidence that the qualified biologist has reviewed all construction plans and proposed activities to minimize impacts to any sensitive species and habitats. The biological monitor must maintain a copy of the grading plans and the grading permit at all times while on the project site. The EPD may require additional documentation in the form of biological reports and/or site visit(s) to confirm completion. Please contact EPD for further information.

Permanent Fencing Plan Prior to the issuance

Prior to the issuance of a grading permit, the areas mapped as "MSHCP Riparian" and "MSHCP Riverine" and are outside of the mapped project footprint on Exhibit 8 of the document entitled "Determination of Biological Equivalent or Superior Preservation (DBESP) Analysis for Impacts to MSHCP Riparian/Riverine Areas" dated July 17, 2014, updated February 26, 2015 and prepared by Glenn Lukos Associates, Inc. shall be permanently fenced for protection as open space. The fencing shall provide a physical barrier to minimize unauthorized public access, domestic animal predation, illegal trespass or dumping in the delineated riparian area. The fence shall have a minimum height of three feet at its shortest point. Fence posts shall be no more than five feet apart. The fence design shall be such that a sphere with a diameter of three inches cannot pass through the plane of the fence at any point below the minimum height. The fencing plan will be reviewed and approved by the Riverside County Planning Department Environmental Programs Division (EPD). The fence shall not be installed until EPD staff has reviewed and approved the fencing plan. EPD staff shall have sole discretion in determining whether the proposed fencing will adequately protect the conservation area, and whether changes to the proposed fencing and signage plan are required.

MAP - NATIVE AMERICAN MONITOR

RECOMMND

Prior to the issuance of grading permits, the developer/permit applicant shall enter into a contract with a Tribal monitor(s) from the appropriate Native American Tribe(s) who shall be required on-site during all ground disturbing activities. The developer shall submit a copy of a signed contract between the appropriate Tribe and the developer/permit holder for the monitoring of the project, and which addresses the treatment of cultural resources, to the Planning Department and the County Archaeologist. The Native American Monitor(s) shall have the authority to temporarily divert, redirect or halt the ground disturbance activities to allow recovery of cultural resources. Native American groups shall be given a minimum notice of two weeks that a monitor is required. If a monitor is not available, work may continue without the monitor. The Project Archaeologist shall include in the report any concerns or comments that the monitor has regarding the project and shall include as an appendix any written correspondence or reports prepared by the monitor.

- 2) Native American monitoring does not replace any required Cultural Resources monitoring, but rather serves as a supplement for coordination and advisory purposes for all groups' interests only.
- 3) The developer/permit applicant shall not be required to further pursue any agreement for Native American monitoring of this project if after 60 days from the initial attempt to secure an agreement the developer/permit applicant, through demonstrable good faith effort, has been unable to secure said agreement from the Tribe. A good faith effort shall consist of no less than 3 written attempts from the developer/permit applicant to the tribe to secure the required special interest monitoring agreement and appropriate e-mail and telephone contact attempts. Documentation of the effort made to secure the agreement shall be submitted to the County Archaeologist for review and consideration.
- 4) Should repatriation be preferred, it shall not occur until after the Phase IV monitoring report has been submitted to the Riverside County Archaeologist. Should curation be preferred, the developer/permit applicant is responsible for all costs.

Prior to the issuance of a grading permit, the land divider/permit holder shall comply with the provisions of iverside County Ordinance No. 663, which generally requires the payment of the appropriate fee set forth in that ordinance. The amount of the fee required to be paid may vary depending upon a variety of factors, including the type of development application submitted and the applicability of any fee reduction or exemption provisions contained in Riverside County Ordinance No. 663. Said fee shall be calculated on the approved development project which is anticipated to be 168.33 acres (gross) in accordance with the TENTATIVE MAP. If the development is subsequently revised, this acreage amount may be modified in order to reflect the revised development project acreage amount. In the event Riverside County Ordinance No. 663 is rescinded, this condition will no longer be applicable. However, should Riverside County Ordinance No. 663 be rescinded and superseded by a subsequent mitigation fee ordinance, payment of the appropriate fee set forth in that ordinance shall be required.

Re: General Plan Amendment No. 1132

Dear Mr. Straite:

Thank you for inviting us to submit comments on the General Plan Amendment No. 1132. This letter is written on behalf of the Rincon Band of Luiseño Indians. Rincon is submitting these comments concerning your projects potential impact on Luiseño cultural resources.

The Rincon Band has concerns for impacts to historic and cultural resources and the finding of items of significant cultural value that could be disturbed or destroyed and are considered culturally significant to the Luiseño people. This is to inform you, your identified location is within the Aboriginal Territory of the Luiseño people, but is not within Rincon's Historic boundaries. We defer you to the Pechanga Band of Luiseño Indians or Soboba Band of Luiseño Indians who are closer to your project area

Please contact the Native American Heritage Commission and they will assist with a referral to other tribes in the project area.

Thank you for the opportunity to protect and preserve our cultural assets.

Sincerely,

Rose Duro

APPLICATION FOR AMENDMENT TO THE RIVERSIDE COUNTY GENERAL PLAN

If the property is owned by more than one person, attach a separate page that reference the application case number and lists the names, mailing addresses, and phone numbers of all persons having an interest in the real property or properties involved in this application.

The Planning Department will primarily direct communications regarding this application to the person identified above as the Applicant. The Applicant may be the property owner, representative, or other assigned agent.

AUTHORIZATION FOR CONCURRENT FEE TRANSFER

The signature below authorizes the Planning Department and TLMA to expedite the refund and billing process by transferring monies among concurrent applications to cover processing costs as necessary. Fees collected in excess of the actual cost of providing specific services will be refunded. If additional funds are needed to complete the processing of your application, you will be billed, and processing of the application will cease until the outstanding balance is paid and sufficient funds are available to continue the processing of the application. The applicant understands the deposit fee process as described above, and that there will be NO refund of fees which have been expended as part of the application review or other related activities or services, even if the application is withdrawn or the application is ultimately denied.

PROPERTY OWNERS CERTIFICATION FORM

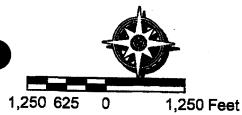

I, VINNIE NGUYEN certify that on 3 23 2015.
The attached property owners list was prepared by <u>Riverside County GIS</u> ,
APN (s) or case numbers TR 36475 For
Company or Individual's Name Planning Department,
Distance buffered 600'
Pursuant to application requirements furnished by the Riverside County Planning Department,
Said list is a complete and true compilation of the owners of the subject property and all other
property owners within 600 feet of the property involved, or if that area yields less than 25
different owners, all property owners within a notification area expanded to yield a minimum of
25 different owners, to a maximum notification area of 2,400 feet from the project boundaries,
based upon the latest equalized assessment rolls. If the project is a subdivision with identified
off-site access/improvements, said list includes a complete and true compilation of the names and
mailing addresses of the owners of all property that is adjacent to the proposed off-site
improvement/alignment.
I further certify that the information filed is true and correct to the best of my knowledge. I
understand that incorrect or incomplete information may be grounds for rejection or denial of the
application.
