BACKGROUND:

Summary

Construction of the Riverside CAC Board Chambers was completed in 2002 as part of the 96,000 square foot addition to the existing Administrative Center. The Board Chamber hosts the highest volume of visitor traffic for public meetings and other county business than any other county facility.

On May 11, 2015, the Board of Supervisors approved Capital Improvement Program funding to include the CAC Security and other miscellaneous projects. Key components of the existing AV technology at the Riverside CAC for the Board Chambers are more than thirteen years old and are in need of replacement. The Riverside CAC Board Chambers AV System Upgrade project will include replacement of the existing analog computers and monitors with High Definition (HD) digital systems, upgrades to the assistive listening system, video conferencing, improved document and presentation capabilities, replacement of the current voting and individual dais-seating monitors and controls.

Impact on Citizens and Businesses

Replacement of the existing audio visual system will benefit the community by providing a more innovative and welcome space to conduct public meetings and other county business
