RECOMMENDED MOTION: (continued)

4. Authorize the Chairman of the Board to execute the Agreement on behalf of the District; and
5. Direct the Clerk of the Board to return four (4) copies of the executed Agreement to the District.

BACKGROUND:

Summary (continued)

Lake Skinner Splash pad was originally designed and built in 2010 by Schmidt Design Group Inc. and has since been a main attraction at the park. Currently, the original rubberized surface in the splash pad area has fallen into disrepair. In an effort to repair the facility and enhance the user experience, the District wishes to develop a plan to replace the rubberized surface and expand the scope of the splash pad including adding an area or elements that will service the special needs community as well as adding a gathering area on the perimeter of the splash pad that will include a concrete pad with shade structure, BBQ area, and lighting. These improvements will maintain the safety of the facility, improve capacity for use and enhance the experience of park guests.

Impact on Citizens and Businesses

The District does not expect any impacts to residents or businesses. The contract is for the design and development of expansion plans to enhance the existing facility which will provide for an improved customer experience.

CEQA Information

The agreement was reviewed and determined to be categorically exempt from CEQA under CEQA Guidelines Section 15061(b) (3) because the proposed consulting agreement will merely start preliminary studies and survey work for a possible site location and design ideas to be conducted by the consultant; therefore, it can be seen with certainty that there is no possibility that the activity in question will have a significant effect on the environment. The Lake Skinner Recreation Area Expansion and Improvements Project had completed Environmental Assessment for the project scope and area of development. The analysis determined the project was qualified for Negative Declaration. The ND was posted and approved on May 12, 2009. The Consultant under this agreement will be siting and design a structure in the area designated and analyzed for zero depth water play structures and associated utilities. The consultant's work will not create any additional impacts that were not addressed in the original ND. It's work is considered to have "no-impact" under CEQA and as such does not require additional analysis.

Contract History and Price Reasonableness

The Request for Proposal (RFP) was issued to the Public on May 20, 2015, advertised on Public Purchase and the County website. A mandatory pre-proposal meeting was held on June 2, 2015 with three design firms attending. On June 17th, a addendum was issued. The RFP closed on July 7, 2015 with one submittal received. The evaluation committee reviewed the submittal and is recommending the award of the design contract to Schmidt Design Group Inc.

4.2 Any claim by the CONSULTANT for additional payment related to this Agreement shall be made in writing by the CONSULTANT within 30 days of when the CONSULTANT has or should have notice of any actual or claimed change in the work, which results in additional and unanticipated cost to the CONSULTANT. The DISTRICT may also terminate this Agreement for default and charge to CONSULTANT any costs incurred by the DISTRICT because of the CONSULTANT's failure to perform.

8.2 CONSULTANT shall establish adequate procedures for self-monitoring and quality control and assurance to ensure proper performance under this Agreement; and shall permit a DISTRICT representative or other regulatory official to monitor, assess, or evaluate CONSULTANT's performance under this Agreement at any time, upon reasonable notice to the CONSULTANT.

DESCRIPTION OF SERVICES

EXECUTIVE SUMMARY

We take pride in working with municipalities to create dynamic spaces that meet the public open-space needs of various communities within California. By approaching each project with an open mind, carefully listening to and understanding our client's vision, and tailoring responses to the attributes specific to each program and site, we are able to develop solutions that achieve the goals of the District while authentically expressing the character of the place. We are eager to work with the Riverside County Regional Park and Open-Space District (District) for the Lake Skinner Expansion Project.

BUILDING ON YOUR VISION

The proposed improvements and renovations for Lake Skinner Expansion Project provide an abundance of opportunities to reinforce the theme already integrated throughout the park. We will first evaluate the entirety of the park and all associated facilities as a cohesive unit, identify unique and creative opportunities, and develop solutions that are responsive to the context of the greater Lake Skinner setting.

We greatly enjoyed working with the District on the award-winning first phase park improvements that were completed in 2010. Five years have passed and we are thrilled to see the regional draw of patrons and the community to Lake Skinner Recreation Area. As the prime consultant for the park improvements and the splash pads, we have the understanding and knowledge of the project and what is required to provide the District with focused solutions that function seamlessly with the existing improvements while continuing the story of the Southwestern Riverside County Multi-Species Habitat (SWRCMS) Reserve, watershed, water conservation, and education.

During the mandatory pre-proposal meeting, we were happy to hear that the park and splash pads are so popular, with hundreds of families attending on almost any given summer weekend. We are eager to work with the District to enhance the park for the proposed opening for spring/summer 2016.

SUSTAINABILITY

Our firm takes pride in being on the leading edge of sustainable design practices. We also believe public

open-space, like Lake Skinner Recreation Area is the best use of our precious water resources. The facilities offer play and enjoyment for individuals of all cultural and socioeconomic backgrounds. We see the opportunity to improve the splash pad to increase water efficiency and also identify opportunities to reduce turf, which could lower the parks' water consumption.

TIMELY DELIVERY

The schedule that the District has set forth for the design and implementation of this project is aggressive but attainable. We will commit the necessary resources to make it a reality. We have proposed to integrate a series of District/consultant progress meetings which will allow for the team to ask questions and receive immediate responses. These meetings will occur throughout the lifecycle of the design process.

We will work closely with the District to identify potential staging areas and haul routes to minimize impacts to available parking, site circulation, and daily users of the regional park. We will also work with the District to identify all existing and planned recreation functions and schedules. Those schedules will be incorporated into the contract documents and would require the contractor to develop a work plan which avoids impacts to scheduled park operations and community events. We also understand your goal to have all improvements complete for the 2016 Temecula Balloon & Wine Festival.

QUALITY CONTROL

Simply said, a project is only as good as the documents used to implement it. For this reason, quality control is woven into the daily operational fabric of our firm. We have institutionalized our quality control system in an integrated Quality Assurance Plan that includes quality control checks, plan review checklists, and a constant quest for perfection. One of the key components is communication. Our team of highly skilled individuals from each consulting firm are in constant communication throughout the design process with Mr. Magnusson the team's Project Manager, and Mr. Justus, the team's QA/QC Principal providing quality control oversight, through a variety of resources including in person meetings, email, and phone. This rigorous and thorough process results in the highest quality construction documents.

SCOPE OF WORK

4.0 SCOPE OF WORK

We have prepared the following detailed scope of work to further illustrate the path we will take to successfully deliver the improvements for the Lake Skinner Expansion project. We place an emphasis on an open and collaborative dialogue between the design team, project management, and District staff. This ensures that District staff is consistently in tune with the most recent project activities while being able to continually provide beneficial feedback to the design team.

4.1 | PROJECT COORDINATION AND SCHEDULE

KICK-OFF MEETING: The design team will hold a kick-off meeting with District staff and stake holders to further define the goals and objectives for the project. The proposed project schedule will be evaluated and refined based on District staff feedback. The permitting process will be established in concert with the project schedule. Protocol for team communication will be outlined to ensure efficient channels of communication throughout the duration of the project.

4.2 | RESEARCH

RESEARCH AND UNDERSTANDING: We will conduct an ongoing review of all available reference materials and documents that apply to the project. This includes previous planning studies, building codes, Title 24 requirements, and as-built documents related to the project.

SITE VISIT: We will conduct an initial site visit with the District to identify project opportunities and constraints.

SUPPLEMENTAL SURVEY: The team will visit the site as-needed to obtain additional survey data and spot elevations necessary to successfully integrate the park expansion project.

4.3 | DESIGN

4.3.1 | SCHEMATIC PLANS:

SCHEMATIC PLANS: Three (3) different schematic plans will be developed for the park expansion based on the District's priority list. The plans will reflect the arrangement of park program elements such as splash pad renovations and expansion, rock climbing wall renovations, shade structures and ADA picnic areas, pedestrian circulation patterns, visual and sound screening, and planting palette. Plans will be on 30" x 40" sheet format.

PREFERRED SCHEMATIC PARK PLAN: A preferred design will be developed for the park based on the selected schematic plan or combination of each of the alternatives. The plan will reflect the preferred arrangement of park program elements based on District comments and direction. Plans will be on 30" x 40" sheet format.

PRELIMINARY GRADING: The design team's civil engineer will prepare a preliminary grading study which corresponds with the preferred schematic park plan. This will also address conceptual site drainage, storage, and water quality treatment as required.

PRELIMINARY LIGHTING: The design team's electrical engineer will work with the team to select appropriate light fixtures. Conceptual lighting layouts will also be incorporated into the preferred schematic park plan.

PRELIMINARY PARK MATERIALS: Preliminary materials will be selected including park paving, synthetic turf, and site furnishings to match the character of the existing park improvements.

MEETINGS: We anticipate a total of four (4) meetings or presentations with District staff throughout the schematic design plan refinement phase.

PROBABLE COSTS OF CONSTRUCTION: A probable cost estimate will be developed that captures the preferred schematic design improvements and will be submitted to the District for review.

DESIGN REFINEMENTS: The design team will make refinements to the schematic design package based on feedback received by District staff. A total of two (2) rounds of review and revisions are anticipated, schedule permitting.

FINAL PRESENTATION: The design team will present the final schematic design to District staff to obtain final approval.

4.3.2 | 30% DESIGN DEVELOPMENT PHASE

g. **IRRIGATION PLANS:** DD level irrigation plans will be developed and will consist of a listing of irrigation system components including irrigation heads and valves to match the existing irrigation system on site (manufacturer and equipment model numbers). The irrigation system will be designed to meet County of Riverside requirements. A water use exhibit including water use calculations will be included.

BASIS OF DESIGN: The design team will prepare a manual that includes all of the proposed materials, fixtures, and finishes for the interior building improvements and exterior site furnishings.

ESTIMATE OF PROBABLE CONSTRUCTION COSTS: Estimate will be updated to reflect any changes in cost resulting from design, materials, or quantity changes.

PROJECT SCHEDULE: We will update the overall project schedule and anticipate the time required for upcoming phases of work.

STAKEHOLDER APPROVALS: The design team will present the final design development package to District and stakeholders. This could potentially include District staff, Temecula Balloon and Wine Festival Committee, and County of Riverside Department of Environmental Health.

CLIENT/CONSULTANT PROGRESS MEETINGS: A total of two (2) meetings are included during the design development phase. We anticipate these coordination meetings will allow the design team to meet with District staff to receive clarifications and direction. This approach will allow for a streamlined and efficient feedback loop.

Project Number: N/A

Project Location: 37701 Warren Road Winchester, California 92596: Riverside County Assessor's Parcel Number: 946-040-004, T7SR2W; Section 1

Description of Project: The Riverside County Regional Park & Open-Space District proposes expand the recreation area's existing zero depth water splash pad by adding a new themed splash pad. The activity under consideration is the approval of a "Consulting Services Agreement" for the location, design and development construction documents for the new splash pad within the Lake Skinner Recreation Area lands. The agreement merely allows for the investigation and consideration of the best use, location, design and development of construction documents. It does not include construction.

Name of Public Agency Approving Project: Riverside County Regional Park & Open-Space District

Name of Person or Agency Carrying Out Project: Riverside County Regional Park & Open-Space District

Exempt Status: California Environmental Quality Act (CEQA) Guidelines, Section 15061 – Review For Exemption

Reasons Why Project is Exempt: The agreement was reviewed and determined to be categorically exempt from CEQA under CEQA Guidelines Section 15061(b) (3) because the proposed consulting agreement will merely start preliminary studies and survey work for a possible site location and design ideas to be conducted by the consultant; therefore, it can be seen with certainty that there is no possibility that the activity in question will have a significant effect on the environment. The Lake Skinner Recreation Area Expansion and Improvements Project had completed Environmental Assessment for the project scope and area of development. The analysis determined the project was qualified for Negative Declaration. The ND was posted and approved on May 12, 2009. The Consultant under this agreement will be siting and design a structure in the area designated and analyzed for zero depth water play structures and associated utilities. The consultant's work will not create any additional impacts that were not addressed in the original ND.
