BOARD OF SUPERVISORS OF THE COUNTY OF RIVERSIDE, STATE OF CALIFORNIA

#### ORDINANCE NO. 779.16 AN ORDINANCE OF THE COUNTY OF RIVERSIDE AMENDING ORDINANCE 779 RELATING TO COUNTY SOLID WASTE FACILITIES AND ESTABLISHING FEES

The Board of Supervisors of the County of Riverside, State of California, ordains as follows:

#### SECTION 1:

This ordinance amends and replaces Ordinance No. 779.15 and any prior version of Ordinance No. 779 in their entirety with the following:

#### Section 1. DEFINITIONS.

The words used in this ordinance shall have the definitions provided in Public Resources Code 40100 et. Seq.

**Section 2. ESTABLISHMENT OF SITES.** Subject to control of the Board of Supervisors, the General Manager-Chief Engineer of the Waste Management Department may designate and operate or control by contract County owned or leased or contracted sites to be used for the public transfer, processing or disposal of solid waste.

**Section 3. REFUSE FROM OUTSIDE OF COUNTY.** Unless so authorized in writing by the General Manager-Chief Engineer of the Waste Management Department or his designated representative, under general policies adopted by the Board, no person shall place, deposit, or dump, or cause to be placed, deposited, or dumped, in or upon any County owned, leased, or contracted transfer station or disposal site in the County, any solid waste originating outside of the County of Riverside, provided however, the General Manager-Chief Engineer of the Waste Management Department has discretion to accept incidental amounts of refuse from outside of Riverside County and near County borders for disposal at County landfills when payment is made according to Appendix A for such incidental refuse.

**Section 4. REGULATIONS.** All County owned, leased, or contracted transfer stations and disposal sites in the County shall be under the supervision of the General Manager-Chief Engineer of the Waste Management Department who shall have the power and the duty to prescribe reasonable regulations regulating the use by the public and the operation of such sites. Such rules shall include, but need not be limited to, the following subjects:

- Days and hours of use.
- Charges for use of sites at times other than regular hours, which shall be sufficient to reimburse the County for equipment, personnel and overhead costs.
- Maximum size of articles and objects being dumped.
- Allocation of various types of waste to specific sites and the placement of waste within any site.
- Prohibition or conditional acceptance of harmful, dangerous or difficult to handle materials, if allowed under the state operating permit, including a reasonable charge for their acceptance, unique handling requirements or assured destruction.
- Prohibition of persons from entering the site for reasons including, but not limited to: unauthorized salvaging of waste and recyclables, attempting to dispose of hazardous waste, loitering, intoxication and other forms of conduct that reduce operational efficiencies and/or increase risk of injury to Department employees and the public.

Except for short-term emergency situations, any regulation fixing days or hours of operation shall be submitted to the Board of Supervisors for approval before taking effect. All regulations prescribed by the General Manager-Chief Engineer of the Waste Management Department shall be filed in his or her office and shall be available for public inspection.

**Section 5. HAZARDOUS WASTE LOAD CHECKING PROGRAM.** All landfills and transfer stations in the County shall implement and maintain a hazardous waste load checking program at each of their solid waste facilities as required by California law (pursuant to Titles 14 and 27, California Code of Regulations); and which program shall also meet the minimum requirements outlined in this ordinance.

- Each solid waste facility operator shall perform random loadchecks across all load types including self-haul residential, business and industrial waste loads, franchise hauler waste loads (including residential, commercial and industrial) to detect hazardous waste before such incoming waste is transferred to, and/or disposed at, the landfill. Such program shall have the objectives of: (1) preventing hazardous waste from being placed in a landfill not permitted to receive such waste and (2) educating and discouraging both facility self-haul customers and franchise waste hauler customers from bringing or sending in such material. The minimum number of loadchecks performed at each solid waste facility shall comply with the following schedule:

#### Landfill/Transfer Station Random Loadcheck Schedule

Average Daily Tonnage Random Samples per Day

0 to 100 tons/day	**
101 to 600 tons/day	6*
601 to 1,000+ tons/day	10*

\* The initial schedule is for a minimum number of "Random Samples per Day" for a minimum of three rotating days per week so arriving customers will not know when they may be inspected. If a problem persists with large quantities of hazardous waste being found at the landfill or transfer station, the Enforcement Agency or the General Manager-Chief Engineer of the Waste Management Department may require the number of "Random Samples per Day" to be applied every day the solid waste facility is open until the problem is deemed corrected.

\*\*Minimum of 6 samples per week - may all be performed on the same day

- An inspection form (which shall be certified for completeness and accuracy by the loadcheck inspector on duty) shall be filled out in its entirety at the time of each loadcheck performed at the solid waste facility. The inspection form shall include the following information, to be filled out at the time of inspection:

- Date and time of inspection
- Loadcheck inspector name, (certification)
- Load type (residential, commercial, industrial)
- Hauler/company name/customer name
- Driver name
- Vehicle type (e.g. Hand Unload, Dump Truck, Side Loader, Front End Loader, or Roll Off)
- License plate number
- Whether or not the load contained prohibited waste

c. When prohibited waste is found, forms shall include the following:

- Load origin (jurisdiction or route number for side loaders and front end loader vehicles, customer/store name and address where picked up for all other vehicle types)
- Hazardous waste found (type/name, class, container size/quantity, volume/weight, unit of gallons or pounds)
- Disposition of material (e.g. picked up by responsible party, returned with customer at time of inspection, solid waste facility assumed responsibility of the material, etc.)

d. Management shall review completed forms at a frequency sufficient to ensure forms are filled out completely and correctly.

e. The General Manager-Chief Engineer of the Waste Management Department or his designated representative and/or a representative of the Enforcement Agency shall have the right to enter the solid waste facilities at any time to audit their load check program's compliance with these standards. These audits shall be limited to four times in any 12 month period and may include three days in which Waste Management Department personnel perform load checks at the facility and one day in which Waste Management Department staff review the facility's written load check program, hazardous waste and universal waste shipping records, facility personnel training records, hazardous waste storage
