BACKGROUND:

Summary (continued)

Microsoft Inc. no longer supports computer workstations and servers that have the outdated XP operating system. Therefore, RCIT is striving to bring all computers that still have the XP operating system compliant as these systems will no longer receive new security updates, fixes, assisted support options or online technical content updates from Microsoft. The county is subject to computer risks and security issues with potential vulnerabilities that will not be addressed by security updates from Microsoft.

Microsoft's end-of-support date was effective July 14, 2015 and the county has approximately 405 Servers and 958 workstations that run on Windows 2003 Servers and the Windows XP Operating System.

The county cannot upgrade or replace these operating systems prior to the indicated deadline, it was decided that for the best interest of the county to seek a vendor that has the technical expertise and resources available to "lock down" the vulnerable systems leveraging Symantec Data Center Security across the county's network and within a reasonable timeframe.

Impact on Residents and Businesses

There is no negative impact on residents.

Contract History and Price Reasonableness

County Purchasing issued RFQ #ITARC-362 on its procurement website, PublicPurchase.com with 39 companies accessing the bid. Through this competitive bid process, two (2) bids were received ranging from \$215,819 to \$372,112. Purchasing and RCIT evaluated the quotations, and the low bidder did not quote for the implementation of the product and therefore was deemed non-responsive. The next responsive/responsible bidder, vCloud submitted a quote of \$372,112 for the total solution which includes the cost for licenses and services as required for deployment and migration.

Purchasing and RCIT recommend the award to vCloud Tech, Inc. as the most responsive/responsible bidder.
