RE: Initiation of Annexation of Rural Properties East of Briggs Road into the City of Menifee

Dear Council Members,

We would respectfully request that the City of Menifee consider annexing the properties contained in the three square mile area bounded by Scott Road on the South, Briggs Road on the West, Leon Road on the East and Old Newport Road on the North.

The homeowners moved to this community to enjoy a rural lifestyle and relied on the fact that the County's General Plan supported and encouraged the keeping of animals and intensive equestrian uses. A recent decision of the Board of Supervisors has put all of this in jeopardy. The Board has allowed a General Plan Amendment application to proceed which proposes 800+/- small urban lots with an aquatic center on 170 acres in the middle of this rural area over the objections of virtually all of the surrounding residents. The home owners living within a 1/2 mile of this project, who have enjoyed this rural area for over a collective 1,100 years, submitted a petition to the Board requesting denial of this project to protect our way of life and property values. The Board's decision to ignore the desires of local residents over the wishes of an out of town developer who lives 100 miles from the site on property that has been owned for less than 6 months is very troubling. There is no support from any of the residents adjacent to this project for the creation of a highly urbanized area in this rural community.

This proposed annexation covers 3 square miles and contains 282 lots with an average lot size of 6 acres. This proposed GPA would construct, on less than 2 percent of the 3 square miles, potentially 800 homes quadrupling the 282 lots that exist today. The proposed GPA creates a highly urbanized housing project that does not allow horses and discourages intensive animal keeping. There are 1000's of small lot subdivision home sites similar to this proposal within 2 miles of this site. The proposal to add more small lots in the last remaining rural area of this community is unwarranted. What reasonable plan places a highly urban use in the middle of a rural area?

Therefore we would request that the City of Menifee consider initiating an annexation of the 3 square miles to protect and preserve this area from urban encroachment, enlarge and enhance the rural areas designated on the City's General Plan and retain the rural natural of this community.

Thank you for your consideration and respectfully submitted,

Sandra L. Slone

There are 1000's of small lot subdivision home sites similar to this proposal within 2 miles of this site. The proposal to add more small lots in the last remaining rural area of this community is unwarranted. What reasonable plan places a highly urban use in the middle of a rural area?

Therefore we would request that the City of Menifee consider initiating an annexation of the 3 square miles to protect and preserve this area from urban encroachment, enlarge and enhance the rural areas designated on the City's General Plan and retain the rural natural of this community.

Thank you for your consideration and respectfully submitted,

RE: Initiation of Annexation of Rural Properties East of Briggs Road into the City of Menifee

Dear Council Members,

We would respectfully request that the City of Menifee consider annexing the properties contained in the three square mile area bounded by Scott Road on the South, Briggs Road on the West, Leon Road on the East and Old Newport Road on the North.

The homeowners moved to this community to enjoy a rural lifestyle and relied on the fact that the County's General Plan supported and encouraged the keeping of animals and intensive equestrian uses. A recent decision of the Board of Supervisors has put all of this in jeopardy. The Board has allowed a General Plan Amendment application to proceed which proposes 800+/- small urban lots with an aquatic center on 170 acres in the middle of this rural area over the objections of virtually all of the surrounding residents. The home owners living within a ½ mile of this project, who have enjoyed this rural area for over a collective 1,100 years, submitted a petition to the Board requesting denial of this project to protect our way of life and property values. The Board's decision to ignore the desires of local residents over the wishes of an out of town developer who lives 100 miles from the site on property that has been owned for less than 6 months is very troubling. There is no support from any of the residents adjacent to this project for the creation of a highly urbanized area in this rural community.

This proposed annexation covers 3 square miles and contains 282 lots with an average lot size of 6 acres. This proposed GPA would construct, on less than 2 percent of the 3 square miles, potentially 800 homes quadrupling the 282 lots that exist today. The proposed GPA creates a highly urbanized housing project that does not allow horses and discourages intensive animal keeping. There are 1000's of small lot subdivision home sites similar to this proposal within 2 miles of this site. The proposal to add more small lots in the last remaining rural area of this community is unwarranted. What reasonable plan places a highly urban use in the middle of a rural area?

Therefore we would request that the City of Menifee consider initiating an annexation of the 3 square miles to protect and preserve this area from urban encroachment, enlarge and enhance the rural areas designated on the City's General Plan and retain the rural natural of this community.

The homeowners moved to this community to enjoy a rural lifestyle and relied on the fact that the County's General Plan supported and encouraged the keeping of animals and intensive equestrian uses. A recent decision of the Board of Supervisors has put all of this in jeopardy. The Board has allowed a General Plan Amendment application to proceed for 800 small urban lots on 170 acres in the middle of this rural area over the objections of virtually all of the surrounding residents. The home owners living within a ½ mile of this project, who have enjoyed this rural area for over a collective 1,100 years, submitted a petition to the Board requesting denial of this project to protect of our way of life and property values. The Board's decision to ignore the desires of local residents over the wishes of an out of town developer who lives 100 miles from the site is very troubling. There are no residents adjacent to this project that will support the creation of a highly urbanized area in this rural community.

This proposed annexation covers 3 square miles and contains 282 lots with an average lot size of 6 acres. This proposed GPA would construct, on less than 2 percent of the 3 square miles, potentially 800 homes quadrupling the 282 lots that exist today. The proposed GPA creates a highly urbanized housing project that does not allow horses and discourages intensive animal keeping. There are 1000's of small lot sub-division home sites similar to this proposal within 2 miles of this site. The proposal to add more small lots in the last remaining rural area of this community is unwarranted. What reasonable plan places a highly urban use in the middle of a rural area?

Therefore we would request that the City of Menifee consider initiating an annexation of the 3 square miles to protect and preserve this area from urban encroachment, enlarge and enhance the rural areas designated on the City's General Plan and retain the rural natural of this community.

Thank you for your consideration and respectfully submitted,

RE: Initiation of Annexation of Rural Properties East of Briggs Road into the City of Menifee

Dear Council Members,

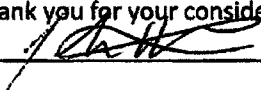

We would respectfully request that the City of Menifee consider annexing the properties contained in the three square mile area bounded by Scott Road on the South, Briggs Road on the West, Leon Road on the East and Old Newport Road on the North.

The homeowners moved to this community to enjoy a rural lifestyle and relied on the fact that the County's General Plan supported and encouraged the keeping of animals and intensive equestrian uses. A recent decision of the Board of Supervisors has put all of this in jeopardy. The Board has allowed a General Plan Amendment application to proceed which proposes 800+/- small urban lots with an aquatic center on 170 acres in the middle of this rural area over the objections of virtually all of the surrounding residents. The home owners living within a 1/2 mile of this project, who have enjoyed this rural area for over a collective 1,100 years, submitted a petition to the Board requesting denial of this project to protect our way of life and property values. The Board's decision to ignore the desires of local residents over the wishes of an out of town developer who lives 100 miles from the site on property that has been owned for less than 6 months is very troubling. There is no support from any of the residents adjacent to this project for the creation of a highly urbanized area in this rural community.

This proposed annexation covers 3 square miles and contains 282 lots with an average lot size of 6 acres. This proposed GPA would construct, on less than 2 percent of the 3 square miles, potentially 800 homes quadrupling the 282 lots that exist today. Dear Council Members,

We would respectfully request that the City of Menifee consider annexing the properties contained in the three square mile area bounded by Scott Road on the South, Briggs Road on the West, Leon Road on the East and Old Newport Road on the North.

The homeowners moved to this community to enjoy a rural lifestyle and relied on the fact that the County's General Plan supported and encouraged the keeping of animals and intensive equestrian uses. A recent decision of the Board of Supervisors has put all of this in jeopardy. The Board has allowed a General Plan Amendment application to proceed which proposes 800+/- small urban lots with an aquatic center on 170 acres in the middle of this rural area over the objections of virtually all of the surrounding residents. The home owners living within a 1/2 mile of this project, who have enjoyed this rural area for over a collective 1,100 years, submitted a petition to the Board requesting denial of this project to protect our way of life and property values. The Board's decision to ignore the desires of local residents over the wishes of an out of town developer who lives 100 miles from the site on property that has been owned for less than 6 months is very troubling. There is no support from any of the residents adjacent to this project for the creation of a highly urbanized area in this rural community.

This proposed annexation covers 3 square miles and contains 282 lots with an average lot size of 6 acres. This proposed GPA would construct, on less than 2 percent of the 3 square miles, potentially 800 homes quadrupling the 282 lots that exist today. The proposed GPA creates a highly urbanized housing project that does not allow horses and discourages intensive animal keeping. There are 1000's of small lot subdivision home sites similar to this proposal within 2 miles of this site. The proposal to add more small lots in the last remaining rural area of this community is unwarranted. What reasonable plan places a highly urban use in the middle of a rural area?

Therefore we would request that the City of Menifee consider initiating an annexation of the 3 square miles to protect and preserve this area from urban encroachment, enlarge and enhance the rural areas designated on the City's General Plan and retain the rural natural of this community.

Thank you for your consideration and respectfully submitted,

Laura M. Peluso

RE: Initiation of Annexation of Rural Properties East of Briggs Road into the City of Menifee

Dear Council Members,

We would respectfully request that the City of Menifee consider annexing the properties contained in the three square mile area bounded by Scott Road on the South, Briggs Road on the West, Leon Road on the East and Old Newport Road on the North.

The homeowners moved to this community to enjoy a rural lifestyle and relied on the fact that the County's General Plan supported and encouraged the keeping of animals and intensive equestrian uses. A recent decision of the Board of Supervisors has put all of this in jeopardy. The Board has allowed a General Plan Amendment application to proceed which proposes 800+/- small urban lots with an aquatic center on 170 acres in the middle of this rural area over the objections of virtually all of the surrounding residents. The home owners living within a 1/2 mile of this project, who have enjoyed this rural area for over a collective 1,100 years, submitted a petition to the Board requesting denial of this project to protect our way of life and property values. The Board's decision to ignore the desires of local residents over the wishes of an out of town developer who lives 100 miles from the site on property that has been owned for less than 6 months is very troubling. There is no support from any of the residents adjacent to this project for the creation of a highly urbanized area in this rural community.

This proposed annexation covers 3 square miles and contains 282 lots with an average lot size of 6 acres. This proposed GPA would construct, on less than 2 percent of the 3 square miles, potentially 800 homes quadrupling the 282 lots that exist today. The proposed GPA creates a highly urbanized housing project that does not allow horses and discourages intensive animal keeping. There are 1000's of small lot subdivision home sites similar to this proposal within 2 miles of this site. The proposal to add more small lots in the last remaining rural area of this community is unwarranted. What reasonable plan places a highly urban use in the middle of a rural area?

Therefore we would request that the City of Menifee consider initiating an annexation of the 3 square miles to protect and preserve this area from urban encroachment, enlarge and enhance the rural areas designated on the City's General Plan and retain the rural natural of this community.

Thank you for your consideration and respectfully submitted,

Randy Williams Date: _____

RE: Initiation of Annexation of Rural Properties East of Briggs Road into the City of Menifee

Dear Council Members,

We would respectfully request that the City of Menifee consider annexing the properties contained in the three square mile area bounded by Scott Road on the South, Briggs Road on the West, Leon Road on the East and Old Newport Road on the North.

The homeowners moved to this community to enjoy a rural lifestyle and relied on the fact that the County's General Plan supported and encouraged the keeping of animals and intensive equestrian uses. A recent decision of the Board of Supervisors has put all of this in jeopardy. The Board has allowed a General Plan Amendment application to proceed which proposes 800+/- small urban lots with an aquatic center on 170 acres in the middle of this rural area over the objections of virtually all of the surrounding residents. The home owners living within a 1/2 mile of this project, who have enjoyed this rural area for over a collective 1,100 years, submitted a petition to the Board requesting denial of this project to protect our way of life and property values. The Board's decision to ignore the desires of local residents over the wishes of an out of town developer who lives 100 miles from the site on property that has been owned for less than 6 months is very troubling. There is no support from any of the residents adjacent to this project for the creation of a highly urbanized area in this rural community.

This proposed annexation covers 3 square miles and contains 282 lots with an average lot size of 6 acres. This proposed GPA would construct, on less than 2 percent of the 3 square miles, potentially 800 homes quadrupling the 282 lots that exist today. The proposed GPA creates a highly urbanized housing project that does not allow horses and discourages intensive animal keeping. There are 1000's of small lot subdivision home sites similar to this proposal within 2 miles of this site. The proposal to add more small lots in the last remaining rural area of this community is unwarranted. What reasonable plan places a highly urban use in the middle of a rural area?

Therefore we would request that the City of Menifee consider initiating an annexation of the 3 square miles to protect and preserve this area from urban encroachment, enlarge and enhance the rural areas designated on the City's General Plan and retain the rural natural of this community.

Thank you for your consideration and respectfully submitted,

There are 1000's of small lot subdivision home sites similar to this proposal within 2 miles of this site. The proposal to add more small lots in the last remaining rural area of this community is unwarranted. What reasonable plan places a highly urban use in the middle of a rural area?

Therefore we would request that the City of Menifee consider initiating an annexation of the 3 square miles to protect and preserve this area from urban encroachment, enlarge and enhance the rural areas designated on the City's General Plan and retain the rural natural of this community.

Thank you for your consideration and respectfully submitted,

Iman Walker

RE: Initiation of Annexation of Rural Properties East of Briggs Road into the City of Menifee

Dear Council Members,

We would respectfully request that the City of Menifee consider annexing the properties contained in the three square mile area bounded by Scott Road on the South, Briggs Road on the West, Leon Road on the East and Old Newport Road on the North.

The homeowners moved to this community to enjoy a rural lifestyle and relied on the fact that the County's General Plan supported and encouraged the keeping of animals and intensive equestrian uses. A recent decision of the Board of Supervisors has put all of this in jeopardy. The Board has allowed a General Plan Amendment application to proceed which proposes 800+/- small urban lots with an aquatic center on 170 acres in the middle of this rural area over the objections of virtually all of the surrounding residents. The home owners living within a 1/2 mile of this project, who have enjoyed this rural area for over a collective 1,100 years, submitted a petition to the Board requesting denial of this project to protect our way of life and property values. The Board's decision to ignore the desires of local residents over the wishes of an out of town developer who lives 100 miles from the site on property that has been owned for less than 6 months is very troubling. There is no support from any of the residents adjacent to this project for the creation of a highly urbanized area in this rural community.

This proposed annexation covers 3 square miles and contains 282 lots with an average lot size of 6 acres. This proposed GPA would construct, on less than 2 percent of the 3 square miles, potentially 800 homes quadrupling the 282 lots that exist today. The proposed GPA creates a highly urbanized housing project that does not allow horses and discourages intensive animal keeping. There are 1000's of small lot subdivision home sites similar to this proposal within 2 miles of this site. The proposal to add more small lots in the last remaining rural area of this community is unwarranted. What reasonable plan places a highly urban use in the middle of a rural area?

Therefore we would request that the City of Menifee consider initiating an annexation of the 3 square miles to protect and preserve this area from urban encroachment, enlarge and enhance the rural areas designated on the City's General Plan and retain the rural natural of this community.

RE: Initiation of Annexation of Rural Properties East of Briggs Road into the City of Menifee

Dear Council Members,

We would respectfully request that the City of Menifee consider annexing the properties contained in the three square mile area bounded by Scott Road on the South, Briggs Road on the West, Leon Road on the East and Old Newport Road on the North.

The homeowners moved to this community to enjoy a rural lifestyle and relied on the fact that the County's General Plan supported and encouraged the keeping of animals and intensive equestrian uses. A recent decision of the Board of Supervisors has put all of this in jeopardy. The Board has allowed a General Plan Amendment application to proceed for 800 small urban lots on 170 acres in the middle of this rural area over the objections of virtually all of the surrounding residents. The home owners living within a ½ mile of this project, who have enjoyed this rural area for over a collective 1,100 years, submitted a petition to the Board requesting denial of this project to protect of our way of life and property values. The Board's decision to ignore the desires of local residents over the wishes of an out of town developer who lives 100 miles from the site is very troubling. There are no residents adjacent to this project that will support the creation of a highly urbanized area in this rural community.

This proposed annexation covers 3 square miles and contains 282 lots with an average lot size of 6 acres. This proposed GPA would construct, on less than 2 percent of the 3 square miles, potentially 800 homes quadrupling the 282 lots that exist today. The proposed GPA creates a highly urbanized housing project that does not allow horses and discourages intensive animal keeping. There are 1000's of small lot sub-division home sites similar to this proposal within 2 miles of this site. The proposal to add more small lots in the last remaining rural area of this community is unwarranted. What reasonable plan places a highly urban use in the middle of a rural area?

Therefore we would request that the City of Menifee consider initiating an annexation of the 3 square miles to protect and preserve this area from urban encroachment, enlarge and enhance the rural areas designated on the City's General Plan and retain the rural natural of this community.

A recent decision of the Board of Supervisors has put all of this in jeopardy. The Board has allowed a General Plan Amendment application to proceed which proposes 800+/- small urban lots with an aquatic center on 170 acres in the middle of this rural area over the objections of virtually all of the surrounding residents. The home owners living within a 1/2 mile of this project, who have enjoyed this rural area for over a collective 1,100 years, submitted a petition to the Board requesting denial of this project to protect our way of life and property values. The Board's decision to ignore the desires of local residents over the wishes of an out of town developer who lives 100 miles from the site on property that has been owned for less than 6 months is very troubling. There is no support from any of the residents adjacent to this project for the creation of a highly urbanized area in this rural community.

This proposed annexation covers 3 square miles and contains 282 lots with an average lot size of 6 acres. This proposed GPA would construct, on less than 2 percent of the 3 square miles, potentially 800 homes quadrupling the 282 lots that exist today. The proposed GPA creates a highly urbanized housing project that does not allow horses and discourages intensive animal keeping. There are 1000's of small lot subdivision home sites similar to this proposal within 2 miles of this site. The proposal to add more small lots in the last remaining rural area of this community is unwarranted. What reasonable plan places a highly urban use in the middle of a rural area?

Therefore we would request that the City of Menifee consider initiating an annexation of the 3 square miles to protect and preserve this area from urban encroachment, enlarge and enhance the rural areas designated on the City's General Plan and retain the rural natural of this community.

RE: Initiation of Annexation of Rural Properties East of Briggs Road into the City of Menifee

Dear Council Members,

We would respectfully request that the City of Menifee consider annexing the properties contained in the three square mile area bounded by Scott Road on the South, Briggs Road on the West, Leon Road on the East and Old Newport Road on the North.

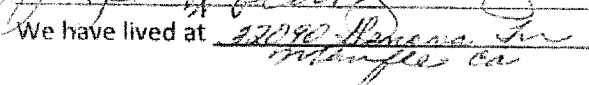

The homeowners moved to this community to enjoy a rural lifestyle and relied on the fact that the County's General Plan supported and encouraged the keeping of animals and intensive equestrian uses. A recent decision of the Board of Supervisors has put all of this in jeopardy. The Board has allowed a General Plan Amendment application to proceed which proposes 800+/- small urban lots with an aquatic center on 170 acres in the middle of this rural area over the objections of virtually all of the surrounding residents. The home owners living within a 1/2 mile of this project, who have enjoyed this rural area for over a collective 1,100 years, submitted a petition to the Board requesting denial of this project to protect our way of life and property values.
