BACKGROUND:

Summary

The proposed University Wash Channel, Stage 3 Project consists of the construction and maintenance of approximately 2,500 linear feet of 90-inch diameter underground storm drain and associated catch basins, access manholes, street repaving and grading of approximately two (2) acres. Once constructed, the proposed Project would provide 10-year flood protection to the adjacent area. Once combined with future master planned improvements upstream, the storm drain improvements will provide 100-year flood protection to adjacent properties and public right-of-way.

A Purchase Agreement and the Right of Entry and Temporary Construction Easement Agreement have been negotiated with the property owner, Expert Management Inc., at the fair market value of \$174,000.00, plus \$20,000.00 for title and escrow fees. The Purchase Agreement covers the Permanent Easements and Temporary Construction Easements that are within Assessor's Parcel Nos. 210-150-001 and 210-150-016. The acquired area consists of approximately 1.11 acres or 48,361 square feet of land. There will be the removal of approximately 50 linear feet of an old retaining wall, which lies within the easement area referred to as RCFC Parcel No. 1120-25 and runs along the westerly boundary of APN 210-150-001; including the hauling away of debris generated from that removal.

Pursuant to the California Environmental Quality Act (CEQA), the acquisition of the permanent easement interests in real property by the District was reviewed and it was determined the project will not have a significant effect on the environment. A Mitigated Negative Declaration (SCH# 2014031054) was prepared and adopted by the Board of Supervisors of the Riverside County Flood Control and Water Conservation District on July 1, 2014. The acquisition of the real property interests were adequately analyzed in the previously adopted Mitigated Negative Declaration, therefore, no further environmental review is required.

 14 such escrow instructions prepared by Escrow Holder as may reasonably be required to
 15 consummate the transaction contemplated by this Agreement. Any such instructions

 2 Escrow Holder will deliver these instruments and the title commitment to BUYER and
 3 SELLER. Escrow Holder will insure BUYER'S easement title to the Property, which is
 4 described above in Section 1, at the Close of Escrow by a CLTA Owner's Standard
 5 Coverage Policy of Title Insurance in the amount of the Easement Interest of RCFC
 6 Parcel No. 1120-25 only ("Policy") as described in Section 2. BUYER shall pay for the
 7 cost of the Policy and for any search or incidental costs associated with the Policy. The
 8 Policy provided for pursuant to this Section 6 will insure BUYER'S interest in the
 9 Property free and clear of all monetary liens, monetary encumbrances and other
 10 exceptions to good and clear title, subject only to the following permitted conditions of
 11 title ("Permitted Title Exceptions"):

- 12 A. The applicable zoning, building and development regulations of any municipality,
 13 county, state or federal jurisdiction affecting the Property.
- 14 B. Those exceptions not objected to by BUYER within ten (10) business days after

 16 instruments noted as exceptions therein. If BUYER "unconditionally
 17 disapproves" any such exceptions Escrow will thereupon terminate, all funds
 18 deposited therein will be refunded to BUYER (less BUYER'S share of escrow
 19 cancellation charges) and this Agreement will be in no further force or effect. If
 20 BUYER "conditionally disapproves" any such exceptions, then SELLER may
 21 elect, but shall have no obligation, to cause such exceptions to be removed by the
 22 Close of Escrow. If such conditionally disapproved non-monetary exceptions are
 23 not removed by the Close of Escrow, BUYER may, at BUYER'S option, either
 24 accept the Property subject to such exceptions, or terminate the Escrow and
 25 receive a refund of all funds deposited into Escrow (less BUYER'S share of
 26 escrow cancellation charges), if any, and this Agreement will thereupon be of no
 27 further force or effect. At the Close of Escrow, BUYER'S easement interest in the
 28 Property will be free and clear of all monetary liens and monetary encumbrances,
 other than real estate taxes that are not yet due and payable.
- C. Taxes: Current fiscal year, including personal property tax, if any, and any further
 assessment thereto under Division 1, Part 0.5, Chapter 3.5 of Revenue and
 Taxation Code of the State of California. All other taxes owed whether presently
 current or delinquent are to be CURRENT at the Close of Escrow.
- D. Quasi-public utility, public utility, public alley, public street easements and rights
 of way of record.

7. POSSESSION OF PROPERTY. It is mutually understood and agreed by and between
 the parties hereto that the right of possession and use of the Property by BUYER,
 including the right to remove and dispose of improvements, shall commence upon the
 execution of this Agreement by all parties.

- A. Upon Close of Escrow and notwithstanding anything to contrary, except as set
 forth in Section 7.B, it is not intended that the purchase of the easement interests
 by BUYER to be, and nor shall such easement interests be, construed such that it
 creates in or gives to BUYER any of the following:

- 1) The obligations or liabilities of an "owner" or "operator," as those terms are defined and used in Environmental Laws (defined below), including, without limitation, the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended (42 U.S.C. Section 9601 et seq.; hereinafter, "CERCLA"); or
- 2) The obligations or liabilities of a person described in 42 U.S.C. Section 9607(a)(3) or (4); or
- 3) The obligations of a responsible person under any applicable Environmental Laws; or
- 4) The right to investigate and remediate any Hazardous Materials associated with the Property; or
- 5) Any control over SELLER'S ability to investigate, remove, remediate or otherwise clean up any Hazardous Materials associated with the Property.

19 NOW, THEREFORE, Grantor and District do hereby agree as follows:

20 AGREEMENT

- 21 1. The right is hereby granted to District to enter upon and use the Easement Areas (defined
22 below), for all purposes necessary to facilitate and accomplish the construction,

- 24 10. This Agreement shall not be changed, modified, or amended except upon the written
25 consent of the parties hereto.
- 26 11. Pursuant to that certain Agreement for Purchase and Sale of Real Property ("PSA") entered
27 into between the parties concurrently with this Agreement, District has provided to
28 Grantor the value of thirty-six thousand nine hundred ten (\$36,910.00) dollars as
consideration in the form described in the PSA for the rights granted by this right of entry

Address: 1995 Market Street	City: Riverside	Date: 7/9/14 Zip: 92501 Initial: kb

Project Title and Description:

The proposed University Wash Channel Stage 3 Project (Project) consists of the construction and maintenance of approximately 2,500 linear feet (LF) of 90-inch reinforced concrete pipe underground storm drain and associated catch basins, access manholes, street repaving, and grading of approximately 2 acres. Once constructed, the proposed Project would provide 10-year flood protection to the adjacent area.

Project Location:

The Project would be located in the city of Riverside, California, in Section 24 of Township 2 South, Range 5 West, San Bernardino Base and Meridian. The Project site is generally bound by Spruce Street to the north, Chicago Avenue to the east, Massachusetts Avenue and Durahart Street to the south, and Kansas Avenue to the west.

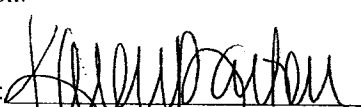

The General Manager-Chief Engineer of the Riverside County Flood Control and Water Conservation District has made a finding that the proposed University Wash Channel Stage 3 Project will not have a significant adverse effect on the environment. An Initial Study supporting this finding is attached. This finding will become final upon adoption of this Mitigated Negative Declaration by the Board of Supervisors of the Riverside County Flood Control and Water Conservation District. Mitigation measures are as follows:

4 RESOLUTION NO. F2014-10
APPROVING UNIVERSITY WASH CHANNEL, STAGE 3 PROJECT

5 WHEREAS, on May 20, 2014, the Board adopted Resolution No. F2014-09 pursuant to
6 Section 18 of the District Act giving notice of its intention to construct a project in Zone 1,
7 within the city of Riverside, designated as University Wash Channel, Stage 3 Project ("Project")
8 and giving further notice that the Project would be considered at a public hearing on July 1,
9 2014; and
10

11 WHEREAS, notice of the public hearing was properly made by publication and posting
12 as required by law, and all persons desiring to be heard on the matter were given the opportunity
13 to appear and present testimony, both oral and written; and

14 WHEREAS, all provisions of the California Environmental Quality Act and the District
15 Rules to Implement the California Environmental Quality Act have been met and the General
16 Manager-Chief Engineer of the District has found that the Project will not have a significant
17 adverse effect upon the environment and has completed a Mitigated Negative Declaration.
18

19 NOW, THEREFORE, BE IT RESOLVED, FOUND, DETERMINED AND ORDERED
20 by the Board of Supervisors of the Riverside County Flood Control and Water Conservation
21 District in regular session assembled on July 1, 2014 based upon the evidence and testimony
22 presented on the matter, both written and oral, that:

- 23
24 1. The Project is not within a Criteria Area set forth in and established by the
25 Western Riverside County Multiple Species Habitat Conservation Plan (MSHCP).
26 2. The Project is consistent with the Riparian/Riverine Area and Vernal Pool
27 requirements of the MSHCP. Pursuant to Section 6.1.2 of the MSHCP, Riparian/Riverine areas
28

DATE

1
2 are lands which contain habitat dominated by trees, shrubs, persistent emergents, or emergent
3 mosses and lichens, which occur close to or which depend upon soil moisture from a nearby
4 freshwater source, or areas with freshwater flow during all or a portion of the year. Vernal Pools
5 are seasonal wetlands that occur in depression areas that have wetlands indicators of all three
6 parameters (soils, vegetation, and hydrology) during the wetter portion of the growing season. It
7 has been determined that although the Project area does not contain any vernal pools, the Project
8 area does include Riparian/Riverine Area as defined by the MSHCP. Construction of the Project
9 would result in approximately 0.72 acre of permanent impacts to disturbed riparian habitat within
10 University Wash. In addition, the proposed Project area does not contain habitat suitable to
11 support the least Bell's vireo, southwestern willow flycatcher and western yellow-billed cuckoo.
12 Mitigation for the permanent impact to the 0.72 acres of Riparian/Riverine Areas channel will be
13 performed offsite at a ratio of 1:1. Pursuant to Section 6.1.2, a Determination of Biologically
14 Equivalent or Superior Preservation (DBESP) analysis of unavoidable impacts to
15 Riparian/Riverine Areas has been completed and submitted to the Resource Agencies on January
16 7, 2014. The Resource Agencies did not respond to the DBESP during the 60-day review period.

19 3. The Project is consistent with the Narrow Endemic Plant Species requirements of
20 the MSHCP. Pursuant to Section 6.1.3 of the MSHCP, habitat assessments and/or focused
21 surveys for certain narrow endemic plant species are required for properties within mapped
22 survey areas. The survey area maps included within the MSHCP have been reviewed and the
23 Project is not within a mapped survey area for Narrow Endemic Plant Species. Therefore, no
24 further surveys or conservation measures are required.

26 4. The Project is consistent with the Urban-Wildlands Interface requirements of the
27 MSHCP. Section 6.1.4 of the MSHCP presents guidelines to minimize indirect effects of a
28

1 project in proximity to the MSHCP Conservation Area. This section provides mitigation
2 measures for impacts associated with: Drainage, Toxics, Lighting, Noise, Invasives, Barriers
3 and Grading/Land Development. The appropriate MSHCP maps have been reviewed and it has
4 been determined the Project does not occur within or adjacent to the Criteria Area or MSHCP
5 designated Public/Quasi-Public (PQP) conservation lands. Therefore, no further analysis or
6 implementation of any conservation measures is required.
7

8
9 5. The Project is consistent with the Database Updates/Additional Surveys
10 requirements of the MSHCP. Pursuant to Section 6.3.2 of the MSHCP, habitat assessments
11 and/or focused surveys for certain additional plant and animal species are required for properties
12 within mapped survey areas. The survey area maps have been reviewed and the Project is not
13 within a mapped survey area. Therefore, no further surveys or conservation measures are
14 required.

15
16 6. The Project is consistent with the Criteria Area and PQP Land provisions
17 contained in Section 3.2.1 of the MSHCP. Section 3.2.1 describes lands within the MSHCP
18 conservation area including those designated as PQP Lands. Section 3.2.1 states that if a
19 Permittee elects to use property currently depicted as PQP Lands in a way that alters the land use
20 such that it would not contribute to Reserve Assembly, the Permittee shall locate and acquire or
21 otherwise encumber replacement acreage at a minimum ratio of 1:1. The Permittee must make
22 findings that the replacement acreage is biologically equivalent or superior to the existing
23 property. The appropriate MSHCP maps have been reviewed and it has been determined the
24 Project does not occur within MSHCP designated PQP Lands. Therefore, replacement acreage
25 for impacts to PQP Lands is not required.

7. The Project is consistent with the Construction Guidelines for Facilities within Criteria Areas and PQP Lands and Standard Best Management Practices, Appendix C contained in Section 7.5.3 of the MSHCP. The appropriate MSHCP maps have been reviewed and it has been determined the Project does not occur within any MSHCP Criteria Areas and PQP Lands, therefore, Section 7.5.3 does not apply to the Project. However, the District will implement applicable Standard Best Management Practices as outlined in Appendix C of the MSHCP.

8. The project will not have a significant adverse effect upon the environment and a Mitigated Negative Declaration and Mitigation Monitoring Program are adopted based on the findings incorporated in the initial study.

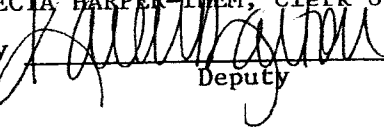

9. The Project is approved and the District is hereby authorized to proceed with the Project.

BE IT FURTHER RESOLVED that, within five (5) working days of this Board hearing, the Clerk of the Board is directed to deliver the adopted Mitigated Negative Declaration and the Notice of Determination to the Office of the County Clerk and Recorder and to the State Office of Planning and Research, who are thereby directed to file same, all as required by law.

Project Title:

University Wash Channel, Stage 3

Project Location (include county)

The proposed project site is generally bound by Spruce Street to the north, Chicago Avenue to the east, Massachusetts Avenue and Durahart Street to the south, and Kansas Avenue to the west in the city of Riverside, County of Riverside. The proposed project is located within Township 2 South, Range 5 West, Section 24 of the Riverside East, California USGS 7.5-minute quadrangle map.

Project Description

The University Wash Channel, Stage 3 project consists of construction and maintenance of approximately 2,500 linear feet (LF) of 90-inch reinforced concrete pipe underground storm drain and associated catch basins, access manholes, street repaving, and grading of approximately two acres. The Riverside County Flood Control and Water Conservation District would manage construction, and own, operate and maintain the storm drain mainline. The City of Riverside would maintain the catch basins (i.e., drain inlets) and connector pipes. Once constructed, the proposed project would provide 10-year flood protection to the adjacent area and would substantially improve drainage along the project reach during the majority of storm events. Additionally, when ultimately paired with future master planned improvements upstream, the proposed storm drain improvements would provide 100-year flood protection to adjacent properties and public right-of-way.

This is to advise that the Riverside County Flood Control and Water Conservation District has approved the above described (X Lead Agency or Responsible Agency)

project on July 1, 2014 and has made the following determinations regarding the above described project: (Date)

- 1. The project will not have a significant effect on the environment.
2. A Mitigated Negative Declaration was prepared for this project pursuant to the provisions of CEQA.
3. Mitigation measures were made a condition of the approval of the project.
4. A mitigation reporting or monitoring plan was adopted for this project.
5. A statement of Overriding Considerations was not adopted for this project.
6. Findings were not made pursuant to the provisions of CEQA.

This is to certify that the Mitigated Negative Declaration is available to the General Public at: The Office of the Clerk to the Board, County Administrative Center, 4080 Lemon Street, Riverside, CA 92501.

Filing of Notice of Determination in compliance with Public Resources Code Section 21152

State Clearinghouse Number: 2014031054

Project Title: Purchase of Easement Interests in Real Property for the University Wash Storm Drain Stage 3.

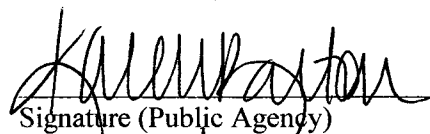

Project Location: The project is located in Riverside County in the city of Riverside. The subject parcels are located northwest of the intersection of Massachusetts Avenue and Durahart Street. The subject APNs are 210-150-001 and 210-150-016. The area consists of approximately 1.11 acres or 48,361 square feet of land. The property is located at latitude/longitude 33° 59' 17.09" N/117° 21' 00.22" W or within Township 2 South, Range 5 West, San Bernardino Base and Meridian.

Project Description: The project consists of the acquisition of the permanent easements and temporary construction easement interests in real property for APNs 210-150-001 and 210-150-016. The project includes the removal of approximately 50 lineal feet of an old retaining wall, and hauling away debris generated from that removal. The project is part of a larger project, University Wash Channel Storm Drain, Stage 3, and was already evaluated pursuant to CEQA.

Determination: This is to advise that on July 1, 2014 the Riverside County Flood Control and Water Conservation District approved the University Wash Channel Storm Drain, Stage 3 project and made the following determinations regarding the project:

1. The project will not have a significant effect on the environment.
2. A Negative Declaration was prepared for this project pursuant to the provisions of CEQA.
3. Mitigation measures were made a condition of the approval of the project.
4. A mitigation reporting or monitoring plan was adopted for this project.
5. The project will not result in any new significant environmental effects not identified in the Initial Study and MND; will not substantially increase the severity of the environmental effects identified in the MND; no considerably different mitigation measures have been identified; and no mitigation measures found infeasible have become feasible.
6. Nothing further is required and no further environmental documentation is required for California Environmental Quality Act purposes because the acquisition of easements was adequately analyzed in the earlier environmental documentation.

This is to certify that the previously adopted Mitigated Negative Declaration and the record of project approval are available for public review at the Office of the Clerk of the Board, County Administrative Center, 4080 Lemon Street, Riverside, CA 92501.
