

**SUBMITTAL TO THE BOARD OF SUPERVISORS
COUNTY OF RIVERSIDE, STATE OF CALIFORNIA**

517

FROM: Don Kent, Treasurer-Tax Collector

SUBMITTAL DATE:
April 20, 2016

SUBJECT: Treasurer's Monthly Disclosure Report on Investments

RECOMMENDED MOTION: That the Board of Supervisors receives and files the Treasurer's "Monthly Disclosure Report on Investments" dated March 2016.

BACKGROUND:

Summary

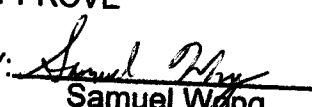

The County Treasurer and Tax Collector is submitting the above noted report to the County Board of Supervisors in keeping with Section 53607 of the California Government Code, which requires a quarterly report on the status of investments. The practice has been to provide the Board with a monthly report. The report gives the various statistics on the portfolio as to overall composition, liquidity structure, credit quality on the various securities, and provides several trends on earning performance, average weighted maturity, and the portfolio's "paper loss or gain".

"Thud"

A big thud marked the sound of the iceberg as it struck the hull of the Titanic, similar it seems to that resonating through our (global) economy, continuing with the first quarter of the year as indicators at this juncture point to a tough remainder for 2016.

For three years running now, economists have read the tea leaves and forecasted 2% + U.S. GDP growth, only to back track and increasingly revise estimates lower. Both 2014 and 2015 had very similar starts and very weak overall GDP numbers. This seems to be becoming the norm and is hard to make a compelling argument of the effects of weather and other esoteric excuses on overall GDP. Moreover, actual growth has fallen by 50% from the 1990's, so it seems as if we simply remain in a low growth trend for the foreseeable future.

It turns out that other areas of the U.S. economy are having a tough time as well; retail sales unexpectedly *declined* in March by -0.3% vs. a forecast of 0.1%. Total business sales have fallen again, and the inventory to sales ratio has hit the highest level since the Great Recession. Industrial Production figures have dropped year over year for seven months in a row, without being in a recession.

The decline in factory output has driven a 1.6% reduction in vehicle production which had been a bright spot in the economy, minus the subprime financing. Manufacturing output de-

creased 0.3% in March and durable goods orders were down 0.4%, the worst since 2008. Consumer confidence continued to abate, marking its fourth consecutive monthly decline with the April report and concerns have risen about the resilience of consumer spending in the months ahead.

Financial distress in Europe continues, being caused in part by deterioration of the balance sheets of its banks, several of which have losses in the billions of euros. Furthermore, recent issues with ongoing terrorism, the endless refugee crisis, and, the looming danger of the Grexit (Greece), Brexit (Britain) and Dexit (Denmark) largely due to the aforementioned problems has Europe in real tight spot. The rest of the global economy, along with China and Japan in particular, are slowing significantly and in a real economic conundrum.

The FED, holding the view that "global developments have increased risk," ended the March 16th FOMC meeting as expected without any change in monetary policy. This global economic weakness adds to market skepticism about the number of additional FED hikes this year, prolonging the pain to those such as institutional and retail fixed income investors alike seeking higher yields and interest income.
