

**SUBMITTAL TO THE BOARD OF SUPERVISORS
COUNTY OF RIVERSIDE, STATE OF CALIFORNIA**

761

FROM: Office on Aging

SUBMITTAL DATE:
May 11, 2016

SUBJECT: Approval of the Riverside County Office on Aging's 2016-2020 Area Plan on Aging (Area Plan), "The Changing Face of Aging". [Districts - All] [Total Cost: \$0]

RECOMMENDED MOTION: That the Board of Supervisors:

1. Approve the attached Riverside County Office on Aging's 2016-2020 Area Plan on Aging (Area Plan), "The Changing Face of Aging";
2. Authorize the Chairman of the Board of Supervisors to sign three (3) copies (must be original signatures) of the attached Transmittal Letter; and
3. Return two (2) copies of the Transmittal Letter to the Office on Aging after approval by the Board of Supervisors. One (1) copy will be retained by the Clerk of the Board for filing.

BACKGROUND:

Summary

Every four years the Office on Aging, in coordination with the Advisory Council on Aging and the community, is mandated by the Older Americans Act and the Older Californians Act to develop an Area Plan, which is updated on an annual basis to reflect any changes in the consecutive years. FY 2016/17 is the first year of the 2016-2020 Area Plan on Aging, titled "The Changing Face of Aging". The Area Plan

BACKGROUND:

Summary (continued)

was developed based on needs assessment activities throughout Riverside County on issues impacting older adults. This process included an in-depth analysis of U.S. Census data and other data sources related to population projections, focus groups with key stakeholders, surveys (in person, via telephone, and by mail), a public hearing, and a thorough review of current reports and assessments from sources within the county.

The 2016-2020 Area Plan includes four priority goals:

- Goal I: "Access is Key" – Enhancing Local and Community Based Services
- Goal II: "Be Strong, Live Long" – Campaign for Health and Wellness
- Goal III: "Aging on Your Terms" – Independence, Person-Centered Care and Caregiving
- Goal IV: "Working Beyond Partnerships" – Developing True System Integration

The goals identified in the Area Plan serve as a roadmap for ensuring that Office on Aging is initiating and participating in the critical conversations that are part of integrating and improving the services older adults will need in the future.

Impact on Citizens and Businesses

The 2016-2020 Area Plan on Aging outlines the four year goals and objectives of the Office on Aging, establishes the rationale for the development, expansion and delivery of community based services for older adults in Riverside County, and ensures compliance with the Older Americans Act and the Older Californians Act. As mandated by the Older Americans Act, the Area Plan focuses on specific populations, which include frail elderly, people with disabilities, low income, minorities, rural area residents, caregivers, and grandparents raising grandchildren. Additional specific populations include Boomers, limited English speaking, and Lesbian, Gay, Bisexual and Transgendered (LGBT).

MESSAGE FROM THE DIRECTOR

It is my pleasure to present the Riverside County Office on Aging's 2016-2020 Area Plan on Aging, titled "***The Changing Face of Aging***". The Area Plan highlights the transformation that the new older adult will bring to society, as the face of aging in America is changing dramatically. Americans are living longer, achieving higher levels of education, and striving to remain physically and socially active as they age.

By the year 2020, Riverside County will experience a 200% increase in persons over the age of 60 and will make up approximately 25% of the County's total population. As Boomers age, they are changing the way America thinks about aging and older adulthood, making it necessary to alter the approach to service provision for the older population.

In recent years, we have begun to experience an increased need to provide services at the local level, in communities where older adults live. In order to meet the needs of the new face of aging, service providers must focus on coordination, program development, service integration and innovation. As they age, Boomers will seek long term care options that allow them to remain in their homes and communities for as long as possible. Most importantly, service providers will need to work together to integrate services in order to support the growing aging population.

The Riverside County Office on Aging engages in outreach, education and advocacy activities, and develops comprehensive strategic plans (including the Area Plan) to assist adults as they age. This Area Plan illustrates how the Office on Aging is preparing to adapt to impending changes through the development of specific goals and objectives that focus on providing older adults with access to the services they need as they age, helping them to live strong and healthy lives, to provide them with options for choices about how, when and where they receive services. The Area Plan also serves as a roadmap for ensuring that the Office on Aging is initiating and participating in the critical conversations that are part of integrating and improving the services older adults will need in the future.

I am excited about what is to come and look forward to increased collaboration with community partners, fellow advocates, providers, constituents, and staff in support of our mission to promote and support a life of dignity, well-being and independence for older adults and persons with disabilities.

Anna L. Martinez, Director
Riverside County Office on Aging

ACKNOWLEDGEMENTS

The Riverside County Office on Aging and the Advisory Council on Aging would like to acknowledge and thank the many individuals in the community who contributed to the development of the Riverside County Area Plan on Aging for 2016-2020. Your time and contributions are greatly appreciated. Thank you!

SECTION 1. MISSION STATEMENT

All Area Agencies on Aging:

To provide leadership in addressing issues that relate to older Californians; to develop community-based systems of care that provide services which support independence within California's interdependent society; and which protect the quality of life of older persons and persons with functional impairments; and to promote citizen involvement in the planning and delivery of services.

Riverside County Office on Aging's Philosophy

Our Mission:

The Riverside County Office on Aging serves to promote and support a life of dignity, well-being and independence for older adults and persons with disabilities.

Our Vision:

Hope for today with expanded possibilities and choices for tomorrow.

Our Core Value:

The right to age with dignity.

Our Purpose:

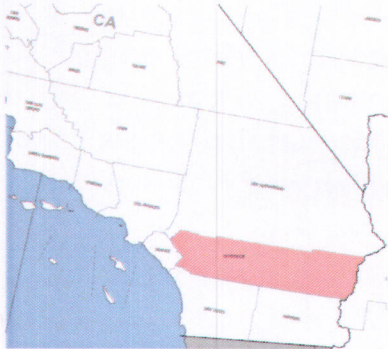

To enhance quality of life across generations through innovation and partnerships.

Our Promise:

To listen with respect, to foster trust, and to serve with compassion and commitment in a timely manner.

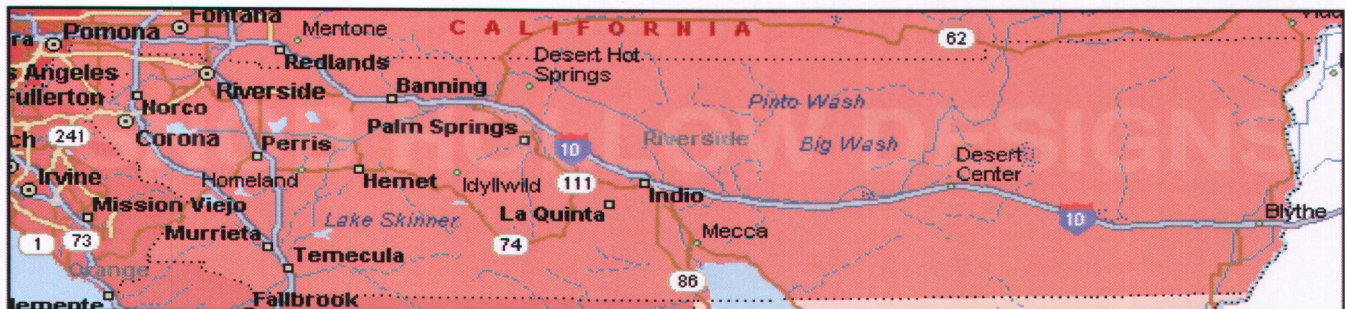

SECTION 2. DESCRIPTION OF THE PLANNING AND SERVICE AREA (PSA) 21

A. Physical Characteristics

Riverside County, founded in 1893, is one of 58 counties in the state of California. It covers 7,206 square miles (*excluding bodies of water*) in the southern part of the state.² Riverside County lies inland from Los Angeles County and is bordered by Orange County to the west, San Bernardino County to the north, San Diego and Imperial Counties to the south, and the Colorado River and the state of Arizona to the east. The County is approximately 180 miles from east to west and 40 miles from north to south; roughly the size of the state of New Jersey in total land area. The Colorado River town of Blythe is a three-hour drive from the county seat in the City of Riverside. With altitudes ranging from 200 feet below sea level at the Salton Sea to 10,084 feet above sea level at the top of Mt. San Jacinto, the County's landscape features a combination of geographical facets, including deserts, forests, and mountain regions, all with rich biological resources. Additionally, there are growing industrial and urban/suburban population centers and productive agricultural lands.

³ Retrieved from: http://www.californiacountymaps.com/riverside_county.shtml [accessed March 12, 2016]

C. Land Usage

Riverside County is currently comprised of 28 incorporated cities, 65 unincorporated communities and neighborhoods, and 12 federally recognized Native American reservations. Due to the vastness of the geography, over 89% of the County is unincorporated land.⁴ In addition⁵:

1. Residential uses : 58%
2. Open space: 28%
3. Agricultural use: 5%
4. Industrial/commercial uses: 2%
5. Mining/recreation and public uses: 1% each
6. Development, water, freeways, and other uses:⁶ 6%

Figure 2 highlights the County's unincorporated areas in brown:

D. Riverside County Population

In 2015, the total population of Riverside County was 2,361,026.⁸ Riverside County is the fourth most populated county in California. Only the counties of Los Angeles, Orange, and San Diego have larger populations. Riverside County is the 10th largest county in the nation, with more residents than 16 of the country's states⁹. The City of Riverside is the most populated city with 313,041 residents. The City of Indian Wells is the least populated city with 5,089 residents.

Table 1 demonstrates the total population and population per square mile subdivided by incorporated cities and census designated places (CDP) as of April 2014.¹⁰

E. Population Projections

Between 2000 and 2010, Riverside County's population increased by 42%¹² and is expected to reach approximately 4 million by 2060.¹³ By 2060, it is estimated that Riverside County will be the third most populated county in California, surpassed only by Los Angeles County and San Diego County respectively.¹⁴

Figure 3: Total Population Projections for Riverside County (2015-2060)¹⁵

¹² Total Population Projections for California and Counties: July 1, 2015 to 2060 in 5 Year Increments, Demographic Research Unit, California Department of Finance (December 2014). [accessed February 2016]

¹⁴ Total Population Projections for California and Counties: July 1, 2015 to 2060 in 5 Year Increments, Demographic Research Unit, California Department of Finance (January 2016).

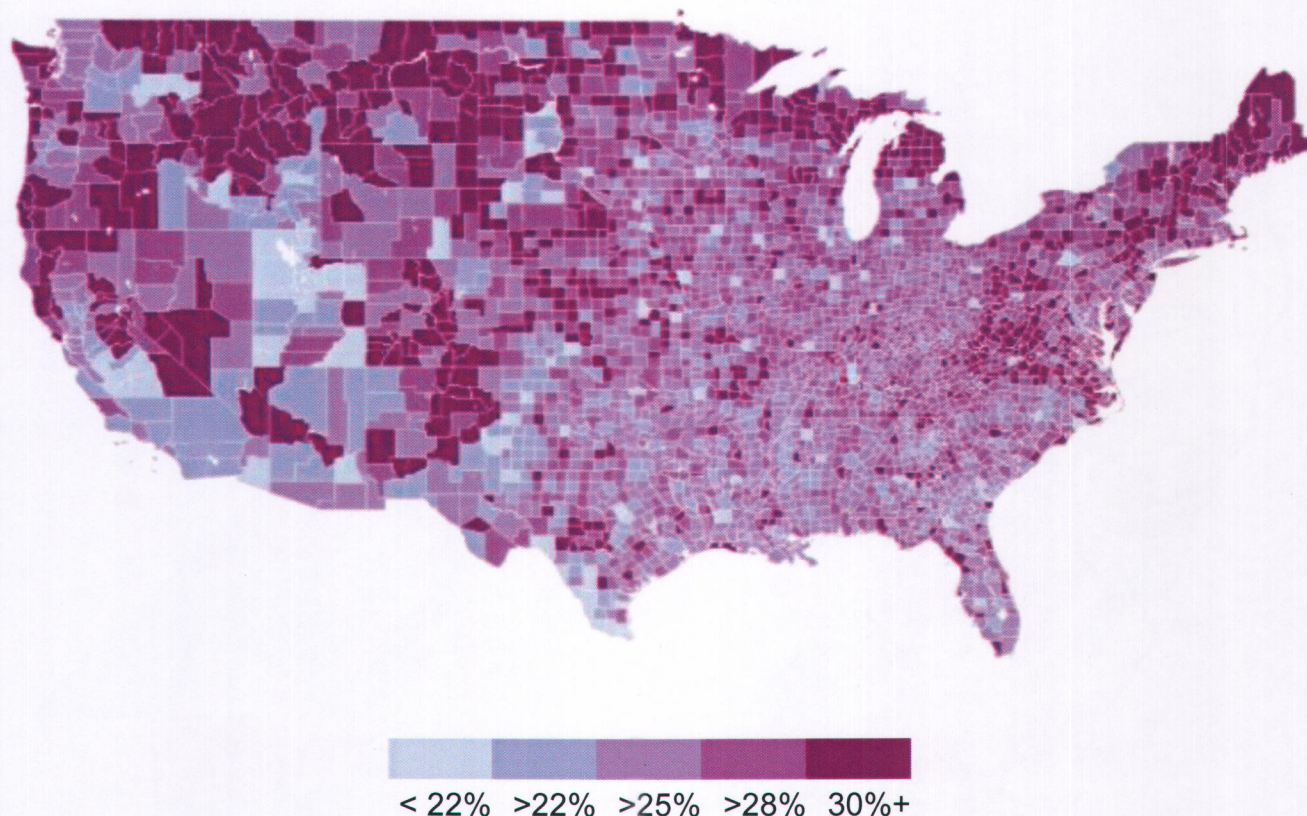

¹⁵ Source Table: Total Population Projections for California and Counties: July 1, 2015 to 2060 in 5 Year Increments Demographic Research Unit, California Department of Finance, December 2014.

F. Boomers and Beyond

The Boomer generation is made up of individuals born between 1946 and 1964. Nationally, 330 Boomers will turn 60 every hour until December 31, 2024. By the year 2029, 20% of the American population will be over the age 65.¹⁶ Of the 78 million Boomers in the nation, more than 58% are expected to live into their nineties and beyond.

Figure 4 shows Boomers across all U.S. counties. Areas with the highest concentrations of Boomers (as a percentage of the total population) are shaded the darkest purple. More than 22% of Riverside County's population was made up of Boomers as of 2012.

Figure 4: Concentration of Boomers in the United States, 2012¹⁷

G. California Booming

As of 2016, California's 60 and over population is 7,605,654 people.¹⁸ Across California, the 60 and older age group will increase by 112% during the period from 1990 to 2020. The "oldest old" age group (those over aged 85) will increase by 143%, even faster than the overall older adult population.¹⁹

In addition, California has the highest number of Centenarians, persons aged 100 or older, than any other state. This population, which makes up less than 1% of the total population, both in California and nationwide, is expected to increase as the overall population of the state increases.²⁰

Figures 5 and 6 highlight the percentage increase of older adults by county in California.²¹

²⁰ US Census Bureau, 2010 Census Special Reports, Centurions: 2010, C2010SR-0, U.S. Government Office, Washington D.C., 2012.

H. Riverside County's Aging Population

Between 1990 and 2020, Riverside County will experience a 200% increase in residence over the age of 60. The fastest growing cohort proportionately is made up of those over age 75, which is projected to grow between 240% (75-84 years of age) and 443% (85+) by 2060.²¹ By the year 2060, one million adults over age 65 will make up approximately 25% of the total projected population in Riverside County.²²

Table 2 shows the total population over the age of 50 in California and Riverside County in 2014.

**Table 2: Total Population by Age Category for California and Riverside County²³
2014 American Community Survey by Age Group (Ages 50 and Above)**

AGE	CALIFORNIA	RIVERSIDE COUNTY
50 to 54 years	2,660,052	152,708
55 to 59 years	2,454,446	136,841
60 to 64 years	2,065,154	112,492
65 to 69 years	1,664,207	98,446
70 to 74 years	1,170,153	75,220
75 to 79 years	847,001	55,732
80 to 84 years	623,036	39,756
85 years and over	688,650	38,117
Total 60 years and over	7,058,201	419,763

Table 3 shows the projected population growth per age group between 2010 and 2060 in Riverside County.

**Table 3: Riverside County Population Projections and Percentage Increase²⁴
Riverside County Population Projections 2010-2060**

Age Group	2010	2060	% of Increase
ALL Age Group (Total Population)	2,194,933	3,678,439	68%
Working Age (25-64 years)	1,085,492	1,750,307	61%
Young Retirees (65-74 years)	141,479	388,792	175%
Mature Retirees (75-84 years)	86,228	293,310	240%
Seniors (85+)	32,776	178,133	443%

²⁴ P-1 (Age): State and County Population Projections by Major Age Group: 2010-2060. Year 2010. California Department of Finance, Demographic Research Unit (December 2014)

Figure 7 further demonstrates the increase in the Riverside County older adult population.

Figure 7: Riverside County Population Projections by Age Group (60+)²⁵

The aging of the Boomer population is only the beginning of the aging phenomenon. Beyond 2024, the nation can anticipate the aging advance of over 40 million Generation X individuals, who begin to turn 60 in 2026, followed by more than 70 million Generation Y or Millennials, who will start turning 60 in 2037.²⁶

I. Disabled Population

The Riverside County Office on Aging is also designated as an Aging and Disability Resource Connection (ADRC), which serves the County's disabled population, regardless of age. In 2014, the U.S. Census estimated that the total civilian, non-institutionalized disabled population within Riverside County was 242,737 persons, or 11% of the total population. This is higher than the overall percentage for the State of California, which is 10.3%.²⁷

J. Ethnic and Cultural Diversity

When the population of Riverside County is divided into specified racial subgroups, the demographics are as follows: 47% Hispanic or Latino origin; 37% White (non-Hispanic or Latino); 7% African American; 7% Asian; 1.9% Native American and Alaskan Native; 0.4% Hawaiian Native or other Pacific Islander; and 3% reported two or more races. Although Figure 8 lists seven ethnicities, it is actually comprised of more than 27 sub-ethnicities and/or nationalities.

Figure 8: 2014 Riverside County Population by Ethnicity²⁹

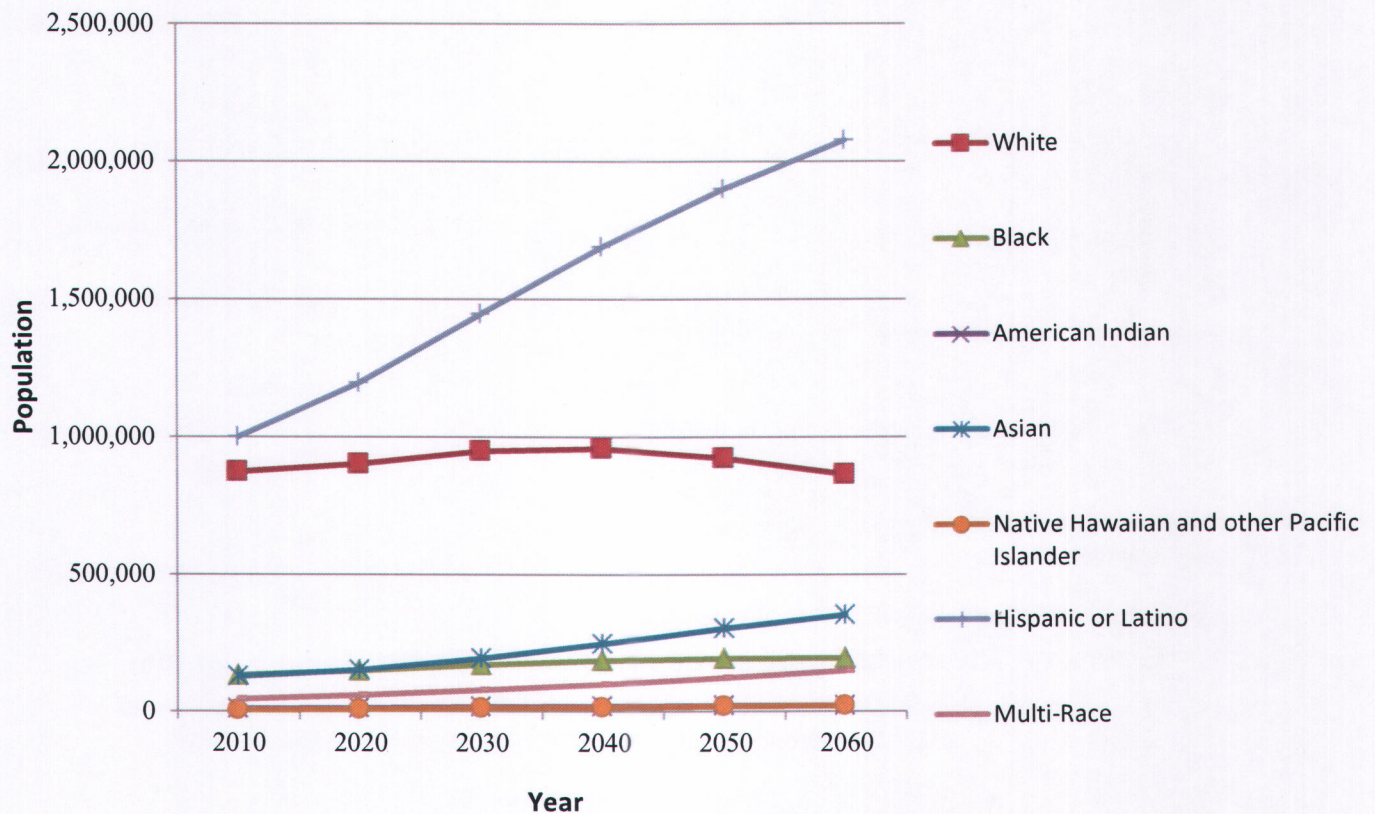

The number of ethnic minorities continues to grow in Riverside County; with the population self-identifying as Hispanic or Latino increasing the fastest. All ethnic groups will continue to increase as more people migrate into the County. As ethnic populations increase, the varying ethnicities and cultures of the population will require alternative delivery systems and require professionals, providers, and caregivers who are sensitive to cultural differences and how those differences impact care.

**Figure 9: 2010-2060 Projected Population Trend of Riverside County
By Racial/Ethnic Groups 2010-2060³⁰**

K. Languages Spoken at Home and English Language Ability

Currently, 74% of residents 65 years of age and older speak only English. Of the 26% of residents that speak a language other than English, more than half (59%) reported speaking English less than “very well”.

Figures 10 and 11 display the types of languages spoken in the County. English is the primary language spoken, followed by Spanish or Spanish “Creole” (*different dialects of Spanish*), other Indo-European languages and Asian/Pacific Island languages.

L. Lesbian, Gay, Bi-sexual and Transgender (LGBT) Population

Riverside County's current LGBT population is approximately 4.5%, making the county one of the largest LGBT communities, per capita, in the nation. Population estimates are likely to underestimate the true size of the LGBT population due to the reluctance of some individuals to identify as LGBT.³² However, there are various studies that estimate the 2011 LGBT population to be between 3% (70,747) and 10% (235,822) in Riverside County. The transgender population of Riverside County is estimated to be between 2,358 and 7,075 individuals.

Understanding the needs of the older adult LGBT population improves the Office on Aging's ability to coordinate with outside agencies to design programming that is welcoming, culturally competent and most effective in providing services.

Figure 12: Estimated Range of LGBT Population in Riverside County by Age Group, 2011³³

M. Native American Populations

Riverside County is home to 12 federally recognized Native American Reservations, which brings a thriving hospitality industry to Riverside County. Table 6 summarizes the federal Native American Reservations in Riverside County.

³⁴ Gardner, Aaron T. "Lesbian, Gay, Bisexual and Transgender Health and Wellness Profile." Riverside County Public Health. County of Riverside, 2014. <http://www.rivcoph.org/Portals/0/LGBT_Health_Wellness_2014.pdf>. [accessed Feb 2016]; O'Connell, Martin, and Sarah Feliz. Table 6: Federally Recognized Native American Reservations in Riverside County^{35 36}

Reservation	Size	Population	Other Information
<i>Agua Caliente Band of Mission Indians of the Agua Caliente Indian Reservation</i>	31,610 acres	21,358	6,700 acres of the reservation lie within the city limits of Palm Springs, making the Agua Caliente Band of Mission Indians the city's largest landowner.
<i>Augustine Reservation of Cahuilla Indians</i>	500 acres (one sq. mile)	1	In 1996, the Chairperson of the Band became the first member to establish residency on the reservation since the mid-1950's.
<i>Cabazon Reservation (also of the Cahuilla Indians)</i>	1,706 acres	806	N/A
<i>Cahuilla</i>	18,884 acres	154	Only 2,000 acres belong to the tribe in common, the rest of the land is divided amongst the individual members of the Cahuilla Band.
<i>Morongo Reservation</i>	32,362 acres	954	N/A
<i>Pechanga</i>	4,394 acres	467	An additional 305 tribal members reside in the adjacent communities.
<i>Ramona</i>	560 acres	Unknown	N/A
<i>Soboba</i>	5,915 acres	522	Tribal lands of the Luiseño Indians in eastern Riverside County, near the town of San Jacinto. This is home to the Soboba Band of Mission Indians.
<i>Santa Rosa (also of the Cahuilla Indians)</i>	11,092 acres	65	N/A
<i>Torres-Martinez</i>	24,024 acres	4,146	Tribal lands of the Torres-Martinez Band of Mission Indians (Cahuilla) in Imperial and Riverside counties
<i>Colorado River Indian Tribes</i>	286,691 acres in both Arizona and in California	1,735	Tribal lands of the Mohave, Chemehuevi, Hopi and Navajo tribes. Land encompasses three counties along the Colorado River.
<i>Twenty-Nine Palms Band of Mission Indians</i>	640	More than 1000	Tribal lands of the Chemehuevi people. Reservation is in both Riverside and San Bernardino counties.

Figure 13: Map of Tribal Lands in Riverside County³⁷

N. Governmental Structure

Planning and Service Area (PSA) 21 is comprised of Riverside County exclusively. The Area Agency on Aging (AAA) is a stand-alone county department governed by the County Board of Supervisors at the local level. The Board of Supervisors is made up of five members, each representing a different area/district within the County. (See Section 16 – Governing Board)

O. Rural or Isolated Population

Despite high population growth during the last decade, the overall population density remains low, estimated at 303.8 persons per square mile.³⁸ Servicing the entire county presents a unique challenge due to the distance between urban settlements and the isolated nature of some areas.

P. Demographic Spread

The demographics for PSA 21 vary drastically by city and more significantly by zip code. Identifying sub-divisions of the PSA help to identify the different levels of services needed, even within a city or unincorporated area.³⁹ In order to better serve the population of Riverside County, the Office on Aging grouped the County into 11 areas based on a more detailed look at each area. Based on 2014 American Community Survey Results, the tables on the following pages highlight demographic variances based on sub-areas and zip code.^{40 41 42 43}

**Table 7: Total Population for Riverside County
(Percent of Poverty, Disabled Population, and Grandparents Raising Grandchildren)**

Total Population	% of Population 65+	% of 65+ Population in Poverty	% of Population Disabled	% of 65+ Population Disabled	% 65+ Disabled Population Living in Poverty
2,228,070	13%	9%	11%	36%	12%

**As of 2014, over 5.5 million children across America were being raised by their grandparents. Unlike foster care, where the state formally assumes the responsibility for raising their grandchildren in an effort to keep their families together, in a grandparent arrangement, the number of grandparents raising grandchildren is most likely underreported. These grandparents are often unable to receive financial support to meet the children's needs.⁴⁴*

R. Workforce

Many Boomers are not ready for the transition from work to retirement. Stock market fluctuations, the recent housing crisis, the privatization of retirement funds, and the recent debates over Social Security, have left many Boomers unsure about retirement. Boomers now find themselves with high secure and unsecured debt balances, college tuitions, elder care and medical expenses, which can have an impact on their financial futures.⁴⁵ As a result, Boomers are delaying retirement or redefining it as they use their retirement years to continue working full-time, part-time or as consultants.⁴⁶

1. Nationally, approximately 80% of Boomers who are eligible for retirement are still active in the workforce.⁴⁷
2. 51% of those over age 65 work full-time, while 28% work part-time.⁴⁸

In 2012, older adult workers made up almost a quarter (or 21%) of the national workforce.⁴⁹

Figure 15: Boomers – Not Ready to Quit Working⁵¹

S. Riverside County Older Adult Workforce (60+)

Riverside County was significantly impacted by the recession and experienced a 9% increase in unemployment rates between the year 2006 and 2010, spiking at 15% in 2010. Since that time, the County's unemployment rate has improved from 15% in 2010 to 6% as of the end of 2015, a decrease of 9%. The increase was largely fueled by a 46% growth in the transportation, warehousing and utilities sectors; 34% job growth in construction; and a 31% rise in the educational and health services industry.⁵² However, the increase in available employment still resulted in an unemployment rate higher than both California and the United States, which had 2015 unemployment rates of 6% and 5% respectively.⁵³ In Riverside County:

1. 76% of adults 60+ are not in the workforce
2. 24% are in the workforce
 - a. Of those still in the workforce, 22% are employed and 2% are unemployed.
 - b. Riverside County adults 60+ comprise 12% of the total workforce.⁵⁴

⁵¹ Coy, Peter. 2014. American Workers are Older than Ever. Bloomberg.com. <http://www.bloomberg.com/bw/articles/2014-08-04/a-record-22-dot-2-percent-of-of-u-dot-s-dot-workers-are-55-or-older> [accessed February 2016]

3. *Employment opportunities in the transportation, warehousing and utilities and construction sectors may not be conducive to older adult employment.*
4. *The growing educational sector and health services industry may provide more opportunities for retirees who wish to remain in the workforce.*

T. Volunteerism

Based on U.S. Census Bureau data, the number of volunteers age 65 and older in the nation will increase from approximately 9 million in 2007 to more than 13 million in 2020.⁵⁵ Retiring Boomers are one of the primary groups from which organizations and non-profits can recruit new volunteer talent. Boomers offer a wealth of knowledge, experience, and skills to organizations they join.

The Riverside County Office on Aging surveyed nearly 3,000 older adults within the PSA and found that, in addition to remaining in the workforce, 20% of older adults also remain active through volunteering.

U. Poverty

The Federal Poverty Level (FPL) is a “one size fits all” approach to evaluating poverty that uses the same dollar amount across the country (regardless of the cost of living) based on the cost of food alone. The FPL is utilized to determine income eligibility for many public programs, to allocate funding for other programs, and as an evaluation tool when determining program effectiveness.⁵⁷

For single and coupled older adults, the FPL is \$11,880 and \$16,020 respectively.⁵⁸ Based on the current prevalence of older adults in poverty, it is projected that 25 million older adults nationally will live in poverty by 2050. That is an increase of 180% from today.⁵⁹

Table 19 below highlights the 2016 Federal Poverty Guidelines.

Table 19: Federal Poverty Guidelines for 2016⁶⁰

2016 POVERTY GUIDELINES						
ANNUAL GUIDELINES						
FAMILY SIZE	PERCENT OF POVERTY GUIDELINE					
	100%	125%	150%	175%	200%	250%
1	\$11,880	\$14,850	\$17,820	\$20,790	\$23,760	\$29,700
2	\$16,020	\$20,025	\$24,030	\$28,035	\$32,040	\$40,050
3	\$20,160	\$25,200	\$30,240	\$35,280	\$40,320	\$50,400
4	\$24,300	\$30,375	\$36,450	\$42,525	\$48,600	\$60,750
5	\$28,440	\$35,550	\$42,660	\$49,770	\$56,880	\$71,100
6	\$32,580	\$40,725	\$48,870	\$57,015	\$65,160	\$81,450
7	\$36,730	\$45,912.50	\$55,095	\$64,277.50	\$73,460	\$91,825
8	\$40,890	\$51,112.50	\$61,335	\$71,557.50	\$81,780	\$102,225
For family units more than 8 members, add \$4,160 for each additional member.

V. Older Adult Poverty in Riverside County

In Riverside County, the majority (80%) of residents over 65, for whom poverty status could be determined, have incomes 150% higher than the national poverty level. The remaining residents have incomes either right at the poverty level or 149% above it (9%) or live below the poverty line (11%).

In the last year, there has been a 2% increase in the older adult population living at or below the national poverty level.⁶¹ Figure 17 shows the 2014 poverty status of those over the age of 65. Utilizing the FPL, it appears that 80% of Riverside County's older adults have enough household income to consider them to be well above the line of poverty.

Figure 17: Poverty Status of Riverside County Population Over 65, 2014⁶²

W. Income and Benefits

Boomers are the first generation that is expected to spend more time in their retirement years than in the workforce. They are also the first generation to feel the pressure of trying to make their retirement savings, averaging approximately \$27,820 annually, stretch for 20-30 years after they formally retire.⁶³ Approximately 49% of all U.S. adults over 65 do not have enough income to meet their most basic needs and this percentage will increase as the population continues to age.

1. *The average monthly Supplemental Security Income (SSI) payment for people over 65 in December 2015 was \$435.47 per single person, or \$5,225.64 annually.*⁶⁴
2. *The average monthly payments for retired workers receiving Social Security in 2015 totaled \$1,335, or \$16,020/annually.*⁶⁵

While some older adults are eligible for more than one source of income, most are not. Only 3% of older adults receiving federal benefits qualify for both Social Security and Supplemental Security, and approximately 11% of those under age 65 who are disabled receive both.⁶⁶

Table 20 identifies the income earnings of Riverside County residents over the age of 60.

Table 20: Income and Benefit Earnings of Riverside County Population 60+⁶⁷

Occupied Households Units With...	Percent Estimate	Mean Income/ Benefits Annually
Social Security Income	91.1%	\$19,512
Retirement Income	45.7%	\$27,820
Earnings	32.7%	\$52,122
Supplemental Security Income	7.8%	\$9,512
Food Stamp/SNAP Benefits	3.9%	--
Cash Public Assistance Income	1.6%	\$5,848

⁶⁷ US Census Bureau: American Fact Finder. 2014 American Community Survey 1-Year Estimates Population 60+ in U.S. and Riverside County. [accessed January 2016].

California's high cost of living makes the FPL an inadequate measure of poverty for any California resident. However, when considering older adult poverty anywhere in the nation, the FPL does not allow for the inclusion of additional expenses, such as housing and health care, which many older adults have. If the poverty measure is recalculated to account for these kinds of expenses, the number of older adults actually living in poverty increases.

X. The Hidden Poor in Riverside County

The Elder Economic Security Standard™ Index (Elder Index) for California measures how much income older adults need and exposes the deficit in their budgets by calculating the actual cost of living for an older adult within the County, including the costs of housing, food, transportation, and health care.⁶⁸

With these additional expenses added in, the Elder Index shows the true number of older adults who are struggling to make ends meet. These older adults are considered "income ineligible" for many assistance programs, but still need help on a monthly basis. These individuals are the "Hidden Poor".

Utilizing the Elder Index, 33% of Riverside County adults over 65 fall into the income eligibility gap because their income exceeds the FPL, but falls below the Elder Index threshold.⁶⁹

Table 19 identifies the income gap (or the annual shortfall) in red. Whether the older adults are single or coupled; rent or own their homes; have mortgages or own their homes free and clear; in every category many Riverside County older adults do not have enough annual income to cover their basic expenses.

Y. Housing/Household

A majority of the total housing units in Riverside County are owner occupied (66%) compared to renter occupied (34%)⁷³ and Riverside County has the sixth largest household size in California, averaging 3.3 persons, which is higher than both California (2.98) and the United States (2.63).⁷⁴

Older adults occupy 160,815,881 housing units in Riverside County. Of these, 80% are owner-occupied and 20% are renter-occupied.⁷⁵ Forty-two percent of householders age 65 to 74 still had housing debt in 2013, compared with just 18% in 1992.⁷⁶

Z. Foreclosures

The financial security of many older adults is dependent on their housing situation. Unfortunately, the recent recession has left some with upside down mortgages or without the homes they previously owned.

In December 2015, 1 in 716 housing units in Riverside County were in foreclosure. Areas such as Homeland are still experiencing high rates of foreclosure with 1 in every 261 homes in foreclosure, as of 2015. The county's overall percentage of foreclosed units is still higher than the state and national levels.⁷⁷

Figure 18 shows the percentage of foreclosures in Riverside County compared to California and the nation.

Figure 18: Percentage of Foreclosures in Riverside County vs. the California and the Nation⁷⁸

AA. Reverse Mortgages

“Reverse mortgages” are a type of loan wherein a bank allows a homeowner to cash out the equity available in his or her home. The homeowner receives a monthly payment from the lender, which reduces the amount of equity available in the home. Homeowners usually enter into these mortgages for short term assistance with financial struggles; however, some utilize these loans as a way to supplement their retirement income for an extended period of time. Unfortunately, what many homeowners don’t understand is that the agreement gives the lender partial or full claim on the home once the available equity is cashed out.

Between 2013 and 2015, the value of homes owned by older adults increased 15%, which increased the number of older adults who can qualify for reverse mortgage loans. Figure 19 shows the increase in reverse mortgages by comparing a month to month comparison from December 2013 and December 2015, in which Riverside County Home Equity Conversion Mortgages (HECM) (aka: Reverse Mortgages) amounts have increased by 18% for initial principle limits (*the amount of funds one is eligible to receive before closing costs are deducted*) and by 26% in maximum claim amounts (*the maximum loan limit that can be insured by the Federal Housing Association*).⁷⁹

BB. Health and Wellness

1. Chronic Disease

According to the National Council on Aging, nearly 92% of older adults in the U.S. have at least one chronic condition, and 77% have at least two.

- a. Four chronic conditions—heart disease, cancer, stroke, and diabetes—are the cause of almost two thirds of all deaths each year.
- b. Diabetes affects 12.2 million (23%) of Americans over 60.
- c. 90% of Americans over 55 are at risk for hypertension, or high blood pressure. 77% of women over age 75 have this condition, as do 64% of men in the same age group.

⁸⁰ National Reverse Mortgage Lenders Association (Measuring HECM Volume by State, County and City) [accessed February 2016].

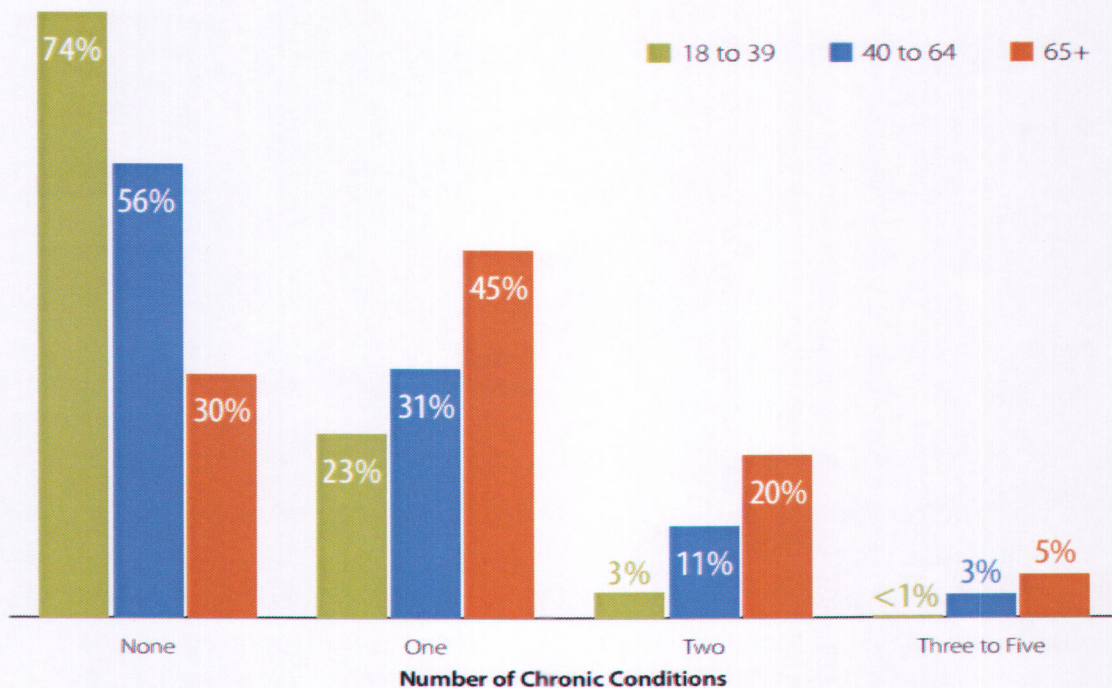

By 2030, 6 of every 10 Boomers in the U.S. will be living with multiple chronic conditions:

- a. Approximately 1 in 3 will have Alzheimer's disease
- b. 1 in 4 will have diabetes
- c. 1 in 3 will be obese
- d. 1 in 2 will be living with arthritis⁸¹

Chronic diseases account for 75% of the money our nation spends on health care, yet only 1% of health care dollars are spent on public efforts to improve overall health.⁸²

In 2012, the national estimated direct cost for diagnosed diabetes alone was \$176 billion.⁸³ Figure 20 shows the prevalence of chronic conditions in California.

California Healthcare Foundation, Apr. 2015. Web. <http://www.chcf.org/~media/MEDIA_LIBRARY/Files/PDF/PDF_C/PDF_ChronicConditionsCaliforniansCHIS2015.pdf> [accessed February 2016].

In California, approximately 70% of adults age 65+ reported having at least one chronic condition. In addition, 25% of Californians age 65 and older had multiple chronic conditions. Adults on public insurance plans were more likely to have one or more chronic conditions compared to those on private plans or the uninsured. Approximately 71% of adults on Medicare, the primary insurance of many older adults, had at least one chronic condition.

Figure 21: Leading Cause of Death and Contributing Risk Factors, General Population, Riverside County 2012⁸⁵

The leading cause of death in Riverside County is heart disease and 1 in 5 Californians over 65 reported a diagnosis of heart disease. Of the California population covered by Medicare, 21% have been diagnosed with heart disease and one-third (33%) of those with heart disease suffer from congestive heart failure.⁸⁶

⁸⁵ Gardner, Aaron T. "Lesbian, Gay, Bisexual and Transgender Health and Wellness Profile." Riverside County Public Health. County of Riverside, 2014. Web. <http://www.rivcoph.org/Portals/0/LGBT_Health_Wellness_2014.pdf>. [accessed February 2016].

Despite the perceived drop in prevalence as a result of new data collection methods, the pervasiveness of diabetes continues to be a concern in the older adult population and the risk of diabetes increases with age; 1 out of every 6 California adults over 65 have Type 2 diabetes. Diabetes remains the seventh leading cause of death in California⁸⁷

Figure 22: Diabetes Prevalence among Older Adults (65+), Riverside County, CA, & U.S., 2003-2011/12 (Calendar Year)⁸⁸

**** Note:** There were a number of methodological changes implemented in the 2011-2012 UCLA Center for Health Policy's California Health Interview Survey (CHIS) cycle that impacted the comparison of estimates over time. In 2011-2012 CHIS updated their analysis based on the 2010 Census, while previous analysis was based on projections from the 2000 Census data.⁸⁹

Figure 23: Prediabetes and Diabetes Prevalence by Age Group⁹⁰

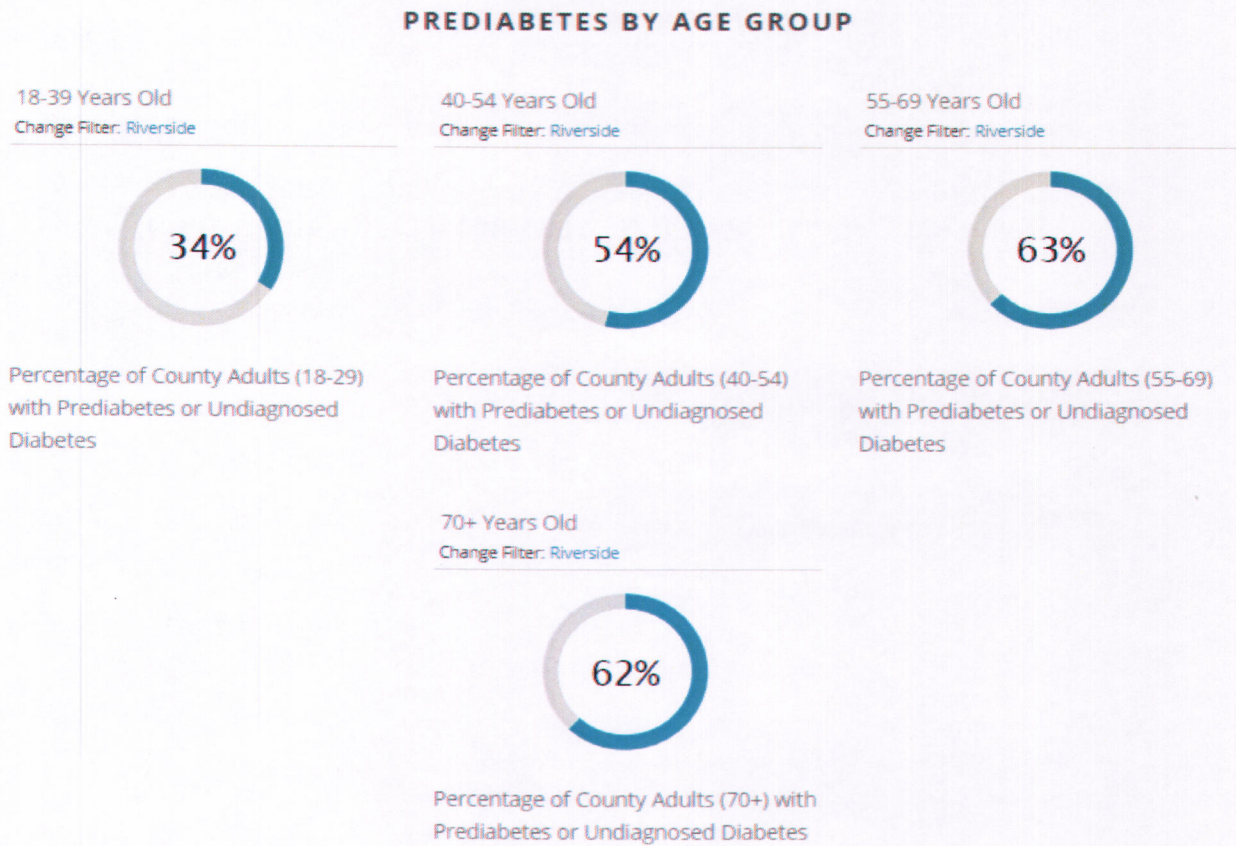

Figure 23 identifies that 30% of those identified with prediabetes will develop Type 2 diabetes within five years, and as many as 70% will develop the disease in their lifetime. Diabetes prevalence increased by 12% among older adults over age 65 between 2003 and 2012 in Riverside County. Approximately one-third (31%) of older adults over 65 in Riverside County with diabetes live below the County’s cost of living thresholds⁹¹ making self-management of this condition a critical element of their lifestyle.

2. Alzheimer's Disease and Other Dementias

New research from the Alzheimer's Association of America states that Alzheimer's disease (AD) is the most common form of dementia. There is a new AD diagnosis every 67 seconds.

- a. 1 in 9 older Americans (approximately 5.3 million) over the age of 65 has AD.
- b. Approximately 82% of people over age 75 have AD
- c. 32% of people over age 85 have been diagnosed with AD.⁹²

Alzheimer's is the most costly disease in America at this time; costing more than treatment for heart disease and direct spending for cancer.

- a. In 2015, the total monetary cost of providing care for those with Alzheimer's and other dementias was approximately \$226 billion.
- b. By 2050, expenditures for providing care for all forms of dementia are expected to reach \$1 trillion.⁹³

Within the next 10 years, 19 states can expect to see a 40% or greater increase in the number of persons with AD.

- a. In 2015, there were 678,446 Californians over 55 living with Alzheimer's disease; and by 2030, this number will nearly double growing to over 1.1 million.⁹⁴
- b. California is expected to see a 42% increase in AD cases by 2025.
- c. California is home to approximately 10% of the people with AD in the United States.
- d. AD was the 5th leading cause of death in California in 2012.

Approximately 10% of Riverside County's older adults are living with Alzheimer's disease.⁹⁵

3. HIV/AIDS

According to a 2014 study by the Riverside County Department of Public Health, there were 3,396 people who reported living with AIDS and 1,993 people living with HIV in Riverside County. Eastern Riverside County has more than doubled the number of cases of AIDS and HIV than any other county region. Approximately 70% of people living with AIDS and 48% of people living with HIV in Riverside County are over 50 years old. Between 2012 and 2014, 30% of all new HIV cases were in people older than 50 years.⁹⁸

SECTION 3. DESCRIPTION OF THE AREA AGENCY ON AGING (AAA)

On June 18, 1974, the Board of Supervisors designated the Riverside County Office on Aging as a County Department on Aging for the Planning and Service Area (PSA) 21. It serves as the Area Agency on Aging (AAA) for all of Riverside County and is one of 33 AAA's within the State of California.

The Office on Aging is one of fifty-five departments within the County of Riverside and is located within the city boundaries of Riverside (for its West County office), with satellite offices in La Quinta and in Hemet. Although there are three (3) community based offices, all offices can be contacted by calling one telephone number:

1-800-510-2020

The specific addresses for the three locations are:

West County Office:

6296 River Crest Drive, Suite K
Riverside, CA 92507
(951) 867-3800

La Quinta Office:

78-900 Avenue 47, Suite 200
La Quinta, CA 92253

Hemet Office:

749 North State Street
Hemet, CA 92543

The Riverside County Office on Aging, also known as PSA 21, is charged with providing leadership, relative to aging issues, on behalf of all older adults in the County. The Office on Aging carries out a wide range of functions including advocacy, strategic planning, coordination and interagency linkages, information sharing, program monitoring, and evaluation to develop or enhance community based systems. The goal is to assist older adults and adults with disabilities with leading independent and dignified lives in their own homes and communities for as long as possible.

Under the governance of the Riverside County Board of Supervisors and with the guidance of the 17 member citizen's Advisory Council on Aging, the Office on Aging provides services based on the mission articulated in this 2016-2020 Area Plan on Aging.

The strategic goals contained in the 2016-2020 Area Plan have been developed as the result of the following activities:

- A. **Community Assessments**, which measured the current and future needs of local communities and various constituencies;
- B. **Advocacy Efforts**, which raised the visibility of emerging issues and recommended changes in local, state, and national public policies and regulations;
- C. **Educational Activities**, which addressed emerging issues and brought key stakeholders together to discuss and design system changes;
- D. **Systems Coordination**, which suggested redesigning services to improve customer access and satisfaction; and
- E. **Program Development**, in which new programs were piloted in order to address changing and/or emerging needs.

PSA 21 administers an annual budget comprised of public and private funds from Federal, State, County and local sources. The funding also includes voluntary contributions from older adults who receive services. All funds are used to provide home and community-based services, and all decisions are guided by this Plan, which is grounded in current demographic data, trend analysis and projections, community needs assessments, and the resources currently available within the PSA. The Plan also identifies those in greatest need and helps to develop the needs of Riverside County's older adults.

SECTION 4. PLANNING PROCESS / ESTABLISHING PRIORITIES

The planning process for developing the 2016-2020 Area Plan “*The Changing Face of Aging*” began in 2015, in order to involve as many key stakeholders and members of the general public as possible.

The first step of the planning process was to share information with the Advisory Council on Aging at their regular meetings regarding the components that make up the Area Plan and areas where community input would be needed for its development. The Advisory Council also received information regarding how the community’s feedback was being processed and integrated into the Plan during the various stages of development. In addition, Advisory Council members assisted with assessing community needs by hosting community forums and roundtable discussions on various topics, which provided opportunities for the community to come together, have discussions and make recommendations for future services.

In order to identify and understand the needs of the target population and to determine any barriers to or gaps in providing services, PSA 21 utilized:

- A. U.S. Census and other related demographic data;
- B. Research from existing surveys and reports;
- C. New surveys and assessments aimed at specific constituencies;
- D. Focus groups, public hearings and program data; and
- E. Research information related to demographic projections and policy trends.

The PSA 21 also considered available funding, regulatory guidelines, partnerships, and pending and existing legislation as a critical part of establishing priorities. However, the 2016-2020 Area Plan “*The Changing Face of Aging*”, is a living document that will be used as an educational tool for Riverside County’s older adults, families, caregivers, adults with disabilities, legislators and the public at large.

SECTION 5 - NEEDS ASSESSMENT

A. Assessing the Needs of Riverside County

In order to develop this four-year plan, the Office on Aging assessed the needs of the community. This process included an in-depth analysis of U.S. Census data and other data sources related to population projections, focus groups with key stakeholders, surveys (in person, via phone, and/or by mail) that were developed in partnership with other agencies or by the Office on Aging alone, public hearings, and a thorough review of current reports and assessments from external sources within the County. The needs assessment for the 2016-2020 Area Plan consisted of four main areas:

1. Demographic Data – Secondary data obtained from the U.S. 2010 Census, the 2014 American Community Surveys, California Department of Finance’s Demographic reporting, Riverside University Health System, Public Health, California Employment Development Department, and the California Department of Aging.
2. Review of Existing Data – OoA reviewed existing data compiled by the county, state, national networks and communities related to aging. OoA also reviewed information from the National Council on Aging, AARP, Gay and Lesbian Medical Association, Center for Disease Control, UCLA Health Policy Publications, UC Berkley Health and Policy Publications, the Alzheimer’s Association, and peer reviewed journals.
3. Advisory Council Opinion Priority Analysis – Through interactive discussions and survey’s conducted with Advisory Council members, the following priorities were identified as those most important for older adults in Riverside County: nutrition, housing, caregiving and elder justice.

Figure 27: Advisory Council Priorities for Riverside County Older Adults

4. Focus Groups, Public Hearings and Assessment Surveys – Information was gathered from Riverside County older adults, providers surveys, and focus groups conducted by OoA throughout the PSA, including Blythe. The surveys were conducted in person through participation in one of 38 focus groups. Further information regarding the focus groups is described below.

B. Survey Collection and Respondents

In addition to demographic analysis, OoA collected 2,972 surveys from older adults in Riverside County over the course of 18 months from June 2014 through January 2016. The surveys were conducted in person at various community events, during support groups with caregivers, from older adults at senior and community centers throughout the county, the LGBT community, via phone through Information and Assistance calls, and by mail from those receiving services.

The demographics of the survey participants are as follows:

1. Residency of participants:

- a. 3.3% Service Area 1- Corona, Norco, Eastvale
- b. 25.4% Service Area 2- Riverside, Jurupa Valley
- c. 8.7% Service Area 3- Moreno Valley, Perris
- d. 7.7% Service Area 4- Menifee, Winchester, Lake Elsinore
- e. 7.6% Service Area 5- Murrieta, Temecula, Wildomar
- f. 5.9% Service Area 6- Banning, Beaumont, Calimesa
- g. 4.1% Service Area 7- Hemet, San Jacinto
- h. 15% Service Area 8- Desert Hot Springs, Palm Springs, Cathedral City
- i. 5.2% Service Area 9- Rancho Mirage, Palm Desert, Indian Wells
- j. 11.3% Service Area 10- La Quinta, Indio, Coachella
- k. 6.0% Service Area 11- Blythe

2. Age of participants:

- a. 33% of our respondents ranged from age 65-74
- b. 24% age 75-84
- c. 14% age 60-64
- d. 12% under age 55
- e. 9% age 55-59
- f. 8% age 85+

3. Gender:

- a. 68% Female
- b. 31% Male
- c. .14% Transgender
- d. .25% Other
- e. .61% Unreported

4. Race/Ethnicity:

- a. 51 % White or Caucasian
- b. 27% Hispanic/Latino
- c. 10% Black or African American
- d. 6% Asian
- e. 2.5% Native American/Alaskan Native
- f. 2% Other
- g. 1% Pacific Islander
- h. .5% Unreported

5. Household Income:

- a. 65% reported household incomes of less than \$2,000 monthly
- b. 35% reported an income of more than \$2,000 per month

C. Survey Results

The Office on Aging Community Assessment Survey was designed to focus on the current needs of the older adult population. The questions focused on current and future needs of the individuals surveyed.

Additional needs and their priority are noted in Figure 28:

Figure 28: Question – What types of services do you need now and/or will you need in the future?

The Community Assessment Surveys show that the community prioritized transportation, physical activities, opportunities to socialize and nutrition services as the top four services needed now or in the future for older adults. In addition, Health Assessment and Research for Communities' (HARC) analysis shows that in the Coachella Valley area nearly 11% of seniors who need assistance with transportation were unable to get that aid within the past year, meaning that over 1,000 seniors have unmet transportation needs.¹⁰²

¹⁰² LeComte-Hinely, Jenna, PhD, and Teresa Segovia, MA. "Senior Health in Coachella Valley." *Health Assessment and Research for Communities*. HARC Inc., Nov. 2014. Web. <http://www.harcddata.org/documents/HARC_SeniorReport.pdf> 2013 HARC Senior Report. [accessed January 2016].

1. Nutrition Focus

To gain a better understanding regarding the level of satisfaction related to the current nutrition programs operated by the Office on Aging (both direct and indirect), the Office on Aging conducted focus groups and collected over 800 surveys at all of the OAA funded meal/nutrition sites during the summer of 2015.

Survey analysis revealed:

- a. Over 50% of congregate meal recipients have been receiving meals at one of the nutrition sites for more than two years.
- b. Over 40% of the meal recipients receive their only meal five days a week from a meal/nutrition site.

HARC analysis of the Coachella Valley reveals:

- a. Approximately 4.1% of older adults are food insecure and had reduced the size of their meals or skipped meals in the past year due to a lack of money to purchase food.
- b. More than half of the food insecure older adults in Coachella Valley are chronically insecure and have to miss meals on a monthly basis throughout the year.
- c. Approximately 1.5% (more than 2,600) older adults in the Coachella Valley had to go for an entire day without eating due to a lack of money to purchase food.¹⁰³

The Office on Aging's survey results and the HARC data demonstrate the need for nutrition programs in Riverside County. The data also shows the significance that one meal can have on the overall nutrition and health of many older adults.

Additional findings were as follows:

¹⁰³ LeComte-Hinely, Jenna, PhD, and Teresa Segovia, MA. "Senior Health in Coachella Valley." *Health Assessment and Research for Communities*. HARC Inc., Nov. 2014. Web. <http://www.harcddata.org/documents/HARC_SeniorReport.pdf> 2013 HARC Senior Report.>. [accessed January 2016].

Figure 29: Question – On the days when you eat at this meal site, how many meals do you usually eat?

Figure 30: Question – How many days EACH WEEK do you eat at this meal site?

Figure 31: Question – How long have you been attending this meal program?

Figure 32: Question – What is your total household annual income during the last calendar year?

2. LGBT Priorities

The Office on Aging surveyed members of the LGBT community primarily in eastern Riverside County (Coachella Valley), which has the third largest concentration of LGBT individuals in the United States. When asked to comment on the current and future needs of the older adult LGBT community. 44% of respondents indicated that Physical Health, such as access to health care, long term care needs, and staying healthy were the highest concern.

Figure 33: Question – Please indicate the top three things that are currently most important for you and the LGBT community?

Access to quality, culturally competent healthcare accounts for a critical 10 - 15% of a community's overall health outcomes. Older gay men and lesbians still experience discomfort in their use of older adult social services with the majority reporting that they would feel more comfortable accessing provider and programs that identify as LGBT friendly.¹⁰⁴ ¹⁰⁵ ¹⁰⁶ When researching providers through the Gay and Lesbian Medical Association (GLMA), only five (5) healthcare professionals (three of which are physicians) were identified for Riverside County.¹⁰⁷

Discrimination and stereotypes in the LGBT community continue to be a challenge; additional research found that people who encountered a threat of being judged by negative stereotypes in healthcare settings reported experiencing adverse health effects. Stereotypes, like sexual health in the LGBT community and cognitive deficits in older adults, can also impact the trust relationship between provider and patient. The study correlates factors of discrimination to physical health and mental health; indicating that those who encountered the threat of being judged were also more likely to have hypertension, to be depressed and to rate their own health more poorly.¹⁰⁸

3. Elder Justice Focus

Scams are prevalent in the older adult community. Financial scams targeting older adults have become so prevalent that they are now considered the crime of the 21st century. Older adults are thought to have a significant amount of liquid assets, thus making them a prime target for scam artists. For the scammer, financial scams are very low risk with high rewards because instances are rarely reported and these crimes are difficult to prosecute. It's not just wealthy older adults who are targeted; however, low-income older adults are also at risk of financial scams and abuse. Strangers are not always the perpetrators of these crimes. Over 90% of all reported elder abuse is committed by a family member or other close association.¹⁰⁹

**Figure 34: What are the most important elder justice issue facing older adults?
Scams and Telemarketing**

The top three elder abuse issues selected by the survey participants are as follows:

- a. 85% selected scams and telemarketing
- b. 81% selected consumer fraud
- c. 72% selected financial abuse (by family members, etc.)

Consumer Fraud (banking, car repairs, etc.)**

4. Caregiving Focus

Boomers are the first generation that may spend more time caring for their parents than their own children,¹¹⁰ and with 43.5 million Americans providing care to someone over the age of 50, caregiving is an issue that must be addressed.¹¹¹ While researchers have long known that caregiving can have deleterious mental health effects for caregivers, research shows that caregiving can also have serious physical health consequences as well:

- a. 17% of caregivers feel their health in general has gotten worse as a result of their caregiving responsibilities.¹¹²
- b. 80% of respondents indicated that support for caregiver mental health is “very important” to address.

**Figure 36: What is the most important issue facing the caregiver?
Support for caregiver mental health (e.g. depression)**

**Figure 37: What is the most important issue facing the caregiver?
Caregiver Training & Education**

**Figure 38: What is the most important issue facing the caregiver?
Affordable alternatives to full time in home care**

In addition to support for caregiver mental health, 80% of those surveyed identified training and education as the most important issue and 79% identified affordable alternatives to expensive in home care as the most important issues for caregivers.

SECTION 6. TARGETING

The Older Americans Act defines a number of “target populations” including:

- Low income individuals with special emphasis on those who are frail, isolated, neglected, and/or exploited
- Ethnic minorities
- Limited English speakers
- Those residing in rural areas
- Lesbian, Gay, Bisexual, Transgender (LGBT) older adults

The needs of each of these populations must be included in an evaluation of the community’s needs, the PSA’s advocacy efforts, and plans for coordinating services.

Ways in which PSA 21 works to meet these needs include:

- Ongoing cultural diversity training for all staff
- Outreach, educational events, support groups, focus groups and services for limited English speakers
- Presence at specific LGBT events, such as annual participation in the Palm Springs Pride event
- Direct service delivery in isolated areas, such as Blythe, where contracted providers are not available
- Ongoing educational events that identify the needs of current and future older adults
- Serving as an Aging and Disability Resource Connection to provide a one-stop resource for information, assistance and referrals throughout Riverside County
- Conducting free on-going evidence based and health promotion programming that fosters prolonged health and independence
- Conducting and participating in disaster preparedness and elder justice initiatives

SECTION 7. PUBLIC HEARINGS

PSA 21

At least one public hearing must be held each year of the four-year planning cycle. CCR Title 22, Article 3, Section 7302(a)(10) and Section 7308, OAA 2006 306(a)

Fiscal Year	Date	Location	Number of Attendees	Presented in languages other than English? ² <small>(CDA forms footnote)</small> Yes or No	Was hearing held at a Long-Term Care Facility? ³ <small>(CDA forma footnote)</small> Yes or No
2016-17	3/09/16	6296 River Crest Dr. Suite K. Riverside, CA 92507	16	No	No
2017-18					
2018-19					
2019-20					

The following must be discussed at each Public Hearing conducted during the planning cycle:

- A. Summarize the outreach efforts used in seeking input into the Area Plan from institutionalized, homebound, and/or disabled older individuals.
 - PSA 21 posted notices in two (2) major local newspapers (covering both sides of the plan service area) on two (2) consecutive Sundays prior to the Public Hearing. The PSA also posted notices outside of the AAA office and at the County Administrative Center in full view of the public for two weeks prior to the Public Hearing.

2. Were proposed expenditures for Program Development (PD) or Coordination (C) discussed?
 - Yes. Go to question #3
 - Not applicable, PD and/or C funds are not used. Go to question #4

3. Summarize the comments received concerning proposed expenditures for PD and/or C:
 - None.

4. Attendees were provided the opportunity to testify regarding setting minimum percentages of Title III B program funds to meet the adequate proportion of funding for Priority Services

Yes. Go to question #5

No, Explain:

5. Summarize the comments received concerning minimum percentages of Title III B funds to meet the adequate proportion of funding for priority services.
 - None.
6. List any other issues discussed or raised at the public hearing.

The key areas discussed are outlined below. Questions, responses and comments were interspersed throughout the presentation.

Main Items Discussed at the Public Hearing:

<p style="text-align: center;">COLOR KEY Main Items Discussed Sub-Item Discussed <i>Public Hearing Discussion</i></p>
--

- ❖ **Review of the Older Americans Act**
- ❖ **Role of the Area Agency on Aging (AAA)**
- ❖ **The Office on Aging New Mission:** *“The Riverside County Office on Aging serves to promote and support a life of dignity, well-being and independence for older adults and persons with disabilities”*
- ❖ **Role of the Advisory Council**
 - Advisory Council Mission Statement: *“The Riverside County Advisory Council on Aging is a group of seasonal and diverse community leaders committed to each other and the process of consensus building to meet the needs of older adults, persons with disabilities, and caregivers in Riverside County”.*
 - Current Advisory Council Committees

QUESTION: *“Do we have a committee for the disabled population?”*

RESPONSE: *“No, the disability work that the Riverside County AAA does is not through the Older Americans Act or the California Department on Aging, but through the Agency’s designation as an ADRC (Aging and Disability Resource Connection). This designation is a separate set of legislation and requirements, which another manager is the coordinator for.”*

- ❖ **Initiatives that the Office on Aging will continue to participate in moving forward:**
 - Coachella Valley - Clinton Foundation Health Matters Initiative
 - Coachella Valley - “Get Tested Coachella Valley” with the Desert AIDS Project
 - County Wide – [Supplemental Nutrition Assistance Program Education] SNAP Ed
 - County Wide - Elder Justice Initiatives
 - World Elder Abuse Awareness Day
 - CARE Teams- (with other county agencies) to reduce and respond to instances of elder abuse and neglect.

QUESTION: "Is there anyone designated to attend the CARE team meetings?"

RESPONSE: "Social work managers attend the CARE team meetings to ensure that the AAA has a presence at each meeting."

- County Wide- County of Riverside's Accountable Community for Health (ACH) Initiative
- County Wide- Evidence-Based Health Promotion Initiatives
 - New Fit After 50 (based on new evidence based criteria requirements)
 - Healthy Options Program (HOP)
 - "Healthy Strides"→ A New Walking Initiative

QUESTION: "I understood that the "Fit After 50" program met requirements and that it was evidence based; based out of a hospital in orange county. Is this not accurate?"

RESPONSE: "The "Fit After 50" program has two (2) components pending validation for an Evidence Based Criteria Classification:

- 1) The historical knowledge of this study is about 10 years old, Riverside County and a couple other counties are working with [the California Department of Aging] CDA staff to validate the process that developed "Fit After 50".
- 2) The new criteria also requires an evaluation in a peer reviewed academic journal, which may have happened 10 years ago, but AAA's have not been able to locate a journal that presents a program with the exact methodology that the "Fit After 50" program follows.

The new "Fit After 50" program will follow a similar methodology with a few changes to meet compliance with the a program that does meet the new evidence-based requirements. Office on Aging will phase the 32+ classes to the new "Fit After 50" model; 10 per year over the next 3 years. For now, a few classes will continue to follow the old program methodology and will be labeled as a social activity in the Area Plan."

QUESTION: "I see this is a draft copy, so will there be a formal publication of this?"

RESPONSE: Yes, once this document is approved by the Advisory Council and the Office on Aging Director, it will go to the Board of Supervisors for approval. Submission to the Board is tentatively scheduled the beginning of April. It is due to the California Department on Aging (CDA) by May 1st. This document remains a draft until it is approved by the state (CDA). The Board usually approves the document pending any changes CDA makes."

❖ **Review of Section 2 – DESCRIPTION OF THE PLAN SERVICE AREA (Riverside County General Information)**

QUESTION: "The mountain area in the desert is all unincorporated and things are different when you live in the mountain. Do you address that?"

RESPONSE: "Yes, it is addressed in the draft given to you."

❖ **Review of population projections**

COMMENT: "The Administration on Aging used to publish a book called 'The Centenarians'. At that time there were one to two hundred centenarians nation-wide and now we have 6,000 in California alone."

RESPONSE: "Yes, Centenarians make up less than 1% of the overall population, actually 0.8% but that number is expected to increase as the older adult population increases."

❖ **Review of demographics**

❖ **Review of chronic disease prevalence within Riverside County**

QUESTION: "Do you know what the top diseases are?"

RESPONSE: "Heart disease and diabetes are the top diseases for the older adult population. Also, Alzheimer's has an increasing prevalence in the population over 65."

COMMENT: "If you look at it the chronic illness statistics and not diseases specifically, I think arthritis is more prevalent in the older adult age group. At some point everyone is going to get arthritis."

RESPONSE: "Yes, looking at chronic illnesses as a whole, arthritis is among the top ranked; also included in that is [chronic obstructive pulmonary disease], asthma, depression, cancer, HIV/AIDS, etc. Heart disease and diabetes are top ranked when associated to cause of death."

COMMENT: "The Alzheimer's prevalence chart is listed under dementia but they are two separate topics. Alzheimer's is a form of dementia so maybe the subheading should state Alzheimer's dementia, so there is no confusion of prevalence."

RESPONSE: "Alzheimer's is a form of dementia."

QUESTION: "What can you attribute to California's decrease in diabetes prevalence and Dementia prevalence in 2012?"

RESPONSE: "This is something that the planning team is looking into and will provide an explanation and citation in the final draft of the Area Plan. The current hypothesis is that the Affordable Care Act may have something to do with the change in numbers."

QUESTION: "If the Affordable Care Act is the cause of the drop in 2012, then what explains the spike in 2014?"

RESPONSE: "Our hypothesis is that after the implementation of the Affordable Care Act there was an increase in diagnosis as a result of increased access to care. The planning team is still researching these numbers and the explanation behind the sudden drop and increase in prevalence."

COMMENT: "The chart for Diabetes Prevalence goes to 2012, but the Alzheimer's slide goes to 2014. Are you able to get 2014 information for diabetes?"

RESPONSE: "The planning team is still looking for additional information. The information found regarding the prevalence of each disease was extrapolated from multiple sources to generate the charts. If the team is able to find additional information for either disease, the charts will be updated to reflect the most recent information."

COMMENT: *"If anyone is interested in staying up to date on statistics and activities surrounding HIV/AIDS prevalence in Coachella Valley and "Get Tested Coachella Valley", they can go to www.DHCD.org under 'Program Committee Updates/Packet'."*

❖ **Review of Needs Assessment**

- Demographic Data
- Review of existing data and secondary data analysis
- Advisory Council Opinion Analysis- Top 4 Needs of Targeted Populations
 - Nutrition
 - Housing
 - Caregiving
 - Elder Justice
- Focus Groups
 - Nutrition Focus

STAFF COMMENT: *"During the Advisory Council Planning Committee meeting, an Advisory Council member brought up a good question regarding the nutrition surveys. She wanted to know what constituted a meal when asking participants how many meals they eat in a day. A 'meal' was not defined in previous versions of the survey. Moving forward, the planning team will redraft the nutrition survey to define what a meal is. The new survey will also include questions regarding what participants do on the weekends for meals when the sites are closed. Additional surveys will be updated to ask follow up questions regarding transportation needs, physical activities and opportunities to socialize."*

- LGBT Focus

QUESTION: *"Were the majority of the LGBT surveys collected in the Coachella Valley area?"*

RESPONSE: *"Yes, the majority of the LGBT surveys were collected at the [Palm Springs] Pride event in Coachella Valley. There were also surveys collected at larger LGBT meetings in Coachella Valley."*

- Elder Justice Focus
- Caregiver Focus
- Community Assessment Surveys- Top 4 Identified Needs
 - Transportation

QUESTION: *"There are some older adult transportation programs underway through the Department of Transportation. Is the Office on Aging coordinating with that or can we get a briefing as to what is going on?"*

RESPONSE: *"This is discussed in further detail in the goals portion of the plan. The goal is centered on coordination for older adult services, like transportation, as a result of our needs assessment. A large amount of the population surveyed marked transportation as*

a need and transportation is beyond our bailiwick, so the Office on Aging will have to work with other agencies to advocate for some additional transportation options for older adults.”

- Physical Activities
- Opportunities to socialize

COMMENT: *“Physical activity and opportunities to socialize are two of the main reasons people attend ‘Fit After 50’.”*

- Nutrition services

QUESTION: *“What percentage of the older adult population attends the congregate meal program?”*

RESPONSE: *“Great question, the planning team will look into that.”*

COMMENT: *“The AC Planning Committee also wanted to determine which sites provide meals for the weekend and which ones don’t.”*

STAFF COMMENT: *“This evaluation will be conducted internally and separate from the plan.”*

❖ **Review of Target Populations**

❖ **Review of Plan Goals**

QUESTION: *“Are these all new goals, or are some [carried] over from last year’s strategic [Area] Plan?”*

RESPONSE: *“Most of them are not new, but the planning team revised the goals to keep them broad and general so that the new Office on Aging Director can determine what our plan of action will be for accomplishing them.”*

- Goal 1- “Access is Key”- Enhancing Local and Community Based Services
- Goal II- “Be Strong, Live Long” Campaign for Health and Wellness

COMMENT: *“It sounds like the Plan is talking about a holistic approach to health, but the goal [Goal II] doesn’t mention Behavioral Health (Mental Health).”*

RESPONSE: *“The sub-objectives mention Behavioral Health, but we will be sure to add Behavioral Health to the main goal statement.”*

COMMENT: *“I read somewhere that there are five chronic conditions prevalent among the older adult population, but the plan only highlights two. I believe the top five were: Chronic Depression (Behavioral Health), Arthritis, Cancer, Diabetes and Heart Disease. Does the plan discuss the others?”*

RESPONSE: *“Although not highlighted in the public hearing PowerPoint presentation, the plan articulates the other prevalent conditions in the narrative.”*

- Goal III- “Aging on Your Terms” Independence, Person-Centered Care and Caregiving
- Goal IV- “Working Beyond Partnerships” Developing True System Integration

COMMENT: "I want the planning team to consider broadening of the improvement of delivery of services goal. It is not just the Office on Aging; it is the other community partners that need to be a part of this. Every department has a "Strategic Plan" and it is important for the Office on Aging to be the leader to advocate in these other organizations and to ensure that they have feedback on the services they are providing to the aging population."

RESPONSE: "This is captured in the sub-objectives of Goal I- Objective A: Provide leadership and expertise to the Riverside County aging network and other key stakeholders to improve the coordination and access to services."

COMMENT: "I think that when the other agencies put out their strategic plan, the Office on Aging should have to review the sections that relate to services for the aging populations."

RESPONSE: "Office on Aging currently has a relationship with the Public Health department and they send over their pre-published documents for review to see if there is anything that needs to be changed or updated, as it relates to the older adult population. Also, other community assessments, which are produced once a year, are reviewed by Office on Aging before they are printed. Office on Aging can attempt to work with more departments and agencies to develop these kinds relationships."

COMMENT: "[Department of Public Social Services] DPSS, Behavioral Health and Riverside University Health System; all of these need to be included."

STAFF RESPONSE: "The Office on Aging is included in a new initiative "Healthy Riverside County," which is partially focused on issues concerning the aging population and how we are addressing their health issues. So, we are at the table now in many different forums to discuss partnership in order to develop a more holistic approach to health."

COMMENT: "Based on the survey results, the Office on Aging may want to do the same with Transportation."

RESPONSE: "The objectives under Goal I are centered around building these types of relationships, but the goal was kept broad so that [the AAA] leadership can decide how we would go about it."

COMMENT: "Within the Behavioral Health department there was a cultural competency group, which was a marvelous strategy. Any document that references an age group or any initiative had to be reviewed by the committee, which made the cultural changes in the document to really strengthen the cultural competency component of services to individuals."

RESPONSE: "Office on Aging has this relationship with Public Health, Office on Aging sat in last year as part of a committee to put together a culturally competent training for their staff focused on older adults, persons with disabilities and LBGT."

QUESTION: "Does the Office on Aging still send someone over to the Riverside Hospital to talk to people in the physician assistant program?"

RESPONSE: "We do, but in a different way. We now have our Care Transitions Intervention Program and a couple of other initiatives that operate in the hospitals, so we

are not participating with that group necessarily, but we are still engaged in those conversations through different avenues.”

COMMENT: “In this coordination process, down the road, maybe the Advisory Council can bring in presenters to discuss these areas on future agendas. For example, [bring in] someone in Law Enforcement, Transportation and other departments to brief the council on what they are doing and the Council could give ideas on how we can coordinate.”

RESPONSE: “That is certainly a way that the Council could give that feedback to the other departments. The planning team will add that to the Operational Work Plan for Advisory Council.”

❖ Review of Adequate Proportions

QUESTION: “Advisory Council previously had a member and anytime there was an issue with transportation that member would work with the Riverside Transportation Commission and that need was met. Transportation for older adults was significantly improved through their efforts. Is there any way to have a connection with Riverside Transportation now?”

RESPONSE: “There is currently a vacancy on the Advisory Council, and that is an interesting question to bring to the Director and the Membership Committee and see if there is interest in getting members that are geographically based and issue based, so the council can have targeted conversations with specific partners on issues.”

COMMENT: “It may be pushing too hard, but would it be feasible to say that the Riverside County Transportation Commission may want to have a liaison or someone from this council on their planning group.”

RESPONSE: “Yes, the Council can participate in those groups. The first goal focuses on the Office on Aging cultivating those relationships and asking those questions. It may take a couple years to get that type of relationship going, if we don’t already have it, but the point is that we know this is a goal and we are going to work toward it.”

QUESTION: “Will we eventually get a final copy of this?”

RESPONSE: “Yes. The Plan usually isn’t approved by CDA until the fall. Also, the planning team is going to put together a Popularized Area Plan once the Board of Supervisors approve the Plan, which won’t include the CDA forms in the back. The Plan is a public document and once finalized can be distributed and will also be posted.”

Verbal testimony was available until 11:30 AM and written testimony was allowed until close of business (5:30 PM) on the day of the public hearing, March 9, 2016.

5. Note any changes to the Area Plan which were a result of input by attendees.

Goal II was revised to include “behavioral health” as part of the overall approach to health and wellness for older adults.

2(CDA form footnote) A translator is not required unless the AAA determines a significant number of attendees require translation services.

3 (CDA form footnote) AAAs are encouraged to include individuals in LTC facilities in the planning process, but hearings are not required to be held in LTC facilities.

SECTION 8 - IDENTIFICATION OF PRIORITIES

The Riverside County Office on Aging planning process included a needs assessment to evaluate current services and identify gaps in service. While the need for services is great and funding is limited, setting priorities is essential since all goals must be accomplished within the four years of the plan cycle.

PSA 21 has identified the following priority areas for the 2016-2020 Area Plan:

- A. Providing local and community based services for older adults;
- B. Encouraging health and wellness amongst older adults;
- C. Providing and encouraging person centered care and supporting caregivers; and
- D. Working with key partners and the Aging and Disability Recourse Connection (ADRC) collaborators to better integrate services.

After a thorough review of the needs assessment results, the Older Californian and Older American Act mandates and guidelines, the Advisory Council on Aging member opinions and antidotal community feedback, the OoA Executive Team and Leadership Team members, and the registered dietitian, the planning staff developed the following four priority goals and the associated goal statements.
