BACKGROUND:

Summary (continued)

medical administration records, medical diagnoses, consent/refusal forms and known allergies. Subsequently, NaphCare, Inc., created a software application, TechCare for the correctional healthcare environment and NCCHC best practice compliance. On November 24, 2014 (3-106) the Board of Supervisors authorized execution of a 10 year, \$9,410,624 agreement with NaphCare for the implementation of TechCare in the County's jails and juvenile detention facilities. An Amendment to the initial project budget was also approved on July 7, 2015 (3-23), adding \$1,263,713 to that contract. The County implemented the medical and pharmacy components of TechCare June 29, 2015.

The County now seeks to implement the forensic behavioral health module of TechCare to unify inmate medical and behavioral health information into one electronic record. The forensic behavioral health (FBH) software module itself was included as part of the original system purchase. Riverside University Health System are requesting authorization to incur additional fixed costs to provide services necessary to bring County Forensic Behavioral Health (FBH) staff onto the system by 7/1/2016. This one time addition to the contract would provide customization of the software to meet the needs of FBH workflows, development of an interface for state mandated reporting and on-site training conducted by the vendor's professionals of approximately 100 FBH staff who will to use and operate the system to meet the behavioral health needs of patients in the jails and juvenile detention facilities.

Impact on Citizens and Businesses

This service impacts the patients in Riverside County receiving care from Riverside University Health System/Behavioral Health.

Contract History and Price Reasonableness

The vendor is in year two of a ten year contract on this project. This is a one-time fixed fee addition to a contract with an existing vendor. The cost is based on fixed pricing of \$125 an hour rate for 640 hours of professional services.
