BACKGROUND:

Summary (Continued)

The Whitewater Watershed Benefit Assessment Area was established on May 14, 1991 by the adoption of Resolution No. F91-23 by the Board pursuant to Ordinance No. 14 of the Flood Control District and the Flood Control District Act. Said Ordinance No. 14 requires that the Chief Engineer shall prepare an annual report on the status of the program, and recommend the benefit assessment levy to be enrolled for the ensuing fiscal year. The Board, upon acceptance of said report, shall set a time and place for a public hearing to hear and consider all protests regarding the report and the amount of the proposed benefit assessment levy.

Impact on Residents and Businesses

The financial impact to property owners is outlined in the Engineer's Report and Benefit Assessment Tax Rolls. The proposed benefit assessment rate for Fiscal Year 2016-2017 is \$3.63 per Benefit Assessment Unit; this is equal to the Benefit Assessment that was enrolled and levied for Fiscal Year 1996-1997 and all subsequent years.

INTRODUCTION

In 1987, Congress amended the Federal Clean Water Act (CWA) to require public agencies which serve urbanized areas with a population greater than 100,000 and other designated areas to obtain permits to discharge urban stormwater runoff from municipally owned drainage facilities including streets, highways, storm drains and flood control channels. In November 1990, the United States Environmental Protection Agency (USEPA) promulgated enforceable regulations establishing Municipal Separate Storm Sewer System (MS4) Permit requirements under its National Pollutant Discharge Elimination System (NPDES) Program. In California, USEPA has delegated its NPDES permitting authority to the State Water Resources Control Board (SWRCB). The SWRCB issues and enforces NPDES MS4 Permits through its nine California Regional Water Quality Control Boards (CRWQCBs).

The Riverside County Flood Control and Water Conservation District (District) service area encompasses portions of three major watersheds (drainage areas): the Santa Ana, the Santa Margarita, and the Whitewater Watersheds. The discharge of stormwater from MS4s within each of these three watersheds is regulated pursuant to an NPDES MS4 Permit (NPDES Permit) administered by a separate CRWQCB. **The District must comply with the provisions of these NPDES Permits in order to legally operate and maintain its flood control and drainage system infrastructure.** The USEPA and the CRWQCB can impose significant penalties for non-compliance as high as \$32,500 per day per violation. In addition, private citizens can pursue enforcement actions under the Federal CWA.

In the case of the Whitewater Watershed, the District, in conjunction with the County of Riverside (County), Coachella Valley Water District (CVWD), and the Cities of Banning, Cathedral City, Coachella, Desert Hot Springs, Indian Wells, Indio, La Quinta, Palm Desert, Palm Springs and Rancho Mirage (Cities), jointly submitted the required Part 1 application for an NPDES Permit on June 11, 1992 to the CRWQCB - Colorado River Basin Region (Regional Board). Part 2 of the NPDES Permit application was submitted to the Regional Board on May 17, 1994. The Part 1 NPDES Permit application consisted primarily of a compilation of existing District, County, CVWD, and Cities information such as land use, facilities, discharge information, fiscal resources, legal authority, etc. The Part 2 NPDES Permit application outlined the Permittees' (District, County, CVWD, and Cities) proposed Stormwater Management Program and corresponding implementation schedules.

The Regional Board adopted the initial NPDES Permit (Permit) for the Whitewater Watershed on May 22, 1996; this Permit established the District and County as Principal Permittees, and the CVWD and Cities as Co-Permittees (collectively, the Principal and Co-Permittees comprise the Permittees). The initial Permit expired on May 22, 2001 and as required by the Permit renewal procedures, the Permittees submitted a Report of Waste Discharge (ROWD) to the Regional Board that led to the subsequent adoption of Permit No. 01-077 on September 5, 2001. Permit No. 01-077 incorporated the Permittees' proposed Stormwater Management Plan (SWMP) which was developed during the initial Permit term along with additional management programs that were subsequently developed. Additionally, the Permit identified certain additional activities that the Permittees needed to pursue, in accordance with specific time schedules, in order to achieve compliance with the Permit and the CWA. On May 21, 2008, the Regional Board adopted the region's third-term permit, Order Number R7-2008-0001 (2008 Permit). The third-term 2008 Permit sought to improve programs established in the previous term. On November 21, 2012, the Permittees submitted a ROWD to the Regional Board to apply for a fourth-term MS4 Permit. A collaborative effort was put forth by Permittees and Regional Board staff to analyze local BMP effectiveness and applicability, and research other applicable statewide MS4 Permits to develop region-appropriate language and requirements for the Whitewater River

Region fourth-term MS4 Permit. The fourth-term MS4 Permit, Order Number R7-2013-0011 (2013 Permit), was subsequently adopted by the Regional Board on June 20, 2013.

From the beginning, the Permittees' Stormwater Management Program has been guided by the following principles:

1. Utilize existing municipal departments/programs to meet NPDES Permit requirements whenever possible.
2. Minimize duplication of effort through coordinated Permittee compliance actions.
3. When necessary, develop new or enhanced stormwater management programs (Best Management Practices) that are both cost-effective and acceptable to the public.

The Whitewater Watershed Benefit Assessment Area (WWBAA) was established pursuant to District Ordinance No. 14 on May 14, 1991 (copy attached - see Appendix B). The WWBAA was formed to offset the District's program and administrative costs associated with the development, implementation and management of identified stormwater management activities required by the federally mandated NPDES Permit Program. The District must continue to develop and implement these stormwater management activities in order to legally operate and maintain its flood control and drainage facilities. A map showing the boundaries of the WWBAA is attached hereto as Appendix C.

As Principal Permittee, the District is required to coordinate regional-scale Permit compliance activities, and implement Permit activities of common interest¹. As such, the costs of the District's various Permit compliance activities fluctuate from year to year. Although some expenses do not change significantly on a yearly basis, certain costs are cyclical (e.g., preparing ROWDs and negotiating Permit provisions), while expenses associated with collecting water samples and laboratory analysis may vary according to the amount of rainfall occurring in a given year or in response to certain information requests from the Regional Board. Costs associated with the development, production, and distribution of public education materials are not always incurred on a fiscal year (FY) basis. Occasionally, additional consultant and/or legal services may be needed to assist the District with the development of a particular Permit requirement or program activity. Also, certain activities or programs may be expanded or curtailed from time to time and, occasionally, new programs or activities must be developed and implemented.

Currently, the regulation and management of stormwater runoff is a topic of increasing interest among the public, municipalities, regulatory authorities and legislators. Although new laws and/or regulations could result in changes to the assessment rate in future years, **the proposed assessment rate for FY 2016-2017 is equal to or less than the assessment rate that was enrolled and levied for FY 1996-1997 and all subsequent years.**

¹ Section E.2, Order No. R7-2013-0011

APPORTIONMENT METHODOLOGY

WWBAA assessments are apportioned on the basis of proportionate stormwater runoff generated by each parcel. This method of assessment is consistent with State law and the District Act. The amount of benefit is computed based on parcel size (acreage) and use classification. A single-family residential structure on a 7,200 square foot lot (1/6 of an acre) is defined as one benefit assessment unit (BAU). The BAUs for other types of land use are calculated in proportion to the amount of runoff generated by a single-family residence on a 7,200 square foot lot.

In comparison with a typical single family residence, industrial and commercial properties typically generate more stormwater runoff and higher pollutant loads on a per acre basis. Thus, industrial/commercial parcels are assessed at a higher rate per acre than residential parcels. Because agricultural discharges are currently exempt under the NPDES Permit regulations, parcels within the WWBAA that are used for agricultural purposes are exempted from the assessment. Vacant, undeveloped parcels are not assessed because they are considered to generate no increase in pollutant loading. Additionally, certain large undeveloped tracts of land such as Federal or State owned forest are excluded from the WWBAA. A more detailed discussion of the apportionment methodology is presented in Appendix B.

CURRENT YEAR ASSESSMENTS (FY 2015-2016)

In July 2015, the District's Board of Supervisors confirmed a benefit assessment rate for FY 2015-2016 of \$3.63 per BAU. Following is a summary of the FY 2015-2016 assessments:

Rate	Billed Parcels	BAUs	Assessments	Corrections	Amount Paid*
\$3.63	55,460	89,521	\$326,113	\$0.00	\$319,265

* Through April 30, 2016

Property owners may request a review of their assessment(s) by contacting the District. District staff considers each request by reviewing information such as assessor's parcel maps, aerial photographs, and, when necessary, conducting site visits. The Auditor/Controller is notified of any needed corrections and a new tax bill is issued or, in cases where the assessment has been paid, a refund is made. Last year, no corrections were processed.

RECOMMENDED BENEFIT ASSESSMENT RATES (FY 2016-2017)

The District recommends that for FY 2016-2017, the WWBAA assessment rate remain unchanged at \$3.63 per BAU. This BAU rate would result in an equivalent charge per acre for the following land uses:

Group	Land Use Category	BAU/Acre	Assessment Rate*
A	Industrial, Commercial	12	\$43.56/acre
B	Apartments/Mobile Home Parks, Churches and Schools	9	\$32.67/acre
C	Single-family Residential	6**	\$21.78/acre
D	Agricultural/Vacant Undeveloped	Exempt	\$0.00/acre
E	Golf Courses	0.10	\$0.36/acre
F	Undeveloped Portions of Parcels	0.05	\$0.18/acre

* Refer to Appendix B for a detailed discussion of the Benefit Assessment methodology.

** 1 BAU per single-family residence, assuming six equally sized residential parcels per acre.

The projected revenue for FY 2016-2017, using the proposed benefit assessment rate of \$3.63 per BAU is as follows:

Rate	Parcels*	BAUs	Assessment*	Projected Revenue**
\$3.63	55,460	89,521	\$326,113	\$309,807

* Based on FY 2015-2016 Assessor's information

** Assumes a 5.0% delinquency rate

The projected revenue along with a portion of the end of year balance from FY 2015-2016 will fund the District's NPDES Stormwater Management Program activities for the Whitewater Watershed area in FY 2016-2017. The proposed FY 2016-2017 budget is presented in Appendix A.

During the early years of the NPDES Program, there were many uncertainties regarding startup costs (consultant costs, amount of required sampling, overall program scope, etc.) since the program was new for both the regulatory authorities and the Permittees. Consequently, the initial assessment rates were set conservatively to ensure that all Permit obligations could be met. To date, the District has been able to successfully negotiate reasonable Permit conditions and implement its Stormwater Management Program in a manner that has retained a portion of the program's initial budget surpluses. As a result, a modest fund balance has been maintained since the benefit assessments were first levied in FY 1991-1992. The District is gradually reducing that fund balance by maintaining the current assessment rate while sustaining expenditure levels that are slightly above projected revenues. It should be noted here that the current trend in California is toward more stringent regulation of municipal stormwater runoff. Thus, it is expected that the District's NPDES Permit compliance costs will increase over the coming years.

NPDES PROGRAM HIGHLIGHTS (FY 2015-2016)

For the year ending June 30, 2016, the following tasks were accomplished in compliance with the 2013 Whitewater NPDES Permit:

- A. Continued implementation of the Stormwater Management Plan (SWMP) and Appendices, including the Water Quality Management Plan (WQMP). The 2014 SWMP received Executive Officer approval and became effective on December 31, 2014; minor errata changes were made in January 2015 (2015 SWMP and WQMP).
- B. Continued implementation of the Whitewater River Region Stormwater Quality BMP Design Handbook for Low Impact Development (LID). This handbook provides selection and design guidance for structural Best Management Practices (BMPs), and recognizes the unique characteristics and regulatory requirements of the Whitewater River Region. Training on this handbook and the 2015 WQMP was provided to Permittee and private consultant staff in fall 2015. The handbook is available on the District's NPDES website.
- C. The District continued to assist the City of Coachella with identification of BMPs to address the Coachella Valley Stormwater Channel (CVSC) Total Maximum Daily Load (TMDL) for Bacterial Indicators. The TMDL regulates discharges from MS4 owned by the City of Coachella, and was granted final approval by USEPA on April 27, 2012. Phase 1 of TMDL implementation began when the City of Coachella received Regional Board approval for its monitoring program plan on May 9, 2013, and the plan continued through June 30, 2015 when the final quarterly monitoring report was submitted to the Regional Board. 2013 Permit Section G.1.a.ii required that the City submit a final report to the Regional Board by January 31, 2016, and this concluded the City's compliance requirements under the interim water quality-based effluent limitation (WQBEL) and Phase 1.
- D. Continued proactive efforts to inform regulators and policy makers by working with the Permittees to provide comment on various draft policy and legislation which have potential to shape District, County, and Co-Permittee MS4 Permit compliance activities.
- E. Continued to collaborate with water purveyors in the Whitewater River Region as planning partners in the Coachella Valley Regional Water Management Group (CVRWMG). The CVRWMG's purpose is to coordinate water resource management efforts, and to enable the Coachella Valley region to apply for grants tied to Department of Water Resource's Integrated Regional Water Management (IRWM) and the SWRCB's Proposition 1 funding programs. The District is currently working with the Permittees and CVRWMG to gather funding and plan for the development of a stormwater resources plan, which is a SWRCB requirement to enable any region to be eligible for Proposition 1 funding.
- F. Continued to chair the NPDES Desert Task Force, which is a committee comprised of Permittees, members of the Regional Board staff and interested parties. The Permittees coordinate their Urban Runoff management activities to work toward achieving the greatest protection of receiving water quality. This committee serves as a forum to effectively disseminate information, discuss regional and statewide program issues, and plan and coordinate Permittee actions to achieve compliance with the NPDES MS4 Permit.
- G. Continued financial support to area-wide stormwater pollution prevention programs, including the household hazardous waste (HHW) temporary and permanent collection events, and the Anti-freeze, Batteries, Oil, and Paint (ABOP) program.

- H. Developed, prepared, and submitted a comprehensive District Annual Report and Watershed Annual Report to the Regional Board.
- I. Continued efforts in compliance with the Aquatic Weed Control Permit. Compliance with this Permit is required for vegetation control activities which utilize application of aquatic herbicides on District facilities. Vegetation control is an essential part of the District's routine maintenance activities in order to ensure that its facilities continue to provide the design level of flood protection to which they were constructed and minimize or prevent loss of life and property. Compliance with the Aquatic Weed Control Permit includes maintaining an aquatic pesticide application plan, implementing BMPs to minimize potential impacts from use of herbicides, monitoring for impacts to water quality, and submittal of an annual report to the Regional Board and State Water Board.
- J. Continued collection and analysis of water quality samples in accordance with the Permit's Monitoring and Reporting Program via the Consolidated Monitoring Program (CMP) for Water Quality Monitoring. Water quality samples are collected during dry and wet weather at MS4 outfalls and the receiving water station for required constituents to ensure compliance with the 2013 Permit.
- K. Continued implementation of the CMP includes procedures for collection and analysis of water quality samples at MS4 outfalls and the receiving water station, data management, quality control, and reporting.
- L. Continued participation in the Stormwater Monitoring Coalition (SMC), a regional monitoring group comprised of Southern California Phase 1 Municipal NPDES Permit holders whose focus is developing effective, meaningful stormwater quality monitoring techniques.
- M. Continued active participation in the California Stormwater Quality Association (CASQA). On behalf of the Permittees, the District remains active within the organization, specifically, Darcy Kuenzi, currently serves as Legislative Co-Chair. District staff also actively participates in the Monitoring & Science, BMP, and Policy and Permitting subcommittees.
- N. Continued active participation in the CASQA Pesticides Subcommittee, with the goal of facilitating changes to State and Federal pesticides regulations. These changes could improve processes for evaluating the environmental impacts on receiving waters of new pesticides, and also change labeling and use requirements for existing pesticides, such as pyrethroids. To address the problems caused by pesticides in urban waterways in California, CASQA has collaborated with the Water Boards in a coordinated statewide effort, which is referred to as the Urban Pesticides Pollution Prevention Partnership. By working with the Water Boards and other water quality organizations, they are striving to address the impacts of pesticides efficiently and proactively through the statutory authority of Department of Pesticide Regulation and EPA's Office of Pesticide Programs.
- O. Continued presentation of semi-annual municipal employee stormwater training programs. These training classes focus on the requisite knowledge for properly implementing the 2015 SWMP and WQMP, and address Permittee functions such as Development Planning, Municipal Activities, Industrial/Commercial Inspections, and Construction Inspections. Fall and spring training classes were held at the District, and also at the cities of Temecula and Palm Springs, to provide close proximity to Permittees.

- P. Continued to provide stormwater pollution prevention presentations in local elementary schools; 68 assembly style presentations were provided County-wide in 2015-2016, reaching over 8,933 students.
- Q. Continued to chair the Public Education Subcommittee. Meetings include Permittee representation from each watershed to review elements of regional public education programs and program materials.
- R. Continued an ongoing effort to redesign the District's Public Education webpage to improve its effectiveness, usability and quality of information regarding MS4 compliance programs. The webpage has been reformatted extensively to add more usable and interactive data. The new webpage provides information for the general public, Permittees, regulators and in-house personnel.
- S. Continued to host the District's NPDES website which provides information regarding the regional MS4 Permit compliance programs. The website provides pertinent information for Permittees, regulators, public and in-house personnel.
- T. Continued distribution of focused BMP brochures targeting construction activities, pet care, guidelines for swimming pool, jacuzzi and garden fountain maintenance, septic tank maintenance, restaurant/food service industry, professional mobile services, automobile service industry, outdoor cleaning activities, and industrial facilities. Efforts continue to ensure that brochures are updated as necessary.
- U. Attended the Date Festival and other community events to provide information and brochures on stormwater pollution prevention, recycling, and proper disposal of household hazardous waste.

PROGRAM/WORK ITEMS (FY 2016-2017)

The requirements of the 2013 Permit became effective for the Permittees when the Regional Board Executive Officer provided approval of the SWMP on December 31, 2014. Fiscal Year 2016-2017 will mark the second complete year of implementation of 2013 Permit requirements, and as the ROWD for the next Permit term is due for submittal in December 2017, the planning process for ROWD development will begin during this fiscal year. The following program activities will be emphasized for the coming year:

2017 ROWD Planning

NPDES requirements for stormwater discharges have traditionally been shaped with non-arid areas in mind (e.g., eastern and mid-western United States). When considering average annual rainfall and urban runoff, the Whitewater River Region is unique in that average annual totals are a fraction of what they are elsewhere in the nation, at approximately three inches of rainfall per year. The Permittees realize that it is important to highlight regional differences such as these, and to educate EPA and SWRCB staff on Whitewater River Region characteristics prior to each NPDES Permit term because it can assist these regulators in incorporation of more region-appropriate requirements in upcoming NPDES Permits.

Before the end of each NPDES Permit term, the Permittees work collaboratively with Regional Board staff to gather and analyze regional water quality monitoring, flow, rainfall, climatic and programmatic data to compare and contrast with information from other regions of California. These analyses help shape the ROWD, and also serve to educate regulators from throughout that state about the unique characteristics of the Whitewater River Region. This ROWD planning process is highly collaborative, requires extensive research, and will begin in FY 2016-2017.

2013 MS4 Permit Implementation

The 2013 Permit features unique data tracking requirements (including tracking and inventorying of Permittee-owned or operated MS4s located on tribal lands), monitoring program and annual reporting requirements, and also requires Permittee construction projects to seek coverage and comply with the SWRCB's Construction General Permit, Order 2009-0009-DWQ, as amended. Training is ongoing to familiarize Permittee staff with these new unique requirements and the updated SWMP, WQMP, and BMP Design Handbook. These data tracking, reporting requirements and program adjustments will involve continued extensive collaboration between District, Permittee and Regional Board staff during the coming fiscal year.

Aquatic Weed Control Permit Compliance

Compliance with the Aquatic Weed Control Permit is required for vegetation control activities which utilize application of aquatic herbicides on District facilities. Vegetation control is an essential part of the District's routine maintenance activities in order to ensure that its facilities continue to provide the design level of flood protection to which they were constructed and minimize or prevent loss of life and property. Compliance with the Aquatic Weed Control Permit includes maintaining an aquatic pesticide application plan, implementing BMPs to minimize potential impacts from use of herbicides, monitoring for impacts to water quality, and submittal of an annual report to the Regional Board and State Water Board.

MS4 Program Management

As a Principal Permittee, and in accordance with the 2014 Implementation Agreement, the District conducts certain activities to coordinate the efforts of the Co-Permittees and facilitate compliance with the Permit. These activities include chairing monthly meetings of the Permittees' NPDES advisory committee (Desert Task Force), administration of area-wide programs (e.g., public education, household hazardous waste collection, hazardous material spill

response, stormwater sample collection and analysis), ongoing program development and preparation of the Annual Report to the Regional Board. The District will also continue to focus its efforts on identifying and commenting on statewide issues that affect local stormwater programs.

Area-Wide MS4 Programs

The District will continue to provide financial support for several important "area-wide" BMP programs implemented on behalf of the Permittees. The programs currently include:

Public Education

The District provides for coordination and oversight of the area-wide NPDES public education and outreach efforts, including public outreach events, school and adult education programs, printed brochures and commercial media campaigns. This includes continued development and distribution of focused educational outreach materials for specific industries and businesses such as restaurants, auto repair shops, mobile cleaning businesses, and other industrial and commercial activities that are potential sources of stormwater pollution.

Training for Municipal Employees

Municipal training programs are provided to improve understanding of the NPDES Permit requirements and stormwater BMPs. The classes focus on methods to reduce and/or eliminate sources of stormwater pollution from public agency facilities and activities, implementation of the WQMP, local stormwater ordinances, and State Construction and General Permit requirements. Training is conducted specifically for construction inspection staff, municipal facilities maintenance staff, and staff responsible for new development/redevelopment project review.

Household Hazardous Waste Collection / ABOP

The District and Permittees provide financial support to the County Department of Waste Resources to support the permanent HHW collection site in the City of Palm Springs, ongoing mobile HHW collection events, and operation of the ABOP program, all of which provide local residents with opportunities to properly dispose of HHW.

Water Quality Monitoring

In collaboration with the CVWD, the District conducts wet weather and dry weather water quality sample collection and analysis in accordance with the fourth-term MS4 Permit's Monitoring and Reporting Program (Section L). The District continues to improve the reporting of water quality monitoring activities and results.

CONCLUSIONS AND RECOMMENDATIONS

The area-wide Municipal Stormwater Program for the Whitewater Watershed has been implemented in an efficient, cost-effective manner through the ongoing cooperative efforts of the District, the Co-Permittees, the Regional Board, the Riverside County Fire Department, and the County Department of Waste Resources. The District's NPDES Program activities, which are funded by these WWBAA assessments, are required to comply with the current NPDES Permit for the Whitewater Watershed and enforceable provisions of the California Water Code and the Federal Clean Water Act, which regulate the discharge of stormwater from municipally owned storm drains and flood control facilities. These mandatory stormwater management program activities are an essential component of the District's continuing operation and maintenance of its critical public safety facilities; therefore, the following action is recommended:

Levy a Flood Control Benefit Assessment in the Whitewater Watershed Benefit Assessment Area at an unchanged rate of \$3.63 per benefit assessment unit for the FY 2016-2017.

ORDINANCE NO. 14

AN ORDINANCE OF THE RIVERSIDE COUNTY FLOOD CONTROL AND WATER CONSERVATION DISTRICT ESTABLISHING A BENEFIT ASSESSMENT FOR THE NATIONAL POLLUTANT DISCHARGE ELIMINATION SYSTEM (NPDES) STORMWATER PROGRAM

The Board of Supervisors of the Riverside County Flood Control and Water Conservation District, State of California, do ordain as follows:

ARTICLE I

GENERAL

Section 1. Title.

This Ordinance shall be known as the "NPDES Program - Benefit Assessment Ordinance" of the Riverside County Flood Control and Water Conservation District.

Section 2. Purpose.

The United States Environmental Protection Agency (the "EPA") has, consistent with Section 402 of the Federal Clean Water Act, as amended, promulgated the National Pollutant Discharge Elimination System Regulations (the "NPDES Regulations") pursuant to which the EPA, through the appropriate California Regional Water Quality Control Board (the "CRWQCB") has required the Riverside County Flood Control and Water Conservation District (the "District") and other affected public entities to secure a National Pollutant Discharge Elimination System Stormwater Permit (the "NPDES Permit") which does require the District to develop, implement and manage identified programs dealing with stormwater runoff. The parcels of land within the respective watersheds within the District's jurisdiction for which a NPDES Permit is

6-4-91 12

1 required will benefit from these programs. The Board of
2 Supervisors of the District has determined, pursuant to the
3 Riverside County Flood Control and Water Conservation Act (the
4 "District Act"), which is Chapter 48, as amended, of the
5 California Water Code Appendix, to establish certain Benefit
6 Assessment Areas in which the District will annually levy a
7 Benefit Assessment to pay the cost of these programs required by
8 the NPDES Permit. The Board of Supervisors of the District,
9 consistent with Section 48-14 of the District Act, held a noticed
10 public hearing at which time all testimony, oral and written, was
11 considered. As the conclusion of the public hearing, the Board of
12 Supervisors of the District adopted resolutions establishing the
13 Benefit Assessment Areas. The provisions of this Ordinance
14 confirming the establishment of the Benefit Assessment Areas and
15 providing for the annual levy of a Benefit Assessment are
16 consistent with the District Act and the reports prepared by the
17 Chief Engineer of the District and accepted by the Board of
18 Supervisors of the District.

19 The Board of Supervisors of the District finds that
20 the Benefit Assessment to be annually levied shall be based on the
21 proportional stormwater runoff generated by each lot or parcel
22 within the Benefit Assessment Area. Revenues derived from the
23 Benefit Assessment shall be applied exclusively to pay the
24 District's administrative and program costs associated with the
25 NPDES Permit required for the Benefit Assessment Area and are to
26 be apportioned to the Benefit Assessment Area in which they are
27 collected.

28 ////
