BACKGROUND:

Summary

The California Water Code, also known as the Porter-Cologne Act, established nine Regional Water Quality Control Boards (Regional Boards) for California, which have primary responsibility for protecting water quality and implementing the National Pollution Discharge Elimination System Program required by the Federal Clean Water Act. To comply with Federal and State law, Riverside County is required to comply with Municipal Separate Storm Sewer System (MS4) Permits issued by the three California Regional Water Quality Control Boards covering the Santa Ana, Whitewater, and the Santa Margarita Regions. These Regional Boards regulating Riverside County have required inspection and inventory of all existing commercial and industrial businesses, and prioritization as to the type of business and potential threat to water quality through their respective MS4 Permits. On November 7, 2006 (Agenda item 3.34), the Board of Supervisors adopted Ordinance No. 857 establishing the Business Registration and Licensing Program for the purpose of Business registration and inspection for compliance with the MS4 permits.

Ordinance No. 857 requires businesses in the unincorporated area of Riverside County to register with the County and pay a registration fee to cover the cost of periodic water quality compliance inspections of businesses. The Regional Water Quality Control Boards require the County to keep an inventory of all businesses and their uses, with the exception of those that fall under an exempt category. Exempt businesses include but are not limited to, residential facilities, churches, home occupations, agriculture, and non-profit organizations. For a complete listing of exempt business types, refer to Ordinance 857.1, Section 4. Exemptions. Businesses that are not exempt are categorized by priority based on their potential to discharge pollutants.

On March 1, 2016 (Agenda item 3-29), the County Board of Supervisors directed the County of Riverside Transportation and Land Management Agency (TLMA) to work with County Counsel to prepare and process an ordinance amendment to Ordinance 857 in order to make it more "business friendly" and to accurately reflect the program's intent.

Key modifications to the Ordinance include the following:

**SUBMITTAL TO THE BOARD OF SUPERVISORS COUNTY OF RIVERSIDE,
STATE OF CALIFORNIA**

- Changing the title from Business Registration and Licensing Program to Business Storm Water Compliance Program.
- Making the Ordinance less intrusive to businesses by providing advance notice and coordination with the business owner prior to inspections.
- Clarifying that the intent and goal of the Ordinance is storm water quality compliance, and not business practice regulation.
- Aligning business categorizations with actual risk and establishing a fixed fee for registration and inspection.

Proposed Ordinance 857.1 changes the existing “deposit-based” fee structure to a flat fee structure that more accurately reflects the County costs to administer the program. Businesses are categorized as Low, Medium, or High, based on the type of business and its potential to discharge pollutants into the storm water system. Based on the business category an inspection would occur once a year or on a cycle as long as once every five years. The proposed flat fee is \$400 for each inspection. If a deficiency is found the owner is given the opportunity to correct it. If upon the second inspection the owner has not corrected the deficiency, they will be charged an enforcement fee of \$225 per additional inspection.

The businesses category/priority is defined as follows:

Low – These businesses have no outdoor activity, but are required to be inspected by the MS4 permit. Mobile businesses not discharging used water and businesses previously categorized as Medium and have had flawless inspections in the past may be reclassified to Low Priority. The inspection cycle for Low Priority businesses is once every 5 years.

Medium – These businesses have minimal outdoor activity, and typically have active storm water Best Management Practices in place. Retail stores and markets normally fall into this category. The inspection cycle for Medium Priority businesses is every 2 years.

High – High priority businesses are often located near a water body, environmentally sensitive areas, or their business type is identified in the MS4 permit as High Risk. Typically these businesses are manufacturing, gas stations, auto repair facilities, and nurseries. The inspection cycle for High Priority businesses is annually.

County Counsel has approved Ordinance No. 857.1 as to form.

Impact on Residents and Businesses

Amending Ordinance No. 857 clarifies the purpose and intent of the Business Registration Program so that it is clear to residents and businesses that this is not intended to be for business licensing, but rather MS4 permit compliance. Other modifications to the language will reduce redundancy, reflect current legal and jurisdictional conditions, and simplify fees; all of which will improve customer service for business owners within unincorporated Riverside County.

SUPPLEMENTAL:

Additional Fiscal Information

This Ordinance also revises the Business Registration deposit-based fee structure to a simpler flat fee structure for inspection and enforcement. This revision is revenue neutral.

Contract History and Price Reasonableness

A proposed business inspection fee covers the reasonable costs of providing regulatory services. An analysis was performed to determine the appropriate flat fee by evaluating business inspection costs over the last 5 years. Consideration was given to efficiencies that could be realized through reduced billings and accounting efforts. This Ordinance is expected to reduce the cost of inspection services, by generating one bill and by allowing medium priority businesses to be reclassified as low priority businesses when businesses demonstrate regular full compliance with NPDES requirements.

BACKGROUND:

Summary

There is a need to re-evaluate and amend our business license and registration program in order to make it more "Business Friendly" and to accurately reflect the program's intent. Although it is labeled as a business registration and licensing program, the County functionally uses the program as a means to monitor compliance with State storm water regulations, not to monitor the operation of a business or determine if they are in compliance with other State or County Codes (such as zoning or building requirements).

In 2005, the County took steps to implement a National Pollutant Discharge Elimination System (NPDES) Commercial/Industrial Compliance Program and Business Registration and Licensing Program, in order to meet State mandates. This was in response to the 2004 NPDES Municipal Separate Storm Sewer System (MS4) Permit issued by the San Diego Regional Water Quality Control Board which, for the first time, required the County to establish a formal water quality/storm water discharge inspection program of commercial and industrial facilities. The Santa Ana and Colorado River Basin Water Boards, the other two State Water Quality Control Boards which oversee portions of Riverside County, included similar requirements in the NPDES MS4 Permits they issued in 2007 and 2008, respectively. The intent of these programs is to monitor business activity that has the potential for discharging pollutants into our storm water system.

The Board of Supervisors adopted Ordinance No. 857 on November 7, 2006. Ordinance No. 857 requires businesses in the unincorporated area of Riverside County to register with the County and to obtain a separate business registration and storm water compliance inspection for each fixed physical location, and for those that are operated on a mobile commercial basis. Ordinance No. 857 also requires the payment of business registration fees to cover the reasonable costs of providing the registration and licensing regulatory service, as well as payment to the County for the actual costs of periodic business inspections.

The County currently has 5,746 businesses in our database that participate in the Business Registration and Licensing Program. The State, through its Water Quality Control Boards, requires that the County keep an inventory of all uses that are not otherwise exempted. Certain uses are exempt from the ordinance. The current ordinance is attached as Exhibit "A". Businesses that are not exempt are categorized by Priority based on their potential to discharge pollutants into the storm water system, as follows:

None – Examples of businesses in this category include home based businesses like internet sales, or commercial businesses like a barbershop or a realtor office, where all business operations are conducted inside and a business is very unlikely to produce a storm water pollutant. Inspections are not required for these businesses, which constitute about 40% of the businesses in the inventory register.

Low – Inspections required at least once every 5 years. An example of a low priority business would be an automotive glass or deli. Approximately 20% are considered low priority

Medium – Inspections required at least once every 2 years. An example of a medium priority business would be a restaurant or pharmacy. Approximately 15% are considered medium priority.

High – Inspections required annually. An example of a high priority business would be a gas station, automotive repair facility, or manufacturing facility. Approximately 25% are considered high priority

Given that the emphasis is on storm water compliance, TLMA has shifted program oversight from our Building and Safety Department to our Transportation Department. Our grading/environmental compliance inspectors now reside in the Transportation Department, since Transportation also interacts with the Water Boards on our own Capital Projects and oversees compliance of new developments with our MS4 permits.

The purpose of this submittal is to initiate the amendment of Ordinance No. 857, by re-evaluating the provisions contained therein. Proposed changes to be considered include:

- Changing the title from Business Registration and Licensing Program to Business Storm Water Compliance Program.
- Making the Ordinance less intrusive to businesses through advance notice and coordination prior to entering the premises to conduct an inspection.
- Ensure that Ordinance No. 857 has a clear and understandable goal of water quality compliance, not overall business practice regulation.
- Re-evaluate the program as a whole to see if businesses are appropriately categorized in the database based on their actual potential for risk to the storm water system. Align our inspection protocol with the risk assessment to look for opportunities to reduce overall inspection costs by grouping field visits and performing inspections in a more cost-efficient manner. Consider fixed-fee options (which may also require amendment of other County fee ordinances) for low and medium priority businesses, which are now treated similar to the high priority businesses in a deposit based fee approach to cover inspection costs.

Impact on Residents and Businesses

Amending Ordinance No. 857 will streamline the Business Registration and Licensing Program to be more efficient; reduce redundancy; reflect current legal and jurisdictional conditions; and improve customer service for business owners within unincorporated Riverside County.

SUPPLEMENTAL:

Additional Fiscal Information

An assessment of the revised business license fees will be conducted as part of the Ordinance amendment process.

Contract History and Price Reasonableness

A standard business license fee is currently charged by the County to cover the reasonable costs of providing the regulatory services included in the Business Registration and Licensing Program. The appropriate amount will be updated based on this ordinance review. It is anticipated that the overall cost of program compliance will drop for some businesses.
