BACKGROUND:

Summary

On September 12, 1995, the Riverside County Board of Supervisors approved an Investment Policy for all funds held in trust outside the County Treasury including funds managed by a fiscal agent on behalf of the Riverside County Flood Control and Water Conservation District.

BACKGROUND:

Summary (continued)

On March 18, 1996, the Board approved Policy B-19: Land Secured Investment Policy which, in accordance with Government Code Section 53646, provided for quarterly disclosure reports on the Investment Portfolio to be brought before the Board in public session and to be filed with the Clerk of the Board.

**Riverside County Flood Control and Water Conservation District
Disclosure Report on Investment Portfolio**

Purpose: The Riverside County Flood Control District will provide the following report monthly to members of its Board of Supervisors, the County Executive Officer and the County Investment Oversight Committee. The report is placed on the District's Board Agenda quarterly and is available to any member of the public interested in the information.

The report will consider three essential areas involving District management of the portfolio, namely (1) the preservation of principal in the funds invested, the cost (i.e., book value) versus the current market value of the securities in the portfolio, (2) the liquidity position of the portfolio, and (3) the current yield on the portfolio as of the report date.

Portfolio: The following is the composition of the portfolio ranked in accordance with the perceived market risk of the securities within the portfolio reported by the District's representative fiscal agent (U.S. Bank Corporate Trust) as of March 31, 2017.

Risk	Type	Cost	Market	%
1.0	U.S. Treasury Bond	\$ 383,699.25	\$ 493,480.35	84.80 %
1.2	U.S. Bank Money Market	\$ 88,488.30	\$ 88,488.30	15.20 %
	Totals	\$ 472,187.55	\$ 581,968.65	100.00 %
	Paper (Loss)/Gain*		\$ 109,781.10	

- Fiscal Year to Date Interest Earnings is \$72,267.94.

Footnotes:

Generally, the level of risk takes into account two major components: the default or credit risk and the market risk associated with the probability that the security will be affected by market changes in short-term interest rates. Risk ranking has been assigned with 1.0 being the lowest level of risk and 2.0 being the highest.

- 1.0 U.S. and Federal Agency Securities directly backed by the United States Treasury are considered the safest.
- 1.1 Next in order of safety are those Federal Agency securities that have an implied guarantee of the United States Treasury.
- 1.2 The third category are those securities that have some form of government collateral backing (i.e., Investment Agreements, Repurchase Agreements, and Money Market Funds).
- 1.3 The fourth category evaluates the credit worthiness, capitalization, and the time duration of the investment.
- 1.4 The fifth category constitutes those that have state and local government collateral backing.

As of March 31, 2017, the liquidity position of the portfolio was:

Maturities less than 1 Year	\$ 88,488.30	84.80 %
Maturities more than 1 Year	\$ 493,480.35	15.20 %

I certify the above information is true and correct as of the date of this report.
