BACKGROUND:

Summary

Section 18 of the District Act requires the Board of Supervisors to hold a public hearing for the purpose of considering all comments regarding proposed facilities before authorizing construction of such facilities.

The Riverside County Flood Control and Water Conservation District (District) in partnership with the Natural Resources Conservation Service (NRCS) and Meadowview Community Association (HOA), is proposing to design and construct the Meadowview Stream Restoration Project (project). The project proposes the restoration of approximately 1,200 lineal feet of streambank totaling 4.25 acres. The District's cost of implementing the project is estimated at \$210,641.23. The District proposes to fund the design, construction and construction inspection costs for the physical modifications only. Surface improvements and future operation and maintenance costs associated with the project will accrue to the HOA.

Pursuant to Section 15333(d)(5) of the California Environmental Quality Act Statutes and Guidelines, small habitat restoration projects of less than five acres are categorically exempt from California Environmental Quality Act (CEQA) provided that there would be no significant adverse impact to endangered, rare or threatened species or their habitat and that there are no hazardous materials at or around the project site that may be disturbed or removed and the project will not result in cumulative impacts. Based on the analysis that has been conducted for the project, none of the aforementioned conditions apply to the project and the project is consistent with the Class 33 Categorical Exemption. As such, in accordance with CEQA, the Clerk of the Board will file a Notice of Exemption with the County Clerk within five days of the Board approving the project if said project is approved at the April 10, 2018 Board of Supervisors meeting.

Impact on Residents and Businesses

Improved flood protection and public safety in the project vicinity.

ENGINEER'S STATEMENT

The proposed Meadowview Stream Restoration Project is located in the city of Temecula, Riverside County, California. The project site is generally bounded to the north and to the west by undeveloped land, to the east by Meadowview Trail, and to the south by Del Rey Road. The project consists of approximately 1,200 lineal feet (4.25 acres) of stream stabilization with native vegetation and bioengineering techniques, such as laying back cut banks, adding rock riprap, compost rolls, and hydroseed in all disturbed areas. Completion of the Meadowview Stream Restoration Project will improve public safety, water quality and the natural environment by reducing bank erosion and restoring the native habitat. The Meadowview Community Association will assume operation and maintenance of the project upon project completion. The District's estimated cost for construction of the proposed project is approximately \$210,641.23.
