**BACKGROUND:**

**Summary**

The service required and to be performed is for the maintenance of storm water runoff catch basin filters attached to the inside of storm water catch basins for the removal of hydrocarbons, trash, and other pollutants from storm water runoff. The filters are located within the County maintained road right-of-way and within designated developments annexed into the Landscaping and Lighting Maintenance District No. 89-1-Consolidated (L&LMD No. 89-1-C) or other Special District (CSA/CFD) collecting assessments or fees for the required service. The storm water runoff catch basin filters are serviced in three equally spaced intervals throughout the year. Service and maintenance records are provided to the County and become part of the annual County NPDES report presented to the respective State Water Boards annually.

**Impact on Residents and Businesses**

Federal, State and Local Clean Water Act regulations require that storm water catch basin filters be maintained and serviced on a recurring basis. The intent of the regulations is to ensure that the systems, on a continuing basis, efficiently remove pollutants from storm water runoff thereby preventing pollution of the County's water resources.

The Personal Service Agreement (PSA) will be in effect for five years, with the final completion date of June 30, 2022, unless terminated earlier.

**SUPPLEMENTAL:**

**Contract History and Price Reasonableness**

Purchasing and Fleet Services issued a formal Request for Quote (RFQ) TLARC-573, and solicitations were sent to relevant Fossil Fuel Filter Maintenance Service providers and advertised the solicitation on Public Purchase. Four vendors met with the County staff at a mandatory pre-bid meeting. Three responses to the RFQ were received with a cost ranging \$233 to \$389, per catch basin.

**SUBMITTAL TO THE BOARD OF SUPERVISORS COUNTY OF RIVERSIDE,  
STATE OF CALIFORNIA**

The annual amount of \$250,000 includes an estimated 10% contingency amount for costs outside the scope of regular maintenance, including but not limited to: replacement of ripped filters, replacement filters, upgrades, and vandalism.

The Transportation Department recommends the award of the contract to the lowest responsive and responsible contractor, Drainage Protection Systems, a division of Oldcastle Precast, Inc.
