C.E.O. RECOMMENDATION: Approve

BACKGROUND:

Summary

The California Climate Investments and the Department of Forestry and Fire Protection (CAL FIRE) budgeted up to \$155 million to CAL FIRE's Forest Health and Fire Prevention Programs. Together, these programs improve resiliency of forested and forest-adjacent communities and upper watershed forests while achieving climate goals. The grant funding is available for projects that focus on supporting local efforts to remove dead and dying trees that pose a threat to public health and safety and for projects that reduce the wildfire threat to habitable structures within State Responsibility Areas (SRA). Funded activities include hazardous fuel reduction, fire planning, and fire prevention education with an emphasis on improving public health and safety while reducing greenhouse gas emissions.

Qualifying projects and activities will help California cope with its extensive tree mortality crisis and provide benefits to habitable structures in the State Responsibility Area (SRA). Non-SRA lands may be included within project boundaries but project activities must provide an overall benefit to reduce the threat of wildfires to the greatest number of people, habitable structures, and SRA land area. Projects will be designed to reduce greenhouse gas emissions during project activities and over time through wildfire reduction. Matching funds are not required; however, priority is given to projects that contain matching funds and leverage other financial resources.

The department plans to apply for Fire Prevention Grant Program funding for a multifaceted program to address the high fire hazard caused by non-native insect infestation in the Riverside County mountain communities as well as potentially create fuelbreaks in areas of the county with the highest fire risk. The Project components will include survey and mapping of tree health and mortality, treatment of trees and forest fuels and other related forest restoration projects, and fuel modification activities.

If the Fire Department is awarded funding, we will seek acceptance of the award from the Board of Supervisors.

Impact on Residents and Businesses

**SUBMITTAL TO THE BOARD OF SUPERVISORS COUNTY OF RIVERSIDE,
STATE OF CALIFORNIA**

These funds are dedicated to protecting the health and safety of the public and firefighting personnel against fire and fire related hazards in the unincorporated area.

Additional Fiscal Information

The Fire Prevention Grant Program does not require cost share match. The department will provide cost share through our approved budgeted departmental functions.

Contract History and Price Reasonableness

The department was authorized to accept two grant awards for the Fire Prevention Grant Program on November 6, 2018 (3-20 and 3-21) and these projects are ongoing. This funding source replaces the State Responsibility Area Fire Prevention Fund (SRAFPF) and Tree Mortality (TM) Grant Program previously funded by CAL FIRE. On April 2, 2015, the department was awarded \$296,000 in SRAFPF funding to reduce hazardous fuels in the Idyllwild/Pine Coves areas. The Board of Supervisors action on May 7, 2015 (3-57) authorized the acceptance of the grant and the terms of the grant were satisfied.

Diane Sinclair, Deputy Director-Fire Admin 12/3/2018
