BACKGROUND:

Summary

Preventative maintenance programs are implemented by Riverside County Department of Waste Resources (Waste Resources), Transportation and Land Management Agency (TLMA), and the Flood Control Water Conservation District (Flood Control) for Caterpillar and other types of heavy equipment, which includes the replacement or repair of major components. The reconditioning and repair of various components assists in prolonging the life cycle use of these machines and provides an alternative to replacement of fleet equipment. Much of the maintenance work is done by County mechanics, however, may require support from a heavy equipment dealer and service provider.

Quinn Company is able to perform the reconditioning and repair service on all Caterpillar equipment currently used in County participating department fleets. The standard operating practice for fleet mechanics of various departments is to assess the component repair needs on site and transport that component to the awarded vendor's location. Quinn Company's proximity to the participating department's locations allows for a quicker turnaround time and less down time for field heavy equipment. In addition, Quinn Company may provide on-site component reconditioning/repairs at various locations throughout the county as needed.

Impact on Residents and Businesses

Utilizing local contractors provides for less travel time and cost in regards to delivery and pick-up of components and on-site repair services. Component repairs can be completed in a timely manner, resulting in less down time of machinery, which can minimize delays in landfill operations, transportation maintenance, and flood control operations that may negatively impact residents and businesses.

Additional Fiscal Information

The estimated annual aggregate amount of \$1.2 million is based on past cumulative budgeted costs for all participating department's equipment repair needs. An additional contingency of \$120,000 per year for a total of \$600,000 is included in the budget allocation table below. County shall have no obligation to purchase any specified amounts of service. Please see budget distribution in table below:

Contract History and Price Reasonableness

County Purchasing, on behalf of the participating departments, released a Request for Quote (RFQ# PUARC-1614) for Heavy Equipment Component Reconditioning and Repair. Purchasing sent notifications to 25 companies as well as publicly advertised on The County Purchasing's bid site, with only one (1) bid response received.

The quote was reviewed by the participating department's Fleet Supervisors for overall component inclusive repair cost for the example line item equipment including used hourly labor rates, travel charges and ability to perform the required reconditioning and repair services within the Repair groups stated in the RFQ. Following the review, the Fleet Supervisors recommended awarding to Quinn Company as the responsive and responsible contractor.

Quinn Company submitted a marked down percentage of 10% on all listed power train reconditioned parts. Quinn Company meets the County of Riverside requirements for reconditioned components such as; engines, transmissions, torque converters, and differentials.

Policy shall name the COUNTY as Additional Insureds.

D. General Insurance Provisions - All lines:

1) Any insurance carrier providing insurance coverage hereunder shall be admitted to the State of California and have an A M BEST rating of not less than A: VIII (A:8) unless such requirements are waived, in writing, by the County Risk Manager. If the County's Risk Manager waives a requirement for a particular insurer such waiver is only valid for that specific insurer and only for one policy term.

2) The CONTRACTOR must declare its insurance self-insured retention for each coverage required herein. If any such self-insured retention exceeds \$500,000 per occurrence each such retention shall have the prior written consent of the County Risk Manager before the commencement of operations under this Agreement. Upon notification of self-insured retention unacceptable to the COUNTY, and at the election of the County's Risk Manager, CONTRACTOR'S carriers shall either; 1) reduce or eliminate such self-

insured retention as respects this Agreement with the COUNTY, or 2) procure a bond which guarantees payment of losses and related investigations, claims administration, and defense costs and expenses.

3) CONTRACTOR shall cause CONTRACTOR'S insurance carrier(s) to furnish the County of Riverside with either 1) a properly executed original Certificate(s) of Insurance and certified original copies of Endorsements effecting coverage as required herein, and 2) if requested to do so orally or in writing by the County Risk Manager, provide original Certified copies of policies including all Endorsements and all attachments thereto, showing such insurance is in full force and effect. Further, said Certificate(s) and policies of insurance shall contain the covenant of the insurance carrier(s) that thirty (30) days written notice shall be given to the County of Riverside prior to any material modification, cancellation, expiration or reduction in coverage of such insurance. In the event of a material modification, cancellation, expiration, or reduction in coverage, this Agreement shall terminate forthwith, unless the County of Riverside receives, prior to such effective date, another properly executed original Certificate of Insurance and original copies of endorsements or certified original policies, including all endorsements and attachments thereto evidencing coverage's set forth herein and the insurance required herein is in full force and effect. CONTRACTOR shall not commence operations until the COUNTY has been furnished original Certificate (s) of Insurance and certified original copies of endorsements and if requested, certified original policies of insurance including all endorsements and any and all other attachments as required in this Section. An individual authorized by the insurance carrier shall sign the original endorsements for each policy and the Certificate of Insurance.

4) It is understood and agreed to by the parties hereto that the CONTRACTOR'S insurance shall be construed as primary insurance for any liability caused by Contractor, and the COUNTY'S insurance and/or deductibles and/or self-insured retention's or self-insured programs shall not be construed as contributory, to the extent that the related liability is attributable to County.

5) If, during the term of this Agreement or any extension thereof, there is a material change in the scope of services; or, there is a material change in the equipment to be used in the performance of the scope of work; or, the term of this Agreement, including any extensions thereof, exceeds five (5) years; the COUNTY reserves the right to adjust the types of insurance and the monetary limits of liability required under this Agreement, if in the County Risk Manager's reasonable judgment, the amount or type of insurance carried by the CONTRACTOR has become inadequate.

6) CONTRACTOR shall pass down the insurance obligations contained herein to all tiers of subcontractors working under this Agreement.

7) The insurance requirements contained in this Agreement may be met with a program(s) of self-insurance acceptable to the COUNTY.

8) CONTRACTOR agrees to notify COUNTY of any claim by a third party or any incident or event that may give rise to a claim arising from the performance of this Agreement.

23. General

23.1 CONTRACTOR shall not delegate or assign any interest in this Agreement, whether by operation of law or otherwise, without the prior written consent of COUNTY. Any attempt to delegate or assign any interest herein shall be deemed void and of no force or effect.

23.2 Any waiver by COUNTY of any breach of any one or more of the terms of this Agreement shall not be construed to be a waiver of any subsequent or other breach of the same or of any other term of this Agreement. Failure on the part of COUNTY to require exact, full, and complete compliance with any terms of this Agreement shall not be construed as in any manner changing the terms or preventing COUNTY from enforcement of the terms of this Agreement.

23.3 In the event the CONTRACTOR receives payment under this Agreement, which is later disallowed by COUNTY for nonconformance with the terms of the Agreement, the CONTRACTOR shall promptly refund the disallowed amount to the COUNTY on request; or at its option the COUNTY may offset the amount disallowed from any payment due to the CONTRACTOR.

23.4 CONTRACTOR shall not provide partial delivery or shipment of services or products unless specifically stated in the Agreement.

23.5 CONTRACTOR shall not provide any services or products subject to any chattel mortgage or under a conditional sales contract or other agreement by which an interest is retained by a third party. The CONTRACTOR warrants that it has good title to all materials or products used by CONTRACTOR or provided to COUNTY pursuant to this Agreement, free from all liens, claims, or encumbrances.

23.6 Nothing in this Agreement shall prohibit the COUNTY from acquiring the same type or equivalent equipment, products, materials or services from other sources, when deemed by the COUNTY to be in its best interest. The COUNTY reserves the right to purchase more or less than the quantities specified in this Agreement.

23.7 The COUNTY agrees to cooperate with the CONTRACTOR in the CONTRACTOR's performance under this Agreement, including, if stated in the Agreement, providing the CONTRACTOR with reasonable facilities and timely access to COUNTY data, information, and personnel.

23.8 CONTRACTOR shall comply with all applicable Federal, State and local laws and regulations. CONTRACTOR will comply with all applicable COUNTY policies and procedures. In the event that there is a conflict between the various laws or regulations that may apply, the CONTRACTOR shall comply with the more restrictive law or regulation.

23.9 CONTRACTOR shall comply with all air pollution control, water pollution, safety and health ordinances, statutes, or regulations, which apply to performance under this Agreement.

23.10 CONTRACTOR shall comply with all requirements of the Occupational Safety and Health Administration (OSHA) standards and codes as set forth by the U.S. Department of Labor and the State of California (Cal/OSHA).

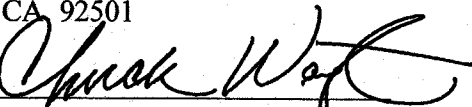

23.11 This Agreement shall be governed by the laws of the State of California. Any legal action related to the performance or interpretation of this Agreement shall be filed only in the Superior Court of the State of California located in Riverside, California, and the parties waive any provision of law providing for a change of venue to another location. In the event any provision in this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the remaining provisions will nevertheless continue in full force without being impaired or invalidated in any way.

23.12 This Agreement, including any attachments or exhibits, constitutes the entire Agreement of the parties with respect to its subject matter and supersedes all prior and contemporaneous representations, proposals, discussions and communications, whether oral or in writing. This Agreement may be changed or modified only by a written amendment signed by authorized representatives of both parties.

IN WITNESS WHEREOF, the Parties hereto have caused their duly authorized representatives to execute this Agreement.

EXHIBIT "A"
SCOPE OF WORK

The specifications set forth are the minimum requirements for the reconditioning and repair of various components of Heavy Equipment used in refuse and dirt operations at various landfill sites for Riverside County's Waste Resources Department (RCWRD), as well as all construction type equipment listed for the Transportation and Land Management Agency (TLMA), and Flood Control and Water Conservation District (FCWCD).

PROGRAM INFORMATION:

1.0 Brand names and specifications: The detailed specifications and/or brand names references are descriptive and indicate quality, design, and construction items required (i.e.: Caterpillar, John Deer, etc.) and shall be of Original Equipment Manufacturer (OEM).

1.1 Reconditioning Program: The reconditioning of engines, electronic governor and fuel systems, transmissions, hydrostatic drives, pump drives, transfer cases, differentials, torque convertors and final drives shall be limited to established rebuild facilities that have been furnishing rebuild components for the types of equipment listed. The CONTRACTOR shall have all the necessary tools, equipment, and testing apparatus to properly rebuild and test components prior to turning them back over to COUNTY. The reconditioning of scraper hitches, hydraulic systems components or brake groups and the repair/replace of undercarriage components may be priced by any established shop operation that County deems qualified.

1.2 In either case, the CONTRACTOR shall recondition/repair major components in accordance with the manufacturer's disassembly/assembly instructions found in the applicable manufacturer's equipment services manuals, including the latest updates. Caterpillar parts shall be used exclusively when reconditioning engines, electronic governor and fuel systems, transmissions, hydraulic drives, pump drives, transfer cases, differentials, and hitches on Caterpillar equipment. This could include a combination of new or remanufactured parts. Parts for reconditioning hydraulic system components shall be as manufactured by Caterpillar or COUNTY approved equal. Certain parts shall always be replaced as specified in the applicable manufacturer's assembly/disassembly instructions. Where applicable, Caterpillar Reusable Guidelines shall be followed. CONTRACTOR shall not deviate below minimum standards, but are free to go beyond these standards in the reconditioning of major components if they consider this advisable and it conforms to the desires of COUNTY Program Objectives

1.3 Remanufactured Product: The CONTRACTOR shall always compare the cost for reconditioning to furnishing "Remanufactured Product", for both the complete major component and certain component parts such as hydraulic pumps, brake shoes, starters, etc. and provide COUNTY with notice of the lowest cost item(s). If economically justifiable, a complete manufacturer's "Remanufactured Product" replacement unit should be offered in lieu of reconditioning an existing COUNTY core. COUNTY will respond to the vendor within three (3) working days after receiving the evaluation and estimate.

1.4 Additional Work: Although additional work is not anticipated, one or more exceptions to the "normal" reconditioning work could occur with any component. The CONTRACTOR will be notified at that time to prepare a quote based on the specific work requested on an individual basis. Quotes will be reviewed by COUNTY administration for approval and notice to proceed. Award for these exceptions will be based on best cost to the County.

1.5 Quantity of components reconditioned annually: Numbers below are based on historic value and may not accurately reflect the services needed throughout the contract period of performance. There is no obligation by the COUNTY of Riverside to purchase any specified amount of goods or services. Annual service requirements may be greater or smaller based on current equipment needs.

- a) **Waste Management Department Annual Estimates:** Undercarriage - 3, Final Drives - 2, Engine - 34, Trans/Torque - 3, Steering Clutch - 3, Differential - 3.
- b) **Flood Control Annual Estimates:** Undercarriage - 1, Final Drives - 1, Engine - 1, Trans/Torque - 1, Steering Clutch - 1, Differential - 1
- c) **Transportation Department Annual Estimates:** Undercarriage- 1, Engine- 1

1.6 Catastrophic failure: Usual practice for fleet mechanics of various departments is to assess the component repair needs on site and transport that component to the CONTRACTOR'S location. However, in the event of catastrophic failure of a piece of equipment, the COUNTY may require the CONTRACTOR to come on-site and diagnose and/or repair the machine if possible at the location. This would apply when the catastrophic failure of a component(s) will not allow for the equipment to be transported in whole or part to the vendor's location. .

1.7 Turnaround Time:

- a) Within five (5) working days after receipt of an Engine (Group 1) and/or Transmission (Group 3), the CONTRACTOR shall have the project torn down and evaluated; develop a written estimate of cost and notify the applicable COUNTY departmental contact. All other major components within Groups 1, 2, 3, 4, 5 and 6 will have a turnaround time of within two (2) working days. Additional work must be communicated along with the evaluation for departmental approval.
- b) Normally, major components delivered to the CONTRACTOR shall be reconditioned and ready for COUNTY to pick up within sixteen (16) working days. Occasionally, however, in the event of a critical need COUNTY may require that a component be ready to pick up within seven (7) calendar days. The vendor will not be held liable for failure or delay in a fulfillment if caused, directly or indirectly, by fire, strike, act of God, or act of Government. COUNTY departmental representative will communicate if the component need is "critical" at the time of service scheduling.
- c) With regard to field reconditioning work (i.e. Engine mid-life bearing roll-in), the vendor shall begin an on-site job within three (3) working days of being notified by COUNTY to perform said work.
- d) Any exceptions to the above turnaround times MUST be clearly communicated at the time of service request. COUNTY will determine at that time to accept the delay or contact another awarded contractor(s) based on the requirement parameters at that time. Critical needs will be determined and clearly communicated at the time of service scheduling.

1.8 Quantity of Major Components to be reconditioned:

COUNTY cannot guarantee the number of major components that will be reconditioned over the contract period. The figures listed in the Program Information are based on COUNTY'S current preventative maintenance practices. CONTRACTOR shall recondition more or less major components at the unit prices quoted in accordance with the actual requirements throughout the contract period.

1.9 Removal, Installation and Start Up:

Except for reconditioning field work and where noted in these specifications, COUNTY'S forces will remove, deliver, pick up, and reinstall each major component reconditioned by the CONTRACTOR. County will notify the CONTRACTOR before a reconditioned component is installed in a machine. At its option, the CONTRACTOR may inspect each component installation and supervise the startup of equipment with the reconditioned component(s).

2.0 Nameplates:

Except for engine mid-life bearing roll-ins, and brake and undercarriage repairs or rebuilds, each major component reconditioned shall have a metal tag affixed to it showing the following:

- a. Date reconditioned
- b. Original part number
- c. A rebuild serial number
- d. A blank space to inscribe or stamp the date of installation

2.1 Electronic Control Modules (ECM)

- a) Flood Control and Waste Resources are currently the only COUNTY participating departments requiring outsourcing of service for diagnosis and replacement of ECM's. ECM's will be replaced and serviced to the applicable manufacturing specifications based on make and model of equipment. Repair service will take place at the equipment's location.
- b) Warranty on all parts and labor to diagnose, disassemble, and repair the electronics control units will be required and must be clearly communicated at time of service. Warranty information on this component should be included in the bid response.

2.2 Factory Warranty Time

Labor Time will be calculated according to factory warranty time. The factory warranty time is the amount of time that the factory authorizes for performing the job under warranty.

2.3 Combination Time: Combination time refers to the time possibly required for jobs performed with other operations. One example might be that while performing brake shoe replacement, you need to replace a leaking wheel cylinder as well. The Combination Time gives you the time required to replace the wheel cylinder with the shoes already removed. You add combination items to your estimate the same way you add any other labor item

**EXHIBIT "A" CONTINUED
EQUIPMENT LIST**

The following Equipment Lists have been provided by the participating Departments and included for reference. Departments will update the equipment list periodically as current fleet is replaced. The CONTRACTOR will provide cost for new or additional equipment as needed throughout the life of the contracts by written amendment. Equipment will be of like items as those listed and within the commodity of Landfill and Heavy Construction Type Equipment.
