

SUBMITTAL TO THE FLOOD CONTROL AND
WATER CONSERVATION DISTRICT
BOARD OF SUPERVISORS
COUNTY OF RIVERSIDE, STATE OF CALIFORNIA

ITEM
11.1
(ID # 9602)

MEETING DATE:
Tuesday, April 30, 2019

FROM : FLOOD CONTROL DISTRICT:

SUBJECT: FLOOD CONTROL DISTRICT: Review and Determine There is a Need to Continue the Emergency Action and Continue the Implementation of the Emergency Protection Projects in the Areas of Temescal Valley in Unincorporated Western Riverside County and Lake Elsinore for Storm/Flood Emergency Contract Work, Nothing Further is Required Under CEQA, District 1. [\$0] (4/5 vote required)

RECOMMENDED MOTION: That the Board of Supervisors:

1. Review and determine there is a need to continue the emergency action and continue the implementation of the Emergency Protection Projects (Emergency Projects) in the areas of Temescal Valley in unincorporated western Riverside County and Lake Elsinore.

ACTION: 4/5 Vote Required

Handwritten signature of Jason Uhley.

Jason Uhley, GENERAL MGR-CHF FLD CNTRL ENG

4/18/2019

MINUTES OF THE BOARD OF SUPERVISORS

On motion of Supervisor Jeffries, seconded by Supervisor Perez and duly carried, IT WAS ORDERED that the above matter is approved as recommended.

Ayes: Jeffries, Spiegel, Washington and Perez
Nays: None
Absent: Hewitt
Date: April 30, 2019
xc: Flood

Kecia Harper
Clerk of the Board
By Deputy

C.E.O. RECOMMENDATION: Approve

BACKGROUND:

Summary

The Holy Fire began Monday afternoon, August 6, 2018, in the Cleveland National Forest and quickly moved from Orange County into Riverside County. Conditions of extreme peril to people, property and critical infrastructure necessitated the mandatory evacuation of several communities near Lake Elsinore and Temescal Valley. Due to the effects of the Holy Fire, Governor Edmund G. Brown Jr. issued an emergency proclamation for Orange and Riverside Counties on August 9, 2018.

Pursuant to Riverside County Ordinance No. 533, the Riverside County Director of Emergency Services proclaimed a "Local Emergency" in Riverside County on August 9, 2018. The Riverside County Board of Supervisors adopted Resolution No. 2018-170 in a special meeting on August 16, 2018 (Agenda Item No. 1.0) to ratify the Proclamation of Local Emergency as declared by the Riverside County Director of Emergency Services. The Riverside County Board of Supervisors have extended the Proclamation of Local Emergency for the Holy Fire through the adoption of a series of resolutions as the vast burn area left by the Holy Fire leaves Riverside County residents and visitors threatened by flooding and debris flows when rain occurs, most recently through Resolution No. 2019-073, adopted on April 2, 2019 (Agenda Item 3.15).

The District has existing facilities within or below the burn area boundaries, including Horsethief Canyon Storm Drain (Project No. 2-0-00250), Leach Canyon Dam (Project No. 3-0-00105) and West Elsinore MDP - McVicker Debris Basin (Project No. 3-0-00226). Typically, these facilities provide flood protection for much of the adjacent communities during large storm events. However, due to the vast burn area in the canyons and the significant loss of vegetation, these facilities are now at risk of being overwhelmed by stormwater, mud and debris during seemingly modest rain storms. A blockage, reduction in the storage and/or conveyance capacity of the facilities, or damage to the facilities could result in a critical threat to life and property in the areas of Temescal Valley in unincorporated western Riverside County and Lake Elsinore ("Post-Fire Risk Area").

In early October, with scattered thunderstorms forecasted for the region and a significant risk of mud and debris flows in the Holy Fire burn area, the Riverside County Flood Control and Water

**SUBMITTAL TO THE FLOOD CONTROL AND WATER CONSERVATION DISTRICT BOARD
OF SUPERVISORS
COUNTY OF RIVERSIDE, STATE OF CALIFORNIA**

Conservation District's (District) General Manager-Chief Engineer found that the emergency will not permit a delay in the implementation of the Emergency Projects resulting from a competitive solicitation for bids in accordance with California Public Contract Code Section 22050 and the District's Resolution No. F94-39. The District has retained the following contractors on an emergency basis to help implement the Emergency Projects:

1. K E C Engineering
2. KIP Incorporated
3. Sukut Construction, LLC

On October 16, 2018 (Agenda Item No. 11.2), November 6, 2018 (Agenda Item 11.3), December 4, 2018 (Agenda Item 11.1), January 8, 2019 (Agenda Item 11.2), January 29, 2019 (Agenda Item 11.3), February 26, 2019 (Agenda Item 11.4), March 12, 2019 (Agenda Item 11.4), March 26, 2019 (Agenda Item 11.3) and April 9, 2019 (Agenda Item 11.1), the Board of Supervisors made motions to (i) receive and file the Emergency Protection Agreements and associated Amendments, (ii) authorize the use of District funds for the storm/flood emergency contract work done as a part of the Emergency Projects and (iii) determine the need to continue the emergency action and continue the implementation of the Emergency Projects.

A series of winter storms between late November 2018 and March 2019 have triggered flooding and debris flows in the Holy Fire burn area on multiple occasions. This has caused the evacuation of residents, road closures, and damage to property and critical infrastructure. Despite extensive mitigation efforts taken by the County of Riverside, the District and City of Lake Elsinore prior to the storms arrival, the storms have left streets, residential and commercial properties and critical flood control infrastructure loaded with mud and debris which must be cleared before arrival of the next storm. This is a pattern that will be repeated when storms occur over the Post-Fire Risk Area.

It is requested that the Board of Supervisors review and determine there is a need to continue the emergency action and continue the implementation of the Emergency Projects in the Post-Fire Risk Area for storm/flood emergency contract work by K E C Engineering, KIP Incorporated and Sukut Construction, LLC, including any and all necessary cleanup.

Environmental Analysis

Based on the review of the proposed emergency protection action, the District has found that the work is exempt pursuant to Section 15301 for "Existing Facilities" and Section 15269(a), (b) and (c) for "Emergency Projects" of the California Environmental Quality Act ("CEQA") Guidelines. The emergency protection work is associated with existing flood control facilities. The projects in question meet the conditions described in Section 15269(a), (b) and (c) for specific actions necessary to prevent or mitigate an emergency and to maintain essential flood control services. The Governor declared a state of emergency for the Holy Fire on August 9, 2018. In accordance with CEQA, two Notices of Exemption were prepared by the District and filed by the Clerk of the Board upon the Board of Supervisors approval at its October 16, 2018 and January 8, 2019 meetings. The Board of Supervisors' determination that there is a need to continue the emergency action is an implementing action of the Emergency Projects, and the additional emergency contract work are consistent with the above CEQA Notices of Exemptions. Therefore, nothing further is required under CEQA.

Impact on Residents and Businesses

More than 20,000 residents were impacted by the fire, having to evacuate the area. While the fire was 100% contained on September 13, 2018, the conditions in the burn areas of the fire have left the adjacent communities vulnerable to mud and debris flows and flooding during rain storms. In the event of another rain storm, the area may be negatively impacted if these measures are not taken to protect the communities.

Additional Fiscal Information

The District budgets for flood emergencies and/or unexpected contingencies to minimize risks to life and property. Sufficient funds for the Emergency Projects are available in the District's Zone 2 and Zone 3 budgets for FY 2018-2019.

When it rains, mud and debris that is washed from the Holy Fire burn area has the potential to negatively impact water quality within the Santa Ana Watershed. For example, nutrients have been detected in the burn area runoff at levels exceeding 60 times the natural background

COUNTY OF RIVERSIDE, STATE OF CALIFORNIA**

levels. In addition to protecting the public and property, the emergency work the District is undertaking also reduces the amount of such pollutants that may otherwise reach and impair major receiving waters. As such, the District anticipates that a contribution from the Santa Ana Benefit Assessment fund may be made toward the cost of this work.

<u>Contractor</u>	<u>Original Agreement Amount</u>	<u>Funds via Previous Amendment(s)</u>	<u>Additional Funds via New Amendment</u>	<u>Estimated Total Costs</u>
