BACKGROUND:

Summary

Light Brown Apple Moth (LBAM) was first discovered in the San Francisco Bay Area in 2006. Since then, it has been detected in 28 counties from Mendocino to San Diego. Native to Australia, LBAM damages many plants found in backyard gardens and agricultural produce. A Federal Quarantine Order was established on May 2, 2007. In order to continue interstate movement of regulated plants, fruits and vegetables, an LBAM trapping program must be deployed to confirm that areas of the state are free from LBAM.

This agreement was approved as to form by County Counsel.

Impact on Residents and Businesses

Residents and businesses will be positively impacted in that this invasive species, which is injurious to landscape and agricultural plants, will be prevented from entering and becoming established within the county and the State. This will result in continued export commerce for our agricultural industry, reduced pest control efforts and costs and therefore an increase quality of life.

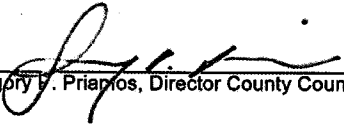

Contract History and Price Reasonableness

A similar agreement was entered into last year for FY 18/19 between the County and the California Department of Food and Agriculture for the Light Brown Apple Moth Detection Trapping Program. This agreement will cover all related costs.

SCOPE OF WORK
Light Brown Apple Moth Program (Detection Trapping)
July 1, 2019 – June 30, 2020

Light Brown Apple Moth was first discovered in the San Francisco Bay Area in the late fall of 2006. Since then, it has been detected in 28 counties, from Mendocino to San Diego. A Federal Domestic Quarantine Order (DA-2007-42) was established on May 2, 2007 that required, in addition to other actions, additional LBAM trapping to allow continued interstate movement of regulated articles. To confirm that areas of the state are free from LBAM, traps are piggybacked alongside existing detection traps.

This agreement is inclusive of the County's agreement to perform activities approved by the CDFA as described in the attached projected Work Plan (budget).

Pest Exclusion Advisory No. 37-2015

([http://www.cdfa.ca.gov/countygag/postings/files/PEA No. 37-2015 .pdf](http://www.cdfa.ca.gov/countygag/postings/files/PEA%20No.%2037-2015.pdf)) provides additional clarifications regarding authorized expenses that qualify for reimbursement.

Authorized expenses under this Light Brown Apple Moth (LBAM) detection trapping cooperative agreement include:

- I. Personnel Activities**
 - A. Detection Trapping Activities**
 - 1. Trapping Activities
 - 2. Mileage Reimbursement
 - 3. Delimitation Trapping
 - 4. Documentation for LBAM Traps
 - 5. Daily Trapping Summaries (DTS) (Form 60-210)
 - 6. Program Environmental Impact Report
 - B. Other Activities**
 - 1. Administrative Support
 - 2. Reporting
 - 3. Sample Submission
 - II. Non-Personnel**
 - A. Supplies**
 - B. Vehicle Mileage**
 - III. Reporting/Invoicing**
 - A. Monthly Trapping Report**
 - B. Invoicing/Reimbursement**
- I. Personnel Activities:** The County agrees to perform the listed activities required by the LBAM State Interior Quarantine (CCR 3434) and Federal Domestic Quarantine Order DA-2016-28 (or more recent version). This agreement is also inclusive of the following:

A. Detection Trapping Activities county entities must follow:

1. Trapping Activities

Trapping activities will be conducted by County personnel following the guidelines and direction found in the attachment, "Light Brown Apple Moth Trapping Guide 2019." Trapping is performed in conjunction with existing detection trapping routes and/or sites (piggybacked) used for other general detection species. Trap

servicings will be reimbursed at three-minutes per trap. These traps should be serviced and maintained by existing general detection trappers. The trapping season for your county should be the same as for general detection trapping, such as for general fruit flies. Consult the CDFA Insect Trapping Guide ([https://www.cdfa.ca.gov/plant/pdep/Insect Trapping Guide/docs/Insect Trapping Guide web.pdf](https://www.cdfa.ca.gov/plant/pdep/Insect%20Trapping%20Guide/docs/Insect%20Trapping%20Guide%20web.pdf)) for exact months for general pest detection trapping, for example, Section CP (ChamP™ Trap), page 71.

2. Mileage Reimbursement

Mileage reimbursement is not allowed for LBAM traps piggybacked onto general pest detection and glassy-winged sharpshooter sites. Mileage reimbursement may be allowed for associated trapping activities (attend meetings, sample submission, quality control, supervision).

3. Delimitation Trapping

Delimitation trapping may be allowed upon detection of "new location" finds, but only with the approval of LBAM project management.

4. Documentation for LBAM Traps

Incorporate the documentation for LBAM traps into the books used for general pest detection or GWSS programs.

5. Daily Trapping Summaries (DTS) (Form 60-210)

Must be completed daily by each reimbursable trapper and will serve as official documentation of work performed. The DTS must be held available for review by the CDFA audits office for three years but are not turned in to the LBAM Program. To facilitate program audits, the DTS – whether completed daily, weekly, or monthly – must be signed by the individual who performed the work indicated on the summary. This applies to hand completed or electronic summaries.

6. Program Environmental Impact Report

Ensure that all activities are performed following CDFA's management practices and any necessary mitigation measures as required and consistent with CDFA's Program Environmental Impact Report (PEIR).

B. Other Activities:

1. Administrative Support

Personnel hours associated with administrative activities such as hiring and/or training personnel, ensure trapping procedures are followed, provide and maintain trapping vehicles, and ensure all documentation of work is complete and accurate of data entry and/or invoicing and trapping reports for LBAM detection trapping.

2. Reporting

Personnel hours associated with entering data into the United States Department of Agriculture Integrated Plant Health Information System (IPHIS) database, completion of the "Monthly Activity Report" and any other data entry required. Use of LBAM Program forms for reporting and inspections is required. Forms created by the County will not be accepted.

3. Sample Submission

Submit samples to the Plant Pest Diagnostics Laboratory, located at 3294 Meadowview Road, Sacramento, CA 95832 via approved method(s). See Collection and Submission of Samples in the attachment, "Light Brown Apple Moth

Trapping Guide 2019.” On a case by case basis, project personnel may have a county divert samples directly to LBAM program personnel. Alternate directions will be agreed upon with the County Agricultural Commissioner ahead of time if that becomes appropriate.

II. Non-Personnel

A. Supplies:

1. **Supplies:** In accordance with 2 CFR 200.94 (<http://www.ecfr.gov/>), supplies are considered articles having a useful life of less than one year. Only supplies directly related to administering and conducting quarantine and regulatory enforcement activities associated with the LBAM Program will be reimbursed. Examples of supplies include materials from a general supply or stockroom, fabricated parts, paper, stationery, general office goods, ink and toner cartridges and organization tools.

All records substantiating that the supplies are used for the LBAM Program must be maintained by the county.

- B. **Vehicle Mileage:** The mileage reimbursement rate used on the monthly invoice must be the same as the rate in the Work Plan (budget). If the federal mileage reimbursement rate (<http://www.irs.gov>) fluctuates during the Agreement period, counties must submit invoices for the current federal rate.

Substantiation of Vehicle Mileage Costs: Counties must maintain a single vehicle log per vehicle, and all mileage must be recorded daily with an indication of which program the vehicle was used for and the name of the driver. Vehicle logs must be submitted as requested.

III. Invoicing/Reporting: Personnel hours associated with the compilation, submittal, and maintenance of the following:

- A. **Monthly Trapping Report:** Submit monthly trapping reports using the LBAM Combined Detection and Regulatory Trapping Survey Report (LBAM-Trapping-Report.xls Excel spreadsheet) by close of business the 5th day of each month. **Please submit the Report electronically to maryjean.sawyer@cdfa.ca.gov.**

- B. **Invoicing/Reimbursement:** Submit monthly invoices no later than 30 days past the end of the month in which the invoiced activity occurred to lbaminvoices@cdfa.ca.gov. Note – payment is contingent upon receipt of trapping reports for that month. **Invoices will not be approved for payment if monthly trapping reports have not been submitted.**

1. **Allowable Costs:** All invoiced expenses must fall within the parameters of this “Scope of Work” and must be directly related to administering and conducting LBAM detection trapping activities.
2. **Hourly Rate(s) on Invoices:** Invoices must reflect the actual hourly rates (salary and benefits) for each personnel classification listed on the Work Plan (budget) that conducted LBAM quarantine response and regulatory enforcement activities.
3. **Personnel on Invoice Must Match Work Plan (Budget):** Invoices must reflect work performed by personnel classifications listed on the Work Plan (budget).

4. **Documentation:** Documentation (including purchase receipts) for expense reimbursement does not need to be submitted to CDFA, but must be retained by the County and shall be made available upon request for audit purposes.
5. **Substantiation of Costs:** All personnel salary costs must be properly tracked or allocated to the cooperative agreement in accordance with the Office of Management and Budget (OMB) requirements and Federal cost principles. Please be sure that personnel costs can be traced back to original documents detailing the account to which personnel hours are billed. In addition, all invoiced personnel costs must match the scope of work (work plan).

If the County plans to seek reimbursement for vehicle mileage, the documentation for mileage reimbursement must be tracked separately from all other programs and documentation must be available to support the reimbursement. In addition, all invoiced vehicle costs must match the scope of work (work plan). On a related note, mileage rates used on invoices must be the same as contained in the work plan. CDFA will send an email that will notify Counties of new rates (current rate \$0.58) if the federal mileage rate changes during the term of the agreement.

All other expenses (travel, supplies, communications, etc.) for which the County will seek reimbursement under the cooperative agreement must be directly related to the cost of administering and conducting the program, and documentation must be available to support the reimbursement. In addition, all invoiced expenses must match the scope of work (work plan).

The following citations are requirements outlined in OMB Circulars and Federal Cost Principles applicable to your agency/organization.

State, Local and Indian Tribal Governments:

- 2 CFR 200 (<http://www.ecfr.gov>), Uniform administrative requirements, cost principles, and audit requirement for federal awards.
- 2 CFR 225, Cost Principles (formerly OMB Circular A-87), see Cost Allocation Plans and Attachment B, 8. Compensation for personal services, h. Support of Salaries and wages.

6. **Submission of Monthly Invoice:** Invoices must be emailed to lbaminvoices@cdfa.ca.gov or Marc Yee (marc.yee@cdfa.ca.gov).

Contact Marc Yee with any questions regarding invoicing or reimbursement by email or by calling (916) 262-1102.

Light Brown Apple Moth Trapping Guide 2019

PROGRAM: Light Brown Apple Moth (LBAM) Trapping (Detection)

TYPE OF TRAP: Jackson Trap

The delta-shaped Jackson trap is made of plastic-coated cardboard. A sticky insert on the bottom captures moths. The pheromone septum is placed in the stickum on the trap insert. If the pheromone septum is lost due to wind or other factors, use a Medfly lure basket to secure the pheromone septum.

Photos by CDFA

The trap consists of four parts: trap body, insert, septum, and trap hanger.

ATTRACTANT: A mixture of (E)-11-tetradecenyl acetate (96%) and (9E, 11E)-9, 11-tetradecadienyl acetate (4%).

DETECTION TRAPPING SEASON:

Counties that are not part of the contiguous LBAM regulated area, normally manage year-round detection trapping programs - continue with 14-day service intervals. Currently these are:

Los Angeles	Orange	Riverside	San Bernardino
San Diego	Santa Barbara	Ventura	

Counties that are not part of the contiguous LBAM regulated area, and do not trap year-round - all trapping will be conducted during the normal detection trapping season with 14-day service intervals. Currently these are:

Amador	Butte	Calaveras	Colusa
El Dorado	Fresno	Glenn	Kern
Kings	Lake	Madera	Mariposa
Mendocino	Merced	Nevada	Placer
San Luis Obispo	Shasta	Stanislaus	Sutter
Tehama	Tulare	Tuolumne	Yuba

Counties that are partially within the contiguous LBAM State regulated area will trap in the portion of the county that is outside the contiguous LBAM regulated area boundaries (includes detection trapping in areas outside of the contiguous regulated area) during the normal detection trapping season. These currently are:

Alameda	Contra Costa	Marin	Monterey
Napa	Sacramento	San Benito	San Joaquin
Santa Clara	Solano	Sonoma	Yolo

Counties that are completely within the LBAM regulated area and surrounded by partially infested counties, will not include LBAM trapping in the normal detection trapping season. These currently are:

San Francisco San Mateo Santa Cruz

Counties where LBAM trapping is not biologically warranted will not include LBAM trapping in the normal detection trapping season. These currently are:

Alpine	Del Norte	Humboldt	Imperial
Inyo	Lassen	Modoc	Mono
Plumas	Siskiyou	Sierra	Trinity

DETECTION TRAP DENSITY: Statewide, outside of a regulated area - Use up to five traps per square mile piggybacked onto existing trap sites. Existing trap sites would generally be Mediterranean fruit fly (Medfly) or glassy-winged sharpshooter (GWSS) locations. However, other trap sites may be utilized if Medfly or GWSS sites are not available.

CROPLAND TRAP DENSITY: Federally Regulated County, outside of a regulated area - Trapping for LBAM must occur on each premises or farm in an LBAM area that ships regulated articles interstate in areas 1.5 miles or more from a LBAM detection site. Trapping for LBAM must occur at a trapping density of one trap per square mile in cropland areas.

INSPECTION FREQUENCY:

Detection Trapping – Once every 14 days
 Nursery and Cropland Trapping – Once every 30 days.

Delimitation Survey:

All Counties*

When a confirmed LBAM is trapped outside the regulated area, pheromone baited Jackson traps may be placed uniformly over a four-square mile area with twenty-five traps placed in each of the square miles. A total of 100 traps will be deployed. All traps should be placed within 72 hours and inspected once within the first seven days. Traps should be serviced every 14 days thereafter for a period equal to two generations beyond the date of the last LBAM detection. This period is determined by a temperature-dependent developmental model maintained by the LBAM program personnel in Sacramento.

* For the counties listed below, all of the above applies with the following exception. If LBAM delimitation traps are deployed for a single adult, the full array of required traps will only be maintained from April 1-Oct 31. The find site must be trapped during the full delimitation period at 14-day servicing intervals. This difference is based on LBAM biology.

Amador	Calaveras	El Dorado	Lake
Mariposa	Mendocino	Nevada	Tuolumne

HOSTS: The moth has a wide-range of unrelated hosts including: apple, pear, peach, apricot, blackberry, raspberry, citrus, persimmon, avocado, oak, willow, walnut, poplar, cottonwood, alder, pine, and eucalyptus.

SELECTION OF TRAPPING SITES: Deploy detection and nursery traps onto any existing trapping site. Cropland traps are generally not piggybacked. Piggybacking traps in this manner will allow for rapid deployment, efficient servicing, and reduce program expenses. Ideally, the trap should be placed at least 10 feet from any existing trap. However, piggybacking traps takes priority over the 10-foot separation.

HANGING THE TRAP: Assemble the trap by first writing the trap number and date of deployment on both the trap body and the sticky insert. Trap numbers for this pest will include the identifying letters "LB" (in place of "MF", "OF", "ML", etc.). The trap body is then opened; the bottom is pushed upward and firm pressure is applied laterally. THIS

IS IMPORTANT! When pressure is released, the trap bottom will remain flat. The sticky insert is slid into place. It will fit tightly, if properly done. Tear open the septum package and slide the lure onto the insert without touching the lure or the inside of the package with your fingers. Forceps or tweezers may be used for septum placement if necessary. The lure is placed directly onto the center of the sticky insert on its side, use a Medfly lure basket to secure the pheromone septum in windy areas (DO NOT BLOCK THE OPENING OF THE SEPTUM WITH STICKUM!). The trap may be placed in any host tree that fits the following placement criteria – in the upper 1/3 to 1/2 of the tree canopy, and 1/3 to 2/3 the distance from the trunk to the outer edge of the foliage. It is important that neither end of the trap is blocked by foliage. The presence or absence of ripe fruit is not a factor in hanging the trap. Shade is not as critical for this trap as for the fly traps.

TRAP INSPECTION AND SERVICING: When inspecting traps, the following steps should be taken:

1. Remove the trap from the tree.
2. Pull out insert and examine entire area of stickum.
3. Remove leaves and debris from stickum as moths could be beneath these objects. Be certain that the sticky surface is not rendered less effective by dust or debris. The stickum must remain optimally sticky to capture moths.
4. If no moths are found, replace insert, date trap, and rebait, if necessary, according to the recommended baiting interval and suggested handling techniques.
5. Change inserts every month or more often as needed. Always change the trap body, insert and lure when relocating the trap. Mark with the new trap number and current date, make sure to note this on the insert as well.
6. Replace lure according to the schedule below. Avoid contamination when handling lures or lure packages. Use forceps if necessary for placement of septum on to insert.
7. Trap bodies eventually lose their shape, become filled with trap servicing data, or otherwise deteriorate. When this occurs, they should be replaced.

COLLECTION AND SUBMISSION OF SAMPLES: The entire trap insert, containing the suspect moth, should be collected for supervisory review. Specimens submitted to Sacramento within 24 hours after a supervisor deems it to be necessary. Specimens should be cut from the stick insert and placed in a dry vial for submission. Send the specimen to Sacramento via overnight delivery with a Standard Form 65-020, "Pest and Damage Record" (PDR). Be sure the identification slip and the outside of the package are marked "RUSH". Include the trap number in the "Remarks" section of the PDR Form.

BAITING INTERVAL: Change the septum every six weeks or sooner if temperature is above 95 degrees F for a period of time.

TRAP RELOCATION: Relocate the trap on the same relocation interval as the trap with which it is piggybacked. If this trap is not being piggy-backed, relocation is not necessary unless host is removed and no other suitable host is available.
