C.E.O. RECOMMENDATION: Approve

BACKGROUND:

Summary

The slurry seal treatment is provided as preventative maintenance to extend the life of the pavement and postpone more costly pavement rehabilitation. The slurry seal treatment seals small cracks, restores lost flexibility to the pavement surface and helps preserve the underlying pavement structure. This project includes various roads located in the communities of Lake Hills, Highgrove, Woodcrest, Temescal Valley, Horsethief Canyon, Lakeland Village, Wine County near Temecula, Thermal, Thousand Palm, Bermuda Dunes and the unincorporated areas near Menifee and La Quinta. The specific roads are listed in "Attachment 1".

This project proposes Slurry Seal, Cape Seal and Microsurfacing treatments based on the existing pavement conditions. The Slurry Seal treatment consists of an application of a mixture of asphalt emulsion, aggregates, water and other additives over the existing asphalt pavement surface. This work includes road cleaning, crack repairs, application of Slurry Seal treatment, installation of new thermoplastic crosswalks, replacement of striping, pavement markings and raised pavement markers. All roads will be swept several times, at specified intervals, after the slurry has been applied.

The Cape Seal treatment adds a layer of "chips" or small crushed rock (screenings), and the slurry seal is placed over the chips and acts as a "wearing course" in areas of higher vehicles traffic.

The Micro-surfacing treatment is similar to Slurry Seal except it uses polymer modified and fast setting asphalt emulsion allowing thicker layers to be placed. The thick layer application allows to fill in ruts commonly found on roadways with light to modrate truck traffic.

The bid documents include the following bid schedules of work:

- Base Bid: Slurry Seal Project in the County of Riverside, Districts 1, 2, 3 and 4.
- Alternative Bid Schedule 1: Slurry Seal Project in the City of Riverside.
- Alternative Bid Schedule 2: Slurry Seal Project in the City of Menifee.

**SUBMITTAL TO THE BOARD OF SUPERVISORS COUNTY OF RIVERSIDE,
STATE OF CALIFORNIA**

The Transportation Department will select the contractor based upon the lowest responsive and responsible bid of the sum of all bid schedules.

The Cities of Riverside and Menifee have been invited to participate in the project. The proposed work within the cities is included in Alternative Bid Schedules 1 and 2 respectively. If the low bid is approved and concurred to by the Cities of Riverside and Menifee respectively, separate Reimbursement Agreements between the Cities and County of Riverside will be submitted to the Board of Supervisors for approval prior to or concurrent with the award of the construction contract.

The submitted plans and specifications have been approved as to form by County Counsel.

Project Nos.: D0-0006, D0-0007, D0-0008 and D0-0009

Environmental Findings

The project proposes to slurry seal various road locations within Districts 1, 2, 3 and 4. The proposed project is exempt from CEQA under Section 15301(c) because the slurry seal applied on the pavement surface of various roads does not create additional automobile lanes and involves negligible or no expansion of existing or former use of the existing roadways and associated facilities.

Impact on Citizens and Businesses

The Slurry Seal treatment will extend the life of the pavement thereby reducing the need for more extensive types of resurfacing that can be up to ten times more costly.

SUPPLEMENTAL:

Additional Fiscal Information

The construction contract is estimated to cost approximately \$3,257,412 and construction is anticipated to be completed in FY 2019/2020. The Slurry Seal project will be funded with Measure A/Western, Measure A/Coachella Valley, Gas Tax/SB-1, City of Riverside and City of Menifee funds.

There are no General Funds used in this project.

PROJECT TITLE: Slurry Seal Project – Districts 1, 2, 3 & 4
Work Order # D00006, D00007, D00008 & D00009 Task Code #Z1530

PROJECT SPONSOR: Riverside County Transportation Department

Original Negative Declaration/Notice of
Determination was routed to County
Clerks for posting on.

PROJECT LOCATION: Various Locations

SUPERVISORIAL DISTRICT: 1, 2, 3 & 4

12/18/19 kb
Date Initial

PROJECT DESCRIPTION: The Riverside County Transportation Department (RCTD) proposes to provide slurry seal treatment to existing pavement surfaces on various roads located within Districts 1, 2, 3 & 4 of Riverside County.

Slurry seal treatments consist of an application of a mixture of asphalt emulsion, aggregate (very small crushed rock), water, and other additives over the existing asphalt pavement surface. The treatments are provided as preventative maintenance to extend the life of the pavement. The work also involves removing and replacing thermoplastic crosswalk and pavement markings/paint traffic stripes and other work as may be required.

ENVIRONMENTAL ANALYSIS:

The proposed project will be constructed within existing county Right of way. Temporary construction easements may be required for the proposed improvements.

This project is subject to compliance with the Western Riverside County and Coachella Valley Multi-Species Habitat Conservation Plan (MSHCP). In accordance with Section 7 of the Western Riverside County and Coachella Valley MSHCP, necessary operation and maintenance along existing roadways are considered a covered activity within and outside of cell criteria areas. The project consists of maintenance and repair of existing public roads. The project is considered to be a safety improvement project under operation and maintenance and therefore is a covered activity.

The Riverside County Transportation Department has found that the above-described project is exempt from the provisions of the California Environmental Quality Act (CEQA), based on the following:

DEC 17 2019 3.46

Section 15301 (c) – Existing Facilities – The project proposes to slurry seal various road locations within Districts 1, 2, 3 & 4. The proposed project is exempt from CEQA under Section 15301 (c) because the slurry seal of various roads does not create additional automobile lanes and involves negligible or no expansion of existing or former use of the existing roadways and associated facilities.
