C.E.O. RECOMMENDATION:

BACKGROUND:

Summary

On Tuesday, July 23, 2019, a powerful storm system producing exceptionally high winds caused extreme peril to the safety of person and property within Imperial Irrigation District's (IID) service territory located in the County of Riverside. The microburst storm caused damage to the district's energy infrastructure and other property including various transmission towers and distribution poles.

The district's Supervisor of its Office of Emergency Management proclaimed the existence of a state of emergency on July 23, 2019. This proclamation was ratified by the IID Board of Director's by resolution dated July 29, 2019. Further action was then requested of the County to proclaim that a "Local Emergency" exists in Riverside County. These conditions of extreme peril necessitated the proclamation of a local emergency by the Director of Emergency Services, which was ratified by the Board of Supervisors at their meeting of August 27, 2019.

It is requested that the Board of Supervisors adopt Resolution No. 2020-030 to terminate the Proclamation of Local Emergency. The loss of electric utility service affected approximately 4,500 district rate-payers and multiple items within the district's electric system sustained significant damage resulting from the microburst storm. The situation resulting from said conditions of extreme peril is now deemed to be within the control of the normal protective services, personnel, equipment, and facilities of and within the County of Riverside.
