C.E.O. RECOMMENDATION: Approve

BACKGROUND:

Summary

The County of Riverside (County) in cooperation with the cities of Jurupa Valley and Riverside are proposing to replace the existing Mission Boulevard Bridge over the Santa Ana River with a new bridge to enhance safety and improve traffic circulation. The Mission Boulevard Bridge is located within the City of Jurupa Valley and the City of Riverside near Mount Rubidoux.

On September 1, 2015 (Agenda Item No. 3-26), the County entered into a service agreement with the cities of Jurupa Valley and Riverside. Although the project is located within the jurisdictional boundaries of the cities, the agencies desired to designate the County as the lead agency for the project since the County has extensive experience in the development and implementation of bridge projects involving federal and state agencies.

The existing Mission Boulevard Bridge over the Santa Ana River is in the eligible bridge list to receive federal Highway Bridge Program (HBP) funds for complete replacement. In addition, the Mission Boulevard Bridge is eligible to received \$2,683,980 of State Seismic Bond (Prop 1B) funds for construction under the Local Seismic Safety Retrofit Program (LSSRP). The State Seismic Bond (Prop1B) funds will be part of the local match funds required by the HBP funds.

The California Department of Transportation desires to enter into a Project Delivery Agreement with the County to establish a schedule to complete this project for the purpose of programming State Seismic Bond (Prop 1B) funds. The Project Delivery Agreement provides the terms and conditions whereby the County agrees to complete the project within the approved schedule. The Agreement is specific to State and Federal bridge funds expected to be available for the project and does not include local funds that will be needed to complete the project.

The total estimated project cost for replacing the Mission Boulevard Bridge is \$54 million. This project will be funded utilizing federal, state and local funds. The project is currently in the final design phase and is scheduled for construction late 2022.

Project Number: B3-0528

**SUBMITTAL TO THE BOARD OF SUPERVISORS COUNTY OF RIVERSIDE,
STATE OF CALIFORNIA**

Impact on Residents and Businesses

The project is expected to have minimum impact on the surrounding environment and community during development and construction. The new bridge will be designed in accordance with the latest state of the art bridge design criteria. The proposed bridge will enhance public safety and improve traffic circulation for the local residents and businesses. The bridge will include a multi-purpose trail to provide connectivity to existing regional trail.

SUPPLEMENTAL:

Additional Fiscal Information

The Mission Avenue Bridge Replacement Project will be funded with federal HBP funds and local matching funds (City of Jurupa Valley, City of Riverside, and the State Seismic Bond (Prop 1B) funds).

 Project Title Mission Blvd Bridge over Santa Ana River

We acknowledge the scope, cost, and delivery schedule as identified above constitute the Project Delivery, as agreed on (August 4, 2020), by both Department of Transportation and the local agency. This project is being monitored by the California Transportation Commission and the Department of Transportation for conformance with these dates in accordance with Local Bridge Seismic Retrofit Account Guidelines and Highway Bridge Program Advisory Committee procedures and policies. We certify that funding sources cited are expected to be available in the delivery year listed. The estimated costs represent funding components for the construction phases only. If any phase of this seismic retrofit project is not delivered in the year that has been agreed upon in this agreement, HBP funds could be withdrawn as outlined in the Proposition 1B Local Bridge Seismic Retrofit Account Guidelines.
