BACKGROUND:

Summary

Riverside County Information Technology (RCIT) has a total of seventy-one (71) communication sites where generators provide primary power and/or emergency backup power. The sites are an integral part of the Public Safety Enterprise Communication (PSEC) system that provides, first responders, two-way communications across all Riverside County. The PSEC System operates 24 hours a day, 7 days a week for 365 days. Due to the critical services provided by the system, interruptions in operations can be disastrous. Ten (10) of the sites only source of power is via the generators. The remaining sixty-one (61) sites utilize generators whenever primary power from utility companies becomes unavailable. The generators required maintenance follows the manufacturer's recommended schedule (quarterly, annual and triennial) to ensure proper operation and no down time. Service must be provided by a certified service provider who has obtained the Generac Industrial Dealer Central Certification.

The County of Riverside Purchasing on behalf of PSEC solicited quotations for Generac Generators Equipment, Maintenance and Repair Services. Only one bid was received. PSEC recommends award to Pape' Material Handling, Inc. The approval before the Board today will provide service, maintenance and repair for the generators at each site through October 31, 2025.

Impact on Residents and Businesses

The County Public Safety Enterprise Communication radio system is supported by full-time and backup generator systems. The operation and reliability of these systems help to provide on time and accurate communication to our Public Safety workers. Even temporary power loss at the sites will impact communication services resulting in significant risk to both the County's first responder teams and the general public they are protecting and supporting.

Additional Fiscal Information

Funding for this Agreement has been budgeted through the normal County process.

4.2 Any claim by the CONTRACTOR for additional payment related to this Agreement shall be made in writing by the CONTRACTOR within 30 days of when the CONTRACTOR has or should have notice of any actual or claimed change in the work, which results in additional and unanticipated cost to the CONTRACTOR.
