BACKGROUND:

Summary

On October 23, 2018, the County entered into a contract with American Road Maintenance, Inc. for the rehabilitation of the Runway 17-35, Taxiway F and associated connectors Pavement Reconstruction Project at the Jacqueline Cochran Regional Airport. The rehabilitation project consists primarily of crack sealing and applying an emulsified asphalt seal coat. There are also select areas where asphalt pavement is being removed and replaced.

The original contract amount with American Road Maintenance for this project was \$1,076,267.05. The project included two change orders, Change Order No. 1 for \$15,390 was approved to apply a quicker setting sealant for the taxiways and aprons to prevent tracking and improper curing before airport operations are being resumed. Change Order No. 2 was for a cost underrun of \$62,993.63 that resulted from quantity alterations based on field measurements bringing the total construction project cost to \$1,028,663.42 which is less than the originally contracted project cost. There was additional consulting and administrative cost of \$149,198.81 bringing the total project cost to \$1,177,862.23.

The work has been satisfactorily completed and in compliance with the contractual documents. The Aviation Department accepts the project as completed.

Impact on Residents and Businesses

This project was completed on July 11, 2019 and the Jacqueline Cochran Regional Airport has returned to full operational capacity, improving Runway 17-35, Taxiway F and associated connectors pavement for airport users
