**C.E.O. RECOMMENDATION:** Approve

**BACKGROUND:**

**Summary**

UCCE, in partnership with the County of Riverside, has provided research-based information and educational programs to the residents of Riverside County for over 100 years. Following the establishment of the Federal Smith Lever Act (1914) the County and the University entered into a cooperative agreement in 1917. The Smith-Lever Act created a nationwide Cooperative Extension network to bring research and education from land grant universities to the public.

Section 32330 of the State Education Code allows the County Board of Supervisors to appropriate funds for the support and maintenance of extension work in order to maintain the partnership.

**Impact on Residents and Businesses**

University of California Agriculture and Natural Resources (UCANR) brings the power of UC research to give people the tools to improve the lives of all Californians. This is done through both county-based Advisors and campus-based Extension Specialists who work as teams to develop and provide practical, trusted, science-based answers to solve practical issues that face Californians. UCCE Advisors are problem-solvers, catalysts, collaborators, educators, and stewards of the land, living in the communities they serve.

- Promoting economic prosperity—Improving agricultural production and developing a qualified workforce.
- Promoting healthy people and communities through nutrition education and 4H youth development programs.
- Promoting a healthy environment and sustainable urban landscape through urban horticulture and the Master Gardener program.
