**BACKGROUND:**

**Summary**

Law Enforcement agencies across the country are using body-worn cameras (BWC) as a tool to improve law enforcement interactions with the public. BWCs can provide a visual and audio record of interactions. Some preliminary evidence indicates that the presence of BWCs helps strengthen accountability and transparency, and can assist in deescalating conflicts, resulting in more constructive encounters between the police and members of the community.

The Sheriff's Department current BWC platform is at end-of-life and is no longer supported by the vendor. The current platform does not have the capability to streamline data access, redact data or distribute information. Between 2014 to current, the Sheriff's Department purchased and continues to operate approximately 1,500 VieVu branded police body-worn cameras. Through the years and from the award of prior grants, the Sheriff's Department was able to expand their BWC program by equipping and training uniformed patrol personnel with body worn cameras and providing BWC policy training.

On November 1, 2016 (Agenda Item 3.23), the Board approved and authorized the Chairman to sign the Bureau of Justice Assistance FY 16 BWC Pilot Implementation Program (PIP) Grant Cooperative Agreement to accept the BWC PIP grant award funds in the amount of \$577,900. The grant required a 50% match from the Sheriff's Department budget. The funds provided the necessary expansion of the BWC usage for uniformed staff.

The Sheriff's Department and District Attorney's Office (DA) recently collaborated to implement a BWC program for the DA and to expand the Sheriff's current BWC program. The County, on behalf of the Sheriff's Department and DA applied and was awarded the Bureau of Justice Assistance (BJA) FY19 BWC PIP Grant in the amount of \$1,831,292. On November 19, 2019 (Agenda Item 3.19), the Board approved the grant agreement with U.S. Department of Justice (DOJ), Office of Justice Programs (OJP), Bureau of Justice Assistance (BJA). The grant requires a 50% match of \$1,831,292 for a total project cost of \$3,662,584. Of this amount, the Sheriff's Department total projected cost is \$3,382,584 with the remaining amount of \$280,000

**SUBMITTAL TO THE BOARD OF SUPERVISORS COUNTY OF RIVERSIDE,  
STATE OF CALIFORNIA**

allocated to the DA. The funds have already been allocated in the Sheriff's Department budget through a budget adjustment. Funding from the grant will improve the Department's ability to serve and protect the public through the use of updated BWC technology, while developing a robust partnership with communities. The grants will expand our existing BWC program, improve employee and citizen accountability and strengthen community relationships by using video to improve transparency in law enforcement encounters with the public.

**Grant Funding Breakdown**

	<b>Grant Amount</b>	<b>50% Match</b>	<b>Grant Funding Amount</b>
Sheriff's Amount	\$1,691,292	\$1,691,292	\$3,382,584
DA's Amount	\$140,000	\$140,000	\$280,000
Grant Funding Amount	\$1,831,292	\$1,831,292	\$3,662,584

The District Attorney's Office will submit a Form 11 for the purchase of the DA BWCs.

**Price Reasonableness**

County Purchasing, on behalf of the Sheriff's Department, issued a Request for Proposal (RFP) #SHARC-464 for Body Worn Cameras and advertised the bid on publicpurchase.com. The bid invitation was sent out to forty-four (44) potential bidders, and the County received six (6) proposals. The bids were evaluated by a team of Sheriff's personnel and each bid response was evaluated based on the criteria set forth in the RFP: overall response to the RFP requirement, overall device design and features, overall software solution, bidders experience and ability, cost and fees, reference, and financial information. The evaluation team conducted field testing at the Lake Elsinore and Palm Desert stations, as well as independent evaluation by Sheriff's Research & Development Unit. After reviewing the proposals and field testing it was determined by the evaluation committee that Axon was the lowest and most responsive bidder to provide Body Worn Cameras for the Sheriff's Department. In addition, the Department negotiated the terms of the contract and committed to a ten-year contract term (5-year contract term with the option to renew annually for an additional 5 years for a total of 10 years), the vendor agrees to a fixed license fee and a data storage cost of \$726,278 for years two through five and the service renewal will increase by 3% annually for years six through ten.

In the first year for the Sheriff's Department, the funds will cover 1,500 body worn cameras, accessories, data storage, and license fees for a total cost of \$2,723,990. Due to the 50% match, the Department will fund \$1,361,995 of the purchase. The three-year grant performance is from October 1, 2019 to September 30, 2022, and the Department will spend the grant balance of \$658,594 in FY 22-23.

**First Year Sheriff's Budget Cost Breakdown**

Grant Funding Amount	\$1,361,995	40%
Department Match Amount	\$1,361,995	40%
Grant Funding Balance	\$658,594	20%

**SUBMITTAL TO THE BOARD OF SUPERVISORS COUNTY OF RIVERSIDE,  
STATE OF CALIFORNIA**

TOTAL COST	\$3,382,584	100%
------------	-------------	------

In addition, the Department would like to request a 20% contingency in the amount of \$1,920,137 over the 10-year contract term, to allow for additional purchases and replacement of body worn cameras and accessories and cover the license fees and data storage cost if needed.

**Additional Fiscal Information:**

The 10-year project cost is \$9,600,684, and with the additional 20% contingency, the total request is \$11,520,821. As mentioned, with the grant funding the body worn cameras in the amount of \$1,691,292, the total Net County Cost is \$ 9,829,529.

**Impact on Residents and Businesses**

The Body-Worn Camera grant funding will allow the Sheriff's Department to expand the existing BWC program to fully equip all sworn field personnel, as well as select personnel in Corrections and Court Services. The use of BWC where video footage captured the interaction between officer and citizens will provide better transparency and accountability of events and support accounts articulated by officers and community residents.

Agency administrators can manage their choice to use this service within the administrative features of Axon Cloud Services. If Agency chooses to use this service, Axon must also enable the usage of the feature for Agency's Axon Cloud Services tenant. Agency will not see this option with Axon Cloud Services unless Axon has enabled Wi-Fi Positioning for Agency's Axon Cloud Services tenant. When Wi-Fi Positioning is enabled by both Axon and Agency, Non-Content and Personal Data will be sent to Skyhook Holdings, Inc. ("**Skyhook**") to facilitate the Wi-Fi Positioning functionality. Data controlled by Skyhook is outside the scope of the Axon Cloud Services Privacy Policy and is subject to the Skyhook Services Privacy Policy.

Agency remains responsible for all fees incurred through suspension. Axon will not delete Agency Content because of suspension, except as specified in this Agreement.
- 11 **Axon Cloud Services Warranty.** Axon disclaims any warranties or responsibility for data corruption or errors before Agency uploads data to Axon Cloud Services.

## Master Services and Purchasing Agreement

Upon request, Axon will provide written proof that Axon successfully deleted and fully removed all Agency Content from Axon Cloud Services.
- 15 Post-Termination Assistance.** Axon will provide Agency with the same post-termination data retrieval assistance that Axon generally makes available to all customers. Within the Axon Cloud Services supporting infrastructure, access is granted based on the principle of least privilege. All access must be approved by system owners and undergo at least quarterly user access reviews. Any shared computing or networking resource will undergo extensive hardening and is validated periodically to ensure appropriate isolation of Customer Content.

Non-Content Data is logically isolated within information systems such that only appropriate Axon personnel have access.
