BACKGROUND:

Summary

The Board approved a contract with the Contractor in the amount of \$1,756,236.75 as Agenda Item Number 11.1 (MT#14870) on April 27, 2021.

Final inspection of the Project was made, and the Project was found to be complete according to the plans and specifications. A brief Project description and location map is attached. The final price for the contract is \$1,746,393.90 which is under the contract amount.

The District does not anticipate any claims for additional compensation from the Contractor.

In partnership with the Lake Hemet Municipal Water District (LHMWD), the Project constructed six earthen recharge basins and approximately 3,000 lineal feet of underground waterline (see attached Project description and location map). In conjunction with recharging stormwater runoff, the waterline will import and deliver surplus water to each recharge basin to promote infiltration and increase groundwater recharge in the Hemet-San Jacinto Valley groundwater basin areas. Any excess flows will return to the adjacent Bautista Creek Channel. LHMWD will assume the operation and maintenance of the Project upon construction completion.
