BACKGROUND:

Summary

In November 2016, California voters approved the passage of Proposition 56, the California Healthcare, Research and Prevention Tobacco Tax Act of 2016 (Prop 56). Proposition 56 is used to fund the Local Oral Health Program, which will improve the oral health of Riverside County residents by addressing the promotion of healthy habits and population-based prevention interventions. Communication strategies will be developed and implemented to inform and educate the public about oral health information. Community-clinical linkages will be developed to increase utilization of dental services. Riverside University Health System-Public Health (RUHS-PH) will collaborate with dental providers, health care systems, professional organizations, and educational institutions to expand the capacity to support prevention and early treatment services. A surveillance system will be developed to measure key indicators of oral health and key performance measures for tracking program progress. A key priority will be to identify and address underserved areas and populations.

Travis D. Tramel, RDHAP Inc., in partnership with RUHS-PH and its Oral Health Program, will continue to conduct Kindergarten Oral Health Assessments (KOHA) as required by AB 1433 and the California Department of Education (CDE). AB1433, signed into law in 2005, helps schools identify children suffering from untreated dental disease and helps parents establish a dental home for their children.

**SUBMITTAL TO THE BOARD OF SUPERVISORS COUNTY OF RIVERSIDE,
STATE OF CALIFORNIA**

Families are putting off dental visits and as a result many children are “suffering in silence” as most parents are not aware of the underlying dental problems present in their child’s mouth. There is increasing evidence that systemic health and social inequities have contributed to some racial/ethnic minority populations being disproportionately affected in the area of dental health. This virtual assessment will help to mitigate some of the disparity by giving equal access to oral health assessments district wide.

The contractor has six years of experience providing mobile dental hygiene services in school settings with a focus on underserved areas of Riverside County and will provide State licensed Registered Dental Hygienists or Registered Dental Hygienist in Alternative Practice to conduct the assessments.

Impact on Residents and Businesses

This funding will allow RUHS-PH to continue to provide oral health education and intervention programs to minimize the incidence of dental disease. Partnering with Travis D. Tramel, RDHAP Inc., will continue to help identify children who need dental care and help the parents to establish a dental home for the long-term oral health of their children.

SUPPLEMENTAL:

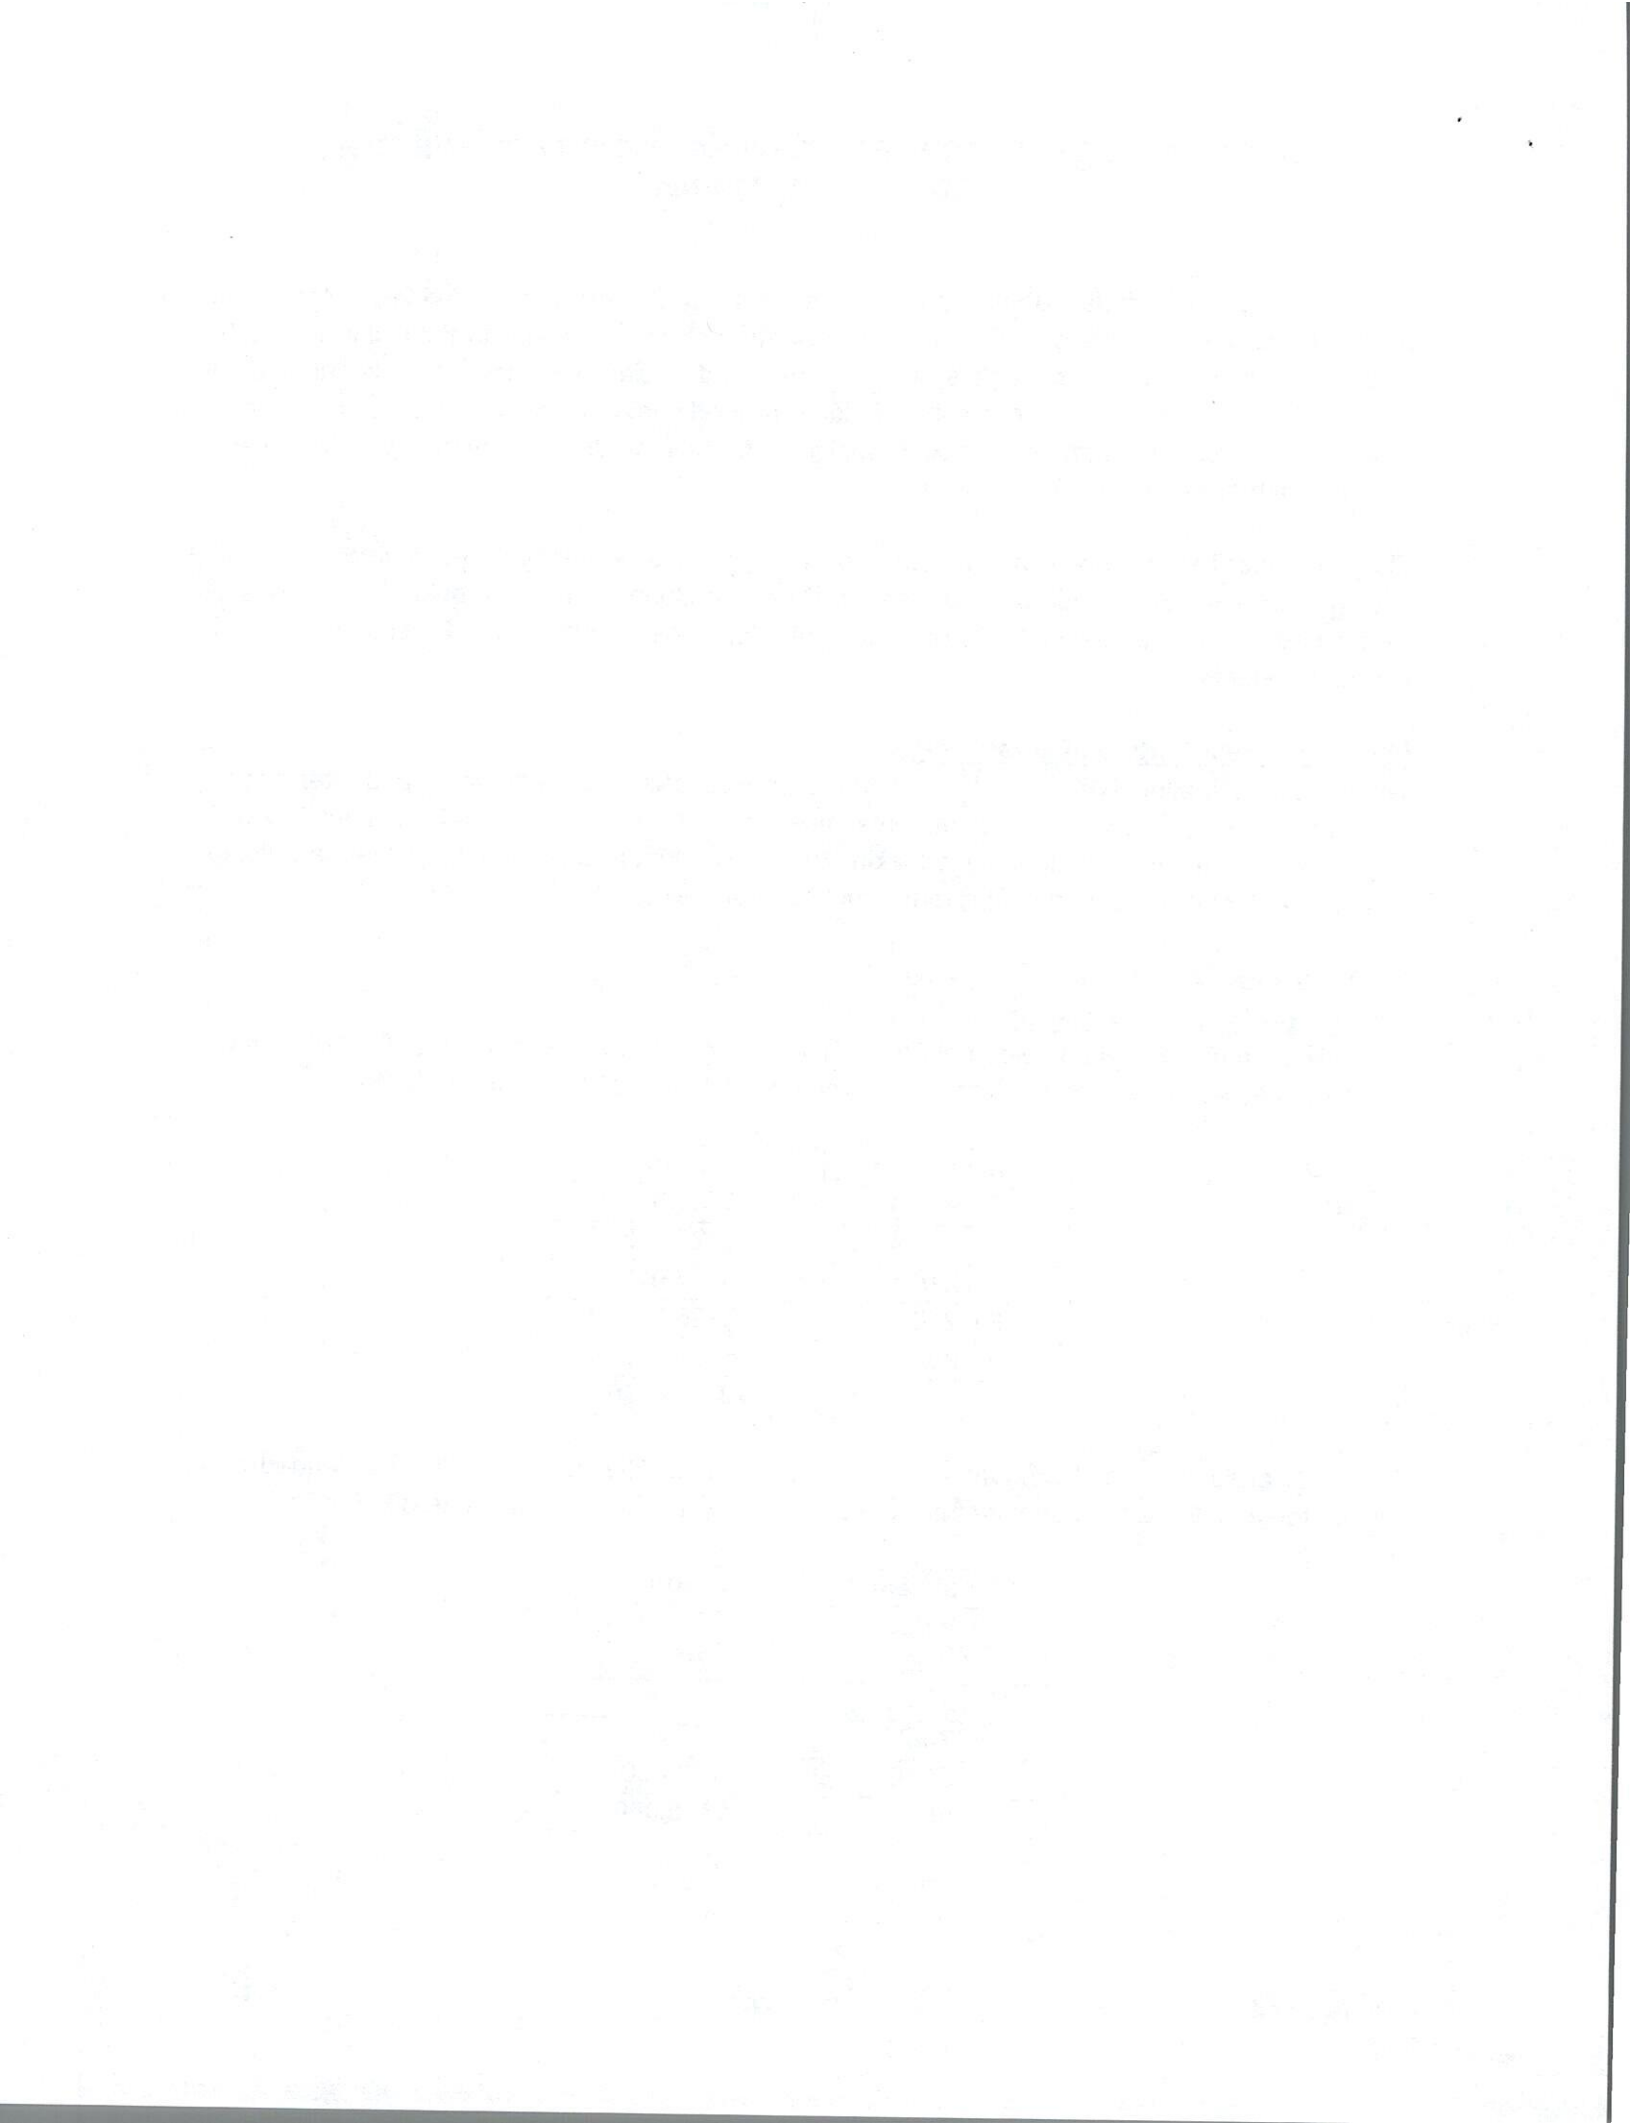

Additional Fiscal Information

There is no impact to County General Funds. The total grant awarded amount of \$3,629,565 will be distributed as follows for a period of performance of July 1, 2022 – June 30, 2027:

Riverside County is home to a racially and ethnically diverse population of nearly 2.5 million people. More than 45% of the population identifies themselves as non-white. Based on the most current U.S Census data the median household income in the county is \$67,005 for all residents. In contrast, the median income for Hispanic/Latino families is \$57,903. Eleven percent of Riverside County households are living in poverty, of those, seven percent are families with children under the age of 18.

In general, Riverside County's health fares rather poorly compared to other counties in California. The County Health Rankings puts Riverside County in 25th place out of 57 counties in the State for health outcomes and 40th for health factors, up three places since the 2017-2021 funding cycle. The ratio of the population to dentists is 1,910:1 an improvement from 2017 when the ratio stood at 2,020:1 population to dentists.ⁱ

The Riverside University Health System-Public Health (RUHS-PH) was established in 1926. The goal of RUHS-PH is to ensure the health and well-being of county residents and visitors. The Riverside County Community Health Improvement Plan 2016-2021 <https://www.shaperivco.org/> currently includes an oral health focus in two of the four priority areas: Priority Area 2: Promoting Healthy Behavior and Priority Area 4: Improving Access to Care:

- Bring more services to schools and communities such as mobile dental clinics, events, health fairs, and school clinics.
- Increase dental health care screening by using resources like virtual dental home.
- Increase the number of and access to primary and specialty care providers and services

Riverside County currently has an oral health program in place and was a participant in the California Children's Dental Disease Prevention Program (CCDDPP) school-based prevention program from its initial inception in 1980. The CCDDPP was closed in 2007 due to significant fiscal pressures at the local level and ongoing budget deficits at the State. Riverside County was not able to continue funding its school-based oral health program and the program ceased operation in June 2007. During the 10 year period from

Riverside County Public Health
Budget Years 2022-2027

2007-2017 a variety of community-based organizations, health foundations, and non-profits stepped forward with varying degrees of success to fill the gap.

The past funding cycle allowed us many opportunities to expand our reach in the County. We established a partnership with Riverside County Child Health and Disability Prevention (CHDP) program to expand their fluoride varnish application training workshops for primary care physicians and their staff in March of this year. So far, over 60 providers have received the training and extra sessions of this workshop have been added to the schedule to meet the growing demand for this training. The CHDP general overview workshops are another place where OHP staff are involved and stress the importance of oral health and the establishment of a dental home for CHDP eligible children.

We intend to strengthen our partnership with CHDP during the 2022-2027 cycle. It is our goal to leverage the care coordination expertise and activities of the CHDP program into our own program. OHP will provide referrals and linkage to a dental home for children and families not already linked to a regular source of care as identified during the Kindergarten Oral Health Assessment (KOHA). We will work to avoid duplication of services and to identify and address remaining gaps in services for the targeted populations.

During BY 4 we partnered with McMillen Health to create an online Oral Health Curriculum for use in our early learning sites throughout the County. It is our intent to expand this robust oral health curriculum that incorporates twice daily brushing with fluoride toothpaste into additional early learning sites during funding cycle 2022-2027.

Another vision of the Local Oral Health Program in Riverside County is to increase community-based partnerships in the county including the possibility of forming regional coalitions and a community of practice with medical and dental providers and to include neighboring counties if there is interest.

Barriers encountered during the past funding cycle include staffing challenges brought on by having staff redirected to COVID response. We have navigated this obstacle by adding a temporary staff line item into our budget to allow us to hire temporary personnel the current cycle. Restrictions imposed by the County Department of Public Health and school districts have restricted the way we do outreach and education. As a result, we created and implemented a variety of social media videos, online trainings, and drive through events to keep our work moving forward and accessible to the community.

REVISED 11/5/2021**

Local Health Jurisdictions (LHJs) shall implement selected strategies outlined in the California Oral Health Plan and make progress toward achieving the California Oral Health Plan's goals and objectives. The activities may include convening, coordination, and collaboration to support planning, disease prevention, surveillance, education, and linkage to treatment programs. LHJs will maintain regular reporting to demonstrate progress towards implementing grant activities.

LHJs or designees must select Grant Activities and Reporting/Tracking Measures for objectives 1, 2, and 3 and will be responsible for selecting, at a minimum, one additional objective (from objectives 4 – 7) of their choice for the entire grant term. LHJs or designees can choose one or all objectives from 4-7.

A more comprehensive summary of expectations for grant objectives, activities, and reporting/tracking measures is included in a separate LOHP Work Plan in Appendix 2.

Based on the guidance above, please indicate which of the objectives and activities your local health jurisdiction will implement by placing an "X" in the appropriate check box below. Maintain records of reporting/tracking measures for all selected objectives and submit documentation annually, bi-annually, or as necessary, including all relevant documentation in progress report and data form submissions:
