**BACKGROUND:**

**Summary**

On January 5, 2022, CDPH/SAPB notified of its intent to award the Sheriff's Department of a grant award in the amount of \$235,650 to participate in the Enhanced Forensic Toxicology Program to conduct toxicology tests for suspected overdose deaths as part of the overdose prevention initiative aimed at reducing rates of drug abuse, misuse, and overdose, a significant public health issue in Riverside County.

The Sheriff's Department is seeking the Board of Supervisor's approval to execute the Agreement participating in the Enhanced Forensic Toxicology Program to help improve and advance the data collection in decedent cases involving drugs. By participating in the program, the Sheriff's Department intends to provide CDPH/SAPB an inventory of forensic toxicology tests for identified suspected drug overdose deaths, and to communicate these test results to CDPH/SAPB.

The grant award will help the Sheriff's Department reduce rates of drug overdose deaths by facilitating real time testing via the purchase of drug screen equipment and consumable testing kits. The Sheriff's Department will use in-house drug and screening equipment to gather data and to share its results with CDPH/SAPB. Coroner cases require toxicological testing to determine the level of chemical substances in bodily fluids and organs for determining the mode, manner, and cause of death. Often, the cause of death is determined solely by toxicological test results, and many criminal cases require testing of those suspected of being under the influence of drugs. The Sheriff's Department will perform data collection, comprehensive toxicology testing and to communicate results on drug related fatalities to CDPH/SAPB.

**Impact on Residents and Businesses**

This grant will fund toxicological testing to improve and advance data collection of decedents suspected of being under the influence of drugs to help reduce and mitigate the impact of suspected drug overdose deaths in Riverside County.

**Additional Fiscal Information**

**SUBMITTAL TO THE BOARD OF SUPERVISORS COUNTY OF RIVERSIDE,  
STATE OF CALIFORNIA**

The Department will spend the entire \$235,650 allocation in FY22/23, and there will be no fiscal impact on the County. The Sheriff's Department will receive full reimbursement from CDPH/SAPB for all costs associated with the project.

## Contractor Data Security Standards

**1. General Security Controls**

- A. **Confidentiality Statement.** All persons that will be working with CDPH PCI must sign a confidentiality statement. The statement must include at a minimum, General Use, Security and Privacy safeguards, Unacceptable Use, and Enforcement Policies. The statement must be signed by the workforce member prior to access to CDPH PCI. The statement must be renewed annually. The Contractor shall retain each person's written confidentiality statement for CDPH inspection for a period of three (3) years following contract termination.
- B. **Background check.** Before a member of the Contractor's workforce may access CDPH PCI, Contractor must conduct a thorough background check of that worker and evaluate the results to assure that there is no indication that the worker may present a risk for theft of confidential data. The Contractor shall retain each workforce member's background check documentation for a period of three (3) years following contract termination.
- C. **Workstation/Laptop encryption.** All workstations and laptops that process and/or store CDPH PCI must be encrypted using a FIPS 140-2 certified algorithm, such as Advanced Encryption Standard (AES), with a 128bit key or higher. The encryption solution must be full disk unless approved by the CDPH Information Security Office.
- D. **Server Security.** Servers containing unencrypted CDPH PCI must have sufficient administrative, physical, and technical controls in place to protect that data, based upon a risk assessment/system security review.
- E. **Minimum Necessary.** Only the minimum necessary amount of CDPH PCI required to perform necessary business functions may be copied, downloaded, or exported.
- F. **Removable media devices.** All electronic files that contain CDPH PCI data must be encrypted when stored on any removable media or portable device (i.e. USB thumb drives, floppies, CD/DVD, smart devices tapes etc.). PCI must be encrypted using a FIPS 140-2 certified algorithm, such as Advanced Encryption Standard (AES), with a 128bit key or higher.
- G. **Antivirus software.** All workstations, laptops and other systems that process and/or store CDPH PCI must install and actively use a comprehensive anti-virus software solution with automatic updates scheduled at least daily.
- H. **Patch Management.** All workstations, laptops and other systems that process and/or store CDPH PCI must have operating system and application security patches applied, with system reboot if necessary. There must be a documented patch management process which determines installation timeframe based on risk assessment and vendor recommendations. At a maximum, all applicable patches must be installed within 30 days of vendor release.
- I. **User IDs and Password Controls.** All users must be issued a unique user name for accessing CDPH PCI. Username must be promptly disabled, deleted, or the password changed upon the transfer or termination of an employee with knowledge of the password.

**Exhibit G****Information Privacy and Security Requirements  
(For Non-HIPAA/HITECH Act Contracts)**

Passwords are not to be shared. Must be at least eight characters. Must be a non-dictionary word. Must not be stored in readable format on the computer. Must be changed every 60 days. Must be changed if revealed or compromised. Must be composed of characters from at least three of the following four groups from the standard keyboard:

- Upper case letters (A-Z)
- Lower case letters (a-z)
- Arabic numerals (0-9)
- Non-alphanumeric characters (punctuation symbols)

- J. **Data Sanitization.** All CDPH PCI must be sanitized using NIST Special Publication 800-88 standard methods for data sanitization when the CDPH PCI is no longer needed.

**2. System Security Controls**

- A. **System Timeout.** The system must provide an automatic timeout, requiring reauthentication of the user session after no more than 20 minutes of inactivity.
- B. **Warning Banners.** All systems containing CDPH PCI must display a warning banner each time a user attempts access, stating that data is confidential, systems are logged, and system use is for business purposes only. User must be directed to log off the system if they do not agree with these requirements.
- C. **System Logging.** The system must maintain an automated audit trail which can identify the user or system process which initiates a request for CDPH PCI, or which alters CDPH PCI. The audit trail must be date and time stamped, must log both successful and failed accesses, must be read only, and must be restricted to authorized users. This logging must be included for all user privilege levels including, but not limited to, systems administrators. If CDPH PCI is stored in a database, database logging functionality must be enabled. Audit trail data must be archived for at least 3 years after occurrence.
- D. **Access Controls.** The system must use role based access controls for all user authentications, enforcing the principle of least privilege.
- E. **Transmission encryption.** All data transmissions of CDPH PCI outside the contractor's secure internal network must be encrypted using a FIPS 140-2 certified algorithm, such as Advanced Encryption Standard (AES), with a 128bit key or higher. Encryption can be end to end at the network level, or the data files containing CDPH PCI can be encrypted. This requirement pertains to any type of CDPH PCI in motion such as website access, file transfer, and E-Mail.
- F. **Intrusion Detection.** All systems involved in accessing, holding, transporting, and protecting CDPH PCI that are accessible via the Internet must be protected by a comprehensive intrusion detection and prevention solution.

**3. Audit Controls**

**Exhibit G****Information Privacy and Security Requirements  
(For Non-HIPAA/HITECH Act Contracts)**

- A. **System Security Review.** All systems processing and/or storing CDPH PCI must have at least an annual system risk assessment/security review which provides assurance that administrative, physical, and technical controls are functioning effectively and providing adequate levels of protection.
