BACKGROUND:

Summary

In addition to establishing fees and penalties, Ordinance No. 779, **Attachment A** includes the basis for operating regulations that include waste inspection, salvaging and safety. In order to verify that the current refuse rates are appropriate to offset expenses, the Department prudently reviews its operations annually and forecasts capital improvements, expansion projects, and future expenses and liabilities with a projection of 20 years. Since revenue from in-county tonnage delivered to the landfills represents the majority of the Enterprise Fund's total revenue, it is important to accurately project future tonnage growth or decline. Because of stricter regulatory compliance requirements to increase landfill diversion to 75%, we anticipate zero tonnage growth in coming years.

Additionally, the Department's operating costs have increased significantly due to inflation and other market factors, including increases to capital improvement projects, salary increases, stricter regulatory compliance requirements, increased fuel costs, permitting fees and heavy equipment costs. Another significant factor is the cost the County is contractually required to pay Waste Management Inc. to dispose of over 40% of the County's waste at the El Sobrante landfill, which is adjusted by 90% of the Consumer Price Index (CPI) each year.

While not projecting tonnage growth, it is anticipated that traffic volume will continue to rise as residential customers take advantage of the County's low disposal rates and home development continues to encroach closer to landfills.

For the reasons outlined above, the Department proposes to increase landfill disposal fees by the percentage change in CPI for the Riverside-San Bernardino-Ontario index for the 12-month period ending January 2023. The percentage change in CPI is calculated to be 7.33%. The proposed rates are summarized below. Additionally, long-term contractual Waste Delivery Agreements, which represent approximately 70% of the total in-county waste stream, will be adjusted as stipulated in the contracts and summarized in **Attachment B – Contracted Rates**. It is important to note that the Department's proposed non-contract rates (per ton rate and flat rate fees) are still lower in comparison to neighboring counties, **Attachment C – Landfill Rate Comparison**.

**SUBMITTAL TO THE BOARD OF SUPERVISORS COUNTY OF RIVERSIDE,
STATE OF CALIFORNIA**

Due to the significant increase in the number of vehicles attributed to residential customers and the resulting long traffic queues, the Department established flat rates effective FY22/23 for three different vehicle types as allowed by the California Code of Regulations (14 CCR §18815.9 (g)(3)(A)). Establishing flat rates eliminated the need to weigh back empty residential vehicles exiting the landfill and successfully resulted in reduced transaction processing times, thus reducing congestion at the scale house.

With the implementation of the new flat rates for fiscal year 22/23, the Department eliminated minimum load rates that were in place in prior years. To maintain equity across all vehicle load types, the Department proposes to establish a non-flat rate minimum charge. The proposed minimum charge is equivalent to residential truck and trailer flat rate loads.

The Department proposes to increase tire fees from \$4.00/tire to \$6.00/tire due to an increase in handling/processing costs. In June 2022, BJ's Tires, the department's tire recycler, increased their recycling costs by 65% causing the Department's subsidy rate to increase to 72%. The Department will continue to work towards stabilizing the subsidy rate. The proposed increase will reduce the subsidy to 60%. Tire acceptance at the landfills provides an outlet to the public and is anticipated to continue to curb/prevent illegal dumping.

The Department proposes to increase appliance fees from \$5.00/appliance to \$6.00/appliance due to an increase in handling/processing costs. It currently costs the Department \$16.60/appliance. The Department subsidized 70% of this cost in 2022 and will continue to work towards stabilizing the subsidy rate. Appliance acceptance at the landfills provides an outlet to the public and is anticipated to continue to curb/prevent illegal dumping of these items.

The Department continues to operate the compost facility at the Lamb Canyon landfill and has plans to start a composting facility at the Badlands Landfill. The composting process requires a continuous supply of clean green material to feed the compost pile. The Department proposes to provide a discounted rate of \$15.00 per ton for processed ground material from approved commercial haulers. Receiving green material that has already been processed provides a cost savings to the Department in labor and equipment costs.

The Department continues to pilot the operation of a Waste Recycling Reuse Store (WRRS) at the Lamb Canyon Landfill. Program staff remove goods that have remaining useful life from the waste streams to resell to the public. The Department's goal is to provide affordable used items that would have otherwise been disposed in the landfill, thus saving landfill space. The WRRS will:

- Reduce/divert solid waste from the landfill;
- Reduce carbon emissions generated through landfilling solid waste;
- Promote a sustainable lifestyle;

**SUBMITTAL TO THE BOARD OF SUPERVISORS COUNTY OF RIVERSIDE,
STATE OF CALIFORNIA**

- Provide low-cost goods/products to the public;
- Reduce the demand for raw material;
- Conserve existing landfill airspace to extend the life of the landfill;

The WRRS falls within the same business category as thrift stores, which have unique pricing unlike retail stores. Prices may be based on similar commodity categories or pricing by quality or brand. The Department will follow the pricing options and guidelines below when pricing items for sale in the WRRS.

1. Pricing by Category – Set a price on a group of items that fall into a similar category, such as:
 - Antiques
 - Appliances
 - Automotive Parts/Accessories
 - Bicycles
 - Electronics
 - Exercise equipment
 - Furniture
 - Other Sporting Goods
 - Tools – Lawn & Garden

2. Pricing by Quality or Brand. Pricing items according to their brand, condition, and quality. Average pricing of items will be 30% below original retail price.

Waste Recycling Reuse Store staff will utilize the internet to help determine the price range. Websites that may be used to assist in identifying pricing of items include:

The Salvation Army	https://satruck.org/Home/DonationValueGuide
Goodwill	https://www.goodwillwm.org/uploads/pdf/gw%20donation%20guidelines.pdf
Bicycle Bluebook	https://www.bicyclebluebook.com/value-guide
Bicycle Values	https://bicyclevalues.com/
Bicycle Vales	https://discerningcyclist.com/used-bicycle-value-calculator/

Other websites such as OfferUp, Craigslist, etc. may be used when pricing cannot be identified using thrift store pricing guidelines. When using these websites, the lowest pricing range found will be used to price items. The Department will continue to pilot the operation of a Materials Reuse program to identify additional program costs.

Attachment A, Appendix D – Schedule of Miscellaneous Fees: As part of its Composting Program, the Department subsidizes the cost of compost bins to Riverside County residents. Due to an increase in the unit costs per bin as well as shipping costs, the Department proposes to increase the sale price from \$13.00/bin to \$18.00/bin, which is a 46% subsidy. Composting helps keep the high volume of organic material out of our landfills, the goal of SB1383, and turns the material into a useful product. The Department’s cost for materials to create worm bin kits is passed through class participants. Material costs increased from \$26.08 to \$35.40 in FY 22/23, thus the Department proposes to increase the fee for worm bin kits by \$9.00. The Lend-A-Bin Cleaning Fee and Late Fee cost increase is proposed to cover the increase in staff costs.

Proposed Fee/Rate	Current Fee/ Rate	Amount of Change	% Change
Sale of Compost Bins to Riverside County Residents Only – Geobin \$18.00	\$13.00	\$5.00	38.46%
Sale of Worm Bin Kit \$35.00	\$26.00	\$9.00	34.62%

c) Late Fee \$14.00	\$13.00	\$1.00	7.69%

Impact on Residents and Businesses

Waste Disposal Fees are reviewed annually, and are subject to CPI adjustment which, for this period, is 7.33%. Fee increases are needed in order to offset impacts due to inflationary factors while meeting the need for capital improvements, expansion projects at County landfills, equipment purchases, increasing program expenses which allow for the continued protection of the general public health and welfare by efficient management of Riverside County's solid waste system. The Waste Disposal Fees charged under Ordinance No. 779.24 continue to be the lowest in the Southern California region, and the Department does not anticipate an increase in illegal dumping as a result of these fee increases.
