Subject: Petition signatures for Public Record

Dear County Board of Supervisors,

My name is Jen Larratt-Smith, and I plan to make a public comment at the County Board of Supervisors meeting on Tuesday, June 6. I am part of a grassroots movement called Riverside Neighbors Opposing Warehouses (R-NOW) which has organized to oppose the March Joint Powers Authority's West Campus Upper Plateau proposal to build over 4.7 million square feet of industrial warehouses on land formerly owned by March Air Force Base and surrounded on more than three sides by residential homes.

In my comments, I will allude to two petitions which we circulated over the past year opposing the proposal. I would like to submit the signatures and the websites of these petitions to the public record.

To read the full text of the petitions, please read both websites:

change.org/state-park (1259 signatures as of today)
change.org/no-more-warehouses (2827 signatures as of today)

Attached to this email are the signature pages for the two petitions. You will see that there is widespread concern and opposition to this project. I urge the two representatives of the County-- Supervisor Jeffries and Supervisor Gutierrez-- to vote no on the project, and I urge the rest of the County to apply whatever pressure they can on the March JPA to rethink their plans.

Thank you.

Sincerely,

Jen Larratt-Smith
Chair
R-NOW

Oppose

Comments

I am opposed to the March JPA's West Campus Upper Plateau proposal to build 4.7 million square feet of industrial warehouses in an area surrounded on more than three sides by residential homes. I am urging the two JPA Commissioners who sit on the Board of Supervisors to vote no on the project. The County will inherit the land when the JPA sunsets, so I am also alerting the other County Supervisors that there is widespread opposition to this proposal. I have attached a comment letter provided to the draft EIR that included alternatives to warehouses on this land (starting on page 22). All alternatives were researched and vetted for reasonableness and practicality to the surrounding communities. I hope the County takes these ideas seriously as I am not confident that the March JPA will.

8 March 2023

Mr. Dan Fairbanks, AICP
Planning Director
March Joint Powers Authority (March JPA)
14205 Meridian Parkway, Suite 140
Riverside, CA 92518

RE: Public comment on record for the West Campus Upper Plateau Project, Environmental Impact Report, State Clearinghouse No. 2021110304

Attention Mr. Fairbanks:

Thank you for considering my comments on the March JPA West Campus Upper Plateau project. The project site comprises approximately 817.9 acres within the western portion of the March JPA planning subarea (according to documents posted on the JPA's website), located approximately half a mile west of Interstate 215 and Meridian Parkway, south of Alessandro Boulevard, north of Grove Community Drive, and east of Trautwein Road. It is surrounded on two sides by residential neighborhoods in the City of Riverside, on one side by a residential neighborhood within the County of Riverside, and is adjacent to the 215 freeway, more industrial developments, and ultimately the City of Moreno Valley.

My comments reflect documents available publicly on the March JPA website which to the best of my knowledge are the most recent available to me. These documents include:

- Draft West Campus Upper Plateau Project Environmental Impact Report State Clearinghouse No. 2021110304 and plus Appendices A-S, January 9, 2023
- Local Guidelines for Implementing the California Environmental Quality Act for March Joint Powers Authority (et al), 2022
- General Plan of the March Joint Powers Authority, assumed March 11, 1997 date
- General Plan Land Use Plan, assumed March 11, 1997
- Planning Related Maps (Zoning General Plan/Land Use), July 2018
- Settlement Agreement: Center for Biological Diversity, September 2012
- Settlement Agreement: CCAEJ and CAREE, August 2003 (not on the JPA website)

I object to many things found in the draft EIR, but it does show one thing quite clearly; the March JPA and Dudek spared no expense in developing this monstrous document. The technical writing, subject area specialists, consultants, and graphic designers must have spent considerable time and cost quite a bit of money throughout the development of this land use plan and project proposal. And in some ways, their expertise and skill are quite good, making something so unpopular at best and completely deceitful at worst shine as the nice portfolio piece that it is. But

in so many ways, this document is a work of fiction. Why does the JPA and the applicant insist on misleading the public with a document containing so many errors and omissions?

The project would site over 4.7 million square feet of total warehouse space surrounded on three sides by residential neighborhoods located within the City of Riverside and County of Riverside. The warehouses would be sited within 500 feet of residents, a proposed park, and reserved passive recreation areas; it is less than a quarter mile from a preschool (which your initial study and draft EIR neglect to identify) and the entire project is sited within a 1,500-foot range of residential homes. The draft EIR does not properly analyze the project's land use, air quality, traffic, health risk assessment, hazards and hazardous materials, biological resources, geology and soils, greenhouse gas emissions, and population and housing sections. It also fails to consider or provide non-industrial alternatives to the project as consistently requested by the community.

As a member of the community, I am disappointed that none of the alternative development plans consider non-industrial uses, especially since the current plan sparked the formation of a grassroots community group that has opposed it for more than a year. Why did each of the alternative plans include 143 acres of industrial zoning? The area is zoned C-2, much like the surrounding area, which could include residential, commercial, and recreational uses as long as they are low-density. Please specify what other land uses C-2 zoning allows and why you chose not to pursue these options. Under Planning Process C1F, the Final Reuse Plan (1996) reads: "Serious and careful consideration will be given to the wishes of existing land users and owners in areas adjacent to the base." Given that this industrial complex is surrounded on more than three sides by residential homes and that residents have submitted over 2,500 signatures, hundreds of emails, and dozens of comments at public meetings opposing the project; how is our feedback being "seriously" and "carefully" considered? What significant reductions in warehouse acreage have been made to the project as a result of the extensive opposition? Specifically, how has it impacted the industrial zoning footprint or the alternative plans? If the answer is that it has not, how do you justify your disregard for the community opposition in relation to your own policies?

In your General Plan (1999) Goal 2, Policies 2.3 and 2.4 state that the land uses should "discourage land uses that conflict or compete with the services and/or plans of adjoining jurisdictions" and "Protect the interest of, and existing commitments to adjacent residents, property owners, and local jurisdictions in planning land uses." How does building 4.7 million square feet of industrial warehouses that have "significant and unavoidable" noise and air quality impacts protect adjacent residents? Please specify in what ways this project fulfills this goal. Historically, the West Campus Upper Plateau was never intended to be an industrial zone. In the initial planning process, the Final Reuse Plan (1996) describes how "the planning processing was designed to incorporate consensus of the adjacent communities, creation of a 'Community Preference' land use plan consistent with the goals of the community relative to base reuse, and to maximize the opportunity for citizen involvement with base reuse" (Final Reuse Plan, 1996, p.

II-v). In what specific ways have you incorporated Community Preference in the development of your plan? As part of the Base Realignment and Closing (BRAC) process, four specific land use alternatives were considered as shown in Exhibits A, B, C, and D in the Final Reuse Plan. Exhibit B is the Alternative Pattern with the largest space reserved for 'Industrial/Warehousing' uses and it explicitly shows 'Industrial/warehousing' land-use was only considered within the first ¾ mile of the 215 Freeway; the West Campus Upper Plateau was a separate Business Park category for less intense land-uses.

The adopted 1999 General Plan reflects the planning assumptions and again designates the West Campus Upper Plateau as Business Park or reserved space for the previously endangered Stephen's Kangaroo Rat. Moreover, the Draft General Plan 2010 "Draft Vision 2030" Section 2.2.24 stated, "The Meridian West area shall be developed to provide a variety of land uses that will lead to the creation of high-paying jobs while protecting the environmental resources located therein. b) The Meridian West area should include an appropriate land use mix to emphasize the interaction between Office, Business Park and Park, Recreation and Open Space d) When planning and approving future projects within the Meridian West area, projects that provide large quantities of high-paying jobs (such as corporate offices), high-technology jobs, and jobs related to the green building industry are preferred. Therefore, the historical precedent of the Final Reuse Plan (1996), General Plan (1999), and Draft General Plan (2010-never adopted) are clear.

The West Campus Upper Plateau was never considered for intensive Industrial/Warehousing uses in any EIR or planning process that involved community meetings. All March JPA planning documents clearly indicate that warehouse uses should observe appropriate setbacks and be compatible with adjacent land uses to protect adjacent residential zoning. Within the last year, community members have presented a clear and consistent pattern of opposition to the proposal to 'upzone' the land use as specified in the General Plan from Business Park to Industrial. Community members have submitted petitions with thousands of signatures opposing the Project, provided hundreds of public comments, and commented in multiple Developer-hosted community meetings in opposition to the planned warehouse complex next to residential communities in Orangecrest, Mission Grove, and Camino del Sol. The Project is incompatible with the General Plan, Final Reuse Plan, Draft General Plan, and Community Preference land use. I urge the March JPA to reject any Specific Plan that includes more than 50 total acres of warehouses in any zoning type (industrial, business park, mixed-use) as incompatible with its pledge to maximize community preference and protect existing residential property owners in its planning process. With these objections in mind, it is appropriate to take some time to consider the inaccurate and misleading information provided in the draft EIR for public consideration. Gathering feedback on this type of inconsistent and erroneous documentation is either sloppy work or purposefully dismissive of public concern and requests.

Let's look more closely. Figure 4.1-2 identifies key points that illustrate what the views are today and will be once the project is complete. I object to this section as misleading and inaccurate. First and foremost, this image provides elevations for scenic vistas but not building elevations to

compare the views to today. It combines satellite imagery with an overlay that is one dimensional and misleading to the public. This image doesn't show contour, landscape changes, and fails to communicate the enormity of the space and of these buildings on the land. And without grade elevations of each building and the perimeter of the complex, this image does not adequately portray the dramatic impact this project would have on the area from simply an aesthetics standpoint. Why did the JPA and applicant not provide this information for public consideration? I hope to demonstrate a possible answer in this letter.

Let's explore this further: the draft EIR provides creatively composed images of present and proposed views in Figures 4.1-3 through 4.1-7. That is where those talented graphic artists and

overly creative project managers come in handy. I equate the images in these figures to the experience of seeing the original Superman movie and then comparing it to a modern Batman movie, modern CG makes it a totally different experience for viewers just like your artists have created something fictional for the public, something we will never experience.

View #1, Figure 4.1-3 shows the following existing and proposed views:

EXISTING

PROPOSED

Yet if one merely turns 90-degrees from this same location, one gets a current view of warehouses build by the March JPA and the developer.

This image from the same location shows precisely what the JPA and the developer have provided on previous similar warehouse projects. Where is the landscaping that your graphic designers added to Figure 4.1-3 above? How does the yellow and white blend in with the dramatic landscape and backdrop of the Box Spring and snow-covered San Bernardino mountains? How do the multi-colored containers blend with the seasonal green of the floral in December through April? Why would anyone believe that the view provided in Figure 4.1-3 will look like the proposed version and not the real views that exist in this area today? How is this not a significant impact to aesthetics and views for residents and visitors alike? Your document claims mitigation but the proof is in what you already have done and there is no mitigation being done on existing warehouses under the JPA and this developer. What enforcement exists for the developer when they fail to sufficiently mitigate impacts and the project is complete? Why is there no plan in place to detail remedies for poor development standards and practices? It is reasonable to all who live in this area to demand an enforcement plan and significant in-kind contribution by the applicant to mitigate their existing intrusive development practices, and a plan for the Joint Powers Commission to implement for all future monitoring and enforcement of these neglectful practices.

View #2, Figure 4.1-4 shows the following existing and proposed views:

**EXISTING****PROPOSED**

This is where the graphics team shined. I'd almost believe that I was going to have a garden and a natural walking path to enjoy near these warehouses. So much green in the proposed image that it makes one believe that the JPA is in fact making my life healthier by building high-polluting warehouses near thousands of homes, a large church, and a pre-school (the one omitted in the initial study and draft EIR). But this image is also fictional. What is missing here is the real view of what will happen under this project near the newly opened Barton Road. This road will pass

within 50 feet of homes, a neighborhood that straddles the line between the City of Riverside and unincorporated (for now) County residents. There are a couple of other obvious errors in the proposed graphic: for one there is not that much room to the right of the road in the image. If this were a real image, the photographer would have been taking the picture from the block wall of one of the closest neighbors. And just how close is that building to their homes? The Site Plan in Figure 3-5 states it is 300 feet but there is no way that is true based on the Site Plan map and a measuring tape that shows the road and these proposed smaller warehouses would be closer than that. This image is irresponsible and misleading. Why is the JPA and developer willing to put residents of Riverside and the County at risk in this way? Why would they significantly impact their views and the aesthetics of this land as it stands at the connection of existing and future Barton Road as seen below? Your document claims mitigation to lessen the significance of the impact to aesthetics here but the proposed view in Figure 4.1-4 is a work of fiction.

This project will irreversibly negatively impact residents bordering this land. If built as proposed, the newly opened Barton Road and neighboring warehouses would offer around the clock noise

and light pollution to residents in ways that alternate plans would not. Why hasn't the JPA and the applicant proposed any alternate plans that do not include industrial?

View #3, Figure 4.1-5 shows the following existing and proposed views:

EXISTING

PROPOSED

The grandeur of the vista from Grove Community Drive is one of the most amazing scenic points in all of Riverside. The sweeping vista of Box Springs and San Bernardino mountains on a clear

day (apparently even a graphic artist can't erase the visible air pollution cause be the dramatic cumulative effects of industrial sprawl) is unparalleled in this region. Once again, the proposed image in Figure 4.1-5 is fictional and is not consistent with existing JPA warehouse projects. For starters, the fictional element is that the proposed image does not include the correct number, size, or placement of warehouses proposed in the EIR, and it does not include grade elevations to site the warehouses at a trustworthy height for the public to consider. There are at least five smaller building visible from this viewpoint on the site plan and there isn't nearly enough space in that plan for the type of tree cover and vegetation shown in Figure 4.1-5. That alone makes the proposed image inaccurate and misleading to the public.

About those mature trees and landscaping in Figure 4.1-5, they exist nowhere else in the JPA's territory, so at best you have taken creative license here and at worst you have an intentionally misleading representation of the project for the purposes of persuading the public and the commission that the impacts of developer on aesthetics and scenic vistas surrounding this plan are adequately mitigated and will not adversely harm surrounding residents and their quality of life. Since the West Campus Upper Plateau is a highly prized piece of land to the community, a place of recreation and family and community harmony, why is the JPA and the developer so eager to put warehouses in a place with such significant and calming aesthetics that are found nowhere else in western Riverside County? No number of projected (not actual) jobs can replace the value of this land for residents and visitors to it.

And why should residents believe the JPA when you have never delivered the promises you made to the community in similar EIR documents, project plans, and community outreach meetings for existing warehouse developments? What part of the images provided below demonstrate that the JPA and its developer are trustworthy neighbors, people who will honor their commitment to protect the aesthetics and scenic vistas for the residents of western Riverside County? One only needs to look at past examples to predict what will happen in the future. Where are the mitigations in the images below? Mature trees? Most of these warehouses are 4-6

years old. How about the preservation of scenic vistas? Before these warehouses were built, I could see the March ARB runway from the tops of these small hills. Now I am luck to hear the March ARB runway over the persistent logistics noise from the tops of these same small hills.

One last comment on Figure 4.1-5, why is it that the existing and proposed images of this viewpoint both have mildly hazy skies? Is this the result of a coastal marine layer/onshore flow? Not that I am a meteorologist, but those clouds look to be cirrostratus, cirrocumulus, or altostratus clouds which are generally mid to high level clouds that occur at altitudes of 20,000 feet and above. So no, it doesn't look like this image has a marine layer in it, rather this is good old southern California smog, the kind of pollutants that are caused in part by the same diesel trucks shown in the images above and that you proposed to amplify in our neighborhood and increase on our freeways. There is no way that this project will not significantly impact the aesthetics and scenic views of this area as proposed today. What will the JPA do to correct the misleading and erroneous renderings of this project? They are highly misleading to the public and do not accurately represent what the JPA and applicant have built for years of land use upscoping the original intentions for this land. You don't get to continue to claim that jobs are the reason the general plan was created while ignoring the other reasons it was created in order to satisfy your greedy and dishonest development practices.

It is worth repeating here, under Planning Process C1F, the Final Reuse Plan (1996) reads: "Serious and careful consideration will be given to the wishes of existing land users and owners in areas adjacent to the base." Given that this industrial complex is surrounded on more than three sides by residential homes and that residents have submitted over 2,500 signatures, hundreds of emails, and dozens of comments at public meetings opposing the project; how is our feedback being "seriously" and "carefully" considered? What significant reductions in warehouse acreage have been made to the project as a result of the extensive opposition? Specifically, how has it impacted the industrial zoning footprint or the alternative plans? If the answer is that it has not, how do you justify your disregard for the community opposition in relation to your own policies?

View #4, Figure 4.1-6 shows the following existing and proposed views:

EXISTING

PROPOSED

The first image below shows just how scenic the views are of the West Campus Upper Plateau. From residents' homes, one can see green hillsides, rolling hills, and on clear days like this one, one can see all the way to the Ontario warehouse giga-plex and line of semi-trucks heading north up the Cajon Pass. It is difficult for the public to imagine the proposed image above because it is not something can see today. It is misleading and it does not exist anywhere within the JPA's developments today. The image perspective is that of a person standing in the field looking at the buildings rather than of the neighbors living adjacent to this project. It is misleading because it is

not what people will actually see if the project is built. It is misleading because you do not provide grade elevations for all buildings with the draft EIR and this view specifically will see the most direct impact of the obstructive buildings and semi-truck burdened streets of Barton and Cactus (and I don't just mean the trucks driving past, I mean the ones parked or idling nearby illegally since there is no enforcement plan in place to prevent this from happening).

A few other errors in the fictional image include there will not be mature trees surrounding it (there are none surrounding existing JPA warehouses today, see image below for proof), the grade of the pad the buildings are placed on in the image is not what the grade will be for the project, and once again the size, number, and type of buildings in these images is not consistent with the Site Plan in Figure 3-5. How as public representatives can you allow the developer to say that there is a less than significant impact to these scenic vistas? The trees next to the yellow warehouse below are several years old. They don't cover half of the height of that building and there are not enough of them to actually mitigate the impact these warehouses will have on aesthetics and scenic vistas. What would you do to ensure that this project is different and significantly better than ALL of the other JPA projects? Again, why is there no enforcement plan in place for the Joint Powers Commission to hold the developer and occupants of these warehouses accountable for their illegal or disruptive behaviors? How is approving more warehouses protecting and preserving the aesthetics of this land?

View #5, Figure 4.1-7 shows the following existing and proposed views:

EXISTING

**PROPOSED**

In the case of the misleading images in Figure 4.1-7 above, there are no viewpoints anywhere in the JPA controlled and redeveloped land that has an unobstructed view after building industrial on it. This proposed image is dishonest and misleading to the public. While not all from the Upper Plateau area, the following images show just what an intrusion and disruption of scenic views these warehouses are in this area (and real images should be worth more than fake ones).

Interestingly enough, the scenic vistas and impacts on aesthetics for this plan don't consider all of the scenic views of the Upper Plateau. It might be relevant to consider what nearly five million square feet of industrial buildings and the necessary infrastructure would do to other scenic views of this area and from different viewpoints than were provided in the draft EIR.

The following images show the view from Cactus Ave. heading into the Upper Plateau area.

While not taken under the best lighting conditions, they are good enough to show the scope of the land from a different angle and view. Once again, the images and graphic representation of the proposed development are misleading and irresponsible. Real images, such as the ones here, of this land provide a better representation of this land and its surroundings.

As these images show, the elevation gain from Cactus to the top of the Upper Plateau is more significant than the other images or the draft EIR indicate. Because of this significant change in elevation, the developer would need to remove even more of this land to make it so the roads rise at a gentler grade to allow semi-trucks and their cargo easier access to the warehouses. This significant rise in elevation also means these trucks will make more noise accelerating going uphill and braking going downhill. It means removing more dirt in just the construction of the road than is detailed in the draft EIR. It means destroying the mountain bike and hiking trails in the area to accommodate the grade of the extension of Cactus. It means destroying the natural drainages, plant and animal habitats, and the characteristic of this unique piece of land.

It is from this view that the public will notice a significant and unavoidable impact to the aesthetics and scenic vistas of the Upper Plateau. Why has the JPA chosen to over build this area around Cactus and Meridian with warehouses? Why is it insisting on adding nearly five million sq. ft. of additional industrial space here? Does the JPA and the developer view the aesthetic character and value of this land to be purely derived by development codes? Allowable under law? Or does the JPA consider and care about the people who live and drive in this area daily? Do you value the public's interest in this grand landscape as much as you value the profit you and the developer will derive from more industrial development? Please detail for me a non-jobs-based justification for developing on this land and misleading the public as to the impacts it will have on their lives.

Another interesting item to note in these images is the black tire marks on the road. I know you are aware of the significant amount of car and motorcycle racing that takes place in and around these existing warehouses. The evidence of this illegal activity is seen throughout the JPA controlled Meridian Business Center and the connecting roads.

It is difficult for the public to understand how the 40 hours of patrol time by the Riverside Sheriff's department paid for by the JPA is preventing this kind of illegal activity, but it seems to be the answer provided by the March JPA whenever a community member asks for help stopping this unaccounted for noise pollution and illegal and damaging activity. So again, I point to the images you provided in the draft EIR and ask why you have purposefully misled the public to believe that your plan will look anything like your graphic designers say it will? As far as I can tell, there is no plan to mitigate the things, such as overnight racing and drifting, that are indirectly caused by the development you proposed. Because your draft EIR is insufficient in the area of public safety and lacks a way to measure and mitigate noise pollution of this type, I request a more thorough review, documentation, discussion, and solution to the problems you are creating with this misleading and erroneous draft EIR.

With one final look at this landscape, in winter before the rains turn the plans green and the mountains white, this view is rare in southern California. It is rare in western Riverside County. It is rare in such an urban area to have so much open space that allows residents to shed some of the stress and anxiety they store up from their daily lives, horrible air quality, and overbearing road and highway traffic (at all times of the day and night). This image is a jewel even in its brown phase. Why does the JPA and the developer want to destroy it? Why is the JPA turning its back on the community it is tasked with serving? And why is the JPA willing to continue to destroy a community that was once strongly centered on March AFB? Does it really come down to "jobs" and "economic growth"? I am having a difficult time believing you right now.

Frankly, I am disappointed that none of the alternative plans consider non-industrial uses, and that the images found throughout the draft EIR mislead the public so blatantly. Historically, the West Campus Upper Plateau was never intended to be an industrial zone. In the initial planning process, the Final Reuse Plan (1996) describes how “the planning processing was designed to incorporate consensus of the adjacent communities, creation of a ‘Community Preference’ land use plan consistent with the goals of the community relative to base reuse, and to maximize the opportunity for citizen involvement with base reuse” (Final Reuse Plan, 1996, p. II-v). In what specific ways have you incorporated Community Preference in the development of your plan?

The West Campus Upper Plateau was never considered for intensive Industrial/Warehousing uses in any EIR or planning process that involved community meetings which I attended. All March JPA planning documents clearly indicate that warehouse uses should observe appropriate setbacks and be compatible with adjacent land uses to protect adjacent residential zoning. The Project is incompatible with the General Plan, Final Land Use Plan, Draft General Plan, and Community Preference land use. Therefore, I urge the March JPA to reject any Specific Plan that includes more than 50 total acres of warehouses in any zoning type (industrial, business park, mixed-use) as incompatible with its pledge to maximize community preference and protect existing residential property owners in its planning process.

For the past year, residents of Riverside, Moreno Valley, Perris, and unincorporate Riverside County have made one thing clear in response to the specific plan: **no more warehouses**. In every meeting, public engagement, and modification to your site plan you have ignored the community and you did so it seems intentionally. For a year we have asked for alternate plans

that did not involve industrial development so close to homes, neighborhoods, and sensitive receptors. It has become clear that the JPA and the applicant had no interest in discussing and offering alternate plans to industrial development of the West Campus Upper Plateau area and I have serious concerns with the lack of alternate plans in the draft EIR.

Fortunately, the group Riverside Neighbors Opposing Warehouses (RNOW) has worked hard to develop three reasonable alternatives to your plan for the Upper Plateau. I am in favor of these alternate projects and believe they hold considerable appeal to the community that have realistic development opportunities for the JPA and the applicant.

1. Alternate plan #1: The Campus Approach

- *Concept:* University of California Riverside (or a consortium of colleges) campus facilities and research centers focusing on expanding the college's OASIS, CARB, CERT, and economic development programs, mixed with business park, a developed public park as required in both the 2003 and 2012 settlement agreements, and significant open-space with a conservation easement.
- *Environmental Analysis:* No impacts to population/housing, and recreation; impacts w/mitigation to aesthetics, biological and cultural resources, energy, geology soils, greenhouse gas emissions, hazardous materials, land use planning, hydrology, public services, transportation, utilities, and wildfire; significant and unavoidable impact to air quality, noise, and tribal resources.
- *Project Objectives:* Support job creation through partnership with UCR (and other area colleges) and their research centers to help college students develop the skills and knowledge needed to lead our world into the future while offering a campus and business park environment that focuses on R&D as well as forward-thinking environmental, medical and hi-tech, and renewable resources and business. Project meets JPA objectives 1-3, 5-7; project does not meet JPA objective 4 (Cactus not would not be connected under this plan).
- *Conclusion:* Per the General Plan's goals and policies, this alternate plan offers the JPA and developer a project that would provide for long-term quality job growth in education and technology, and preserve valuable open-space for residents to enjoy a better quality of life. This plan also considers a need for the area to provide high-paying jobs and an opportunity for the UC and other colleges to grow in the area. And lastly, it incorporates the need for recreational opportunities and the preservation of open space and a unique ecological habitat. It would also allow the JPA to honor the past of March AFB and preserve a part of the munitions bunkers as a memorial to the history of the Air Force in Riverside County.

2. Alternate plan #2: The Veterans Village Approach

- *Concept:* A veteran's village that incorporates open-space and a developed park (like the Great Park in Irvine) memorializing the local history of the US Air Force, with

- low-density affordable veteran housing (like the Veteran’s Village in Moreno Valley), medical offices and services, rehab and therapy center, job training and career transition services, and a small business park.
- *Environmental Analysis:* No impacts to recreation, and utilities; impacts w/mitigation to aesthetics, biological and cultural resources, energy, geology soils, greenhouse gas emissions, hazardous materials, land use planning (done in conjunction with USAF), hydrology, population/housing, public services, transportation, and wildfire; significant and unavoidable impact to air quality, noise, and tribal resources.
 - *Project Objectives:* Support the heritage of March AFB while offering job creation through veteran services such as medical, career training, and housing projects. This option could include incentives for Veteran Owned, Disabled, or Minority Owned businesses to serve local communities while offering active and passive recreation opportunities for youth sports and active and passive community recreation. Project meets JPA objectives 1-7 and was enthusiastically received by the US Veterans Group associated with March ARB.
 - *Conclusion:* Per the General Plan’s goals and policies, this alternate plan offers the JPA and developer a diverse project that would provide for long-term military service, a multi-use park as well as preserve valuable open-space. This plan is a clear sign of patriotic investment and development that would allow both the JPA and the developer to capitalize on the good will of the community and connect to the history and present-day operations of March ARB.
3. Alternate plan #3: The State or County Park Approach
- *Concept:* A minimally invasive alternative plan partnering with the National Park Service's Federal Lands to Parks program that converts former military bases, closed under Base Realignment and Closure Acts (BRAC), to public parks and recreation areas. “Airman State Park” would be similar to Fort Ord State Park (CA), Charlestown State Park (IN), and Wompatuck State Park (MA).
 - *Environmental Analysis:* These public parks help revitalize communities impacted by the closure of the military bases, providing close to home recreation, protecting natural and cultural resources, and potentially attracting businesses and increasing property values. No impacts to aesthetics, air quality, biological and cultural resources, energy, geology soils, greenhouse gas emissions, hazardous materials, land use planning, hydrology, population/housing, public services, recreation, transportation, tribal resources, and utilities; impacts w/mitigation to noise and wildfire.
 - *Project Objectives:* Protects a special local natural and recreation attraction for future generations to enjoy while honoring the land and its connection to the USAF. Project meets JPA objectives 2, 6-7; project does not meet JPA objectives 1, 3-5.
 - *Conclusion:* Per the General Plan’s goals and policies, this alternate plan offers the JPA the chance to link with the community (State or County) by preserving an

ecologically diverse habitat and landscape, and offer residents a better quality of life and extensive recreational opportunities. It complies with the General Plan and Exhibits 5-1 and 5-4 land uses and is a popular alternate plan among members of the public and local communities.

These alternate plans are consistent with the March General Plan and Final Land Use Plan. I encourage the JPA to consider seriously the voices of the public and investigate further these three alternate proposals to develop the West Campus Upper Plateau area. Why have you ignored the community and relied on them to propose a land use plan for you? What steps will you take to engage the public in these alternate plans? Will you have the courage to preserve this landscape for future generations, saving a tiny part of southern California from the developer's blade and blasting, in the name of health and happiness?

While the March ARB General Plan was written more than 20 years ago, and you have publicly stated that it is a guideline rather than a requirement for the JPA to follow it, you owe it to the public the plan was created to help to do something solely in our interest. The spirit of the general plan was to reignite a community negatively impacted by the closing of March AFB. The general plan was the government's best effort to do something positive for Riverside, Moreno Valley, and Perris residents who directly felt the blow of decommissioning the March base. Ask anyone that does not work for you, has the JPA achieved their mission of revitalizing the community surrounding the Base? Has the JPA made Riverside, Moreno Valley, Perris, and the unincorporated County a better place to live and work? Has the JPA improved people's (not you or your contractors) lives? Your misleading economics report fail to tell the real story of destruction and degradation of community the JPA is engaged in today.

I urge the March JPA to reject any specific plan that includes warehouses in any zoning type as incompatible with its pledge to maximize community preference and protect existing residential property owners in its planning process. The March JPA and the applicant have a duty to adhere to the March ARB General Plan and Final Land Use Plan and to follow the vision established in these documents. You also have a duty to work with local communities to develop this land in conjunction with the people and municipalities that make up the Joint Powers Commission. The West Campus Upper Plateau project should be reconsidered and reasonable alternative configurations be developed, limiting the negative impacts developing this land will have on the residents who will have to live with this development. Please don't allow one final grand act of poor land use planning be your lasting legacy. You can do better and you have people willing to help you realize a positive path forward for this land. I await your detailed response.

Namaste (catch you later),

Christopher Shearer

March JPA West Campus Upper Plateau

State your position below

Oppose

Comments

I am opposed to the March JPA's West Campus Upper Plateau proposal to build 4.7 million square feet of industrial warehouses in an area surrounded on more than three sides by residential homes. I am urging the two JPA Commissioners who sit on the Board of Supervisors to vote no on the project. The County will inherit the land when the JPA sunsets, so I am also alerting the other County Supervisors that there is widespread opposition to this proposal.

Please support the community who will be most affected and oppose this warehouse project. We, who elected you, are opposed to more warehouses. R-NOW has proposed several viable alternatives for the land use.

I am opposed to the March JPA's West Campus Upper Plateau proposal to build 4.7 million square feet of industrial warehouses in an area surrounded on more than three sides by residential homes. I am urging the two JPA Commissioners who sit on the Board of Supervisors to vote no on the project. The County will inherit the land when the JPA sunsets, so I am also alerting the other County Supervisors that there is widespread opposition to this proposal.

I am opposed to the March JPA's West Campus Upper Plateau proposal to build 4.7 million square feet of industrial warehouses which is surrounded on more than three sides by family homes. I am urging the two JPA Commissioners who sit on the Board of Supervisors to vote NO on the project. The County will inherit the land when the JPA sunsets, so I am also alerting the other County Supervisors that there is widespread opposition to this proposal. This project will bring untold air and noise pollution to our families and destroy our otherwise peaceful setting. There are already more unsightly warehouses in our area than anyone could ever have imagined. Please vote NO to building any more, especially in our neighborhood. Thank you.

Good morning, I'd like to voice my support for designating the March Weapons Storage Area as a County historic landmark. The March WSA is a monument to March AFB history, the cold war, and a unique air force facility. This area is currently under the land-use jurisdiction of the March Joint Powers Authority. The General Plan of the March JPA designated this an open space area in order to preserve this piece of regional history. There are 14 munitions storage igloos and

The March JPA is considering a plan to demolish the WSA in order to place another 20 warehouses on a hill surrounded on more than 3 sides by residential homes. If there is one thing that Riverside County has no shortage of, it is warehouses. As the County has two member on the March JPA commission, we'd ask the commissioners to directly intervene with the project applicant and discuss preserving this important cultural landscape and considering plans for the area that are consistent with the General Plan for the region.

Riverside County will inherit this land in 2 years. Given its near-term ownership, we're trying to make you aware of this particular piece of land, its history, and its unsuitability for yet more unwanted industrial warehouse use.

March Weapons Storage Area – Statement of Historical Significance

Introduction

March Air Force Base was established during World War I as Alessandro Flying Training Field in ~1917-1918. After World War II, March was assigned to the Strategic Air Command with deployment of the 22d Bombardment Wing, the 44th Bombardment Wing, and the California Air National Guard 106th Bombardment Group (redesignated to 320th Bombardment Wing in 1952). As part of that mission, the March base developed a Weapons Storage Area on the western portion of the base to store heavy munitions.

The March Weapons Storage Area (WSA), also known as ‘the bomb dump’ and ‘munitions storage area’ is a cluster of ~20 buildings located on the West March campus, south of Alessandro Blvd, east of Barton Road, and north of the neighborhood of Orangecrest. This historic district area (Site WSA Historic District) includes 14 weapons storage igloos and 6 weapons maintenance and storage shops. These 20 buildings are related to one another as historical buildings used by the U.S. Air Force at March Air Force Base during the Cold War. The buildings in the WSA district were constructed from 1948-1962 as part of the March Air Force Base mission as part of the Strategic Air Command

Post Cold-War, March was chosen for realignment under the Base Realignment and Closure (BRAC) III. The March WSA was set aside in 1999 as Stephen’s Kangaroo Rat habitat, with possible future redevelopment. The March WSA Historic District is currently threatened by redevelopment as part of the March Joint Powers Authority (MJPA) West Campus Upper Plateau project¹. This project would demolish 18 of the 20 historic structures in the WSA district and retain 2 weapons storage igloos sandwiched between warehouses. The two remaining weapons storage igloos would not be visible and would be largely inaccessible to the public due to being surrounded by three warehouses. The history of the WSA district will thus be irreparably destroyed by the proposed warehouse complex.

March WSA Historic District

During the Cold War, March Air Force Base was in the Strategic Air Command which was responsible for command and control of the strategic bomber and Intercontinental Ballistic Missile (ICBM) components of US nuclear forces from 1946-1992². In the 1950s and 60s, March’s role as headquarters for the 15th Air Force included management of strategic bombers and ICBM Forces³. It is stated that the 15th Air Force controlled over 10 bases in the Western US and had responsibility for 75%+ of the ICBMs in the Western US⁴. These are the foundations of the local rumors that nuclear weapons were stored at March in the WSA district.

An annotated aerial image of the March WSA is shown in **Figure 1**, which was created and published in Appendix E-2 of the Draft Environmental Impact Report for the March West Campus project⁵. Buildings

⁵ <https://marchjpa.com/wp-content/uploads/2023/01/E.-Cultural-Resources.pdf>

A1-A14 are the weapons storage igloos, while buildings B-G are weapons maintenance and storage structures. Buildings A1-A14 are utilitarian concrete structures, constructed between 1948 and 1962. Buildings B-G were constructed between 1953-1962. The entire area retains integrity of location, design, materials, association, and workmanship. Given the distance between the WSA district and the surrounding neighborhoods, it also retains much of the integrity of setting.

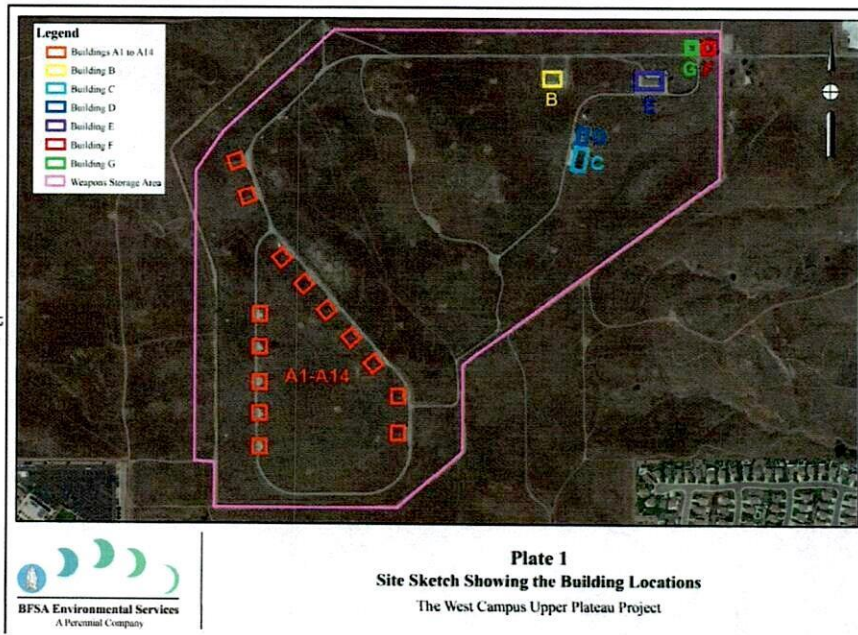

Figure 1. Annotated aerial image of the March WSA from Appendix E-2 of the March JPA West Campus Upper Plateau draft EIR (<https://marchjpa.com/mjpa-meridian-west-campus/>)

Weapons Storage Igloos

Historic aerial imagery recorded in the March JPA EIR appendix E-2 demonstrate that the WSA munitions storage igloos were constructed between 1948 and 1953 for the nine buildings along the north and east of the periphery (A1-A9), while the buildings on the west were constructed between 1953 and 1962 (A10-14). Igloo structures are military standard design from the period, approximately 25 feet wide and approximately 80 feet long. Igloos are shaped conically with concrete walls and foundations. Roofs are covered in earth and vegetation to appear natural from aerial and satellite imagery.⁶ There was no standard storage of ammunition prior to the mid-1920s; igloos became standard storage structures after the Lake Denmark Naval Powder Depot explosions.^{7,8}

In the cultural resources section of the March JPA draft EIR p. 4.4-21, it is stated that 'While Buildings A1 to A14 are the only United States Air Force associated munitions storage igloos in California, they are not

⁶ Murphey et. al. 2000. Army Ammunition and Explosive Storage in the United States: 1775-1945 (Electronic Document). U.S. Army Corps of Engineers Fort Worth District, Geo-Marine, Inc., Special Publications Number 7.

⁷ Reed, M.B. 1995. Ammunition Storage: Early Twentieth Century Design and Context, Fort McClellan, Alabama. Report #289. New South Associates, Stone Mountain, Georgia. Prepared for the Corps of Engineers

⁸ https://msiac.nato.int/app/uploads/2023/01/msiac_accident_poster_08_-_lake_denmark_usa_10_jul_1926.pdf

unique, military-related munitions storage structures in California.”⁹ This statement is the basis for the structures not being designated for state historic landmark registration in 1996 during BRAC. The Concord Naval Weapons Storage

However, as the City of Riverside local historian Scott Watson noted in his EIR comment letter, these WSA igloos were not evaluated for ‘local level of significance’. He quotes National Register Bulletin #15,

‘...if a property is of a type found throughout a State, or its boundaries extend over two States, but its importance relates only to a particular county, the property would be considered of local significance.’

While the WSA igloos may not have national significance, they are likely to have state and local significance as the only examples in the state. **Figure 2** shows a picture of four munitions storage igloos from June 2022.

Based on California and National Register of Historic Resources criteria, we believe the March WSA historic district meets the criteria of association with the Cold War and March Air Force Base’s unique local mission as a nuclear command facility. The Naval WSA in Concord, CA was recently converted to a regional park¹⁰ and is a model for the March Air Force WSA. Demolishing the March WSA and replacing it with 20 warehouses would irreparably destroy this cultural resource; please help us preserve it.

Figure 2. Munitions storage igloos picture from June 2022 within the restricted WSA district. Picture from Plate 9 of appendix E-2 of the March JPA Draft EIR.⁵
