

1. Last Week's video: "National Weights and Measure Week" Quotes from the video: **"...our community thrives on integrity and at the heart of this integrity lies the commitment to accurate weights and measures.... Here in Riverside County, accuracy is not just a requirement, it is a promise we keep."**

You supervisors make a similar promise to us regarding the accuracy of our elections: when you certify an election, you are guaranteeing to us that the results are accurate and that the system and devices used in counting our votes have been tested and verified for accuracy: yet it is our understanding that county gave up its right and responsibility to independently examine and test the counting machines we use, if so then you are unable to guarantee their accuracy

2. The 2022 Election was an alarm bell that something is wrong in the way the ROV counts our votes: 50,000 more votes were counted than the number of voters who voted in the primary and there were similar discrepancies in the general election. You and the ROV are responsible for finding out why, and this is why the 2022 election records must not be destroyed at the end of this month. This would be like me turning in an incorrect tax return to the IRS and when they insist on an audit, I respond by shredding my receipts. You are responsible for the ROV's work and for auditing their records so you can correct the cause of the problem in future elections
3. Our Constitution guarantees us honest elections honest elections and you are the ones in our county who protect that right by following Federal election law: For a federal election to be certified, it must meet the following standards.
 - a. Were our voter rolls accurate? (National Voter Registration Act of 1992)
 - b. Were the votes cast by registered U.S. Citizens residing in Riverside County? (U.S. Constitution, 14th Amendment)
 - c. Were the votes counted equal to the number of voters who voted? (Help America Vote Act)
 - d. Was there no more than 1 in 125,00 ballots in question? (HAVA)
4. **Did the 2022 Primary election meet these standards? In order to find out the the first step is to prevent those records from being destroyed. I hope to hear you make that commitment in your public comments today.**
