BACKGROUND:

Summary

The District has budgeted for and plans to construct Bedford Canyon Channel, Stage 1 ("Project"), which consists of (i) approximately 2,206 lineal feet of concrete and rock-lined trapezoidal channel with soft-bottom invert and access roads, (ii) reconstruction of a portion of the existing Bedford Canyon Wash upstream of Temescal Canyon Road and (iii) junction structures, concrete lined channels, riprap and grade control structures located in the City.

The Project will safely convey 100-year peak storm flows from Caltrans rights of way to the existing Temescal Canyon Road to reduce breakout, erosion and sediment generated in the Bedford Canyon Wash. Upon construction completion of the Project, the City intends to transfer portions of the Bedford Canyon Wash, including the riprap channel downstream of the existing Bedford Canyon Wash, to the District, and the District will assume ownership and responsibility for the operation and maintenance of these facilities.

The Agreement is necessary to provide for District construction inspection and subsequent operation and maintenance of the referenced drainage facilities.

County Counsel has approved the Agreement as to legal form, and the City plans to execute the Agreement on its August 21, 2024, meeting agenda. The City's executed Agreement is forthcoming.

Environmental Findings

The Agreement is exempt from CEQA pursuant to CEQA Guidelines Section 15061(b)(3) (Common Sense Exemption), which provides, "The activity is covered by the common-sense exemption that CEQA applies only to projects which have the potential for causing a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA." The Agreement does not authorize to any extent whatsoever actual physical development. Such development, if it occurs at all, will be the result of subsequent actions subject to CEQA review by the District prior to construction. The Agreement merely establishes certain rights and responsibilities for access, maintenance and operation of a planned facility. It can be seen with certainty that there is no possibility that the Agreement will have a significant effect on the environment.

Impact on Residents and Businesses

The District's financial contribution toward the Project is funded by ad valorem property tax revenue and entails no new fees, taxes or bonded indebtedness to residents and businesses. Upon construction completion, the facilities will alleviate breakout, erosion and sediment generated in the wash. The residents and businesses of the City are the primary beneficiaries of the Project.

Additional Fiscal Information

The engineer's estimate for the construction of Bedford Canyon Channel, Stage 1 is estimated to be \$6,822,436; however, the final amount of the construction contract will be determined by competitive bidding through the California Public Works Contract Process. The District is funding all design, construction and its construction inspection costs for the flood control facility.

The District will ensure sufficient funding is secured for the Project prior to construction contract award by the Board of Supervisors. Future operation and maintenance costs associated with the channel will accrue to the District.
