**BACKGROUND:**

**Summary**

Coachella Valley and the Salton Sea Air Basin are designated non-attainment areas for PM10, or air particulate matter less than 10 microns. The primary source of PM10 is dust-generating activities like vehicles traveling over paved or unpaved streets and through construction zones. Since the early 1990s, CVAG and its member agencies have cooperated on a Regional PM10 Street Sweeping Program – one of the most significant air quality control measures that can be taken to reduce PM10 throughout our region. This program has the added benefit of keeping all major streets in the Coachella Valley clean at a low per-mile cost due to economies of scale.

The street sweeping program is currently funded by three main sources:

- (1) Reallocation of a portion of AB 2766 funds dispersed to individual jurisdictions based on vehicle license plate renewals.
- (2) Grant funding from the South Coast Air Quality Management District (SCAQMD); and
- (3) The Coachella Valley Air Quality Enhancement Fund managed by Riverside County, also known as COLMAC funds.

CVAG member agencies have participated in the AB2766 funds to CVAG for the program. In June 2020, the CVAG Executive committee approved amendment number 5 to the MOU for a term of four years. It is set to expire on June 30, 2024. CVAG is now recommending Amendment #6 to the MOU, which retains the same contribution level of 75% but for a shorter, two-year term. This will allow CVAG staff time to assess the impact that the increasingly frequent and severe blows and events have on regional roads.

Identical MOU Amendments are being circulated to all participating member agencies for approval by their respective governing bodies. The County approved the request for a five-year extension on September 1, 2020 (Agenda Item 3.1, MT 13317), which will provide funding through June 30, 2025.

**Impact on Residents and Businesses**

Maintaining funding for the PM10 Street Sweeping Program in the Coachella Valley will help ensure the program continues its success of reducing fugitive dust issues in the region, which helps improve air quality for residents.
