C.E.O. RECOMMENDATION: Approve

BACKGROUND:

On Wednesday, January 22, 2025, the Department of Housing and Workforce Solutions' (HWS) Office of Homeless Services facilitated the Homeless Point-in-Time Count ("PIT Count"). The PIT Count was coordinated in partnership with the Riverside County Continuum of Care (CoC) (a network of private- and public-sector homeless service providers), all 28 cities, Board of Supervisors, County Executive Office, and multiple county departments such as the Department of Public Social Services (DPSS), Riverside County Information of Technology Services (RCIT), Riverside University Health System – Behavioral Health (RUHS-BH), Code Enforcement, Probation, and Riverside Sheriff's Office (RSO).

The count is federally mandated by the U.S. Department of Housing and Urban Development (HUD) and provides estimates on the number of sheltered and unsheltered homeless individuals on a single night across the nation, including Riverside County. The sheltered count consists of all adults and children residing in emergency shelters or transitional housing on the night of the count, with data sourced from the countywide Homeless Management Information System (HMIS). In contrast, the unsheltered count captures individuals living in locations not intended for human habitation such as vehicles, parks, sidewalks, abandoned buildings, or the streets and are identified through a combination of street-based enumeration, service-based engagement, and outreach efforts conducted across all areas of the county, including unincorporated regions. While valuable, the PIT Count is not designed to provide a complete enumeration of the homeless population.

Summary

The 2025 PIT Count documented a total of 3,990 individuals experiencing homelessness in Riverside County, including both sheltered (2,012) and unsheltered (1,978) adults and children. While this represents a 7% increase in the overall homeless population compared to the 2023 count (3,725 individuals), the rate of growth continues to slow. The growth rate has steadily declined from 15% in 2022 to 12% in 2023, and now to 7% in 2025.

The 19% reduction in unsheltered homelessness is a significant achievement and correlates with the 11% increase in the sheltered population. It also demonstrates an

**SUBMITTAL TO THE BOARD OF SUPERVISORS COUNTY OF RIVERSIDE,
STATE OF CALIFORNIA**

improvement in Riverside County's system being able to connect people on the streets to shelter. This progress is largely attributed to major investments in expanding the number of emergency and transitional housing beds available across the region, affordable housing development, permanent supportive housing, and multidisciplinary teams who coordinate medical, behavioral health, and housing navigation services. This reduction was seen across all major subpopulations including veterans, transitional age youth (18-24), households with children, and seniors (65 years and older).

It is important to note that 419 of the individuals surveyed during the unsheltered count had no prior histories of homelessness. This speaks to the ongoing economic challenges such as inflation, rising rental costs, and stagnant income levels continue to drive individuals and families into homelessness. Over 60% of renters in Riverside County spend more than half their income on rent, making housing instability a growing concern. Seniors and individuals with disabilities remain at heightened risk due to fixed incomes and limited access to affordable housing options. In addition, family disruption, insufficient income, and unemployment continue to be the top 3 reasons why people report experiencing homelessness.

Overall Count Countywide:

- 3,990 total sheltered and unsheltered PIT count for 2025 (7% increase from 2023) *
- 1,978 total unsheltered PIT count for 2025 (19% decrease from 2023) *
- 2,012 total sheltered PIT count for 2025 (11% increase from 2024) *

*Unsheltered PIT count is conducted once every two years, while sheltered count is conducted annually.

HOMELESS POINT-IN-TIME COUNT

Summary

The federally mandated count of people experiencing sheltered and unsheltered homelessness on a single night in Riverside County was conducted January 22, 2025. The data collected is used to demonstrate the need for services, to support resource planning, and to inform the community about homelessness.

Total Point-In-Time Data

3,990  7% increase from 2023
PIT Count

HOMELESSNESS GROWTH RATE DECLINED FROM 15% TO 7% (2022-2025)

Highlights:

Sheltered increase reflects **increased program participation** in CALWORKS and system-wide **capacity growth**

All major subpopulations —Veterans, Youth, Families, and Seniors— have **decreased rates of unsheltered homelessness**, while **shelter access has continued to grow** across those same groups.

For every **2 people entering homelessness** for the first time, **3 individuals were housed and maintained stable housing.**

More individuals are sheltered than unsheltered, showing real momentum toward **stability and support.**
