15. Termination for Cause

Either party may terminate this Agreement for cause in the event of a material breach of this Agreement, provided that the non-breaching party provides written notice of the material breach. Unless stated in the Scope of Work a final invoice will be submitted for payment no more than thirty (30) calendar days following the expiration date of this Agreement, or after project is complete, whichever comes first. The final invoice must be clearly marked "Final Invoice" thus indicating that all payment obligations of the CDFA under this Agreement have ceased and that no further payments are due or outstanding.

2. Allowable Expenses and Fiscal Documentation

- A. The Recipient must maintain adequate documentation for expenditures of this Agreement to permit the determination of the allowability of expenditures reimbursed by CDFA under this Agreement. If CDFA cannot determine if expenditures are allowable under the terms of this Agreement because records are nonexistent or inadequate according to Generally Accepted Accounting Principles, CDFA may disallow the expenditures.
- B. If mileage is a reimbursable expense, using a privately-owned vehicle will be at the standard mileage rate established by the United States (U.S.) Internal Revenue Service (IRS) and in effect at the time of travel. The standard mileage rate in effect at the time of travel can be found on IRS's website regardless of funding source/type.

PROJECT
Riverside County Agricultural Commissioner

I. Project Overview (FAC 7272.5)

Project Goals and Objectives (check all that apply):

- Increase the profitability and value of crop land and rangeland
 Decrease the costs of roadside, park, and waterway maintenance
 Reduce the fire hazard and fire control costs in the state
 Protect the biodiversity of native ecosystems
 Maintain the recreational and aesthetic value of open space, recreational, and public areas
 Increase water supply and flow

Project Activities (check all that apply):

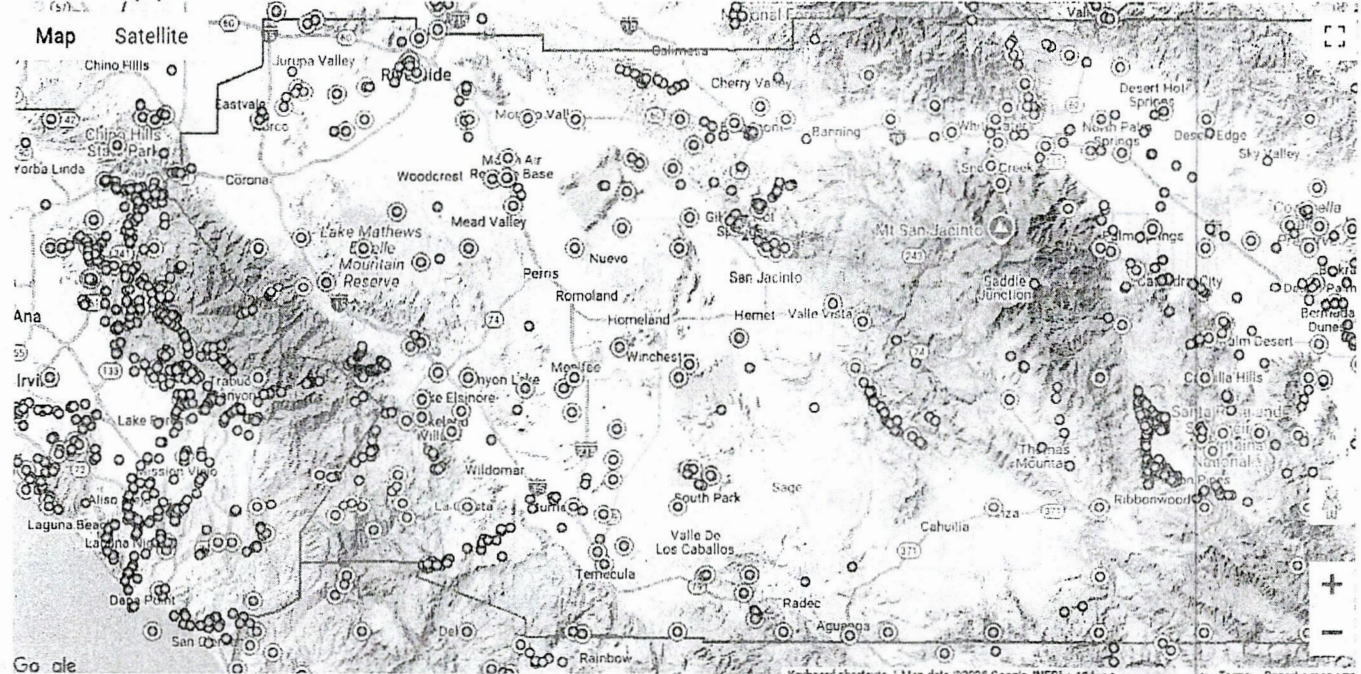

- Operation of programs by the county agricultural commissioner for control of noxious weeds along county roads and other local government owned property
 Matching funds for control of noxious weeds on city owned streets, parks, rights-of-way, and other public areas
 Disseminating biological control agents by the county agricultural commissioner for the long-term control of yellow starthistle or other noxious weeds
 Abatement of noxious weed infestations on land vital to the success of the program

II. Project Plan

Weed Species to be Controlled: The Riverside County Agricultural Commissioner's Office will focus on controlling invasive weed species, including **yellow starthistle (*Centaurea solstitialis*)**, **saltcedar (*Tamarix spp.*)**, and **Russian thistle (*Salsola tragus*)**. These species were selected due to their high invasive potential, threat to local biodiversity, agricultural productivity, and the increased fire hazard they pose. Yellow starthistle, for example, significantly reduces the nutritional value of grazing land and contributes to wildfire risk.

Methodology:

- **Early Detection Survey:** Our team will conduct field surveys across Riverside County to identify early-stage infestations of these invasive species. We will utilize trained personnel and community reporting to detect new outbreaks.
- **Mapping:** GIS mapping will be used to identify infestation hotspots and guide the priority for treatment efforts. Field maps will be regularly updated, ensuring our approach is targeted and efficient.
- **Reporting:** Regular progress reports will be submitted to CDFA, with a clear visual representation of project status and outcomes. Outreach efforts, including website information and local community events, will be implemented to raise awareness and encourage local involvement in weed reporting.
- **Control/Mapping:** Mapping and control activities will be synchronized to ensure that resources are allocated efficiently. Any necessary permits for herbicide use have already been applied for, and CEQA documentation is in progress.

Location(s):

Known Distribution of yellow starthistle, saltcedar, and Russian thistle according to Calflora on 3/25/2025

Weed Removal/Control Techniques(s):

- **Manual Removal:** In areas where infestations are localized, manual removal (hand-pulling or mechanical removal) will be conducted.
- **Herbicide Application:** Herbicides such as glyphosate and triclopyr (or other recommended by a licensed Pest Control Advisor) will be used in larger, more widespread infestations. These herbicides are selected for their effectiveness in controlling the targeted weed species while adhering to environmental safety standards.

Challenges and Solutions:

One potential challenge is the accessibility of certain remote areas, which may complicate both control and monitoring efforts. To address this, we plan to employ a combination of aerial surveys and remote sensing technologies to monitor large or difficult-to-reach sites. Additionally, ensuring effective public outreach and engagement in remote areas may be difficult, so we will leverage local community groups and volunteer networks to assist with reporting and early detection.

III. Reporting

Grant recipients will be required to submit a mid-year report to CDFA documenting a visual representation of the project's progress on October 15, 2025, October 15, 2026, and October 15, 2027.

Final project reports are required 30 days after project completion, no later than January 30, 2028. Final project reports should include detailed information on project results and include photos of field work showing progress (before/after photos).
