BACKGROUND:

Summary

The California Department of Parks and Recreation (CDPR) provides grant funding to local law enforcement agencies for boating enforcement activities, equipment purchases, and training, all aimed at protecting the public's right to safe and enjoyable boating on California's waterways. Through the Boating Safety and Enforcement Equipment Grant Program (BSEE), CDPR awards funding to local government agencies that demonstrate a need for boating safety and law enforcement equipment. The program is funded by the Sport Fish Restoration and Boating Trust Fund.

Previously, on May 24, 2022, the Riverside County Board of Supervisors approved grant funding from BSEE for the Riverside County Sheriff's Office (RSO) to purchase dive helmets in the amount of \$50,642 (Minute Order 3.23).

The Colorado River Station Marine Enforcement Unit (CRS MEU) conducts boating safety and enforcement operations along approximately 80 miles of federal managed waterways on the Colorado River, spanning from the San Bernardino County line in the north to the Imperial County line in the south. The CRS MEU's mission is to ensure a safe environment for all boaters by addressing hazards such as boating under the influence, reckless operation, underage operators and drowning incidents, as well as incident response and search and rescue services.

On April 30, 2025, RSO submitted a grant application to BSEE for FY2025-26 funding to purchase equipment to enhance the operational capabilities of the CRS MEU. On September 23, 2025, RSO was awarded \$68,927 to fund two equipment purchases:

- \$53,348.64 for two Personal Watercrafts (PWC), and a trailer: The PWCs will enhance law enforcement and search and rescue operations by allowing deputies to navigate fluctuating river water levels effectively, and access backwater areas unreachable by traditional patrol boats. This will improve response times during high-traffic holiday weekends, helping to save both lives and property.
- \$15,578.00 for an aerial drone: The drone is essential for enhancing patrol operations, providing rapid coverage of large areas and delivering aerial perspectives beyond the reach of the CRS MEU. For boating safety, it will increase the likelihood of successful

STATE OF CALIFORNIA**

rescues and effective monitoring by allowing rapid deployment from patrol boats. Additionally, it will be used for missing persons, drownings and boat recoveries, improving the chances of an incident being a rescue instead of a recovery.

These two equipment purchases will strengthen the CRS MEU's ability to fulfill its core mission of ensuring public safety and effective law enforcement on the water.

Impact on Residents and Businesses

These funds have no adverse effect on citizens or businesses. The equipment will enhance law enforcement operations on the Colorado River and improve search and rescue capabilities providing safe, professional, and efficient services to the residents and visitors of Riverside County.

Additional Fiscal Information

The Sheriff's Office received notification of project approval in FY2025-26 and is requesting a budget adjustment now as it could not anticipate the additional revenue or expenditures in the FY 2025/26 budget request. It is expected all funds will be expended in FY2025-26.

7. Three RECREATIONAL BOATING safety issues

This is a Federal Pass-Through 'Recreational Boating Safety Grant'. The purpose of the grant is to promote boating safety and to decrease the number of accidents, injuries, and fatalities on U.S. waters. Clearly identify three BOATING safety issues that affect recreational boaters in your jurisdiction. Your answer to this question will be referenced throughout this grant application.

The Colorado River Station Marine Enforcement Unit conducts boating safety and enforcement operation on approximately 80 miles of federal waterway, on the Colorado River. Our jurisdiction covers from the San Bernardino County line to the north, to The Imperial County line to the south. The main mission of the MEU is creating a safe environment for boaters through education and enforcement. Typical safety issues consist of boating under the influence, reckless boating, unregistered vessels, underage operators, sunken/submerged vessels, missing persons, drownings, and vessel collisions. Last year, 2024, the MEU wrote over 125 citations, handled 4 vessel collisions, and several sunken vessel incidents.

I am requesting grant funding to purchase vessels and equipment that will aid in enforcement and search and rescue operations here on the Colorado River. Historically our area of the Colorado River has unreliable water levels that prevent enforcement/search and rescue vessels from deploying on the water. In these situations, having Personal Watercraft (PWC's) like Sea-Doo's, would provide us the ability to put enforcement and/or search and rescue vessels on the river regardless of the water levels. These PWC's can operate in very shallow water and can reach backwater areas that aren't accessible to boats. These PWC's can also support enforcement vessels during heavily populated holiday weekends with enforcement actions and can get to critical incidents quickly. The CRS MEU has had several incidents where vessels failed to yield and were able to evade our patrol boats. PWC's would even the playing field for us and would allow us to potentially apprehend boaters operating under the influence. In the case of missing persons, a quick response may be the difference between a missing person being a rescue instead of a recovery. The following is a list of reasons why PWC are preferable to boats in some situations:

1. Their small size not only allows for quick transport to remote locations, but they can also be towed with any vehicle equipped with a tow hitch (no need to purchase expensive SUVs or limited purpose 4-wheel drive trucks).
2. PWCs can often be launched at even the smallest of ramps or even at a gently sloped natural shoreline.
3. Their higher speeds (some capable of speeds more than 55 mph) make them ideal for quick initial response to boating accidents, search and rescue missions, or deputy response to island-based (sand bars) day camping areas.
4. Stations with limited manpower can take advantage of the fact that PWCs only require one officer for effective operation (patrol vessels require both an

- operator and a deck hand).
5. PWCs are generally easier to operate thus allowing for their use by less experienced officers.
 6. Shallow draft allows for access to areas otherwise unable to be patrolled.
 7. No exposed propeller means that there is a reduced chance of injury when operating in crowded areas or when rescuing persons from the water.
 8. While many of today' s models can cost as much as \$20,000 this is often a fraction of the cost of purchasing and equipping a full-size law enforcement patrol vessel.
 9. Reduced fuel consumption and generally lower maintenance cost often result in additional cost savings.

If funding is received for these PWC's retired Captain Andre Ramos (CA State Parks) has agreed to conduct the PWC for Law Enforcement training course here on the Colorado River.

Underwater submersibles are becoming the industry standard for search and rescue operations in marine environments. These underwater, remote operated submersibles can launch quickly and conduct underwater searches for sunken vessels, and missing persons. Due to our location on the extreme east end of the county, a dive team response is usually several hours. Again, a quick response and search could be the difference between an incident being a rescue instead of a recovery.

Aerial drones have proven themselves to be extremely valuable for regular patrol operations like lost hikers, and missing persons. An aerial drone, specifically assigned for boating safety, missing persons, and drownings, would be invaluable to our MEU, and have no effect on patrol operations equipment. Aerial drones can cover a large area in a short time and can see things from their vantage point that can be missed by MEU personal operating a vessel. A drone with thermal imaging will be even more effective in these types of operations. Having the ability to immediately deploy a drone from a patrol vessel could, once again, be the difference between an incident being a rescue or a recovery.

The purchase of two Personal Watercraft (PWC's), a submersible drone, and an aerial drone, would greatly improve the MEU's ability to accomplish the overall mission of the unit.

Patrol Boat Questions (Sea-Doo and Trailer)

- 10 a. Describe exactly what is being requested and how this equipment will help mitigate the recreational boating safety issues identified in Question 7.**

Sea-Doo RXT-X 325 x2/Zieman single axle trailer x2: \$51,348 (for both trailers and PWC's)

Watercraft (PWC's) like Sea-Doo' s, would provide us the ability to put enforcement and/or search and rescue vessels on the river regardless of the water levels. These PWC's can operate in very shallow water and can reach backwater areas that aren't accessible to boats. These PWC' s can also support enforcement vessels during heavily populated holiday weekends with enforcement actions and can get to critical incidents quickly. The CRS MEU has had several incidents where vessels failed to yield and were able to evade our patrol boats. PWC' s would even the playing field for us and would allow us to potentially apprehend boaters operating under the influence. In the case of miss in g persons, a quick response may be the difference between a missing person being a rescue instead of a recovery.

- 10 b. Describe any negative impacts to boating safety and/or boating enforcement if your agency does not get this grant.**

The area that the Colorado River Station Marine Enforcement Unit (MEU) operates in has fluctuating water levels and backwater areas that are not accessible by boat. PWCs have the ability to operate in shallow water, and can launch from natural riverbanks when standard launching facilities are not usable. The MEU has had incidents in the past where water levels were not sufficient to launch patrol boats and search and rescue operations were halted. Additionally, the MEU has had incidents were boaters have failed to yield to law enforcement vessels and fled. PWCs have the advantage of being much faster than patrol vessels and would even the playing field with the high performance civilian boats and PWCs commonly in use on the Colorado River.

- 10 c. Classify this request by choosing one of the following options and present a strong justification for the request.**

Classify this request by choosing one of the following options.

- "Critical" (operations would cease without it)
- "Increased efficiency" (it would save staff time, identify how much time)
- "Convenience" (it would make life a little easier)
- "Protection" of existing equipment (ex: shade tents, hoists to get the vessels out of the water, etc. to extend longevity)

Exhibit G - BOATING SAFETY AND ENFORCEMENT EQUIPMENT GRANTEE APPLICATION

Justify your classification of this request. (max. 300 characters)

PWCs are critical to the MEU's operations on the Colorado River. The civilian boats and PWCs that operate on the river are commonly high performance and can easily outrun patrol vessels attempting enforcement activities. This is especially true with boaters that are operating under the influence of drugs or alcohol. PWCs have the ability to operate in shallow water levels and backwater areas for search and rescue purposes and can potentially save lives when a patrol vessel can not.

- 10 d. If you are not awarded your full request, would your agency be able to supplement Yes No the difference?

If yes, what percentage can you supplement?

10 e. How and why did your agency select this particular vessel? Explain if this is a standard patrol boat or do you need something specialized for your waterbody to meet your agency's needs? List less expensive models considered and explain why they are not being requested. List other funding sources available to your agency that could be used to purchase or partially purchase this equipment.

The Colorado River Station MEU is requesting the Sea-Doo RXT-X model due to its high performance nature, its fuel capacity, and its ability to handle weight. The MEU commonly encounters high performance civilian boats and personal water craft (PWC) on the Colorado River. These boats are much faster than the MEU's patrol boats and can evade our patrol vessels easily. This is a serious concern during busy holiday weekends, especially those boaters who are operating under the influence of drugs and/or alcohol. The Sea-Doo RTX-X is one of the fastest PWCs produced and will provide MEU members the ability to capture and arrest evaders. This model also has a large fuel capacity (16- 18.5 gallons) which is crucial to a law enforcement PWC. Less time refueling means more time conducting enforcement and being a visual deterrent. The RTX-X can handle up to 600 lbs of weight and can accommodate 3 people. This ability is perfect for a deputy and all of their gear, and provides the ability to bring people on board in an emergency like a vessel collision or a search and rescue operation. The less expensive Sea-Doo GTR and GTR-X were considered, but paled in comparison to what the RXT-X delivers reference performance, range, and capacity. The GTR starts at \$14, 299 and the GTR-X starts at \$17,299 (a \$6,000 and \$3,000 difference). There are no other funding sources available to my agency that could be used to purchase this item. There are no other funding sources available to my agency that could be used to purchase this item.

DBW may fund up to 50% of the total cost of fire suppression equipment.

NOTE: Supplies and consumables (i.e: rope, water bottles, cleaning supplies, hardware) are not funding priorities.

Misc. Equipment Items Questions (SARbot Lite Submersible)

11. Item Details

- 11 a. Is this equipment general all-purpose gear? NOTE: person-specific Yes No and fitted items will not be funded.
- 11 b. Describe exactly what is being requested and how this equipment will help mitigate the recreational boating safety issues you identified in Question 7. If the requested quantity is more than one for any item, explain the need for multiple items. (max. 2000 characters)

The Colorado River Station MEU unit is located on the far east end of Riverside County. When there is a critical incident such as a missing person, boat collision, or drowning, the department dive team has to be requested. The dive team is centralized within the county and it's response time is usually 4-5 hours. Having a SARbot would mitigate the lag time waiting for divers to respond, and a search for missing/unaccounted people could begin immediately. The ability to immediately launch a

submersible could mean a rescue instead of a recovery. Submersible drones are becoming the industry standard and are utilized by several surrounding agencies.

11 c. Describe any negative impacts to boating safety and/or boating enforcement if your agency does not receive its requested grant award.

The Colorado River Station MEU coverage area is located on the far east end of Riverside County. As such, the response time for our department dive team is usually 4-5 hours from the time they are requested. The search capabilities of MEU members is limited to visual searches on vessels during this response time. This lag time, from when an incident is reported to when divers are actually in the water, almost always means the operation will be a body recovery instead of a rescue. A submersible would greatly increase our search capabilities and increase our chances of saving a life instead of recovering a body.

11 d. Classify this request

Classify this request by choosing one of the following options and present a strong justification for the request

- "Critical" (operations would cease without it)
- "Increased efficiency" (if it would save staff time, identify how much time)
[4-5 hours due to dive team response time.]
- "Convenience" (it would make life a little easier)
- "Protection" of existing equipment (ex: shade tents, hoists to get the vessels out of the water, etc. to extend longevity)

Justify your classification of this request. (max. 300 characters)

Colorado River Station MEU members do not currently have the capability to conduct underwater searches and have to request the department dive team. The response time of the dive team is 4-5 hours. This lag time means our incidents will usually end up being body recoveries and not rescues.

- 11 e. If you are not awarded your full request, would your agency be able to supplement the difference? Yes No

If yes, what percentage can you supplement?

11 f. What other capabilities exist in your region for this equipment? Justify why it is not feasible to borrow this equipment from a neighboring agency.

This is a specialized item that requires training and experience to operate. Surrounding agencies, like San Bernardino County Sheriff have SARbots, but once again response time is an issue. San Bernardino County's response time would be 1.5 - 2.5 hours. Essentially, it would be like waiting for our department dive team. The lag time would likely result in incidents being recoveries and not rescues. The training issue, the value of technology equipment, and the response time makes borrowing this equipment not feasible.

11 g. How and why was this particular model selected? Explain if this is standard equipment or do you need something specialized for your waterbody to meet your agency's needs? List less expensive models considered and explain why they are not being requested. List other funding sources available to your agency that could be used to purchase or partially purchase this equipment.

The Colorado River MEU selected this particular submersible based upon research, consulting with other agencies (San Bernardino County and El Dorado County) that operate submersibles, and talking to vendors at boating conventions. This is a standard submersible, and the companies least expensive model/package. To my knowledge, there are no other funding sources available to my agency that could be used to purchase this item.

Misc. Equipment Items Questions (Drone)

11. Item Details

11 a. Is this equipment general all-purpose gear? NOTE: person-specific Yes No and fitted items will not be funded.

11 b. Describe exactly what is being requested and how this equipment will help mitigate the recreational boating safety issues you identified in Question 7. If the requested quantity is more than one for any item, explain the need for multiple items. (max. 2000 characters)

Aerial drones have prove themselves to be extremely valuable for regular patrol operations such as lost hikers and missing persons. An aerial drone, specifically assigned for boating safety, missing persons, and drownings, would be invaluable to our MEU, and have no effect on patrol operations equipment. Aerial drones can cover a large area very quickly and can identify things form the air that can be missed by MEU personnel operating a vessel. A drone with thermal imaging would be even more effective in these types of operations. Having the ability to immediately deploy a drone from a patrol vessel could be the difference between an incident being a rescue or a recovery.

11 c. Describe any negative impacts to boating safety and/or boating enforcement if your agency does not receive its requested grant award.

The Colorado River Station MEU covers approximately 80 miles of water along the Colorado River. The unit commonly deals with vessel collisions, missing persons, and broken down/sunken vessels. Having an aerial drone dedicated to the MEU would greatly increase the unit's effectiveness/efficiency. Aerial drones can cover large areas quickly and have a unique vantage point/perspective when attempting to locate submerged bodies and/or vessels. Not having an aerial drone dedicated to the unit will hinder our ability to effectively rescue people in a timely manner, increasing the likelihood of fatal incidents.

11 d. Classify this request

Classify this request by choosing one of the following options and present a strong justification for the request

- "Critical" (operations would cease without it)

- "Increased efficiency" (if it would save staff time, identify how much time)
[1 - 2 hours due to response time for aviation units.]
- "Convenience" (it would make life a little easier)
- "Protection" of existing equipment (ex: shade tents, hoists to get the vessels out of the water, etc. to extend longevity)

Justify your classification of this request. (max. 300 characters)

The Colorado River Station MEU must request department aviation units to conduct aerial searches during critical incidents. The flight time is commonly 1-2 hours if aviation is available. An aerial drone greatly increasing our chances of locating someone missing or unaccounted for in the water.

Percentage of time on the water this equipment will be used for:

Activity	Percentage
Boating Safety Activities	
Search and Rescue Activities	50
Other Activities	50
TOTAL	100.00

List any other activities this equipment will be used for: (max 300 characters)

- 11 e. If you are not awarded your full request, would your agency be able to supplement the difference? Yes No

If yes, what percentage can you supplement?

11 f. What other capabilities exist in your region for this equipment? Justify why it is not feasible to borrow this equipment from a neighboring agency.

To my knowledge, no other capabilities exist in our region for this equipment. Other agencies own aerial drones, but these are not lent out. Each department must maintain the ability to launch their drones in a timely manner during a critical incident in their jurisdiction. Having the drones on hand to immediately deploy in a critical incident is the purpose for possessing them. Lending them to another agency defeats that purpose.

11 g. How and why was this particular model selected? Explain if this is standard equipment or do you need something specialized for your waterbody to meet your agency's needs? List less expensive models considered and explain why they are not being requested. List other funding sources available to your agency that could be used to purchase or partially purchase this equipment.

This drone was selected due to its moderate price and capabilities. The Riverside County Sheriff's Office had used DJI drones in the past but is no longer purchasing drones from that company. This is the lowest priced commercial model offered by Skydio. To my knowledge, there are no other funding sources available to my agency that could be used to purchase this item.
